This should be a busy month to the farmer. Manurse if not already carted out, where likely to be wanted, should be attended to. Place your ma nure in convenient shaded heaps, at proper distanees apart, and cover the tops of lieans slightly with charcoal dust, pulverent muck, of peat, or a slight coating of plaster of paris. Either of these will provent in part, at least, the ammonia escaping with the first warm day. Prepare ground as early as possible, and spread no more manure at the time than can be plowed in within a few hours. If you cannot obtain any of the above named articles to cover the manure heaps until required for use, throw a few shovel fulls of soil for each heap.

General Farm Work:-If stences are not in good order see them attended to. Cut, pile and prepare wood for summer; repair buildings; whitewast stables; clean out old litter and eprinkle with plaster having everything removed to the compost heap that can make fool air during warm spring days, and thus preserve the health of both men and animals; clean and whitewash poultry-Louses; clean hog pens, &co. Look to your tools of all kinds if not already done, and see that they are in good order. Repair harness, &c. Look well to your stock. If they are not properly cared for at this season of the year, they can not be expected to do the heavy spring work. If you have pursued the barbarous custom of feaving manures exposed all winter in cow yards, without protection from the atmosphere, cart it out immediately, as directed in the beginning of this article, and thus stop the greater wastes arising from warmer weather. If you have any manure, more than will be wanted for spring use, make it into compost with muck, peat, pond-mud, or even headlands, rather than lose the more valuable parts of its constituents by leaving it unprotected. If you can, put it under cover; and if you have no manure sheds, cover the heaps with any of the absorbents of ammonia before named .-An occasional sprinkling on its surface of water, in which one-thousandth of its weight of sulphurio acid has been mixed, will be serviceable by changing the carbonate of ammonia to the sulphate, and thus prevent its evaporation, and consequent

All that we have noted above should have been done in February and early March; but as we know that they are often neglected, we I ame them

Meadows and old Fields -"If you have any meadows or old fields that are sward bound, or which bore but different crops of hay last season, give them a thorough harrowing as soon as the frost is much time and expense have succeeded to the out of the surface, while the ground is soft, then row to each acre four quarts of timothy seed, one bushel of plaster of paris, five bushels of newly slaked time, all well mixed, and finish by rolling -American Agriculturist.

If, after the above you will sprinkle the surface with 100 lbr. of nitrate of soda, (cubic petre) in solation, much benefit will ensue.

Fields occupied by wintergrain, if partially winter killed, should be harrowed, the bare spots sowed with spring grain or clover, and suitable topdressings, and then the whole rolled Any roots disturbed by the harrow will be partially restored by the roller to the soil, and the abration will cause such roots to tiller, (throw out new shoots from the first joint) and thus give full crops. - Working Far-

Manure Your Garden.

Manure may be carted or wheeled into the garden at this season of the year, when there is not ders for them, persons wishing to purchase machines much out door work to attend to. This will advance preparations for gardening, when time and what time they wish to procure them.

Farmers wishing to do their threshing immediately fabor are more valuable. Manure cannot be ap plied to better advantage any where, than in the the first of July. Also for sale garden, therefore, it should always have a liberal allowance. This, however, may be over-done by a continuation of the same kind of manure in large quantities, year after year. It a garden has thus been surfeited with barn yard manure, which is trequently the case, some fertilizer should be applied. Lime, applied once in three or four years will be DOG POWERS FOR CHURNS, KENDALL'S very beneficial, and if the soil has become too stiff, CHURNS, GRANT'S GRAIN CRADLES, a liberal coating of road sand may be used to great advantage. If any one doubt the propriety of applying road sand to resuscitate old gardens that have been surfeited with old barn-yard manure until it reases to have any apparent effect, let him try on a part of his garden. Cover the soil two inches deep with the sand, give it a thorough mixture with the spade, and it will act like a charm.

