THE FARMER'S SONG.

Away with grandeur, pomp and gold, Away with childish ease; Give me but strength my plough to hold, And I'll find means to please.

Tis sweet to toil for those we love-My wife and dailing boys; tend to make my labor prove

The sweetness of my joys. The sweetest morsel I procure, When labor makes it sweet,

Is eaten with a taste more pure Than meats that monarche cat. 'I'is mine-yes, 'tis my happy lot, To own but this secluded cot,

Sweet friends and liber v.

Thus I no Monarch on his throne Can grudge his destiny. Let him his weight of cares bemoan,

Whilst I am truly free. When labor wearies and grous dull, I take my back or gun, Thus I the sweetest pleasure cull, And thus all sorrow shun. .

Now tell me, all ye gonty train, Who have what fortune gives, Is not the cheerful country swain, The happiest man that lives !

The Best time to cut Timber.

In the Agricultural Department of the Report from the Commissioner on Patents, William Poiner, of Concordville, Ps. makes the following communication:

During an experience of more than forty years, as a plant, practical farmer, I have taken much interest in ascertaining the best season for felling timber, and I now state with confidence, that fencing timber, such as all kinds of oak, chesnut, red hickory and walnut, cut from the middle of July to the last of August, will last more than twice as long as when cut in winter, or common backing time

in spring. For instance, cut a capling, say five or six inches in diameter, tor a lever, in the month of August, at the lowest prices, together with copper and britannia and another of similar quality and size in winter or spring. I know, if the first is stripped of its back, (which, at the present time, runs,) it will raise, as alever, at least twice the weight that can be raised

by the latter. Another great advantage derived from felling timber in the last running of the sap, (the time above specified.) is, that it is neither subject to dry rot, nor to be injured by worms; while oak, cut at this season, if kept on the ground, will season through two feet in diameter, and remain perfectly cound many vears; whereas, it cut in winter or spring, it will be perfectly sap rotten in two years.

For ship building and other purpose where great expense is incurred in construction, the immense adventage of preparing the timber at the proper season must be evident to all I have no doubt a ship built of timber out between the middle of July and the last of August, would last nearly twice as on hand a large assortment of long as one built of timber cut at the usual time, and would bear infinitely more hard usage, as the timbers season more perfectly, and are harder. A few years since, one of the large Government ships, built in Philadelphia, of the very best of materials, but several years in construction, when ordered to Iron King. to be finished and lannehed, was found, upon in- Improved Premium spection to be entirely worthless in many of the Eastern Premium, timbers, (though kept ander cover) from dry rot. | Jenny Lind Parlor Stoves, In all my buildings for many years past, with large Cylinder timbers of white or other oak, this has never occur- Air tight red, nor are they subjected to be worm eaten. Even | Air tight 6 plate Stoves, fire-wood, cut in the proper reason, is worth from 30 to 60 per cent, more than when cut in spring or

Mr. Emerson, in his Report on trees and shrubs, of Massachusetts, asserts that the soft maple cut in September, is three times more lasting than ash or duce, taken in payment. Towarda, June 6, 1951. walnut cut in the winter.

The inference he draws from the facts brought to light by experiment, is this : There are two seasons suitable for cutting wood or timber. If you desire it to last long, cut it during the last of summer or the early part of autumn; if it is wished to clothe the surface of the ground with a new growth of trees, the cutting should be made late in winter.

WHAT MAN IS BIADE OF .- LIEBIG, in his popular lectures on chemistry, gives the following rather startling information as to the material of which an imal man is camposed of. It appears that he only feeds on the "chamelion's dish, the air," but that he is nothing but air himself - It is no wonder that men have such a disposition to be gassy, and that there are so many "blown hards" among the species, when we consider that he is himself nothing but air. Liebig is good authority on such a subject, and therefore, the following which is extracted from one of his lectures, may be received as a gospel:

" Science has demonstrated that man is formed of condensed air (or solid and liquified gases;) that Brick Row, where they will keep on hand a large he lives on condensed as well as uncondensed air : stock of that he prepares his food by means of condensed nir, and by the some agent, moves the heavics: weights with the velocity of the wind. But the strangest part of the matter is, that thousands of these tabernacles, formed of condensed air, and going oh two legs, occasionally, and, on account of the production and supply of those forms of condenced air which they require for food and clothing, or, on account of their monor and power, destroy each othet in pitching battles, by means of condensed air; and further, that many believe the peculiar powers of the bold and conscious, thinking, and sensitive being housed in his tabernacle, to be the result, simply, of its internal structure, and the arrangement of its particles or atoms; while chemistry supplies the clearest proof, that, as far as concerns this, the ullimate and most minute composition and structure, which is beyond the reach of our senses, man is, to all appearence, identical with the ox, or with the animal lowest in the scale of creation."

