SERIOUS ACCIDENT .- On Frillay last, a Mr. Pal met, while endeavoring to cross the track of the Lavora and Susquehanna Railroad, with a horse and beggy, about five miles from this place, and while the train was in sight, came in contact with he incomptive, his horse killed, buggy broken and and himsell badly injured. If we have heard this matter correctly. Mr. Palmer is the only one to matter correctly. Date, realiser is the bully one to hame. The bell was rung on coming within the reptified distance of the crossing, and continued maging until the train struck the buggy. If per-sons will be fool enough to try their speed with a locomolive they must suffer the consequences. In his affair we cannot see how any blame can attact to the engineer or conductor of the train.-Owego

SERIOUS ACCIDENT .- Stephen Capwell, Esq., one of our worthy County Commissiones, met with a serere accident a few days ago, which came near causing his death at the time. He was engaged in ofing logs on the log way at a saw mill, and when in the act of turning a log, he slipped and fell over the log, which rolled down upon htm, bresking several of his ribs, injuring his breast bone and producing much internal minry. On account of the inhuman and executible conduct of a cortain bottor who lived near by, in refusing to go and used him. it was with the greatest difficulty any blood could be started when another physician was procured, and his recovery was considered extremely loubiful. We are are happy however to learn that the prospect of his recovery is now very avorable, but it is likely he will be maimed for the remainder of his life .- Wyoming Democrat.

THE WHEAT CROP OF OHIO .- A friend recently from Columbus says that the wheat crop in Ohio nevet looked better than how. It is free from all langer save that of rust, and we trust a good crop will reward the labors of Buckeye husbandmen. Cleveland Herald.

Tur TABIET .- It is a fact, worthy of attention, fat not a single person engaged in the iron basi-ness in Perirsylvania, can fail, or become embarnued, without the direct intervention of the revence taniff. When similar events occur in the other departments of trade, we mostly look for their es in deficient capital, mismanagement or want d business capacity, and can always trace them to sources purely of a personal character, and entirewithin the control of competent persons. Not bowever, with the manufacturers of iron.---They may manage their business, no matter how carelessly, or they may embark in it with capital borowed or fictitious, and the confidence of the people will not admit of any other deduction from their failures, than the waint of sufficient protection mi the severe operation of a revenue fariff! Is mithis an incontrovertible fact?
