Dyer. Covington; Hampbren Borden, Tioga; W. H. Elliott, Elmira; A. Tei R. BOWMAN. Montrose : and by all Druggists everywhere.

Very respectfully yours, JOHN J. CLARK. Rector of St. Peter's Char

With such assurance and from such men, as m

difference in sixty-four rows-one and a half acres -of 368 lbs , or 52 bushels, or about 35 bushels to the acro. I should add also, that besides the great difference in the quantity, the corn from the steeped seed, manured with compost, is vasily better than the other, and worth much more pound for pound Try it.

VALUE OF POULTRY MANURE -- It is lamentable and disgusting even to see what a waste is going an in this country of one of the richest and most valuable manures known. We are importing ship loads after ship loads of guano, (sea bird manore.) while hundreds of loads of poultry manure, which it is asserted, is equal in value-is suffered to go to waste, in the United States. Each farmer's to go to waste, and thus the country looses over a million dollars annually ! You do not believe itwe knew your would not. Yet let us calculate-an American can always do this-and see whether we *have any foundation for such an assertion.

There are 21,000,000 people in the United States Would it be too much to suppose that one in thirty of this number kept poultry, which produced one bushel per annum! This would make 700, 100 bushels, weighing 60'lbs. per bushel, equivalent to 21,000 tons. The commercial value of this we will suppose equal to the best Peruvian guano, which is worth \$50 per ton, of 2,000 lbs. This would make one million and filly thousand dollars. Thus our assertion is more than proved.

How TO SAVE IT .- Having learned the value of poultry manure, we suppose our readers would like to know the best method to save it.

First build you a poultry house, if it be no more than a rough scaffolding of poles or slabs, laid upon orotches, forming a double pitch roof, with end boards in winter to keep out the wind and driving storms. Under this place parallel roosts; the manore during the night, then, will all drop down in a narrow row beneath. Here place light loam soout a loot deep, rather wider and longer than the roost, and give it a sprinkling of plaster of Paris an inch thick. When this is covered an inch deep with marrore, give it a laying of loam four inches deep, and an other sprinkling of an inch of plaster and so continue. In the sping, mix all well to gether, keep it free from the rain, and use it at the ratet of one pinto a hill of corn, or corresponding quantity for equashes, cucumbers, pumpkins, melons, onions, strawberries, or any other fruit, vegetable, or gram, requiring rich warm manure, and our word for it, you will have a large crop of superior quality. Thus you will be one of the many who is desirous to benefit himself, and assist in saving more than a million of dollars annually to the conntry.

WOUNDS OF CATTLE -The must aggravated wounds of domestic animals are easily cured with portions of the yelks of eggs mixed in spirits of turpentine. The part affected must be bathed sev. cral times with the mixture, when a perfect cure will be effected in less than 48 hours.

If eight furlongs make a mile, how many would is take to make a camo mile. Isis heuter to souler wrong than to do it.

been but a brief period since in that rapidly sinkin; and emaciate state, as to ut erly preclude, in the opin-ion of his physicians and friends, who watched by his bedside, all hopes of even a temporary recovery and restoration to his present robust health. Thus the care-ful use of your invaluable Specific, the Pulmonic Syrup, maker it our belief, under the circumstances of his previous prostrate, not to say dying condition, one of the most startling results that the whole annals of medi cal skill or science can produce. It deserves to be im perishably recorded to your credit, and secure to you the greatest discoverer of this hitherto remediless di ease, a lasting monument and a world-wide reputation poultry yard produces so hule that it is generally thought a matter of no importance, so it is suffered in the healing art, that no time may either diminish of destroy. Having witnessed Mr. Green's distressing struggles and sufferings from a continued coughr su peradded to the other symptoms consequent upon, or attending to the last stages of a pulmonary disease; and moreover, it being so generally believed by his nu-merous friends that no buman power could relieve, or rotract his life, much less restore him back again to

his former health, we feel it thus our duty to give our unqualified testimony of Mr. Green's perfect recovery by means of the exclusive use of your wonderful Syr up ; and we should indeed rejoice if we could be made he humble instruments of relief and cure to others who may be so unfortunate as to be similarly afficted.
