There are but few crops, perhaps, of greater prac tical importance to the farmer, than that of hay -In most sections of the country, it is the crop on which he mainly relies for sustenance for his domestic spimals during a long and inclement period of the year-the winter, and no inconsiderable portion of the fall and spring. But notwithstanding its universality and high value, it is, and even has which no fixed system—as in the case of grain—has ever yet been recognized. While one farmer prefers to cut and make his hay in the very houtest weather, and with as much exposure to the solar influence as possible, another deprecates such exposure as highly injurous. As tending to the the posure as highly injurous, as tending to tob the plants of much of the rich juice and saccharine gum which they contain, and which to most grasses owe an object of pity to behold. My friends had been see their principal value when used as hay, or an aliment for slock. For one I do not he sitate to express my candid conviction that a very large proportion of the hay annually produced in this country is injured heighbor. Mr. David Conrad, proposed to try Schenck's Pulmonic Syrup, with a view of loosening my cough the sun. When grass is cut in full bloom, and the sun. When grass is cut in full bloom, and of efforting temporary relief, remarking at the time, and the sun. made in grass cocks, with just enough exposure to "that I was too far gone for the Syrup to be of any "the sun and air to wilt it before it is cocked, it is permanent benefit," found to retain not only its color and elasticity unimpaired, but its fragrance also, especially it care. tinued using it. I could feel its healing influence fully secured and packed in the mow. The follow ing directions are recommended for observance by those who wish to prove the advantages of the new over the old practice:

Grass should be made into cocks of about four feet high, not by rolling, but by laying one fork full up on another, of small diameter at the base as possible to stand firm; draw out the loose hey from the every day, with hard lumps like grains of something. bottom all around and lay it upon the top with the bottom all around and lay it upon the top with the ends hanging downward. When grass is put to- frain from eating too much. My strength improved,

It will be proper to give them an airing before they are removed to the barn, and more especially that portion which comes in contact with the ground. When necessary, the first drying wind and lair day lay them over by putting the top of the cock on the Syrup in curing pulmonary diseases. ground, so manage after by putting as dry a bundle with the green, till you have one cock made up again, out of two being put together. By this fermation will evolve or discharge a portion of heat, and thus promote the drying of the hay, by increasing the evaporation of the humind particles. By this treatment the hay is secured un il the maker wishes to remove it to the barn.

Clover hay should remain longer in the cock than most other grasses, that all the larger stems may undergo their proper fermentation. Before removing to the stack, yard, or barn, we generally um the bottom side up an hour or two before load-

Exercise.

Many people look upon the necessity man is under of earning his bread by labor as a curse. But it is evident from the structure of the body, that exercise is not less necessary than food for the preservation of health. Those who labor are not only the most healthy, but generally the most happy part of mank'd. This is peculiarly the case with those who of inhabitants in infant colonies, and the longevity every where, of such as follow agriculture, evidently prove it to be the most healthful as well as the most useful employment.

The love of activity shows itself very early in man. So strong is the principle, that a healthy youth council be restrained from activity. Our love been but a brief period since in that rapidly sinking of motion is surely a strong proof of its utility. It and emacia'c state, as to ut'erly preclude, in the opin seems to be a law throughout the whole animal bedside, all hopes of even a temporary recovery and creation, that no creature without exercise should enjoy health or be able to find subsistence.

laxation of the solids, which disposes the body to the most startling results that the whole annuls of mediinnumerable diseases. When the solids are relax. | cal skill or science can produce. It deserves to be imed, neither the digestion or the secretions can be duly performed. How can persons who loll all day on easy chairs, and sleep all night on beds of down in the healing art, that no time may either diminish of fail to be relaxed? Nor do those much mend the matter, who never stir abroad but in a coach.

Glandular obstructions generally proceed from inactivity. These are the most obstinate maladies .-So long as the liver, kidney and other glands, duly performtheir functions, health is seldom much im. paired; but when they fail, it is difficult to be re-

Weak nerves are also the constant companions of inactivity. We seldom hear the laborious complain of weak nerves. This plainly points out the resources from which nervous diseases generally originate, and the means by which it may be pregented.

