Agricultural.

Shelter for Stock in Cold Weather.

Mr. Editor:—Although the warmth of the present season almost forbids the idea of writing, and more especially of writing upon the subject of keeping cattle in the winter season, I will yet attempt a few lines, detailing my experience upon that subject.

The barn, or building rather, in which my cattle for a number of years were sheltered, (if shelter it could be called) was in a very dilapidated condition. Expecting from year to year to be able to replace it with a new one, I delayed many little repairs which I am convinced it would have been true economy to make several years before. I knew the animals suffered much from cold, and to compensate for their sufferings, I fed them well;—but while pursuing the system a seeming necessity compelled me to adopt, I could not but observe, on comparing notes with my neighbors, that my cattle consumed considerably more food than theirs, while at the same time their condition was not only no better, but scarcely as good. I attributed this fact to any cause but the right cause. Knowing that some animals eat more than others, without improving in an equal degree, I presumed that mine were of these lean, hungry kind, and thus dismissed the subject from my mind.

Feeling somewhat stronger in pocket two years since, I built a new barn. The shelter it afforded my cattle, was, as you may suppose, better than the old one. The food given my cattle during the last winter was the same in quality and quantity as that of the previous winter; but I was surprised to find in spring there was a decided improvement in their condition over that of the preceding spring—and what more I could keep them on at least one fourth less fodder than ever before, and as I am satisfied that they have not changed their natures, I can not attribute this saving of food to any other cause than to the comfortable shelter provided for them in the new barn during the cold weather.

I am aware that there are scientific principles upon which this change may be accounted for: but aspiring to no prouder distinction than that of a plain, practical farmer, I leave scientific explanations to those more competent than myself, being content to record the simple fact that I save one-fourth of my cattle's food by providing with a comfortable shelter during the winter season.—*Cor. Farm Journal.*

Wintering Fowls.

The great art in the management of hens, in order to make them profitable, is to cause them to lay in winter, as it is this season in which eggs are scarce and high.

To cause hens to lay in winter, furnish them with a warm, dry shelter, in a warm location, where they can be free from cold winds, and enjoy a good share of sunshine. The hen-house should be kept clean, and all filth from remains of food should be carefully removed. There should be a good supply of gravel, which should be renewed occasionally, or dug over, so as to form a fresh lot often. Hens should have a constant supply of pure water, and pure, wholesome food. They are fond of corn, wheat, barley, oats, buckwheat, rye, rice, millet, boiled potatoes, and various other kinds of food—Generally the cheapest grain may be used as their principal food; but it is better to supply them with several kinds. They are very fond of corn, and they flourish well with this as their main food—Boiled potatoes mashed up while hot, with meal of almost any kind of grain, or with wheat bran or shorts, and given warm, are an excellent food in cold weather, and generally promotes laying—Changes in food are advantageous. Hens prefer variety as non feathered bipeds. In winter and in summer, when confined to small yards, hens should have a small supply of animal food. Refuse meat or fish may be given them, cooked or raw.—Scraps are often obtained for this purpose, from the tallow dealers, but this is not so acceptable to hens as fresh meat or fish, which may be obtained at a cheap rate, from the fish market or butchers.—Fresh, unburnt bones, pounded or chopped fine are excellent, as the supply both animal food and lime.

Hens need various condiments, such as lime, chalk, pounded bone and oyster shells. Eggshells are also good. Lime may be given in old mortar. They must have some material to form egg shells, when they cannot have access to the ground, even if they have a supply of gravel. They should also have, occasionally, some green food, such as cabbages, or raw turnips, potatoes, or apples, cut in large slices, and they will peck and eat what they want.

Though hens should be kept warm in winter, they should not be crowded together in large lots without ventilations, as they will be liable to disease from impure air. In mild weather, when the ground is bare they should go out in the sun. In feeding boiled potatoes and other warm food to hens, it should be given early in the morning, and the grain should be covered up at night, else they will fill themselves with that before they get a warm breakfast. Give dry loam or ashes to roll in.