Dig your garden deep. If the subsoil is not spitable to bring to the top, which is often the case. trench it by keeping an open space on the top, while you dig and pulverize the subsoil. This ope ration should be carried to the depth of two feet, at least. Many roots will penetrate beyond that depth if the soil is properly prepared. The greatest advantages follow deep digging in dry seasons, and trench draining is necessary to success in wet lo-

The most important points in preparing ground for successful gardening, ane-manure well and dig

A New KIND OF FERCE. - Mr. John R. Reming. ton, of Montgomery, Alabama, (the inventor of the Remington Arial Bridge) has patented a new and useful invention. It is a cement, for making solid fences, as durable as granite, and at a very reasonsble cost of construction. The chief ingredient is sand, and it can be easily manufactured by plantation hands. The coment panels are conveyed to the spot where the fence is to be located, and the two legs of each let into the ground like common posts. The cost to the planter is estimated at 10 cents per panel, of ten feet by five, four inches thick-far cheaper than the wire fence. It does not, or at least should not detract from the merit of this invention, that it bails from Alabama, this time. rather than from Maine or Pennsylvania, or that the modest little town of Montgomery ventures competition with the great manufacturing cities of Tin, Japanned and Sheet Iron Warr, the East for the honor of originating some of the useful discovery of the age - Charleston Courier.

Hones should be curried and brushed down daily. This is as necessary as it is for a person to wash his hands and face daily. It is not only necessary to comfort but to permanent health.

" My son would you suppose that the Lord's prayer could be engraved in a space no larger than the area of a half dime!"

WHEELER'S, & ALSO EMERY & CO'S NEW-YORK STATE ALBIQUETURAL SOCIETE'S FIRST PREMIUM

Rail Road Horse Power & Tresher With the Latest and Important Improvements, for which Patent is secured.

THE subscriber takes this method to inform the Farmers of Bradford and the adjoining counties, that he is agent for, and has for sale, the above cel brated and unequalted Horse Power and Threshing Ma-chines, which he is prepared to furnish on the same terms as by the manufacturer, with the addition of the terms as by the manufacturer, with the addition of the actual cost of transportation, contracted for at the lowest and best rates.

The subscriber has sold a number of the above ma chines in this, and the adjaining counties of Chemung and Tioga, N. Y., and all without exception have given the very best satisfaction, and where they are known, all farmers give them the preference, on account of economy in threshing, being operated with much less expense, and cracking and wasting much less grain than any other machine in use.

The Two-Horse Power Thresher and Separator capable, with three or four men, of threshing from 180 to 200 bushels of wheat or rye, or double that quantity

PRICES The prices for Emery & Co.'s one Horse Power, \$85 00 Thresher and Separator, 35 00 Bands, wrench, oiler and extra pieces, 5 00-Two-horse Power, \$110 00 Tresher and Separator, 35 00
Bands, oiler, wrench, &c., 5 00-\$150 00

Also, Wheeler's one-horse power, Thresher, and Separator, complete, (improved this Wheeler's two-horse Power, Thresher and Separator, complete, Price of Emery's Tresher and Cleaner

Price of Grant's Fan Mills, adapted for hand or power, from The subscriber will also the coming season be pre pared to furnish to order

EMERY & Co.'s NEW

THRESHER AND CLEANER Emery & Co. for nearly two years past have been experimenting to perfect a cleaner, to be operated with their Power for public and field threshing; and with satisfaction, and are now prepared to furnish a Self-cleaner, combined with all the advantages of their

overshot cylinder, and at the same time requiring less force to operate its rotary motion than is required by the vibrating separator. It has been thoroughly tested during the last harvest, and some of them have been used the past season for threshing in the best grain growing sections of the state of New York with the best success—threshing months together an equal amount and at less expense, than the common threshers

with the vibrating separators.

The Cleaner has all the advantages of a good fayning mill, cleaning the grain at for market, wasting none. The additional cost being but little more than a fanning mill, or about thirty dollars—making the whole Thresher and Cleaner cost \$75 to the Farmer, and with Emery & Co.'s two-horse power,\$185 00.
The Cleaner can be detached, and the Thresher us ed alone when desired. The new Thresher and Clean er are destined to take the place of the old, expensive and cumbrous thresher and cleaner now in use.

