early culture: Do not plow sandy lands in the fall Rake up leaves from the woods as they fall, and put them in the compost heaps. Cart headlands to the manure sheads. Have a good supply of male rials suitable for bedding, near the stables. Do not attempt to fatten more caule than you can fully supply with food, or they will not afterwards flourish be brought up in flesh at an outlay which will pay, if neglected early.

Skin old woods of the surface soil, and replace half its value as manure with lime and ashes in the woods, and both farm and wood and will gain by the exchange. Get all the night-soil you can, and mix it with head-lands, &c., for the compost heaps Wet the compost heaps with salt lye from the soapboilers, if you can get it. Use half a bushel of reinso salt to every cord of compost, to prevent te crops, boots, turnips, carrots, &c., on high places, and cover with one inch of dry straw, and then with twelve inches of dry soil; teave smal. openings at the top for the escape of air, and dig s trouch around the heap with a gutter leading off to the then when found in the hog manure; and to secme the first condition, cook it before feeding to hogs, or your manbre will be very rich, at too high a cost, Mr, Ellsworth has satisfactority proved that one pound of cooked corn will make more pork sthan two pounds fed in the raw state.

Have analysis made of your soils, so as to be able to provide the necessary manures during winter, for

Kirchen Garden .- Thin out turnips by pulling the large ones for market, leaving the smaller to increase in size. Prepare for gathering fall crops; gather such as the weather may demand. Continse to weed spinage, &c. Earth up celery on dry days, after the dew has dried off. Prepare frames for parsley, lettuce, cabbage, cauliflower, and such other plants as were sown last month. Put away vegetables by the latter part of the month for protection, and sales during winter. Potatoes should be cellared or put in pits or piles, so as to secure them from wet and frosts.

In taking up roots and storing them, begin with the most tender, and take advantage of dry weather while you have it.

Expose pumpkins and winter squashes to the sun and wind, placing them on a dry board before storing them. Pack beets in sand in cellar, or put them in pits. Horse-radish may now be dug for use as wanted, leaving the old stools for future pro-

Weeding at this time should not be considered as useless, and indeed the removal of parasites add materially to their profitable culture and earlier

FRUIT GARDEN AND ORCHARD - Hardy trees should be removed in autumn. Manure unthritty trees -Top-dress strawberry beds late in the month. Bank up trees to prevent the attack of mice. Lay down and protect tender grapes. Grape layers may be preserved .- Working Furmer.

Drying Apples.

As this is the proper season for drying fruit, a few remarks on drying apples may be of some advantage to our readers.

Apples intended for drying should be gathered as much as possible without bruising—the best way is to hand pick the largest and ripest of them .-Wine-falls, and those that are shaken down, should have every practicle of bruise taken out unless they are immediately out and placed to div.

In cutting and paring the Iruit, great care must be taken with all thick skinned varieties, to remove all the skin; but some kinds with thinner and tender skins, are frequently dried without paring. A machine for paring is used in this neighborhood, by means of which one parer can supply five or six cuttors with pared apples. When the apples have been quartered, the seed vessels should be taken out carefully, and the piece again divided.

Racks for drying may be made in a cheap and durable manner by an oblong frame of pine strips, and nailing on plastering lath for the bottom.

When apples are dried in the sun, they are near ty always preyed upon by wasps, flies, &c., which destroy many of the pieces, and cover the whole with their dirt. Our mode is to dry them in a kiln constructed for the purpose A close structure of boards is built maide of an out-house, with an old store below, in which is kept a steady fire, and successive tiers of racks above, which may be shifed up and down at pleasure.

After drying, the apples may be tied up in a stout .bag, and suspended from a nail or rafter, to preserve them from dampness and vermin.

The Maiden's Blush and Birmingham varieties pre most approved for drying in this vicinity, but there are doubtless others equally as good Germantouen Telegraph.

But Fires .- But flies which are so tormenting to horses in the fall of the year, may easily be prevented from stinging them under the jaw, by placing a "bib" there, hong on the throat-strap, and ' tied at the lower corners to the rings at the bit of the

FEATILITY IN CLOVER ROOTS -R. W. Curries informs us in the Granite Cormer that he has found by experience that the roots of a good thickly sown crop of clover, by two years tolling is worth as much as twelve or fifteen loads of manure,

I would ever wake with Gop. My first thoughts are for Him who hath made the night for rest and he day for travel .- Bishop Hall.

Aliacellaneons.

Another Rescue by ECHENCR'S PULMONIC EYRUP I was the verge of the grave, and so far some that I me family and for the had toot all hopes of my recovery and other in this fituation, having been recurd by the see of Schrock's Pulmons Syrap, I desire to tearly, with grafeful tenesion to be. Schrock, the unspeakable for fift have acceived from the use of his invaluable medicine.