It is absolutely impossible to enjoy health, where the perspiration is retained in the body; it vitiates the humors, and occasions the gout, rheumatism

No piece of indolence injures the health more than the custom of lying in bed too long in the morning, the morning is undoubtedly the best time for exercise, as the air braces and strengthens the nerves. Custom soon renders early rising agreeable and nothing contributes more to the preservation of good

Every person should lay himself under some necessity to take the exercise. Indolence, like other vices, when indulged, gains ground, and at length becomes agreeable. Hence those who are fond of exercise in the early part of life, become quite averse to it afterwards. This is often the case with godly or hypochondriae persons, and frequently renders their cases very difficult to be

THE ROLLER.—The roller is by many farmers considered an indispensable implement, especially in the cultivation of light sandy soils. If dry weather succeed the sowing of grain, rolling is absolutely necessary to press the earth upon the seeds, and ly necessary to press the earth upon the seeds, and our order, from our own designs and patterns, and J. Dorrance, G. M. Hollenback, Ziba Bennett and H. prevent the escape of moisture. Wheat requires stand unrivalted. We offer our goods for nett Cash, B. Wright all of Wilkesbarre, whose names appear a moist tenzoious soil, and the fact has been fully demonstrated that when the field is rolled after it is sown, it will come up from one to three days sooner and grow more vigorously than it would on a portion of the same field that is not rolled. Besides the advantages derived from pressing the earth firmly about the seed, the volatile properties into Habits, Sleeves, Cuffs, Edgings and Insertings, Emcontact with each other, as is done by plowing and harrowing, are prevented from escaping, and producing a saldtary effect upon the kernel in hastening vegetation. Another advantage is, where the land is seeded down to grass it gives a smooth, even Staw Bonnets and Trimmings. suctace to mow,

Medical.

Another Rescue by SCHENCE'S PULMONIO SYRUP Twas on the verne of the grave, and so far some that my family and friends had lost all hopes of my recovery; and when in this situation, having been research by cued by the use of Schenck's Pulmonic Syrup, I do size to testify, with grateful emotion to Dr. Schenck the unspeakable benefit I have received from the us

of his invaluable medicine.

Early last fall, I contracted a violent cold, and consequence of which I had chills, alternated with for ver, pains in my right breast and shoulder blade, with a bad cough, and no expectoration. I kept getting worse until I took my bed, and had the attendance of had nearly all gone, and was so weak that I could scarcely raise my head from the pillow, and was truly for to see me die, and my sick hed was surrounded by kind and sympathizing neighbors, who had come to

witness my departure from this world. When all raws of hope had fled of my recovery. My wife, anxious for the relie of my intense sufferings, procured some of the Pulmonic Syrup. I found it afforded me relief, and con-

apon my lungs.
I continue to improve under its use, and my friends were much gratified to witness my unexpected improvement; many of my neighbors came to look at me is one raised from the dead.

My cough now became loose, and I felt something break, w en I had the prin in my breast, and I discharged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter My bowels now became regular and natural, and my

gether in this manner, it is in a great measure out of danger.

I continued to improve in every respect soon after I commenced using the Syrup, and the improvement continued until I was restored to my health. I have passed through the inclement weather of the latter art of winter and the spring, and feel as well now as ever I felt in my life, and I am this day a living testimony of the great efficacy of Schenck's Pulmoni:

Lest this statement be thought too highly colored by some people, I subjoin certificates of a number of the inhabitants of Tacony, who saw me at different times during my disasse, and never expected to see me restortreatment there is a more speedy exhalation of ed. I also append the certificate of the brothers of moisture by the action of the air, while an incipient Mystic Lodge, No. 270, I. O. of O. F., who kindly watched over me, and fully believed they would consign my remains to the tomb; but, thanks to Dr. schenck for his invaluable Palmonic Syrup, my life has been spared, and I am permitted to make the foregoing statement for the benefit of sufering mankind. I reside at Tacony, and am well known by most of the people there, and will be gratified to have any person call upon me and learn more particulars of the virtues of this medicine.