With good management, generally in accordance with what we have recommended, hens will lay well in winter, if they are of good breeds and not too old, and are in healthy condition. If they do not lay with much care and attention, give them a very little cayenne in their mixed food; and warm, stimulating food. Hens often suffer in winter for want of exercise. They will fly from their roost, eat their breakfast, stand almost motionless, and go to roost again soon after noon especially if they are in rather dark houses. We avoid this evil by covering their grain up in gravel, and let them scratch for a living, which give them exercise that is conducive both to their health and comfort, and to their laying.

One winter we had eight hens, which were well supplied with water, grain, and gravel, but did not lay in winter—not one egg in January. The next winter we tried what could be done with the same hens, then the worst for age, as they were mostly old hens. They were in the same house. We gave them warm food and condiments, and buried their gravel and old plaster, and they laid eggs enough in January to pay three times the expense for their food.

J. S. Sayward, Esq., editor of the Bangor Courier, in an article furnished us for the Yankee Farmer, states that from one hundred and fifty hens he had nineteen hundred eggs in the month of January. This was in the cold region of Down East.—Numerous other cases might be named of large profits from an extra attention in managing hens in cold weather.—*N. E. Farmer.*

DR. H. C. PORTER,
Wholesale and Retail Dealer in
DRUGS, MEDICINES,
GROCERIES, LIQUORS, &c.

STORE in the south end of the Ward House, well known as the largest, cheapest and most extensive assortment west of the city. Particular attention will be given to any or all who may wish to call, either to examine or purchase, and any medical information will be cheerfully and *gratuitously* given to those who who wish to consult concerning themselves or friends. Continuous supplies of fresh and recently prepared articles are weekly arriving, having been carefully selected with a view to their *usefulness*, and any article wanted not usually kept, either will be found here, or procured at the shortest notice by Express, for those leaving their order. Accommodating clerks always will be ready to *safely* compound any prescription and endeavor to make it (whatever the purchase) mutually agreeable. All goods shall be considered *warranted* as represented, and being Agent for the best and popular Patent Medicines, all those found in this store can be relied upon, in all cases, as being *genuine*. The stock now comprises every article in the trade, among which may be found the following:

Drugs and Medicines.

ACIDS.
Acetic, Citric, Nitric, Muriatic, Aquafortis, Sulphuric, Tartaric etc

BALSAMS.
Fir, Copaiva, Tolu, ulphur, Life etc

BARKS.
Bayberry, Cinnamon, Peruvian (Jes'ts), Elm, etc

ESSENCES.
Peppermint, Cinnamon, Wintergreen etc

EXTRACTS.
Sarsaparilla, Dandelion, Boneset, Horehound, Aconite, Vanilla, Lemon etc

SEEDS.
Fenigreek, Anise, Carraway, Canary, Rape, Garden, Mustard, Cardamom, Colchicum etc

FLOWERS.
Chamomile, Arnica, Lavender etc

GUMS.
opium, assafoetida, arabic, camphor, copal, gamboge, gudiac, myrrh, shellac, tragacanth etc.

OILS.
neats foot, tanners, olive, castor, sperm, origanum, bergamont, lemon, wintergreen, cinnamon, cloves, hemlock, juniper, savin, tansey, tar, rosemary, orange, neroli, peppermint, linseed, cod liver etc

LEAVES.
buchu, uva ursi etc

ROOTS.
colombo, gentian, jalap, turmeric, spijelia (pink), hellebore, ipicac, liquorice, marsh, rosemary, rhedbark, orris, squill, valerian, senego, sarsaparilla, ginger etc

SALTS
magnesia, sulphur, brimstone, calomel, quicksilver, tartar, lemons, soda, cream tartar, epsom, antimony, alum, corro sublimate, red precipitate, quinine, qunine, arsenic

MISCELLANEOUS
alcohol, ether, laudanum, paregoric, shakers herbs, gold leaf, castile soap, venice turpentine, aqua ammonia, opedildoc, cubebs, brittish lustre, bronza, burg. pitch, cantharides, corks, bath brick, emery, sand paper, white glue, otter or annatto

GROCERIES.

Medical.

Another Rescue by SCHENCK'S PULMONIC SYRUP.

I was on the verge of the grave, and so far gone that my family and friends had lost all hopes of my recovery; and when in this situation, having been rescued by the use of Schenck's Pulmonic Syrup, I desire to testify, with grateful emotion to Dr. Schenck, the unspeakable benefit I have received from the use of his invaluable medicine.