Early lust fall, I contracted a violent cold, and in consequence of which I had chills, alternated with fewer, pains in our right breast and shoulder blade, with

ser, pains in my right breast and shoulder blade, with a bad cough, and no expectoration. I kept getting worse until I took my bed, and had the attendance of ny family physician. I was under his care about for weeks, and at the expiration of that time was reduced so low that despair took hold of myself and friends and even my physician abandoned me and gave me up to die with the hasty consumption. My appetite mas gone, my bowels very irregular, lever and sweats, pain in my breast and shoulder, attended with a distressing cough, which was very tight; my firsh hal nearly all gone, and was so weak that I could scarcely raise my head from the pillow, and was truly an object of pity to behold. My friends had been sen for to see me die, and my sick bed was surrounded by kind and sympathizing neighbors, who had come

witness my departure from this world. When all rays of hope had fled of my recovery, neighbor, Mr. David Conrad, proposed to try Schenck's Pulmonic Syrup, with a view of loosening my cough and relieving me of the tough phiegm, and as a mean of affording temporary relief, temacking at the time well, even it fully supplied. Young catele cannot be brought up in flesh at an outlay which will pay, permanent benefit. My wife, anxious for the relief of my intense sufferings, procured some of the Pul-monic Syrup. I found it afforded me relief, and con-tinued using it. I could feel its healing insuence

upon my lungs.

1 continue to improve under its use, and my friends were much gratified to witness my unexpecprovement; many of my neighbors came to hook at my as one raised from the dead.

My cough now became loose, and I felt something break, we at I had the pain in my breast, and I discharged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter germination of weeds, grabs, &c., &c. If you have every day, with hard lumps like grains of something. not sufficient cellur mom, makes piles of your mont. My bowels now became regular and natural, and my appetite was so far improved, that I could scarcely re frain from eating too much. My strength improved, and I required my flesh.

I continued to improve in every respect soon after I commenced using the Syrup, and the improvement continued until I was restored to my health. I have passed through the inclement weather of the latter s lower spot, thus keeping the pile dry. Do not part of winter and the spring, and feel as well now as Sorgel that corn is more valuable when changed to ever I felt in my life, and I am this day a living testimony of the great efficacy of Schenck's Pulmonic

Syrop in curing pulmonary diseases.

Lest this statement be thought too highly colored by some people, I subjoin certificates of a number of the ints of Tucony, who saw me at different times during my disease, and never expected to see me restor-I also append the certificate of the brothers of

Mystic Lodge, No. 270, I. O. of O. P., who kindly watched over me, and fully believed they would consign my remains to the tomb; but, thanks to Dr. Schenck for his invaluable Pulmonic Syrup, my life has been spared, and I am permitted to make the foregoing statement for the benefit of suffering mankind. I reside at Tacony, and am well known by most of the people there, and will be gratified to have any person call upon me and learn more particulars of the JOHN C. GREEN. riugs of this medicine.

June 24th, 1851. The subscribers, members of the Mystic I odge, No. 270, I.O. of O. F. of Holmeshorg, Ps. do hereby certify that we know John C. Green. (and is a member in good standing in No. 270 1. O. at O. F.) who was dangerously ill with a low Pulminary Consumption, his meavery was produced by Schenck's Pulmonic

Syrup.
We believe his certificate is correct in every par HENRY NEFF, P. G. ALFRED ROBINSON, P. G. ABRAHAM ARTHUR, P. G. I. K. OSMAN, N. G. JACOB WATERMAN, JR! JAMES C. CALVER. JOSHUA PHINEMORE.

Holmesburg, Philadelphia Co., Jane 25, 1951. The undersigned, residents of Tacony, eight miles shove Philadelphia, being well acquainted with John C. Green, and the circumstances attending his case, feel impelled by a deep sense of imperative duty, to make universally known to the public his entire recovcannot receive to much attention in late fall -- ery from the very last stages of Pulmonary Consump-Mulching soils intended for early gardening, will tion. So entirely belifess was his condition, having said materially to their profitable culture and garden been but a brief period since in that rapid y sinking and emaciate state, as to ut'only preclude, in the opin-ion of his physicians and friends, who watched by his bedside, all hopes of even a temporary recovery and restoration to his present robust health. Thus the careful use of your invaluable Specific, the Pulmonic Syrup, makes it our belief, under the circumstances of his previous prostrate, not to say dying condition, one of the most startling results that the whole annals of mediremoved from the vine. Grafts may be cut and cal skill or science can produce. It deserves to be imperi-hably recorded to your credit, and secure to you, the greatest discoverer of this hitherto remediless dis ease, a lasting monument and a world-wide reputation in the healing art, that no time may either diminish or destroy. Having witnessed Mr. Green's distressing struggles and sufferings from a continued cough, superadded to the other symptoms consequent upon, or attending to the last stages of a pulmonary disease; and moreover, it being so generally believed by his nu-merous friends that no human power could relieve, or protract his life, much less restore him back again to his former health, we feel it thus our duty to give our unqualified testimony of Mr. Green's perfect recovery by means of the exclusive use of your wonderful Svr up; and we should indeed rejoice if we could be ma. the humble instruments of relief and cure to others who

may be so unfortunate as to be similarly affleted. Jesse Duffield, David Contad, C. Hinckle. A. Heath, Joseph Head, Jr., Jesse Watson, Robert Allyn, Stephen Lukens, Matthew Toden, James Torbert, Allen Vandegrift
