all farmers give them the preference, on account of economy in threshing, being operated with much less

my method of growing potators free from rot. I have practiced it two seasons with entire success, and have now 600 bushels of fine Mercer polatocs in my cellar, and all free from the disease. My method is, to plow the ground late in the

fall or early in the spring, harrow it smoothly be fore planting time, then haul out say lifteen tour rotted manure, spread it broadcast, then take two horses and a plow, and back up two full lurrows the furrows just meeting in the backing; leave a strip a loot wide, and back up two more; and so continue till you have completed the lot. Then tuin about and split these double forrows open with Will the Latest and Important Improvements, for which Patent is secured. a single furrow, then commence dropping seed, (pieces of cut potatoes, containing at least four eyes,) in the furrow, six inches apart. After the lot is dropped, take your horses and plow, throw ted and unequalled Horse Power and Threating Ma-chines, which he is prepared to furnish on the same terms as by the manufacturer, with the addition of the two good furrows, (one round of the team to a throw.) just meeting on the top; dress off the top, clearing the row of all stones, clods, &c., then sow actual cost of transportation, contracted for at the low-

broadcast five bushels of common salt over the est and best rates. ground immediately after planting ; cultivate polatoes when in blossom. When the crop is ready to gather, clear the

ground, and turn a furrow from each side of the row; how down the ridge, then harrow down the ground, pick up the remaining potatoes, and the work is done. It is apparent that by this process we get a broad, loose bed for the potatoes to grow in also a double depth of soil.

A FARMER .- [ Ohio Cultivator. From the Germaniown Telegraph.

## Planting Potatoes.

Almost every tarmer, now-a days, adopts the practice of cutting his potatoes for seed, in order to economise cost. Some cut the tubers into as many pieces as there are "eyes" in the potato, and allow from one to three pieces to a hill Others divide the roots in the centre, passing the knife through them longitudifially, and one half a potato only to a hill. Quarters are also used. Now it may not be generally known that there are two distinct parts to the potato, and that the apex, or end which presents a number of small eyes, will produce a crop earlier by some ten or fifteen days, than the midille or body part. The produce of the · latter, however, is always superior in-point of size, while that of the butt or navel is inferior, the eyes THRESHER AND CLEANER being imperfectly developed or immature. In se lecting foots for seed, the preference should always be given to the largest, soundest, and most symmetrical, as large, well formed roots will produce a better progeny than those of a more diminutive character. Having made your relection, cut off the seed ends, then the butts, and divide the middle into two sections; the tao pieces being sufficient for a "hill." Il you are desirous to have early potatoes, for table use, or for marketing, plant your seed ends. Heed your buils to your swine or caule, and after allowing your middles to temain spread out on a dry floor for a fortnight to heal the woundplant them, and the result will be a liberal and healthy crop of well-formed and good-sized roots

Afflicted do not Despair The following case is one of the greatest triample of modicine over disease ever published in medical his-Another fellow being reacued from Death by Schench

Aledical.

Antonia and a substant of the set of the set

tory. Read it! Prompted by no other than the fireling of binevolence, and for the benefit of my afflicted follow beings, I de-site to make known a abort description of my disease, and the unexpected cure Fotdahed from SCHENCKS

and the unexpected cute I obtained from SUHENCED PULMONIC SYRUP. About three years age I was afflicted with a violent cold, which settled on my breast and side, and every tew days would raise considered ble bloods my cough was tight stift difference. Every day I had violent fover crosping chills, and profess atreats as alght, with great difficulty of instifting and great fous of appetite ; my system was entirely pre-trated, being confined to my bed most of the time. Two of the most eminent physicians of this city st-tended me, and after exhausting all their skill, pre-nounced my class incurable. Indeed, one said my lungs were almost gone, and I could for possibly n-cover. At this stage of my disease, I was prevailed upon to ity *Dr. Scherick's Pulmonic Syrup*, and before I had taken half a dozen bettles, was as fer recovered 4 00 4 00 \$3 00 had taken half a dozen bottles, was so fa