Farmers and, others wishing to procure any, of the above-mentioned Horse Powers and Threshers, will save trouble, risk and expense, by purchasing them of On account of the large demand for the above machines, and the difficulty of immediately filling or-

Medical.

Afflicted do not Despair

Another fellow being rescued from Death by Schenck's Pulmonic Syrup.

The following case is one of the greatest triumphs of medicine over disease ever published in medical history. Read it! tory. Read it?

Prompted by no other than the feeling of benevolence, and for the benefit of my afflicted fellow beings, I desire to make known a short description of my disease, and the unexpected cure I obtained from SCHENCKS PULMONIC SYRUP. About three years ago I was afflicted wit a violent cold, which settled on my breast and the manufacture of the state of the and side, and every low days woulld raise considerable blood; my cdugh was tight and distressing. Every day I had violent fever creeping chills, and profuse sweats at night, with great difficulty of breathing and great loss of appellie; my system was entirely pros-trated, being confined to my bed most of the time-I'wo of the most emment physicians of this city attended me, and after exhausting all their skill, pro-nounced my case incurable. Indeed, one said my lungs were almost gone, and I could not possibly re cover. At this stage of my disease, I was prevailed upon to try Dr. Schenck's Pulmonic Syrup, and before had taken half a dozen bottles, was so far recovered as to be to go about the house. It seemed to strengthen my whole system—it loosened the cough and stopped the bleeding-my bowels became regular, and every thing I ate, seemed to digest easily and nourish my whole system. Indeed, such was the rapid pro-gress of my health and so sudden the change, that I became too sanguine of a speedy cure, and abandoned the use of the medicine before the disease was horoughly eradicated, which resulted in another attack of bleeding at the lungs last tall, accompanied by a dis-tressing cough. I sgain commenced taking the Pulmonie Syrup, and sent for Dr. Schenck who, upon a careful examination, advised me to continue using it. Before I had taken four bottles, an abscess formed in my side, which gathered and broke, discharging, as near as I can judge, a pint of very disagreeable yellow mat-ter. This seemed to cleanse and purify my whole system, From this time I began to get better, and am happy to say entirely recovered. I am sure at this time I enjoy better health than I have for the last ten years. Since I commenced taking the Pulmonic Syrup, I have never failed to recommend it wherever I went, that others, as well as myself, might be saved saved from that awful disease; for I feel it a duty I owe to the afflicted to publish it to the world. Permit me to mention a few cases which have come under my immediste observation. Being on a visit to Camden N. J., last summer, I saw a child, evidently in the last stage of bowel consumption. The mother informed me that the physicians had given the child up as in-curable. I told her what benefit I had received from the use of Schenck's Pulmonic Syrup, and Induced her to procure a bottle. I heard nothing more from the little sufferer until about free month after; being in the market, my attention was drawn to a lady who observed me very attentively. She finally approached me, and asked if I was not the lady who recommend-ed Schenck's Pulmonic Syrup to her dying child last summer in Camdon. I replied that I was. She said that her child had entirely recovered, and was uncom-monly healthy. Her name is Mrs. Wilson, and now resides in Bridesburg. Another lady I would mention in particular, who had a sciofulous affection. Her face and neck presented one continued sore, and one of her eyes was seriously affected with it. She had become greatly emaciated, and to all appearances past recovery. I induced her to try Schenck's Pulmonre Syrup, which she did, and is now perfectly cared. Another lady, Mrs. McMullen, whose residence I will give on application, was evidently in the last stage of Consumption, I prevailed upon her to try the Pulmonic Syrop. In a very short time she was entirely recovered, and now enjoys excellent health, having become exceedingly fieshy These are three cases within my knowledge, which I know were cured by Schenck's Pulmonic Syrup, Allwho doubt this statement, and will take the trouble to call on me at my residence Parrish street five doors above tenth north side, I think I will be able to satis-

their lungs, and if he says he can cure them, follow the directions, and prevent taking cold, they will rapidly GULIELMA L. LEIBERT.

