

Barberruinal.
Whoever has observed, with attention, the growth of fruit trees in this country, will frequently have seen with surprise the peach and plum trees, green with disease, and dying early, while other fruit trees appear in a sound condition, and live to a great age. The cherry tree, also, seems to be healthy in this country than in Europe.

This fact justifies the supposition, that these trees contain in themselves properties not to be found in such as remain healthy, and it is known that they differ from all others in the abundance of a substance called gum. Let us now inquire whether we can trace any connection between the existence of this substance and the predisposition to disease?

In the healthy tree, gum is found mixed with the sap in a dissolved state; when the tree is in a diseased condition, gum is secreted, and driven to the surface as a transparent, adhesive substance. In its normal state (dissolved in the sap) it exists only in the bark; that is to say in those vessels through which the sap, elaborated by the leaves descends to form a new growth of wood. Gum is soluble in water, and its greater or less degree of fluidity will depend on the quantity of water employed in its solution. By the simple process of evaporation it can be reproduced in concrete form; and is, therefore, in a high degree qualified to pass through the various stages of fluidity, under the reciprocal actions of heat and moisture. The health of a tree depends on the free circulation of the sap; and if this circulation be at all impeded, the tree becomes diseased and, if not relieved, death ensues.

May it not, therefore, be believed that the diseases of peach, plum and cherry arise from impeded circulation, since they are, in this country invariably accompanied by bursting or rupture of the bark?—And it may not be inferred, that this impeded circulation is caused by gum, when we remember the qualities of this substance, and how it may be acted upon by the excessive heats of the American summer? The influence of the sunbeams, when the air is clear, is very powerful, and must necessarily cause an evaporation more or less rapid in proportion as the heat is increased or diminished. In those parts of the tree which are exposed to the sun, the juices are drawn forth, and the gum, becoming less fluid, moves more slowly, and gradually accumulates in, and obstructs the natural passages; while in other parts, the trees being subjected to more genial heat, a more active circulation is maintained. The consequences of which is an expansion, and at last a bursting of the vessels through which the sap flows, at those points where the obstructions exist; and thus ensues warts, or knobs, or an effusion of sap, and eruptions of gum.

Though this is only theory, and needs to be verified by actual experiment and chemical research, yet it derives support from the practice of many gardeners. It has been stated on sufficient authority that salt applied to the soil about a plum tree, will prevent the black wart. If our argument be correct, the result of the action of salt is obvious enough; the tree receives in its system a solution of salt, which, by its nature, attracts moisture, (or gives greater fluidity to the sap, and communicates it to the gum—thus preventing the concretion that would check circulation. The cause of the disease (excessive heat) is not removed by the application of salt; but it acts as an indirect remedy; it alters the secretion of the tree, so that the same cause does not produce the same effect.

We are aware, that plants brought into a condition contrary to their nature, lose to some extent, their vital powers; and that, in consequence, a formation of slime sugar (saccharum mucosum) takes place. It always follows a great decrease of phlegm (principium mucosum), which last substance abundantly exists in peach, plum and cherry trees. In the capacity of the plant to produce slime sugar at the approach, or, rather, in a certain stage of disease, we see how nature provides the means of accomplishing her ends, since the reduction of the plant to dust (its last destination, on the usual order of things,) is brought about by decay, and the first step towards decay is fermentation. Nature, then, has recourse to that powerful principle of fermentation—slime-sugar—to begin fermentation, and that the taste and odor of this substance will summon to its aid those additional agents of destruction—insects. When therefore, we perceive, on diseased fruit trees, swarms of insects, let us not confound the effect with the cause, but rather attribute their presence to the disease, than to the disease to their presence.

J. H. EBLE, Landscape Gardener.
Barrytown, N. Y., Oct. 1849.

PHILOSOPHY OF FARMING.—Here is the secret of good farming. You cannot take from the land more than you restore to it in some shape or other without ruining it and so destroy your capital.

Different soils may require different modes of treatment and cropping; but in every variety of soil there are golden rules to attend to. Drain until you find that the water that falls from the heavens does not stagnate in the soil, but runs through it and off freely. Turn up and till the land until your foot sinks into a loose, powdery loam, that the sun and air readily pass through.