recovered as to be to go about the house. It seemed to sta as to be to go about the house. It seemed to strength-en my whole system--it hoisened the cough and sop-ped the bleeding--my howels became rejular, and svery thing I ate, seemed to digest daily and nourish my whole system. Indeed, such was the rapid pro-gress of my brelth and so andden the change, that I became too sanguine of a speedy cure, and abandon-ed the use of the medicine-before the disease was thoroughly eradicated, which resulted in another attack of bleeding at the lunge last tall, accompanied by a dis-treasing cough. I again commenced taking the Pal-monie Syrup, and sen for Dr. Schenck who, spea a careful, examination, advised me to continue using it. 5 00 3 00 5 00 2 50

careful examination, advised me to continue us careful examination, advised me to continue using it. Before I had taken four bottles, an abacese formed in my side, which gathered and broke, discharging, as neat as I can judge, a pint of very disagressible yellow mat-ter. This seemed to cleanse and purify my whole sys. ter. This sectored to cleanae and putting my whole sys-tem, From this time I began to get better, and an-happy to say entirely recovered. I am sure at this mos I enjoy better health than I have for the last ten general. Since I commenced taking the Pulmanic Sys-up, I have never, failed to recommend it wherever I.

went, that others, as well as myself, might be aved aved from that awful disease; for I feel it a duty I owe to the afflicted to publish it to the world. Permit me to mention a few cases which have come under my me to mention a low cases which have come under my immediate observation. Being on a visit to Camden, N. J., last summer, Fasw a child, evidently in the last stays of bowel consumption. The mother informed me that the physicians had given the child up as incurable. I total her what benefit I had received from the use of Schenck's Pulmonic Syrup, and induced her to procure a bottle. I heard nothing more from the little sufferer antil about three months after; being in the market, my attention was drawn to a lady who observed me very attentively. She faally approached me, and asked if . I was not the lady who re ed Schenck's Pulmonic Syrup to her dying child last summer in Camden. I replied that I was. She said that her child had entirely recovered, and was uncom-monly healthy. Her name is Mix. Wilson, and now resides in Bridesbutg. Another lady I would mention in particular, who had a accolute affection. Her face and neck presented one continued sore, and one of her eyes was seriously affected with it. She had become greatly emaciated, and to all appearances past recovery. I induced her to try Schenck's Pulmonre Syrup, which she did, and is now perfectly cured. Another lady, Mrs. McMullen, whose residence I will give on application, was evidently in the last stage of Consumption, I prevailed upon her to try the Pulmonic Syrup. Ins very short time she was entirely recovered, and nowenjoys excellent health, having become exceedingly fesh These are three cases within my knowledge, which I know were cured by Schenck's Palmonic Syrap, All who doubt this statement, and will take the trouble to call on me at my residence. Parrish street five doors above tenth north side, I think I will be able to estis-

factorily convince them by own case, and others that I know have been cured by this Syrap. Since my cure, there have been so many to see me to know what I took, that I have had a very good opportunity of knowing a great many that have taken it, and have been greatly benefited thereby, and I think if persons afflicted with Consumption or Liver Complaint, would send for Dr. Schenck, and let him carefully examine their lungs, and if he says he can cure them, follow the directions, and prevent taking cold, they will rapidly recover.

They were all bored or rotted, and fell from the plum trees of a different kind, which have borne less shared the same fate Last year a young tree which stood near an ash-leech, and had never borne before produced a solitary plum that was sound .- This suggested the idea that its preservation was owing to the ashes which had been scattered sround the roots of the tree. Following out the hint thus given, I last year spread lime and ashes, with manure and salt around all my trees, The result has been, that they have all borne this sear more than usual, and most of the fruit has been sound. This result I ascribe in part to the ashes and lime. The same Ffield is recommended by "An Old Digger." And the conclusion is obvious, that alkili enough will destroy the young insects as they lie burrowed in the ground, or attem, t to amerge from it in the Spring. If in this way sound plums can be raised, it will be found a very easy way. Let some of our readers by the experi ment and note the result .- Horticulturalist.

