Waste of Mahares. The greatest defects in American agriculture the present time, arise chiefly from circlesmess and wide. The disregard of order, system and economy, is the bane of our farming. It is the occasion of cons ant and immense loss in many ways. The most striking example of this, perhaps, is the great perligence in regard to the saving of mannies -No withstanding the frequence with which this subject has been brought to the attention of farmers. there is scarcely a neighborhood in which many instances of the neglect and loss altuded to, are not eeen. On most farmers there is nearly a total loss of the trine of the stock, daring the time it is kept nt the bara; and even the other portion of the excrement is often so much exposed that half its value, is probably lost. It is often washed into the highway, and is seen in the coloring of water of brooks, which carry off the soluble portions. It would not, probably, be an over estimate of this loss, to ishy

The loss might be wholly p evented and with butflittle comparative expense. The first thing towards this would be to use plenty of substances to absorb all liquids of the stables and varis. Ceil us under barns and stables, where the shape of the ground would render if convenient to make them. would be perferable, as receptuales for manure, to crowbars, grabbing hoes, rakes, grass scythes, scythe any other plan. Where celling are not made, there snathes, scythe stones and rides, crafte scythes, bush might be excavations under the stalls, and being seviles, corn cutters, shovel plough moulds, garden filled with muck, pent chare al, or charcoal dust, the uring would be retained in a form convenient the uring would be retained in a form convenient! Carriage bows, top leather and cluth; patent leather; for application to the soil, Yards should be so form. India rubber cloth; brass and silver plated hub bands, ed by means of embunkments if necessary, that concave and Boston patterns; brass and silver plated there will be no soak or wash from them. If the curtain frames, kining nails, carriage knobs, aproprings tools of the buildings throw more water on the man- seaming cord; striped face, wide and narrow; silk ure than is sufficient to keep a moist, (not wet) striped lace, new style; top lining, worsted fringe moss. gutlers and spouts should be put up to lead the wa-

money they pay in taxes:

The practice of having plenty of water in barryards, should be more general. In many instances animals sustain much injury from the wants of this ty of LEAD PIPE, which we are prepared to furnish sequiate, and much valuable madure is lost from the same cause.

Hoven in Cattle.

When cattle obtain access to young, succulent clover or grass, and are hungry, they will fill their stomachs very full of it, and a fermentation taking pressure, and unless rehef is obtained death ensues. This is called "hoven." It is brought on, sometimes, by eating gradually of roots, com, or anything that

When a creature has become hoven, or "blown," ns it is sometimes called, there are two ways of reway. The mechanical mode is to let off the gas the left side, about midway between the hip bone and the rib. We once saved the life of an ox in this way. The animal had eaten too freely of potatoes, and was down, apparently dying, when we first saw it, and there was not time to do anything else. But putting the knife in, and afterwards inserting a tube, the gas escaped, and the ox was saved. But this mode should be the last resort. There are two other modes of a mechanical character for relieving this trouble. One is the putting of a tube down the throat into the stomach, and thus slowing the mas to escape.

Another, a more simple method, is to pural gag into the mouth, and keep it open. We offee had a youngawo years old steer, that become hoven -We prepared to give it some medicine, but in the struggle, after we had got its mouth open, and kept this, please call at Hall's old stand, south side of public it open some time, in order to put in the muzzle of the bottle containing the medicine, it ferched a short wheeze and up came a small portion of the food and an enormous quantity of wind, or gas, which reviewed it materially. Seeing this, we took a short piece of wood, about the size of a hoe-handle, tied a string to buch end, put it into the mouth, and, lying the string behind the horns, kept it there some time, -by which means it was male to occasionally wheeze, and bring up more of the gas, by which it was completely relieved. 1 15

We have been reminded of this incedent by reading a communication of Jas. Gowen, Esq, of Philadelphia to the Farm Journal, in which he says of "hoven":-" The simplest and most efficient remedy is this: -so soon as the animal is discovered to be distended or hoven, let a twi-ted straw or a hav rope, as thick as a man's wrist, be immediately placed in its mouth, bridle fashion, drawing it up tight, and tying it securely on the back of the head, behind the roots of the horns. The animal's jaws will then stand open, as if gagged; the effort it makes to disengage itself of the rope with its tongue, produces an action in the muscles that relaxes the valves, as it were, and liberates the gas The cure is thus accomplished instanter, without

The chemical mode is to give something to the animal that will either absorb the gas thus formed. or stimulate the stomach to pass it off. A solution of pearlash, or lime water, soap suds, oil, and such like things, are often given, which frequently relieve them .- Maine Farmer.