Let no weeds occupy a place where a useful plant could grow. Collect every particle of manure that you can, whether liquid or solid. Let nothing on the farm go to waste. Put in your crops in that course which experience has shown to lead to success in their growth, and to an enrichment, not an impoverishment, of the land. Give every plant room to spread its roots in the soil and its leaves in the air.

VALUABLE TABLE.—The following table will assist the agriculturist in calculating the number of plants or trees which may be planted in a given piece of ground at any distance apart. It may also assist him in the distribution of manure, division of beds, &c. An acre of ground contains 63,500 square feet. An acre will contain, at these distances apart:

Feet apart.	Plants.	Feet apart.	Plant.
1	43,560	12	302
2	10,890	15	103
3	5,930	20	108
4	4,810	25	98
5	3,722	30	74
6	2,742	35	63
7	2,110	40	53
8	1,697	45	48
9	1,355	50	43

May care resemble each other when sophisticated by profit or fashionable life; whatever it contains is of no value.

Dr. SWAYNE'S Celebrated Family Medicine!
MORE PROOF OF THE EFFICACY OF SWAYNE'S Compound Syrup of Wild Cherry!
THE ORIGINAL AND GENUINE PREPARATION FOR THE CONSUMPTION OF COUGHS, COLDS, ASTHMA, BRONCHITIS, LIVER COMPLAINT, SPITTING BLOOD, DIFFICULTY OF BREATHING, PAIN IN THE THROAT AND LUNGS, INFLAMMATION OF THE THROAT, INFLAMMATION OF THE LUNGS, BRONCHITIS, AND ALL DISEASES OF THE THROAT AND LUNGS; the most efficient and speedy cure known for the above diseases.

Dr. SWAYNE'S Compound Syrup of Wild Cherry.
RELIABLE TESTIMONY.
Jno. Milton Earle, editor of the Worcester Spy, Mass., was attacked with a severe inflammation of the lungs, accompanied with a distressing cough after using various other remedies, with little or no benefit, by the use of one bottle of Dr. Swayne's Compound Syrup of Wild Cherry, he was restored to perfect health.

Wm. Montell, a respectable merchant of St. Clair, Schuyler county, writes, January 30, 1849:—Read and I send you a certificate of Wm. Beaman, a citizen of our town. His case of consumption is well known here, and of long standing; he attributes his cure entirely to your Compound Syrup of Wild Cherry.

IMPORTANT CAUTION—READ! READ!
There is but one genuine preparation of Wild Cherry, and that is Dr. Swayne's, the first ever offered to the public, which has been largely throughout the States used, and some parts of Europe; and all preparations called by the name of Wild Cherry have been put out since the name of Wild Cherry has been used as a false currency to their sales. Each bottle of the genuine is enveloped with a beautiful steel engraving, with the likeness of William Penn thereon; also Dr. Swayne's signature and as a further security, the portrait of Dr. Swayne will be added hereafter, so as to distinguish his preparations from all others.

G. SWAYNE'S CELEBRATED VERMIFUGE.
A safe and effectual remedy for Worms, Dyspepsia and Cholera Morbus, richly on Dyspeptic children or adults, the most useful Family Medicine ever offered to the public.

This remedy is one which has proved successful for a long time, and it is universally acknowledged by all who have tried it to be far superior (being so very pleasant to the taste at the same time) to any other medicine ever employed in diseases for which it is recommended. It not only destroys worms, but is useful to the whole system. It is harmless in its effects, and the health of the patient is always improved by its use even when no worms are discovered.

Most Good News for the Sick.—Anderson, Indiana.—Dr. SWAYNE—Dear Sir: All your medicines sell well, and give good satisfaction. Your valuable Compound Syrup of Wild Cherry has been the most successful remedy in my hands in this section. Your Pills are most excellent. I want you to send a good supply of them. A man purchased a bottle of your Vermifuge the other day for his child, and by its use it discharged 63 of the largest worms he had ever seen. It is somewhat difficult to get the people to try it, as they have often been gulled by poisonous and worthless worm medicines. Yours being so very valuable, and so safe to the taste, at the same time, I shall be able to dispose of a large quantity. Respectfully, yours, &c., THOMAS T. SHARP, P. M. To Dr. SWAYNE, N. W. corner of Eighth and Race streets, Philadelphia.

