through the drouth of summer, and trees that otherwise stop, continue growing nearly all the reason. If any one has his double as to the striking son. It any one has his doubts as to the striking tions, &c.; with a good assortment of Nails:-3d, 4d, difference between trees thus treated and those ul- 5d, 6d, 8d, 10d, 12d and 20d; 4, 5 and 6 inch spikes; lowed to grow without such care, let him experi-wrough rails and horse nails, by the pound, keg or ton. Also, cast, German, English blister, American rient fie himself.

Mulching applies to all kinds of trees, fruit or omamental; shrubbery, and even vegetables. Strawberry vines are greatly; improved by spreading over the bed spent tan or saw-dust; the truit is large and much more abundant.

A recent Friter in one of our Harticultural Jourh mais says, mulching fruit trees that stand upon a gravelly sub-soil, produces almost the effect of a clay hottom.

Mulching is much better than the system of warering, and if properly done almost enpersedes It. If watering be once begun, the plant becomes stimulated to growth; and should there be a dry gratason, it must be continued or the sudden check eansed by the drought will often kill outright -Whereas, by mulching, the plant keeps on the even tenor of a steady growth without, any sudden. and often without any drawback. Besides in dry "weather, watering without mulching, from the rap , id drying of the surface, causes the ground to bake and thus injures the roots of the trees. Watering after mulching does not subject the trees to either of the above evils, but is often an additional advantage, and need be done but a few times during a long drought.

A few days ago when explaining to a farmer the benefit of mulching his trees, he said the best way to make them grow was to pile a heap of stones around them. A year or two before he put at the towest prices, together with copper and britannia out several fine trees along the fence and only one lived, around that one he happened to have placed : a heap of stones. So far so good. This however, was but a less happy and rougher way of doing the same thing. AGRICULA. West Jersey Pioncer)

PATTERING PORK.-Count Smith writes the Tri bane from London, the following sensible suggestions on the subject of fattening pork:

Permit me here to say that after conversing with many provision dealers, in London, in reference to American pork and beef, I learn there is one most important objection to its rale or consumption.-That difficulty proceeds from the fact, that in cooktable. In boiling our pork, bacon, and corned beef the consumers comptain of its great shrinkage, by reason of the fat separating from the mass and floating at the top of the pot. This objection does not arise from pork and beef, the produce of the United Kingdom, and perchance, from other countries. Now they tell me, that this difficulty may be overcome, as regards pork, if our people would, whilst fatting the hog, feed him about one pint of common field peas per day. This, is said, will bind the lat to the lean, or make the whole more solid. Pork, the produce of some of the Eastern States, is quite firm, when cooked, peas being more Air tight 6 plate Stores, freely used than with us. If our great staple can | Six plate Stores, be greatly advanced in value by so simple a remedy, it would be well if our Editors would call at which they offer to the public, and all of which will be disposed at extremely low rates. In proof of tention to the subject. No remedy was suggested this, please call at Hall's old stand, south side of public to render our beef any better, except that the em- equare, and extending to Pine street. playment of "sal nire." or salt petre, was highly duce, taken in payment. Towards, June 6, 1851. chjectionable.

Calves .- Young calves should never be confined in yards with yearling, or cattle older than them selves. As they are inferior in strength they are consequently often injured, by the pushing and erowding of their more sturdy companions, and often seriously maimed or destroyed outright. It you have a flock of sheep, turn your calves among them. They will partake of their food with the sheep, without quarreling, and at night, will be kept more comfortable than if tied up, or put in a pen by themselves. In many diseases to which cattle are sub ject, a tea of sheep dung is the sure remedy that can be given. When running with sheep, the calves generally consume, with avidity, the straw and litter on which these animals repose, and which, to a certain extent becomes impregnated with the peculiar virtues of the "specifie" and are thereby prevented from falling rick Those who have adopted this practice speak of it in terms of the highest approbation. Convenience for watering, feeding, to. should be arranged, and the animals provilal with salt as often as necessity requires.

AGRICULTUREAL IN FRANCE .- A letter writer for

the Republic says :- ' A trip of six hundred and file ty miles, from the northern to the southern extremity in France, justifies me in the expression of my obinion that God's sun does not shed its rays on, so fair a land, or one so thoroughly cuitivated. The whole country is literally a garden. Every square fact, from the mountain down to the lowest ravine, is made to produce something, it it be susceptible of it. Their mode of planting or sowing their crops, whether on plain or hill-side, produces the finest effeet on the appearance of the landscape; the space allotted for each crop is laid out in squares or parallelograms, with mathematical precision, and whether large or small, a garden could not be di-Aled with greater accuracy. As there are no fen cos or hedges, and as the different crops are in vations stages of moturity, you can imagine the variety of bues that meet the eye and the magnificence of their panorama that stretches out in every direcfion as fir as the vision can penetrate. I am some to add, in this connection, that seven-eigh s of the agricultural labor is performed by females; while two or three hundred thousand men in uniform are idling away their time in the barracks of the cities and villages. In the absence of fences, calife, seen ;ed by ropes, are driven about their pasturage by temales; and sheep are confined within the required limits by boys, assisted by a shepherd's dog-Speaking of cattle terminds me that, notwithstanding fresh pork is abundant enough in market, both in be obtained by addressing a line through the Post England and France, I have not seen a live pork.

This is no Quackery ORRICK'S VERMIFUGE

Or Worm Destroyer.
This Medicine contains no Mercury, nor Mineral substance. It is purely Vegetable.
This remedy for worms is one of the most extraor dinary, over used. If effectually eradicales worms of all corts from children and adults.

Thousands petish by worms without the real cause being known. Some other reason is a signed for the sickness, until too late to cure the real cause. What immense responsibility reals upon the paren who does not know, and the doctor who does not un de stand, the complaint which is destroying those procious flawers of life-children.

What should be done?
The answer is plain. Give the Vermituge, which will be sure to do good if they have, no worms, and if they have, it will destroy and evadicate them with a certainty and precision truly uslomishing.

There is no mercury or mineral in it. Mercury is the basis of most worm remailes; and the remedy is sometimes worse than the disease. So never the logenges, but rely upon this Every person will be con-vinced on one trial that it is the most perfect cure

ever invented. The immense sale that this Vermilone has, is a sure test of its value and the extimation in which it is held by families. It would be quite too expensive to pullish the volumes of certificates that have been given for this atticle, and the users of it are requested to spread the name to all persons whom they think will be benefitted by it.

Speak of it in all families, and you will do your du ty to your follow creatures, and feel assured of the apobation of all good men, and will receive your reward

We call on all good citizens to make known the ef fects of this wonderful remedy.

Remember, and ask for Orrick's Vermifuge.

Startling Facts. Hundreds of children and adults are lost yearly with vorms, when some other cause has been supposed to

It is admitted by all doctors that scarce a. man, wonan, or child exists, but what sooner or later are troubled with worms, and in hundreds of cases, sad to relate, a supposed fever, scarlating, cold, or some other ailing carries off the flower of the human familywhile in truth they die of worms! and sthese could have been eradicated in a day, by the use of one bott le of ORRICK'S VERMIFUGE.

How sickening the thought that these things should be-and who can ever forgive themselves for not try-ing this WORM EXTERMINATOR, when they know that even if the case was not worms, this reme dy could not by any possibility do hurt-but always good as a purgative, let the cleans be what it may. good as a purgative, let the cireme ne what is may. How important then to use it, and who will dare to take the responsibility to do without it! Let all particles the sessions of the control of the con rents ask themselves this question in truth and solve
