Cultivating the Potato.

The following article from that noted potato grow er of Buffalo, N. S. Smith, esq., is worthy of the attention of every farmer who desires to produce the best potatoes and preserve them from the rot. Mr. Smith eavs:-

My own experiments of eight years, with the postate, have very much incomraged me to continue the alternate culture of seed and its see llings, with careful selections.

The process does materially improve the potato in new and excellent virueties-in health and productiveness. At the same time, much depends for success upon a proper situation and preparation of soil, manner of cu tivation, time of planting, lifting and good storage.

Good upland soil, deep, thorough plowing, early planting-with well cultivated approved seeding varieties, in shallow drills, early weeding, light billing, early lifting, and dry airy storage, does more for the redemption of the potato from disea ses, than all the nostrums the world can devise.

Potato seed, though it produces generally several different varieties in its seedlings, will not be like ly to produce varieties or qualities, with which i has no connection. It new and choice varieties be expected from sowing the seed, care should be taken to obtain seed from good varieties, or in the immediate neighborhood of the same.

Seed from the balls will transmit from a diseased stock, in some degree, that disease to its seedling--to some varieties more than others.

Some have gathered balls from any where, with out regard to the character of the stock, planted the use it discharged 63 of the largest worms he had ever seed, and finding in the stedlings disease and in seed, and finding in the seedlings disease and in ferior specimens, abandoned at once the experi ment, and, in their judgment, seedling potatoes are no better than old ones.

The same laws that govern the apple, peach and strawberry, in their culture for new and choice varieties, govern also the potato. If a new choice seed ling apple, pear or strawberry be desirable, why not a new and excellent potato? But neither is to be obtained without the use of their seed, and may be not without a series of experiments, with careful selections.

Potatoe seed, from properly selected, will cu't valed seedlings, combining through the seed the best varieties at home and from abroad, is among the most valuable seeds to be found in market.

Potato seed may be sown like the tomato, early in hot-bed, for an early crop; or like cabbage, in a rich bed in a warm place and transplanted; or, with a seed planter in the fields, with great profit or broad cast on each fine soil, and lightly harrowed Dr. SWAYNE, N. W. corner in, with no other cultivation, and the crop of young seedlings, the very best, for planting the next sea

Early sowing the seed; and early lifting, gives the potato a tendency to early ripening. Lifting the potato before it has perfected its growth, it is found drier in cooking, will keep better through J. Daniels, Burlington. M. Bullock & Co., East the winter, vegetate earlier in the spring, and be. S. W. & D. F. Pomerey, come more hardy in its constitution.

· Medium sixed potatoes cook better, are of finer quality and flavor, will plant more ground by the bushel, and are more exempt from disease.

My crop of the last season, combining all my best varieties through the med from home and abroad, is good-exempt from the prevalent di ease, productive, and developing, from the seeds obtained not long rince from different parts of the world, viz: Prussia, England, South America, Mackinaw, and other places, varieties promising a valuable acquisition to the gotato market. The erop, of about 1,400 bushels, shows distinctly in its healthy and strong foliage, loaded with balls, its strongly marked and distinct varietes, and the increase of new varieties of fine appearance, the benefits of the progressive alternate culture.

LIME FOR APPLE TREES .- No fact has been more frequently and satisfactorily demonstrated of late. than that old lime that has been used in plaster, is one of the most energetic and salutary applications for apple trees, that can be mamed. Trees that for years have been nearly or quite barren and so overrun with moss and other parasitial plants, as to induce the belief that no efforts for their regeneration could possibly be successful, have, by being manured coionsly with this article, been made to yield prolifically, and to resume ina few years the appearance and almost the energy of youth.

This fact is worth the serious consideration of the farming community. There are but few homesteads around which there may not be sound trees, once healthy and valuable, that present the symptoms of approaching if not present barreness, and which, consequently, demanded the immediate application to obviate the ordinary effects of old age. By removing the surface soil, to the depth of three or four niches around the trunk, and form a circle the radius of which shall be equal to three feet, and spreading on time-say from one to two bushels, an immediate effect will be produced for the better, and the whole system return rapidly to health-Pennsylvania Telegraph.