Remember! the genuine is now put up in square bottles.

Dr. SWAYNE'S SOBER COGNAC SERRAPELLA AND EXTRACT OF TAR PILLS.—The virtues of these Pills are appreciated only by those who have used them; they are adopted to assist nature in carrying off morbid matter, obstructions impurity of the blood, &c. &c. They are a gentle and effective purgative, correct all the functions of the liver, and as an alterative, medicinal, they are very valuable, and should be used in every family. They have an outside coating of pure White Sugar, whereby everything disagreeable to the taste or smell is entirely removed, without in the least affecting the excellent qualities of the medicine. Remember! they are now put up in boxes, instead of the old wood covered with a red label, bearing the signature of Dr. Swayne. None other is genuine. The above reliable medicine was prepared only by Dr. SWAYNE, N. W. corner of Eighth and Race street, Philadelphia.

AGENTS FOR BRADFORD COUNTY.

MYERS' LIQUID CURE,
A POSITIVE AND NEVER-FAILING REMEDY FOR PILES.
Whether Internal, External, Blind or Bleeding, Sore throat, Canker Sores, Mouth Ulcers, Catarrhs, Scalds, Burns, Cuts, Sprains, Bruises, &c. We feel justified in proclaiming THE FACT TO THE WORLD that of all medicines ever brought before the Public, NONE have ever been more beneficial in afflicting humanity than "Myers' Liquid Cure." We know that this is saying a great deal, but if we were to fill volumes, we could not say too much in praise of this.

HEALTHY-NEURASTHENIA, LIFE-PROLONGER, EXHICIT.
Hundreds, nay thousands, bless the happy hour when first they were acquainted with its transcendent virtues; and our present purpose is to inform other thousands, how and where they may obtain that relief, which they so long have sought in vain.

The superior excellence of this preparation over all other medicines for the speedy and permanent cure of PILES is well known to all who have tested it. It has been proved in thousands of instances, and has NEVER FAILED to cure the MOST OBSTINATE CASES, and we are confident it NEVER WILL FAIL.

If used a proper length of time according to directions. As a proof of our entire confidence in its efficacy, we assure all purchasers that, if after a proper trial, it proves ineffectual, the money paid for it will be returned.

"Myers' Liquid Cure" is an official Remedy for Rheumatism, Bites, Pimples, Barbers' Itch, Pruritis, Lint, Chills, Sore Throat, Malaria, Scalds, Stings of Poisonous Insects, &c., and for Various Diseases of every description.

It is both safe and effectual for RHEUMATISM.

No preparation now before the Public can compare with the excellence of the "Liquid Cure" for Scalds, Burns, Cuts, Sprains, Bruises, Swellings, &c. Its effects are:

REAL PAIN KILLER ARE MAGICAL.
Every Family in the Land should possess themselves with this Remedy. It should be in the possession of every household, within the reach of all.

Full Directions accompany each bottle. Pamphlets containing copies of certificates from those who have tested the "Liquid Cure," may be had gratis of our authorized agents.

"Myers' Liquid Cure" is prepared only by HIRAM MIX, Towanda, Pa.

For sale by HIRAM MIX, Towanda, Pa.; and by C. H. Herrick, Athens; Rufus King, Troy; James H. Phinney, Monticello; Henry Gibby, LeRoy.

COFFEE.
Will be kept on hand a large assortment, and made to order on shorter notice and for less money than can be produced at any other establishment in the land. Those who are under the necessity of purchasing that article will find it well supplied. A good house and just may be had in Lancaster from October 1, 1847. L. M. NYE & CO.

SCROFULA.
BRANT'S INDIAN PURIFYING EXTRACT

It is a medicine, in every respect, and in every manner, to be used in the treatment of Scrofula, and in all the various forms of this disease, which is the most common and most dangerous of all the diseases of the human system. It is a medicine, in every respect, and in every manner, to be used in the treatment of Scrofula, and in all the various forms of this disease, which is the most common and most dangerous of all the diseases of the human system.