More Land -The fault of many a farmer is his appelite to: more land. However poorly cultivated. what land he has, he always wants more. The next field must be his. The lences between them may be a good boundary for his neighbor, but not for him. His policy is to buy more land and give manure in homospathic does. There is no lesson so needful for as that derived from the well known story of the Frenchman and his two daughters. When the first daughter was married he gave her for her portion one half of his vinyard, But to his surprise the half he had left, receiving as much pultivation as he had bestowed upon the whole, yielded as much as the whole had done. When the second was married, he gave her the half of what he had left, and still he had as many grapes as before, Same and American

WHEELER'S, & ALSO EMERY & CO'S HEW-YORK STATE ALBICOLTURAL SOCIETY STIRST

Rail Road Horse Power & Tresher, With the Latest and Important Improvements, for

which Patent is secured. THE subscriber takes this method to inform the Farmers of Bradford and the adjoining counties, that he is agent for, and has for sale; the above cel braed and unequalled Horse Power and Threshing Machines, which he is prepared to furnish on the same erms as by the manufacturer, with the addition of the actual cost of transportation, contracted for at the low-

est and best rates.

The subscriber has sold a number of the above machines in this, and the adjuining counties of Chemung and Tioga, N. Y., and all without exception have given the very hest satisfaction, and where they are known, ell farmers give them the preference, on account of economy in threshing, being operated with much less expense, and cracking and wasting much less grain han any other machine in use.

The Two-Horse Power Thresher and Separator is tapable, with three or four men, of threshing from 150 o 200 bushels of wheat or rye, or double that quantity oats, per day.

PRICES. The prices for Emery & Co.'s one Horse Power, \$85 00 Thresher and Separator, 35 00 Bande, wrench, oiler and extra pieces, 5 00-Two-horse Power, \$110 00 5 00-\$125 00 Tresher and Separator. 35 00

and Separator, complete, (improved this Wheeler's two-horse Power, Thresher and Separator, complete, Price of Emery's Tresher and Cleaner, with bands, wrenches, &c.,
o Saw Mill, complete for use,

Also, Wheeler's one-horse power, Thresher,

Bands, oiler, wrench, &c., 5 #0-\$150 00

Price of Grant's Fan Mills, adapted for hand or power, from The subscriber will also the coming season be prenated to furnish to order

EMERY & Co.'s NEW

THRESHER AND CLEANER, The Cleaner has all the advantages of a good fanning mill, cleaning the grain fit for market, wasting none. The additional cost being but little more than a fanning mill, or about thirty dollars-making the whole Thresher and Cleaner cost \$75 to the Parmer, and with Emer. & Co.'s two-horse power, \$185 00.

IT On account of the large demand for the above machines, and the difficulty of immediately filling orders for them, persons wishing to purchase machines should give me timely notice as to what kind and at what time they wish to procure them.

Farmers wishing to do their threshing immediately

after harvest, should procure their machines as early as the first of July. Also for sale A GENERAL ASSORTMENT OF IMPROVED

Miecellapeone. This is no Quackery!

ORRICK'S VERMIFUGE. Or Worm Destroyer. This Medicine contains no Mercury, nor any other Mineral substance. It is purely Vegetable.

This remedy for worms is one of the most extreordinary over used. It effectually erodicates worms of
all sorts from children and adults.
Thousands perish by worms without the real
being known. Some other reason is assigned
sickness, until too late to cure the real cause.
What immense responsibility rests upon the part
who does not know, and the doctor who does not understand, the complaint which is destroving those orede stand, the complaint which is destroying those pre cious flowers of life-children.

What should be done? The answer is plain. Give the Vermifuge, which will be sure to do good if they have, no worms, and if they have, it will destroy and endicate them with a

certainty and precision truly astonishing.
There is no mercury or mineral in it. Mercury the basis of most worm remedies; and the remedy is sometimes worse than the disease. Bo never use lozenges, but rely upon this. Every person will be conver invented. The immense sale that this Vermifuge has, is a sure

est of its value and the estimation in which it is held by families. It would be quite too expensive to pubh the volumes of certificates that have been given for this article, and the users of it are requ spread the name to all persons whom they think wil e benefitted by it. Speak of it in all families, and you will do your du-

obation of all good men, and will receive your neward beaven. We call on all good citizens to make known the ef ects of this wonderful remedy. Remember, and ask for Orrick's Vermifuge.

y to your follow creatures, and feel assured of the ap-

Startling Facts. Hundreds of children and adults are lost vearly with vorms, when some other cause has been supposed to

be the true one.

It is admitted by all doctors that scarce a man, we man, or child exists, but what sooner or later are troubled with worms, and in hundreds of cases, and to relate, a supposed fever, scattating, cold, or some other ailing carries of the flower of the human familywhile in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE

How sickening the thought that these things should he-and who can ever forgive themselves for not try-ing this WORM EXTERMINATOR, when they know that even if the case was not worms, this remedy could not by any possibility do hurt-but always good as a purgative, let the disease be what it may. How important then to use it, and who will dare to take the responsibility to do without it! Let all pa-rents ask themselves this question in truth and sober-