The subscribers, members of the Mystic I od re, No 270. I. O. of O. F. of Holmesburg, Po. do hereby certify that we know John C. Green. (and is a member in good standing in No. 270 L. O. of O. F.) who was dangerously ill with a low Pulmonary Consumption last winter, so that they give him rp .o die; that be is now fully restored to perfect health, and they he' eve his recovery was produced by Schenck's Pulmor

We believe his certificate is correct in every HENRY NEFF, P. G. ALFRED ROBINSON, P. G. ABI AHAM ARTHUR, P. G. J. K. OSMAN, N. G. JACOB WATERNAN, JR.

JAMES C. CALVER. JOSHUA PHINEMORE.

The undersigned, residents of Tacony, eight miles bove Philadelphia, being well acquainted with John C. Green, and the circumstances attending his case, eel impelled by a deep sense of imperative duty, to make universally known to the public his entire recovery from the very last stages of l'ulmonary Consumption. Bo entirely helpless was his cardation, having restoration to his present robust health. The sthe careful use of your invaluable Specific, the Pulmonic Syr-Inactivity never fails to produce a universal re- up, makesit our belief, under the circumstances of his perishably recorded to your credit, and secure to you, the greatest discoverer of this hitherto remediless disease, a lasting monument and a world-wide reputation destroy. Having witnessed Mr. Green's distressing struggles and sufferings from a continued cough, struggles

peradded to the other symptoms consequent upon, or attending to the last stages of a pulmonary discuse : and moreover, it being so generally believed by h's aumerous friends that no human power could relieve, or protract his life, much less restore him back again to his former health, we feel it thus our duty to give our

unqualified testimony of Mr. Green's perfect recovery; by means of the exclusive use of your wonderful Syrup; and we should indeed rejoice if we could be made the humble instruments of relief and cure to others who may be so unfortunate as to be similarly affleted. Medical.

This is no Quackery! ORRICK'S VERMIFUCE.

Or Worm Destroyer. Medicine contains no Mercury, nor any other Mineral substance. It is purely Vegetable. This remedy for worms is one of the must extraorlinary, ever used. It effectually oradicates worms of ll sorts from children and adulte.

Thousands perish by worms without the real cause being known. Some other reason is assigned for the ickness, until too late to cure the real cause. What immense tempossibility rests upon the parent who does not know, and the doctor who does not un-derstand, the complaint which is destroying those pre-

cions flowers of life-children. What should be done? The answer is plain. Give the Vermifuge, which will be sure to do good if they have, no worms, and if they have, it will destroy and eradicate them with a certainty and precision truly astonishing.

There is no mercury or mineral in it. Mercury the basis of most worm remedies; and the remedy cometimes worse than the disease. So never uso lozenges, but rely upon this. Every person will be con-vinced on one trial that it is the most perfect cure

The immense sale that this Vermifuge has, is a sure test of its value and the estimation in which it is held by families. It would be quite too expensive to pub-lish the volumes of certificates that have been given for this article, and the users of it are requested to spread the name to a persons whom they think will be benefitted by it.

Speak of it in all families, and you will do your du-

ty to your follow creatures, and feel assured of the apbation of all good men, and will receive your reward n heaven. We call on all good citizens to make known the ef

fects of this wonderful remedy.

Remember, and ask for Orrick's Vermifuge. Startling Facts. Hundreds of children and adults are lost yearly with vorms, when some other cause has been supposed to

be the true one. It is admitted by all doctors that scarce a man, or child exists, but what sooner or later are troubled with worms, and in hundreds of case. ad to relate, a supposed fever, scarlating, cold, or some other while in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE.

How sickening, the thought that these things should be—and who can ever forgive themselves for not try-ing this WORM EXTERMINATOR, when they more that even if the case was not worms, this remedy could not by any possibility do burt—but always importance. I take it for granted that every person change of clima to all one make of clima to all one and much good as a purgative, let the disease be what it may. I will do all in their power to save the lives of their was followed by a very color much much show important then to use it, and who will date to children, and that every person will endeavor to protect the first and who will date to children, and that every person will endeavor to protect the first all passenges.
