MARING HOOKS AND ETES .- The N. Y. Evening

Post has a letter from a correspondent in Connecti-cut from which we copy the following;

Upon the premises we were shown the works of the Waterbury Hook and Eye Company, where a capital of \$16 000 is employed in the manufacture of hooks and eyes. Here were arranged long rows

of little machines about the size of small washstands

under which a constant shower of feminine conven-

iencies was pouring down, but from what cause or what agency it was difficult to conjecture. Upon a

closer inspection a large spool of wire was preceive

ed revolving slowly in its rear, growing shorter inch by inch in mechanical harmony with the me-

were ready to grasp the severed fragment and pass it along from change to change, antil it finally drop-

instinct with life and intelligence. The power of speech seemed to be all that was lacking to com-

plete the delusion. There were but four or five men in the room, who passed around occasionally from one stand to another to oil the machinery, to

supply new wire when the previous spool was con-

sumed or to empty the vessels when filled by the silvery shower. The whole performance more re-sembled a voluntary process of nature then the re-

sult of mechanical art. The duty of the superintend

ant of one of these machines, seemed to me curious

ripe, drop from their branches and are gathered

is an additional advantage, it will drain the south
