Caltaroof Cors.

com is already up and flouting its literant follage of his invaluable medicine.

Early last fall, i contracted a violent cold, and in the breeze, in many of our States in which our consequence of which I had chills, alternated with formal circulates, it will be in time in others to ver, pains in my right breast and shoulder blads, with plant for some weeks. Even in our own State, no a bad cough, and no expectoration. I kept getting markeniar day can be set down as a proper one; for worse until I took my bed, and had the attendance of particular day can be set down as a proper one; for. is the effect produced by a few leagues of location. that a difference of several weeks exists as to the proper time of planting, in the remote points of our wen limits. But although it may be considered too early for planting over a vast range of country, it is full time every where for farmers and planters who cultivate this crop, to be looking about them for maware to grow it with; for really at is folly, unless one soil is really rich in organic as well as inorganic elements, to expect a large crop of corn, without giving it plenty of manure. The very structore and size of the plants—their habits and rapid growth-would tell us that such is the fact if costly experience had not long since convicted all obserwing corn growers of the truth of what we here atfirm. Without the elements to form the grain out of-to sustain the stalk, in its wholeness, and to enable it to elaborate and perfect its seed-be in the soil, disappointment must necessarily follow every enempt to grow large or even comparatively pro fliable crops of corn. It what we affirm be true, and we believe every candid, thinking farmer, will say that it is, then it should be the duty of every ong who desires to make corn growing a profitable Sosiness, to make the accumulation of manure a chief principle of his system of larming. It is not sufficient for any one to say, that he has not time to devote to such a subject-for it is alike his interest. and his duty, to take the time. On many farms-especially those having the advantage of wa'er fronts -the materials for making manure are as abundant that it would be an object to keep a hand and team the rank round, engaged in collecting them. On part of winter and the spring, and feel as well now as such estates, substances are to be found in abundance, that it would seem a sin, not to avail one's self of their enriching properties, as there can be no question, but that Providence placed them there some people, I subjoin certificates of a number of the inhabitants of Tacony, who saw me at different times that man might be induced to appropriate them to

the use of his crops.

ing out of it, for upwards of two miles. His shores were lined at different points, with thousands of has been spared, and I am permitted to make the foreloads of the very best kind of materials for compost- going statement for the benefit of suffering mankind. ing into menure; yet he had never used any of them; and the only reason he had to give, was that he could not spare the time necessary to collect them, as if the time and labor which might be thus appropriated, would not result in more profit to him, than any other time or labor bestowed on his farm. We left him with the promise that he would set his hands to collecting and composting the following tall. It he did so we would like to hear what result they may produce on his crops the present season. If he followed our advice, as to the mode of composting the rought materials on his shores, with ashes and plaster, or with barn-yard manure and plaster, we feel very sure that the effect will so tell upon the products of his com crop, the present year, as to make him a believer in the faith which teaches, that the first duty of the tiller of the coil, is to accomulate manure. Neither men nor beast can effectually labor unless he be well stracted in the growing of crops, be replaced-be C. Green, and the circumstances attending his case, resupplied—exhaustion, impoverishment, must be the inevitable consequence. In this replacement the inevitable consequence. In this replacement, and re-supply, one need not be so very choice in tion. So entirely helpless was his condition, having his selection, for all animal—all vegetable bodies, been but a brief period since in that rapidly sinking may be usefully and profitably put in the compost ion of his physicians and friends, who watched by his heap, if you apply the proper leaven to excite fermentation and decay. One load of barn yard or
restoration to his present robust health. Thus the carestable manure, if it be good—it it shall have been up, makesit our belief, under the circumstances of his properly taken care of, or five bushels of ashes, Will be sufficient to convert two loads of march, river or creek mud, or wood mould or leaves, or ditch or road scrapings, or earth from headlands, or the greatest discoverer of this bitherto remediless disfence corners and sides, into good manure. To ev- ease, a lasting monument and a world-wide reputation ery twenty loads of such materials, one bushel of plaster, or from two to five bushels of salt whichev-struggles and sufferings from a continued cough, suer be the most convenient or economical, should be added. Over every layer of the coarse material, plaster, salt, or charcoal dust, should be spread, as and moreover, it being so generally believed by his nuthe compost heaps are being formed, to arrest or economise the volatile principles of the substances. as they may be elaborated by the process of the decay of the rough materials, for in all substances we have named, and all others of kindred nature. there are large percentages of nitrogenious matters -large percentages of those elements which, under the operation of decomposition, generate ammonia, that substance which gives to Guano so much of its active virtues—so much of its agricultural value.— We did not wish to be un lerstood as desiring to convey the idea, that in the production of ammonia, the substances named by us, have any thing like the same quartity in their composition, as are to be found in Guano; for such is neither our belief nor one object; but if applied in quantities named by they will answer fully as well, as do the ordinsry dressing of Guano given to an acre of land. We believe that twenty-horse cart loads of compost, prepared as we have directed, would impart equal present benefit, as would a dressing of 2, 3 or 400 the. Guano; while its effects, in the melioration of the soil, would be much longer continued. We are aware, that the collecting of the materials, and the termation of such compost heaps will occupy considerable time. Be it even so; for time and money sannot be better applied and expended. We know sympations where one man and a team could collect ewenty loads in a day, which would, with the additions we have named, manure an acre of land so that the yield would double-and certainly no one will question the profitableness of such results,