#### Preparation of the Soll for Secds.

The ground for the reception of fine seeds of vegetables should be broken up the preceding year, and well manured in Autumn, and rendered fine in the Spring by repeated plowing, and harrowing. or raking. Plow and manure deep, for deep rooted regetables; but manure near the surface for all others. Potatoes and Indian corn answer well, and produce large crops in ground newly broken up Very fine seeds should be sown in a newly prepared fresh soil, and covered only a quarter of an inch deep; and the ground to be trodden hard, o colled with a heavy roller. This enables the earth to preserve its moisture at the surface, where at the same time the seeds may receive the necessary degree of heat from the Sun, and vegetate at once striking root downwards. Fine seeds, if rown too deep, are liable to perish .- Kendrie's Orcharc'ist

#### Early Polatoes.

Potatoes may be forwarded from two three weeks by placing them on the south side of a fence, o building, early in the spring, and protecting them carefully from the night trost, by a stratum of straw The caloforic agency of the sun's says, tends to energise the principles of production, by awakening an earlier activity, which, when properly di recied, operates favorably upon the fature growth. Some deposite their potatoes in fermenting horse manufe till they have evolved sprouts two or three inches in length, but this is not to be recommended. sas great care is necessary in planting in order to prevent the sprouts being broken, and so powerful a stimulus deteriorates the macity the tuber for well su-tained and healthy growth, when deposited in the soil -Germantouru Telegroph.

MEMORANDUM .- Often breaking up a surface keeps a soil in health-for when it lies in a hard bound state enriching showers run off, and the salubrious air cannot enter.

SEAPPING WOOD .- Wood which proves trouble some by snapping on the fire, may be rendered harmless by turning the stick with the heart inward,

above-mentioned Horse Powers and Thresh tree before they were ripe. Two or three other save trouble, risk and expense, by purchasing them of the subscriber.

I On account of the large demand for the above machines, and the difficulty of immediately filling or ders for them, persons wishing to purchase machine should give me timely notice as to what kind and at what time they wish to procure them. Farmers wishing to do their threshing immediately

after harvest, should procure their machings as early as the first of July. Also for sale.

Office, 214 Broadway, New York. CAUTION.-The public is requested to bear in mind that everything prepared by the Graefenberg Company has their seal upon it.

Doctor Yourself for Twenty-Five Cts. BY MEANS OF THE POCK. ET ESCULAPIUS, or. Every one his own Physician! THIR-TIETE edition, with upwards of

... undred engravings, showing rivate diseases in every shape and form; and malformations the generative system. BY WM. YOUNG, M. D.

The time has now arrived, that persons suffering from secret diseases, need no more become the

victim of QUAUKERT, as by the prescriptions contained in this book any one may cure himselt, without hind. rance to buriness, or the knowledge of the most inmate friend, and with one tenth the usual expense. In addition to the general routine of private disease, it fully explains the cause of manhood's early decline, it fully explains the cause of manhood's early decline, with observations on maringo-besides many other derangements which it would not be proper to enumer-ate in the public prints. OF Any person sending 25 cents enclosed in a let-

ter, will receive one copy of this book, by mail, or five copies will be sent for one dollar. Address, "Dr. W. Young, No. 152 Spruce street, Philadelphia."-Post paid

C Dr. YOUNG can be consulted on any of the Diseases described in his different publications, at his Officet 152 Spruce Street, every day between 9 and 3 o'clock, (St.ndays excepted.)

### J. M'INTOSH, DENTIST,

HAS removed to a few doors below Bridge street, on the East side of Main at. in the bailding formerly occupied by J. D. Montanye Esc. All operations amounting to \$60, or over, one hal to be paid down, the remainder in three months.

the operation proves unsatisfactory, the money paid will be refunded. A note of hand however must secure the payment of the half left unpaid, with a provise.

All orders must be addressed O. WALLACE & Co. 304 Breadway, N. Y. Steem ly

Very Strange but true. A Gentleman of Uica, N. Y., has obtained from the Witch-hanel, a simple remedy, which lays a more just chim to the name of " family cure all" than any Medicine we have ever before knowr. Nothing is connected with it but a little Alcohol to preserve it, and and its data it it is a little Alcohol to preserve it. and yet it acts with great certainty in removing pain and yet it acts with great certainty in removing pain and all focal inflamation, curing all sores, burne burn-ness and lameness, rapidly. Files, bowel complaints, cholers-morbus, besnorhagio, car siche, tooth-ache, sore eyes, and all nervous affections. It is white as water and as harmless, and it is called "Pond's Pain Destroyer and Healing Extrad." Norm is appoint accept if Darth Pattern" is blown in

None is genuine except "Pond's Extract" is blown in the bottle. Mr. Pond first introduced this medicine to, the public and has expended a vast deal of time and money in bringing it to a high state of perfection, and we now warrant every bottle to give satisfaction.

A man by the name of Spencer has put forth an article called "The Coyle Extract" which claims to be from the Witch, hazel. If from that shrab, its neme