COLLAPSE OF THE LUNGS .- Some young children when they cry, are apt to suffer a collapse of the lungs, or in the language of their parents, "hold their breath." This occasions great alarm to parents and is a real evil, for it is sometimes with difficul-- tv that the breath can be recovered. The follow ing is an easy remedy: "Close the nostrils of the child with the thumb and finger, then put your month to the child's mouth and blow smartly; the lungs will be inflated, and the woste will re-commence in a moment.

because One Bettle of it has safer medical, carative gratter we fi, and, in consequence, cures mean disease in much less sine, them one bettle of any other medicine.

If then, ONE Bottle of BRARY'S PURIFIER will cure FOUR TIMES more disease than each south of severparitie, "BRARY'S PURIFIER" would be as chosp at fear dollars a buttle, as sarrage ritle at one dollar. But BRARY'S PURIFIER is cold for only ONE DOLLAR a bottle; and as a bottle of it has chred, and is aspable of curing. Four Times as much disease as each bottle of asresperitle, therefore sarraparilla, in consequence of its less power and dess medical efficacy, should be sold at me more than 'Thesity-Fire Cents wer bottle, the has should at the more than Due Dollar.

Mr. J. B. Harrin, of Rome, Oncida Co., N. Y., had Scrofuls four years—was confined to his bed the Lest pear—he was so much diseased and debilitated as to be unable to raise his hand to his head. He had the best medical advice—had used all of the best surasportillas to no good effect—got survemed sours, and was considered to be in a Dying State, and could not live tentry jour hours longer, when he commenced using BRANTS PURIFIES. His seek was extens through his seinspips, under his chin, so that he breathout he rough the hole—his zer was so enten around that it could be lifted up out of its place, it only holding by a small piece—the use of one arm was destroyed by two Ulcers—an Eller under the arm, so large as a righa's hand, had nearly esten through his side into his body. Thus, he was afflicted with meany such partid, acrid, offerster Ulcare, ch various parts of his nersum. For further and full particulars, see our Pamphles.

Doct. Thousas Williams, one of the most shilful physicians of fitnes, was called to see Haskin the day before he commenced using Brant's Pawifer. Doct. W. examined him, and then told him that all the medicines in the sort double wet care him—that his case was

Worse than Hopeless!

Now hear Mr. HASKIN'S statement of cure. He said: Ny wife procured one bottle of BRANT'S PURIFYING EXTRACT
—THAT BOTTLE enabled me to get off my bed—the second bedtle enabled me to get out of the house—the Thian enabled me to seek it no miles, and when I had finished using Nine Buttle sex

t is Fever and Ague. For destroying and expelling Worms, no Vermifuge to these Pills. Although we have not taken pains to make this fact public, the merit of the medicine itself has acquired for it an extensive reputation and cale for the removal of Worms. Administered to adults or children, the effect of the Pills is equally radical and decisive. All who suffer from Worms should, by all means, use Wright's Indian Vegetable Pills.

In fact, no one can go amise in the use of this medi cine. They are natural to the body as food is. A triawill convince the skeptical that Wright's Indian Vegetable P.lls, far from being a "quack nostrum," are decidedly the most valuable medicine ever offered to

public that has met with such unparalleled success, as Da. Soule's Oriental Sovereign Balm Pills Having been but six years before the public, and the advertising small, compared with most other medicines, vet they have worked their way into every state in the Union and Canadas. They have absolutely become the Standard Medicine of the day. They are purely vegetable and so admirably compounded that when taken in large doses they speedily cure the most delicate, nervous female, and have raised numbers from their eds after all other remedies had failed.

BEWARE OF COUNTERFEITS. As there are courious Pills in circulation called Oriental or Sovereign Balm, be sure to see before you buy that the name of " Dr. E. L. Soule & Co." is on the face of the boxes. None others can be genuine. We are not aware that any one who is making a spurious article has yet dared to make use of our name; but some of them have had the impudence to imitate our oxes and copy our Circulars, Certificates, &c.