Early last fall, I contracted a violent cold, and in consequence of which I had chills, alternated with fever, pains in my right breast and shoulder blade, with a bad cough, and no expectoration. I kept getting worse until I took my bed, and had the attendance of my family physician. I was under his care about four weeks, and at the expiration of that time was reduced so low that despair took hold of myself and friends, and even my physician abandoned me and gave me up to die with the hasty consumption. My appetite was gone, my bowels very irregular, fever and night-sweats, pain in my breast and shoulder, attended with a distressing cough, which was very tight; my flesh had nearly all gone, and was so weak that I could scarcely raise my head from the pillow, and was truly an object of pity to behold. My friends had been sent for to see me die, and my sick bed was surrounded by kind and sympathizing neighbors, who had come to witness my departure from this world.

When all rays of hope had fled of my recovery, a neighbor, Mr. David Conrad, proposed to try Schenck's Pulmonic Syrup, with a view of loosening my cough and relieving me of the tough phlegm, and as a means of affording temporary relief, remarking at the time, "that I was too far gone for the Syrup to be of any permanent benefit." My wife, anxious for the relief of my intense sufferings, procured some of the Pulmonic Syrup. I found it afforded me relief, and continued using it. I could feel its healing influence upon my lungs.

I continue to improve under its use, and my friends were much gratified to witness my unexpected improvement; many of my neighbors came to look at me as one raised from the dead.

My cough now became loose, and I felt something break, when I had the pain in my breast, and I discharged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter every day, with hard lumps like grains of something. My bowels now became regular and natural, and my appetite was so far improved, that I could scarcely refrain from eating too much. My strength improved, and I regained my flesh.

I continued to improve in every respect soon after I commenced using the Syrup, and the improvement continued until I was restored to my health. I have passed through the inclement weather of the latter part of winter and the spring, and feel as well now as ever I felt in my life, and I am this day a living testimony of the great efficacy of Schenck's Pulmonic Syrup in curing pulmonary diseases.

Lest this statement be thought too highly colored by some people, I subjoin certificates of a number of the inhabitants of Tacony, who saw me at different times during my disease, and never expected to see me restored. I also append the certificate of the brothers of Mystic Lodge, No. 270, I. O. of O. F., who kindly watched over me, and fully believed they would consign my remains to the tomb; but, thanks to Dr. Schenck for his invaluable Pulmonic Syrup, my life has been spared, and I am permitted to make the foregoing statement for the benefit of suffering mankind.

I reside at Tacony, and am well known by most of the people there, and will be gratified to have any person call upon me and learn more particulars of the virtues of this medicine. JOHN C. GREEN.

June 24th, 1851.

The subscribers, members of the Mystic Lodge, No. 270, I. O. of O. F. of Holmesburg, Pa. do hereby certify that we know John C. Green, (and is a member in good standing in No. 270 I. O. of O. F.) who was dangerously ill with a low Pulmonary Consumption, last winter, so that they give him up to die; that he is now fully restored to perfect health, and they believe his recovery was produced by Schenck's Pulmonic Syrup.

We believe his certificate is correct in every particular.

HENRY NEFF, P. G.
ALFRED ROBINSON, P. G.
ABRAHAM ARTHUR, P. G.
J. K. OSMAN, N. G.
JACOB WATERMAN, JR.
JAMES C. CALVER.
JOSHUA PHINEMORE.

Holmesburg, Philadelphia Co., June 25, 1851.

