The helmet and the spear Are twined with laurel wreath;
But the trophy is wet with the Orthans' tear,
The bloody spots rest beneath.

I love to see the field That is moist with purple stain; But not where bullet, sword and shield Lie strewn with the gory slain.

No, no; 'tis when the sun Shoots down his cloudless beams. Till the rich and bursting juice-drops run On the vineyard earth in streams.

My glowing heart heats high At the sight of shiping gold; But it is not that which the miser's eye Delighteth to behold.

A brighter wealth, by far. Than the deep mine's yellow vein is seen around, in fair hills crowned With sheaves of burnished grain.

Look forth, ye toiling men ; Though little ye possess. Be glad that dearth is not on earth To leave that little less.

The feast that warfare gives

Let the song of praise be proud. In gratitude and joy,
By the the rich man, with his garners stored, And the ragged gleaner boy.

Is not for one alone;
"Tis shared by the meanest slave that lives,

Then glory to the steel That shines in the Reaper's hand; And thanks to God, who has blessed the sod

What is Practical Farming?

And crowns the harvest land.

Will any of our readers inform us who are the practical farmers? Is it those that have a practical knowledge of all the truths connected with agriculture, and industry enough to put their knowledge to use? Must not a practical farmer necessarily be a scientific one? Does "science mean knowledge reduced to a system, so as to be easily taught, and readily understood," or does it mean something else? Does it render a tarmer less practical it he writes what he ascertains as truthe, and permits these truths to be printed for the benefit of others? If he reads truth ascertained by other farmers, and adopts what his scientific knowledge enables him to select as such, is he less a practical farmer?-What is meant by book farming? Can it be such a man as represented above; or is every practical person call upon me and learn more particulars of the virtues of this medicine.

JOHN C. GREEN. farmer necessarily a book farmer! Can it be supposed that any one man exists, who, without books and from his own observation alone, has surpassed the acquirements of a world for 6000 years; and if this is not a supposable case, how can any man as sume to be a practical farmer without being a book farmer, so far as to know what others have done before him? If this is not so, how is it that no one farmer lived one hundred years ago who knew the truths which have since been ascertained. We should advise those who deride the ambitious and spirited investigators after truth, by calling them book farmers, to convince themselves of their folly by employing lawyers and divines who are practical without ever having used books, unread judges, doctors who have their own experience alone, and ness, than to decide the more active minded mem-

bers of the fraternity. march of improvement has taught men to tear apart | up; and we should indeed rejoice if we could be made the constituents of any substance in nature and to know with certainty what they are, that some should suppose that as otheris held charms and process not encompassed by analysis.

Can any reasonable man suffrose that a plant can grow better, and increase more rapidly, in soils not containing the simples of which by analysis we know it to be formed, than one replete with all the required constituents; and yet we have many who would a gue that chemistry can furnish no instruction to the farmer. We claim no special knowledge not common to any inquiring agriculturist, and yet we have advised modes of culture for more than 200 farms, including manures ascertained to be required by chemical investigation. Will any of these tault finding haters of book farming furnish Troy; G. A. Perkins, Athens.

Troy; G. A. Perkins, Athens.

All letters addressed to DR. J. H. SCHENCK, while we stand ready to prove that in no case have failed to increase the crop 25 per cent. or more, without corresponding increase of expenses. Nor do we stand alone in such practices; hundreds of others have produced similar results steadily and underiatingly, and without any special instances being selected to register their success .- Agricultural Journal.

TIME TO CUT TIMBER -Timber cut from the first of September to the middle of December will not sprout much, and the stumps will rot in half the time they would if timber was cut at any other season of the year; but if the stumps are barked down close to the ground, they will not sprout, no matter at what time the timber may be cut. The best season for cutting rails, is when they will back easy; which is during May and the beginning of June. For backing fruit trees, so as to give them a new bark, the best time is from the 20 to the 25 of June. If it is done carefully, a new bark will ALI, persons indebted to the estate of AMOS grow almost immediately. The operator must be hereby requested to make payment without delay; and all persons having demands against said estate oft, as that will pervent the new from growing.

A good reputation is better than a fine coat. in almost any kind of business-except wooing a fashionable lady.

Aledical.

Another Rescue by SCHENCE'S PULMONIC SYRUP.

I was on the verge of the grave, and so far gone that my family and friends had lost all hopes of my recovery; and when in this situation, having been rescued by the use of Schenck's Pulmonic Syrup, I desize to testify, with grateful emotion to Dr. Schenck. the unspeakable benefit I have received from the use of his invaluable medicine.