Philadelphia, May 29, 1849. J. H. Schenck-Dear Sir-I have known Mrs Leibert for several years, as a member of my church, and have all confidence in her statement, and am rejoiced to find her again restored to health. Any thing more, in addition to her statement, is needless.

fectorily convince them by own case, and others that

I know have been cured by this Syrup. Since my

cure, there have been so many to see me to know what

I took, that I have had a very good opportunity of

knowing a great many that have taken it, and have been greatly benefitted thereby, and I think if persons afflicted with Consumption or Liver Complaint, would

send for Dr. Schenck, and let him carefully examine

Yours, truly, THOS. L. JANEWAY,
Pastor of the North Presbyterian Church,

PULMONARY BALSAM The Great COUGH REMEDY.

Many years of experience, and more than a Hundred Thoms and Curren of Consumptive Complaints, have proved to the undoubted satisfaction of all persons who have become acquainted with this wenderful remedy, that it is greenly superfor, because it is soothing and healing, and more certain to curre Consumption of the Lungs, than any other Remedy in the world. We know, however, that it is said by some that Consumption can not be cured. Be that the opinion of the many or the few were shall not attempt to arrate with such, but this we will say, and do ascert as a fact, which can be proved in theusands of cases, that this medicine has curred Consumption, and which were attended with symptons that resembled, and were in all resembled with that facil disease Consumption. This Baisam has cured thousands of persons who were said to be hopelessly afficited—who had hard, dry, rucking Coughts—Poins in the Breant, Side, and Book—Difficulty of Brenthing—Purslent Expectantion—Helte Feter—Night-Steath—and wasting nway of the Flosh and Blood. Persons having such complaints have been curred after it was said they could set live a week longer. This state, but, by the use of this remedy, they now live, and enjoy good health:

This Baisanm is purely of recetable compound. It is pleasant to good health.

This Ballsam is purely a repetable compound. It is pleasant to take, and serer does injury in any stage of disease or under any circumstances. It effects its wonderful and almost mirrarculous Cures by Partiying, Strengthenton, and Invigorating the distribution, and producing a healthy action—should county countries the circulation, and producing a healthy action—should be presented and admy and fariliating Expectarations. It Cures the following discountries.

Consumption,

COUGHS and Colds, Broachitis, Asthma, Spitting of Blood, Meeting at the Lungs, Pates in the Breast, Side, and Chast, Nerrousses, Neat Secate, Palpitation of the Reart, and all FEMALE WEAK-NESSES and Complaints arising therefrom, Chalera Infan-

All orders must be addressed O. WALLACE & Co. 304 Broadway, N. Y. Very Strange but true.

A Gentleman of Utica, N. Y., has obtained from the Witch-hazel, a simple remedy, which lays a more just claim to the name of "family cure all" than any Medicine we have ever before known. Nothing is connected with it but a little Alcohol to preserve it. and yet it acts with great certainty in removing pain and all local inflamation, curing all sojes, burns, brunases and lameness, rapidly. Piles, bowel complaints cholera-morbua, hemorrhage, ear-ache, topth-ache; sore eyes, and all nervous affections. It is white as water

and as harmless, and it is called

"Pond's Pain Destroyer and Healing Extract"

None is genuine except "Pond's Extract" is blown in the bottle. Mr. Pond first introduced this medicine to the public and has expended a vast deal of time and money in bringing it to a high state of perfection we now warrant every bottle to give satisfection A man by the name of Spencer has put forth an article called "The Coyle Extract" which claims to be found the Wind Land be from the Witch-hazel. If from that shrub, its name s a perfect deception, and it is a very imperfect article; be not deceived, get a pamphlet and see.