The undersigned, residents of Tacony, eight miles above Philadelphia, being well acquainted with John C. Green, and the circumstances attending his case, feel impelled by a deep sense of imperative duty, to make universally known to the public his entire recovery from the very last stages of Pulmonary Consumption. So entirely helpless was his condition, having been but a brief period since in that rapidly sinking and emaciate state, as to utterly preclude, in the opinion of his physicians and friends, who watched by his bedside, all hopes of even a temporary recovery and restoration to his present robust health. Thus the careful use of your invaluable Specific, the Pulmonic Syrup, makes it our belief, under the circumstances of his previous prostrate, not to say dying condition, one of the most startling results that the whole annals of medical skill or science can produce. It deserves to be imperishably recorded to your credit, and secure to you, the greatest discoverer of this hitherto remediless disease, a lasting monument and a world-wide reputation in the healing art, that no time may either diminish or destroy. Having witnessed Mr. Green's distressing struggles and sufferings from a continued cough, superadded to the other symptoms consequent upon, or attending to the last stages of a pulmonary disease; and moreover, it being so generally believed by his numerous friends that no human power could relieve, or protract his life, much less restore him back again to his former health, we feel it thus our duty to give our unqualified testimony of Mr. Green's perfect recovery, by means of the exclusive use of your wonderful Syrup; and we should indeed rejoice if we could be made the humble instruments of relief and cure to others who may be so unfortunate as to be similarly afflicted.

Athens, Bradford Co. Pa. June 21, 1852.

BOOTS & SHOES!

John W. Wilcox,

HAS removed his establishment to H. Mix's store, corner of main street and the public square, and will continue the manufacture of Boots and Shoes, as heretofore,

He has just received from New York a large assortment of *Women's, Children's and Misses' Shoes*, which are offered at low prices. The attention of the Ladies is particularly directed to his assortment, comprising the following new styles:—Enamelled Jenny Lind gaiter boots; do. shoes; black lasting and silk gaiters; walking shoes, buskins, &c. Misses' gaiters and shoes, of every description. A large assortment of Children's fancy gaiters, boots and shoes, of all kinds.

For the Gentlemen, almost every style of gaiters and shoes. This stock has been personally selected with care, and he believes he can offer superior articles at reasonable prices.

☞ The strictest attention paid to *Manufacturing*, and he hopes by doing work well to merit a continuance of the liberal patronage he has hitherto received.

E. G. NICHOLS,
COUNTY SURVEYOR,

HAVING located in Towanda, his services may be obtained by addressing a line through the Post Office, or by calling at the office of Ulysses Mercur, Esq., where he will be found, or where a written application may be left. Nov. 1, 1850.

NEW BLACKSMITH SHOP.

THE subscribers respectfully inform the public that they have taken the shop formerly occupied by Adam Esenwine, on Main street, nearly opposite Drake's wagon shop, where they are prepared to do all kinds of BLACKSMITHING upon reasonable terms.

They are determined by doing their work well and promptly, to merit, as they hope to receive a share of public patronage.

HORSE-SHOEING done in the best manner. All kinds of repairing Machinery, executed in the most skilful manner.

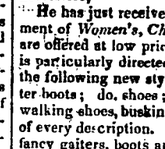
WOOD WORK for wagons will also be made and repaired when desired.

All work done at their shop, will be warranted to be well done, and manufactured from the best materials. The public are requested to give us a trial, and judge for themselves. ESENWINE & SEEBISCHH.

Towanda, May 2, 1851.

FURNITURE WAREROOM.

Important to Housekeepers:



THE subscriber thankful for the liberal patronage heretofore received, begs leave to inform his friends and the public generally, and those commencing Housekeeping in particular that he has now on hand a large assortment of FURNITURE, which he will warrant to be made in a substantial manner, and of the best materials.

STEAM ENGINES AND BOILERS.
THE ESSEX COMPANY,
LAWRENCE, MASS.

MANUFACTURE Steam Engines and Boilers from 8 to 1000 horses power. Horizontal Engines, on heavy iron bed plates, cast in one piece. All have expansion valves; all joints ground so as to be steam tight without packing or paint; all bearings and wearing surfaces large, and running in adjustable boxes of bronze or Babbitt metal; all balance wheels with turned belt face. The Regulator is attached to the bed plate. The Force Pump is in an independent stand arranged with crank shaft and tight and loose pulley ready to receive a belt from the engine shaft or from any other shaft. The whole style of work is not excelled by any engine builders in the United States.

Boilers of the best American or English iron both cast or wrought iron—either tubular or with flues made in the most thorough manner.

Engines from 8 to 100 horses power constantly on hand or in progress, to be delivered within a few days of the receipt of an order.

Also, Steam Saw Mills, capable of sawing 6000 feet board measure, of one inch boards, in 12 hours, with one Muley saw, and requiring no other feed than its sawdust.