In seeding to com, it is always best to be liberal; allowances should be made for destruction by birds -- loss from retting in the ground, &c. Therefore, it is the safest to drop from five to eight grains in sech hill; in the dropping of which, care should be taken to spread the grains well, so that the plants might not be closed together. We have found the common gips a vary good implement to drop with; by graduation, the bole may be made to hold any number of grains, and thus may uniformity in the number be regulated, and much time saved.

if is rest nother Rescue by his ion C SCHEMOR'S PULMONIC SYRUP Come PLANSING.—The time for commencing lills I my family and friends had lost all hope of my reward differs so much in our expanded country, that covery i and when in this simulation, having been restricted by the use of Schenck's Pulmonic Syrup, I deduce that would be universally proper; for although the impressable benefit I have received from this use

worse until a took my ned, and nad the attendance of my family physician. I was under his care about four weeks, and at the expiration of that time, was reduced so low that despair took hold of myself and friends, and even my physician abandoned me and gave me up to die with the hasty consumption. My appetite was gone, my bowels very friegular, fever and night-gwests, pain in my breast and shoulder, attended with a distressing cough, which was very tight; my flesh careely raise my head from the pillow, and was truly in object of pity to behold. My friends had been sen for to see me dis, and my sick hed was surrounded by kind and sympathizing neighbors, who had come to

witness my departure from this world. When all rays of hope had fird of my recovery, a neighbor, Mr. David Conrad, proposed to try Schenck's Polmonic Syrup, with a view of loosening my cough and relieving me of the tough phlegm, and as a means and relieving me of the togst processing at the time, of allording temporary relief, remarking at the time, that I was too far gone for the Syrup to be of any permanent benefit. My wife, anxious for the relief of my intense sufferings, procured some of the Pul-monic Syrup. I found it afforded me relief, and continued using it. I could feel its healing influence

I continue to improve under its use, and my friends were much gratified to witness my unexpected improvement; many of my neighbors came to look at me

a one raised from the dead. My cough now became loose, and I felt something break, w en I had the pain in my breast, and I die charged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter every day, with hard lumps like grains of somethin My bowels now became regular and natural, and my appetite was so far improved, that I could scarcely re-frain from eating too much. My strength improved,

and I regained my flesh. I continued to improve in every respect soon after commenced using the Syrup, and the improvement continued until I was restored to my health: I have passed through the inclement weather of the latter ever I felt in my life, and I am this day a living testimony of the great efficacy of Schenck's Pulmonic Syrup in curing pulmonary diseases.