Early last fall, I contracted a violent cold, and in

consequence of which I had chills, alternated with fe er, pains in my right breast and shoulder blade, with a bad cough, and no expectoration. I kept getting worse until I took my bed, and had the attendance of my family physician. I was under his care about four my lamny paysician. I was under ins care about our weeks, and at the expiration of that time was reduced so low that despair took hold of myself and friends, and even my physician abandoned me and gave me up to die with the hasty consumption. My appetite was gone, my bowels very irregular, ferer and sweats, pain in my breast and shoulder, attended with a distressing cough, which was very tight; my flesh had nearly all gone, and was so weak that I could scarcely raise my head from the pillow, and was truly an object of pity to behold. My friends had been sent or to see me die, and my sick hed was surrounded by kind and sympathizing neighbors, who had come to witness my departure from this world.

When all rays of hope had fled of my recovery. neighbor, Mr. David Conrad, proposed to try Schenck's Pulmonic Syrup, with a view of loosening my cough and relieving me of the tough phlegm, and as a means of affording temporary relief, remarking at the time, "that I was too far gone for the Syrup to be of any permanent benefit." My wife, anxious for the relief of my intense sufferings, procured some of the Pul-monic Syrup. I found it afforded me relief, and continued using it. I could feel its healing influence

upon my lungs. I continue to improve under its use, and my friends were much gratified to witness my unexpected improvement; many of my neighbors came to look at me as one raised from the dead.

My cough now became loose, and I felt something break, w en I had the pain in my breast, and I discharged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter every day, with hard lumps like grains of something. My howels now became regular and natural, and my appetite was so far improved, that I could scarcely re-frain from cating too much. My strength improved, and I regained my flesh.

I continued to improve in every respect soon after I commenced using the Syrup, and the improvement continued until I was restored to my health. I have assed through the inclement weather of the latter part of winter and the spring, and feel as well now as ever I feit in my life, and I am this day a living testinony of the great efficacy of Schenck's Pulmonic Syrup in curing pulmonary diseases.

Lest this statement be thought too highly colored by some people. I subjoin certificates of a number of the nhabitents of Tacony, who saw me at different times uring my disease, and never expected to see me restored. I also append the certificate of the brothers of Mystic Lodge, No. 270, I. O. of O. F., who kindly watched over me, and fully believed they would con-sign my remains to the tumb; but, thanks to Dr. Schenck for his invaluable Pulmonic Syrup, my life has been spared, and I am permitted to make the foregoing statement for the benefit of suffering mankind. I reside at Tacony, and am well known by most of the people there, and will be gratified to have any

The subscribers, members of the Mystic I odge, No. 270, I. O. of O. F. of Holmesburg, Pa. do hereby cer-uly that we know John C. Green, (and is a member in good standing in No. 270 I. O. of O. This is no Quackery! ORRICK'S VERMIFUGE

zing known. Some other reason is assigned for the uckness, until too late to cure the real cause." What immense responsibility rests upon the parent who does not know, and the dector who does not understand, the complaint which is destroying those pre-cious flowers of life—children.

What should be done? The answer is plain. Give the Vermifuge, which will be sure to do good if they have, no worms, and if they have, it will destroy and eradicate them with a certainty and precision truly astonishing. There is no mercury or mineral in it. Mercury is the basis of most worm remedies; and the remedy is

sometimes worse than the disease. So never use lozenges, but rely upon this. Every person will be convinced on one trial that it is the most perfect cure ever invented. The immense sale that this Vermifuge has, is a sure test of its value and the estimation in which it is held by families. It would be quite too expensive to publish the volumes of certificates that have been given

for this article, and the users of it are requested to pread the name to a persons whom they think will e henefitted by it Speak of it in all families, and you will do your duty to your follow creatures, and feel assured of the apobation of all good men, and will receive your teward

We call on all good citizens to make known the ef fects of this wonderful remedy.

Remember, and ask for Orrick's Vermifuge.

Startling Facts.
Hundreds of children and adults are lost yearly with orms, when some other cause has been supposed to be the true one.

It is admitted by all doctors that scarce s man, or child exists, but what sooner or later are relate, a supposed fever, scarlatina, cold, or some other ailing carries off the flower of the human family while in truth they die of worms! and these could have been eradicated in a day, by the use of one bottle of ORRICK'S VERMIFUGE.

How sickening the thought that these things should be-and who can ever forgive themselves for not trying this WORM EXTERMINATOR, when they know that even if the case was not worms, this reme dy could not by any possibility do hurt—but always good as a purgative, let the disease be what it may. How important then to use it, and who will dare to rents ask themselves this question in truth and sober-