SHEARING LAMBS.-Some flock musters recommend the practice of shearing lambs, but I have my doubts as to the utility of divesting young animals of their fleeces, though, perhaps, in certain cases, they would be far better with it off than on Thus, indeed, may be the fact where they are infested with vermin, or when having come early the kins, for the purpose of carrying on the preceding winter, their fleeces may render them uncomfortable in the sultry and close days of June | Respectfully solicit a share of Public Patronage. and July. But would not the comfort thus secured (They pledge themselves to make as good work and to them in hot weather, be purchased by a more than commensurate degree of suffering with it beis true, when unmitigated by remedial appliances, good assortment, so that customers may at any time and one that, perhaps, will sooner exhaust the vital energies of its victim than almost any to which these innocent animals are exposed, I would recomend either New-England rum or tobacco smoke-the former applied as a wash to every part of the fleece and skin, and the latter as a fumigation, blown into the wool by means of a "smoker."

The application of either of these will immedi ately rid the animal of their parasictical enemies and without involving any unpleasant results.-Lambs that are of good size by the fast of June or the first of August, may furnish quite a good fleece; but the value of this is a mere tritle in the estimate it its removal is to operate unfortunately to the animal's health, which I think it inevitably must. BEN-ALEM, April 21, 1951.

Miscellancous.

NEW FIRM AND NEW GOODS! Hardware, Stoves, Copper, Brass, Tin-AND SHEET IRON WARE --

HALL & RUSSELL having formed a co-partner nership, respectfully call the attention of the publie to their assortinent, to which large additions have recently been made, making it the birgest and most varied ever offered in this region. Among the multi-tide of articles a few will be enumerated:

From and Evails. English, American and Swede- square and round; English and American refined; hoop, band and horse shoe ison; nad rods and mulleable from of all descriptions, &c.; with a good assortment of Nails:-3d, 4d, 5d, 6d, 8d, 10d, 12d and 20d; 4, 5 and 6 inch spikes wrought nails and horse unils, by the pound, ker or ton, Also, east, German, Luglish blister, American spring and tire steel, &c.

Carpenter's and Joiner's Wools, If all descriptions, vez: broad, harrow and hand axes; hatchets, adz. joiner's cast steel mortice, firmer and framing chisets; common and cast steel augurs, of at sizes, from } to 2 inch; broces and bitte; angur and red bitts extra; planes and plane from; hand, tenant that with many farmers, it is more than equal to the [X cut, keyhole, and slitting saws; from and steel and try squares of all sizes, from 54 to 15 inches; hammers enirit levels, hevels, tipe lines, mortice guaces, of all sizes, serew drivers, scratches, hollow auguis, &c.

> Blacksmith's Tools. Anvils, bellows, vices, hammers, sledges, rinting hummers, stocks and dies, drilling machines, &c. Parmer's Tools.

Shovels, square or round points; picks, hoes, hay, straw and menure forks; log, cable and binding chains, rakes, hoes and trowels, scoop shovels, &c.

ORRICK'S VERMIFUGE, Or Worm Destroyer, This Medicine contains no Mercury, nor any other Mineral substance. It is purely Vegetable.

This remedy for worms is one of the most, extracting year, ever used. It effectively evadicates worms of some from children and adults. Thousands perish by worms without the real cauce eing known. Some other mason is assigned for the ackness, until too late to cure the real cause. What immense responsibility reals upon the paren who does not know, and the doctor who does not unpretand, the complaint which is destroying those pre ious flowers of life-children.

What should be done? The answer is plain. Give the Vermifuge, which ill be sure to do good if they have, no worms, and if they have, it will destroy and cradicate them with certainty and precision truly astonishing.

There is no mercury or mineral in it. Mercury

the basis of most worm remedies; and the remedy in They have been before the Public for five years, cometimes worse than the disease. So never use loz-During which time more than 5000 certificates have enges, but rely upon this. Every person will be convinced on one trial that it is the most perfect cure ever invented.

The immense sale that this Vermifuge has, is a surtest of its value and the estimation in which it is held by families. It would be unite too expensive to pub ish the volumes of certificates that have been given for this article, and the users of it are freques sorred the name to all persons whom they think wil e benefitted by it. Speak of it in all families, and you will do your du

y to your follow creatures, and feel assured of the ap probation of all good men, and will receive your reward We call on all good citizens to make known the ef fects of this wonderful temrdy.

Remember, and ask for Orrick's Vermifuge.

Startling Facts. Hundreds of children and adults are lost yearly with vorms, when some other cause has been supposed to e the true one.

It is admitted by all doctors that scarce a man, wo nan, or child exists; but what sooner or later are troubled with worms, and in hundreds of cases, and to relate, a supposed fever, scarlating, cold, or some other ailing carries off the flower of the human familywhile in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE.

How sickening the thought that these things should -and who can ever forgive themselves for not trying this WORM EXTERMINATOR, when they know that even if the case was not worms, this reme 75 00 dy could not by any possibility do hurt-but always od as a purgative, let the circase be what it may." How important then to use it, and who will dure to take the responsibility to do without it? Let all pa rents ask themselves this question in truth and sober