Lest this statement be thought too highly colored by

during my disasse, and never expected to see me restor ed. I also append the certificate of the brothers of We were on a visit last summer at a friend's, Mystic Lodge, No. 270, I. O. of O. F., who kindly watched over me, and fully believed they would conwhose estates fronts the bay shore, and creeks maksign my remains to the tomb; but, thanks to Dr. Schenck for his invaluable Palmonic Syrap, my life I reside at Tacony, and am well known by most of the people there, and will be gratified to have any person call upon me and learn more particulars of the virtues of this medicine.

JOHN C. GREEN.

y This is no Queckery!

ORRIGK'S VERMIFUGE This Medicase contains no hiercary, nor and other Mineral substance. It is purely Vegetable.

This remedy for worms so no of the most extraordinary, ever used. It effectually eradicates worms of all sorts from children and adults.

Thousands perish by worms without the real cause being known. Some, other reason is assigned for the elefonest, until two late to cure the real cause.

sickness, until too late to cute the real counc. What immense responsibility rests upon the parent who does not know, and the doctor who does not un-

dentand, the complaint which is destroying those pre-cious flowers of life—children.

What should be done?

What should be done?

The answer is plain. Give the Vermifuge, which will be sure to do good if they have, no worms, and if they have, it will destroy and eradicate them with a certainty and precision truly allouishing.

There is no mercury or mineral in it. Mercury is the hasis of most worm remedies; and the remedy sometimes worse than the disease. So never use los enges, but rely upon this. Every person will be con-

ever invented. The immense sale that this Vermifuge has, is a sure test of its value and the estimation in which it is held by families. It would be quite too expensive to pubthe volumes of certificates that have been given for this article, and the users of it are reguested to spread the name to a persons whom they think will he benefitted by it.

Speak of it in all families, and you will do your duty to your follow creatures, and feel assured of the apobation of all good men, and will receive your reward n beaven.

We call on all good citizens to make known the effects of this wonderful remedy. Remember, and ask for Orrick's Vermifuge.

Startling Pacts.
Hundreds of children and adults are lost yearly with rorms, when some other cause has been supposed to be the true one. Village

It is admitted by all doctors that scarce a man, we man, or child exists, but what sooner or later are tropbled with worms, and in hundreds of cases, and to relate, a supposed fever, scarlatina, cold, or some other ailing carries off the flower of the human family— while in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE.

How sickening the thought that these things should be-and who can ever forgive themselves for not trying this WORM EXTERMINATOR, when they know that even if the case was not worms, this remedy could not by any possibility do hurt—but always good as a purgative, let the disesse be what it may. How important then to use it, and who will dere to take the responsibility to do without it? Let all parents ask themselves this question in truth and sober-

MOUNT PROSPECT BINGHAMTON, N.Y.

THIS institution is located in a beautiful and romantic grove at the base of Mt. Prospect, and within the corporation of the village. Possessed of an abundant supply of the purest soft Water, advantages for exercise in the pure air, of carriage and footwalks' up the mountain, free from the "noise and turmoil of busy life," with excellent sailing and rowing privileges upon the 'pleasant waters' of the Chenango—these are a few of the paesentations the Cure offers to the invalid.

The house is new and commodieus—bathing apparatus excellent-well ventilated; with 230 fee

The Medical department is under the entire care of Dr. THAYER and wife, who have had a large experience in Hydropathic practice, and are favorably known as successful practitioners. Courses of lectures, with full plates and illustrations, will be given throughout the season to the students and patients upon Anatomy, Physiology and Hygiene, for which there will be no additional charges. Females who have been confined to their beds for years, are invited to correspond with us, or give us a call .-Our success in the treatment of those diseases peculiar to women, have given us confidence, and we say to all such even if they have "suffered much of many Physicians," make one more trial.

Terms from \$4 to \$8 per week (payable weekly.) according to room and attention required. Patients will provide for personal use 2 comfortables, 2 blankets. 3 linen or cotton sheets and 6 towels. O. V. THAYER, M.D., Resident Physician. D. W. & H. M. BARNEY, Proprietors.

BLACKSMITHING

A DAM ESENWINE respectfully informs the public that he now occupies the shop where himsel and brother have for years worked, nearly opposite Tomkine foundry, where he is ready to do all work in his line, as formerly in the best manner.
