Flesh for Hens. It you keep hens, and desire to render them source of profit, as well as luxury, see that they are liberally supplied with flesh. The fish taken in ordinary streams, afford an excellent and most grateful substitute for the flesh of animals, and can generally be obtained in almost any desirable quanti y, and at comparatively small expense. When at large, the hens is camivorous, and procures much of her daily food from the resources of the insect world, devoaring almost indifferently, and with tatie discrimination, all such insects, bugs, flies and worins, as fall in her way. These promote focunday, and in situations where she is deprived of the polyllege of carering for herself, either these, or some adequate substitute, in the form of more sol! il viands, must be engined for she will cease to Ly. Neglect of this, is the principal cases why hers, closely confined, are so generally, complained of as unprofitable.

Heaves in Horses.

It has of on been remarked to us that the disease in horses called the " heaves" is more prevalent stair rods and hidrs, fadios' and gentlemen's pocket now than it was formerly. We cannot say whether vias a fact that there are more horses troubled with this disorder than there used to be, or whether, as broshes; trus and steel dipples and hipple wrenches; shot, shot there are more horses now in existence, there consequently more seen troubled in this way, while hinges. Also in intracturing and will keep constantly the comparative number or diseased ones may be en hand a large ascertment of the same. We have never been fully satisfied in regard to the real cause of this disease, or the real composed in part of the following patterns and sizes: soat of it. Every one, however, can soon disting Republican air tight Cooking Stove, guish the symptoms. It consists in a difficulty of breathing, -the flanks or respiratory muscles seem to do the whole work, and that, too very laborious- Iron King, ly. The air is drawn into the lungs when the mus. Improved Premium cles at the flanks begin to draw in as if pushing on the breath, and after pressing in with a good Cottage deal of action, they drop suddenly as if a catch or Cylinder spring had let go of them, and they fe'll by their Air tight own weight. There is also a dry, backing cough Six plate Stoves, attending the disease, and on driving the horse quick, the cough is often excited, and this laborious breathing is brought on very severely. This would seem to fix the seat of the disease in the lungs We have nonced, however, that heavy horses, as they are called, are generally enormous eaters, and it suffered to eat as much as they desire, will fill [their stoinachs to a most uncomfortable extent, and when thus distended, are much worse troubled then when sparingly fed.

Many causes have been alleged as producing this prevalence—such as leeding more freely on olover hay than formerly-dusty hay, caused by the smother of the modern horse-power threshing machine, in barns where hay is kept, &c., &c. I would seem, from the fact of an increased or morbid appetite in the horse, that the stomach has also taken on diseased action.

Various remed as have been proposed, and some of them relieve or palliate the disease for a time. We believe that care and attentions in feeding is of great consequence. Don't let him fill his stomach too full with dry food. Let his food be moist, and of a nature that contains much noun-lineart in small bulk. You do not find heavey horses troubled much with this complaint while they are at grass. Then let their food approximate as near to the condition of grass as you can. Cut the hay-wet it, and sprinkle on meal.

A writer in a recent number of the Rural New Yorker, (I Libbey, of Eagle Harbor, N. Y.) speak- HABTES, DADDES, DEIDES, ing of this diseaso, attributes it to feeding on clover hay that has become dusty in consequence of its being bailly cured. He says he treated a horse that he owned, and that had the heaves, in the following manner:- He took the hay entirely away from him and fed him with straw, mill feed, (-horts, &c , we suppose;) and grain. He thinks if he had cut the straw and wet it with out or corn meal, it would have been better; but as it was the heaves did not tiouble him much.

Those who have good horses that are troubled with heaves and most heavey horses are those which are naturally roost strong and active-should furnish themselves with a straw-cutter and a musictub, and give them cut and moistened feed. They will thus not only keep their horse more economically, but will imp ove his health and keep him in a confortable condition for any kind of labor.

May we add to the above, from the Maine Former, that a single feed of carrots per day is the best preventive from the heaves in horses. Many of our friends have tried this remedy, and so long as they continue the use of carrots, the diseased horse

Reduce the quantity of grain one-third, and substitute carrots in its place, is our rule, and horses seem to be rendered pill-proof, requiring no medicine, and enjoying fine spirits, loose hides, fine wate, and ability to perform full work .- [Er.

This is no Quackery! ORRICK'S VERMIFUGE Or Worm Destroyer.

This Medicine contains no Mercury, nor any other Mineral substance. It is purely Vegetable. This remedy for worms is one of the most extrao linary, ever used. It effectually eradicates worms of all sorts from children and adults.

Thousands perish by worms without the rest cause being known. Some other reason is assigned for the sickness, until too late to cure the rest cause. What immense responsibility reats upon the parent who does not know, and the doctor who does not un-derstand, the complaint which is destroying those pre-

cious flowers of life-children. What should be done? The answer is plain. Give the Vermifuge, which will be sure to do good if they have, no worms, and they have, it will destroy and eradicate them with

ensinty and precision truly: astonishing. There is no mercury or mineral in it. Mercury the basis of most worm remedies; and the remedy cometimes worse than the disease. So never use lozenges, but rely upon this. Every person will be convinced on one trial that it is the most perfect cure ever invented.

The immense sale that this Vermifuge has, is a sure test of its value and the estimation in which it is held by families. It would be quite too expensive to pubsh the volumes of certificates that have been given for this article, and the users of it are requested to pread the name to all persons whom they think will be benefitted by it.

Speak of it in all families, and you will do your du y to your follow creatores, and feel assured of the approbation of all good men, and will receive your teward n heaven. We call on all good citizens to make known the ef

fects of this wonderful remedy.

Remember, and osk for Orrick's Vermifuge.

Startling Facts. Hundreds of children and adults are lost yearly with worms, when some other cause has been supposed to

It is admitted by all doctors that scarce a man, wo man, or child exists, but what sooner or later, are troubled with worms, and in hundreds of cases, sad to relate, a supposed fever, scarlatina, cold. or some other niling carries off the flower of the human familywhile in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE.

How sickening the thought that these things should ing this WORM EXTLEMINATOR, when they know that even if the case was not worms, this remedy could not by any possibility do hurt-but always good as a purgative, let the cisense be what it may, How important then to use it, and who will dare to take the responsibility to do without it? Oriental or Sovereign Balm Pills

NONE Genuine unless accompanied by a fac similar le of the above Engraved Wrapper of Dr. E. L.

SOULE & Co., upon each box. In affering to the public this justly celebrated 80V EREIGN BALW OF LIFE, it is not our wish to make any false statements or wild assertions of their superior efficiency in restoring to health the sick and suffering, well knowing that their reputation as a STANDARD MEDICINE is of itself sufficient refer-

nce for the afflicted.

Many proofs might be given of their value on paper, but we prefer those unacquainted with them to satisfy themselves by enquiring of living witnesses and trying the Pills. They will find them perfectly safe and reli able in all cases, being purely vegetable, and a medicine worthy their best confidence and patronage. The following certificate was sent us for the public

HENRIETTA, Monroe Co. N. Y., May 10, 1851. We the undersigned, enizens of Henricus, having used personally Dr. Soule's Sovereign Balm Pills and witnessed the health-restoring effects thereof, cheerfully recommend these Pills to the afflicted as the best with