The following are the prices of a few of these engines:—

Saw Mill, including steam engine, boiler and iron chimney, complete; pitman irons; muley saw irons; setters; feed, and all bolts and irons for 30 feet of carriage, complete, $1500

Steam engine, 10 in. diameter of cylinder, 25 in. stroke with tubular boiler, containing 360 square feet of heating surface, and all castings, pipes, valves, and other parts necessary to set it in complete operation, $1775

Steam engine, 12 in. diameter of cylinder, 30 in. stroke with tubular boiler, containing 480 square feet of heating surface, complete as before, $2125

Delivered on the cars of the Boston and Maine Rail road at Lawrence, 26 miles from Boston. Terms, cash on delivery.

Boilers for the above modified to suit purchasers, and prices accordingly.

McKay & Houdley, late of Pittsfield, Mass., whose steam engines are already widely known, have recently taken charge of the works of the Essex Company and will be able, with their increased facilities and experience, to make their approved engines cheaper and better than heretofore.

May 8, 1852.y GORDON McKAY, Agent.

$500 CHALLENGE!

WHATEVER concerns the health and happiness of a people, is at all times of the most valuable importance. I take it for granted that every person will do all in their power to save the lives of the children, and that every person will endeavor to promote their own health at all sacrifices. I feel it to be my duty solemnly to assure you that WORMS, according to the opinion of the most celebrated physicians are the primary causes of a large majority of diseases to which children and adults are liable: if you have an appetite continually changing from one kind of food to another, bad breath, pain in the stomach, pimples on the nose, hardness and fullness of the belly, dry cough, slow fever, pulse irregular—remember that all these denote Worms, and you should at once apply the remedy:

Hobensack's Worm Syrup.

An article founded upon scientific principles, compounded with purely vegetable substances, being perfectly safe when taken, and determined in all its effects and not leaving the system in a diseased condition, as most advertised nostrums, composed of Calomel for the removal of Worms, such as Lozenges, Vermifuge, &c., but has performed the most astonishing cures, and saved the lives of thousands, both young and old who have been pronounced hopeless—incurable by Physicians. Read the following, and become convinced of its efficacy over all others:

MORRIS RIVER, N. J.

MR. J. N. HOBENSACK—This is to certify that my child, 15 years of age, having been sick for 5 years, and was attended by Drs. Loper, Whillis and Phisler for a long time without receiving any benefit; when after giving her up as incurable, I went to Philadelphia and consulted one of the best physicians; her disease still growing worse. It was at this time I was induced to try *Hobensack's Worm Syrup*, and after taking two bottles she entirely regained her health. Hoping that this will prove a benefit to parents whose children are similarly affected,

I am yours, &c., R. BOWAN.

Hobensack's Liver Pills.

No part of the system is more liable to disease than the LIVER, it serving as a filterer to purify the blood, or giving a proper secretion to the bile; so that any wrong action of the Liver effects the other important parts of the system, and results variously in Jaundice, Liver complaint, Dyspepsia, &c. We should, therefore watch every symptom that might indicate a wrong action of the Liver. These Pills being composed of *Roots and Plants*, furnished by nature to heal the sick—Namely, 1st: An *Expectorant*, which augments the secretion from the pulmonary mucous membrane, or promotes the discharge of secreted matter. 2nd—an *Alterative*, which changes in some instances the sedate inexplicable manner, the certain morbid action of the system. 3d—a *Tonic*, which gives tone and strength to the nervous system, renewing health and vigor to all parts of the body. 4th—a *Cathartic*, which acts in perfect harmony with other ingredients, and operating on the bowels, and expelling the whole mass of corrupt and vitiated matter, and purifying the blood, which destroys disease and restores health.

Agents for Bradford County—Dr. H. C. Porter and J. M. Reed, Towanda; C. H. Herrick, Athens; M. Bullock & Co. Smithfield; Barnes & Bailey, Waverley; H. Spear, Springfield; Eli Baird, Troy; L. D. Taylor, Burlington; Brown & Rockwell, Monroeton; Parkhust & Lamb, Leroy; Chas. Rathbone, Canton; also T. B. Howland, Columbia, travels in the adjacent counties. 48v
