In a sobbing roice, the answered, to "no, no, father let us go home my heart needs relief.21

New Years day came with its pleasant festivities. The sp'endid mansion of Mr. Lee, thrown open to all his friends, presented a source of social enjoyment, at once bewildering and beautiful. A happy new year was the music of each lip; is thrilled the chords of every heart, and sparkled in every eye. Happiest among the happy was the young daughter. She seemed indeed to have quaffed at the fountain, yea and to have bathed in its pure waters. Never had her laugh rung out with merrier music; never had glance beamed with such angel beauty; never had her voice been so delicately sweet in tone, or her hand so cordial in its grasp. There was a heaven in her young soul, and all she did or said was tinged with light from the holy fire within.

When, (and it was of en the in the course of the day.) the conversation turned upon the gifts of the known here, and of long standing t he attributes his huliday, Mrs. Lee exhibited a pair of superbeilver cure entirely to your Compound Syrup of Wild pitchers; Harry expatiated on the merits of a jet black poney; George bore his friends in triumph to the gilded cage of a mocking bird; while Ellen showed only a small basket, woven with exquisite skill from the evergreens of the woodlands, lined the softest imoss, into the handle of which was wrought, with the white plossoms of the everlesting the single word-charity.

But you would not have me infer that this, beautiful as it is," said an intimate hiend as he viewed the rustic gilt, "is all you received for the New Year?"

"Oh no," replied Ellen with a sweet smile; "I had a large roll of bank bills from father, but having no use for them at present, I put them at inter-

"At interest! where, pray, and at what rate," said her questioner in an incredulous tone.

"That is my secret, sir; but rest assured it was in a bank that will never fail, and which pays interest in advance "

Her secret-would you learn it? In a pleasant upper room in one of the most comfortable tenements of a wide, airy street on the skirts of the town, a happy family will reveal it. They will show you their neat warm sitting room, with its new rag carpet and white curtains, caught up just enough to leave space for the sunbeams to guiver amidst tots of green geraniums and monthly roses. They will show you, father's large easy chair, and mother's cushioned rocker; a neat workstand; and dining table with snowy cloth; low seats for the little one; a lounge for the weary, and neat chairs for friends; a cooking store of the approved pattern: a time-piece and a pair of lamps, burnished to almost silver brightness. They will take you into neat bedrooms comfortably fitted up; into a pantry where new-dishes and bright tins are neatly arranged; show you a closet, where a harrel of flour, and boxes, and bags of provisions are stored, and a coal bin where the black Lehigh glistens. Yes a blind man, a pale woman, a gentle group of joyous children, with streaming eyes and tremulous lips, will tell you Eilen's secret. They pray for her in the morning; they bless her at night; they think of her ever. She came to them like an angel with healing in its wings, a sweet minister of charity.

Thus custom does make asses of us all: And thus the healthful face of many a man Is sicklied over with a deathlike hue: And chewers of this perniciour plant, tobacco. To "twist" and "pig tail" turn from sense away, And lose the name of gentlemen.

GUANO.-Does guano afford a permanent improvement to the soil, or does it act on the first erop, and then leave the land as poor, or poorer than it was before. This is a question so often asked. We will once more answer, that this is as all other stimulants, whether applied to man or the soil, unless furnished with some other food, the effect will not be permanent. But give land a small coat of marl, manure, or green crops, for the guano to work upon, and then it will be found that the effect will be not only beneficial to the first crop, but several succeeding ones. None but the genuine Pernyian guano can be depended upon. "Manufactured guano." in many cases, is nearly worthless.

No preparations now before the Public can so factured gnano," in many cases, is nearly worthless. The Maryland farmers, the past year, have tried various experiments in planting potatoes with guano and find that when it is put on top of the hill or drill, and slightly covered with earth, the yield is much greater than when placed at the bottom of the hill.

No Change -A sailor was lately at a certain chapel in Boston; the parson observing that he looked rather serious, asked him if he felt any change? The sailor put his hand in his pocket, and said he was very sorry, but he had not one cent.

DR. TOWNSEND'S SARSAPARILLA. BR. TOWNERN D'S SARES PABLLLA.

There probably has never been so popular a remedue as present mediciaed as Dr. Town-and's Sarsaparilla, wine we cert mediciaed as Dr. Town-and's Sarsaparilla, wine we originally, and continues to be manufactured in the ory, a first by the Doctor himself, and afterwards for swind year, and to the present time by Clapp. & Town-and, the Doctor himself, and afterwards for swind year, and to the present time by Clapp. & Town-and, the Doctor has resided. In New York, where he keeps a store, and annote to the business that accumulates at that point. The mustice story is in this city, and is conducted by the junior-parter. It Clapp—here all the medicine to manufactured.

Few of our citizens have any bless of the amount of the medicine that is manufactured as a sold. Besides the sign in this country, it is shipped to the Canadaa, West Intialiands. South America, and even its Europe, in consistent quantities. At the manufacturey they exploy a steam quantities. At the manufactory they exploy a steam quantities. At the manufacturey they exploy a steam quantities. At the manufacture they exploy a steam quantities. This is an excertional quantities are called by the country of ments of get up imitations and there is at the present time, on they work is eather under the total country of the probability of the mostificial at a tree called by Towners of New York, is called a "Und Dr.Jacch Towners" Saraparilla.
