Agricultural.

Training Steers.

The following mode of transforming the wild and ungovernable steer, into the gentle and well trained ox, is both reasonable and instructive, and we would recommend it to our readers who have young cattle to break.

The first point is to make them tame and gentle. This may be accomplished by feeding them out of the hand, and carding them daily. They should be approached gently, without yelling to them until they are frighted out of their wits. After having reduced them to a state of perfect docility, a good yoke should be procured, suitable to their size and strength. A small pair is necessary to put on the yoke. Approach gently with the yoke, patting and speaking gently to them, until you have the yoke on the 1st steer, then let an assistant drive the other under the yoke. Their tails then should be securely fastened, to prevent their getting the habit of running the yoke. They should be yoked in the morning and unyoked at night in this manner for several days, until they become accustomed to the yoke.

The first thing to teach them is to stop at the word of command. This may be done by striking them across the face; the blows should be repeated until they stop, and then discontinued; by striking them for every non-observance of the word of command, they will soon know that by stopping they will avoid it, and will act accordingly. They may be taught the "to" gee" and "haw," by gently pushing them around. Backing may be taught by beginning with an empty cart on a side hill; then on a level; then with an increasing load until they will back the same load they will draw. They should never be put to a load that they cannot readily draw, or drilled by prolonged exercise beyond the period when it becomes irksome. Loud and repeated yelling or the use of the lash is both cruel and useless. Clear and intelligible, yet low and gentle words, is all that is necessary to guide a well trained ox. The ox understands a moderate tone more perfectly than a boisterous one, as all sounds become indistinct as they increase. A command should never be given unless enforced. Many bear with bad tricks for a long time, without even an expression intelligible to them—but when patience departs, a thorough storm of blows is poured upon them. This is the way to ruin any beast; a single blow should be given for each offence.

OATS.

In Maryland and all other States East and North of it, is much too early to think of sowing oats;—but as our journal has a wide circulation in the South, where the labors of the field commence much earlier than the region described, we feel it our duty to say that the proper time for sowing oats is, so soon as by the absence of the frost, the earth can be ploughed and put in good order, as it is a well established fact that the early sown always produces the best grain, and it is equllay true, that the quality is also better than that produced by the late sown.

Soils Adapted to Oats—Clay soils are said to be the best for the growth of the oats, but we have known 2,400 bushels raised on a field of 40 acres of sandy mould. This field, however, had received the benefit of 100 bushels of lime and an equal quantity of ashes within eight years, and was in clover, at the time it was ploughed for oats. Clay may be the most congenial soil for oats, as this grain ranks among the potash plants, and there is more of that substance in such soils, naturally, than in soils of a silicious nature. Be oats grown, however where they may, if a good crop is always desirable—and it always is—there must be the elements of at least moderate fertility in the soil, for oats being of rapid growth, require something to feed continuously upon.

Clover lays and grass-swards are the fields on which oats thrive best, but if they be grown upon soils exhausted, or naturally poor, such soils must be aided by moderate dressings of nutritive manure to insure anything like a good crop. A fine crop may be grown with an application of five double horse cart loads of stable manure, and ten loads of wood's mould or river mud, per acre, provided the land receive also a top dressing of five bushels of ashes, and one of plaster, to the acre; eight or ten bushels of bone-dust—two hundred pounds of guano, or fifty or one hundred bushels of marl, mixed with ten double horse cart loads of marsh mud and five loads of barn-yard manure, will each afford a satisfactory crop, but no one can reasonably expect a generous product from worn out land.

Quantity of Seed—If the land be good, three bushels of seed, per acre, should be sown. If the land be of moderate heart, two bushels of seed, per acre, should be sown. If the land be poor, do not sow any oats thereon unless you previously manure it, and then your quantity and quality of the manure applied.

Plough deeply, leave no balks, and harrow until the tilth is fine. After your seed is in, harrow, water-furrow, and roll across the furrows, and if the season be a propitious, one, you may anticipate a just reward for your labor.—*American Farmer.*

CULTIVATION OF CORN.—M. C Crapsy, of Lockport, New York, gives the following as his method of cultivating corn:

"The land must be entirely clear from stumps, stones or anything that will obstruct the drag or cultivator. Sod ground, which was used in this case, is decidedly preferred.

The earliest warm weather in the spring should be improved for drawing on the manure.

Plow eight inches deep, roll hard, then drag and cultivate the ground till it is fine as an onion bed. When the ground is thus prepared, no danger need be apprehended from the wire worm. The corn is up and beyond harm from this insect before it comes to the surface. Mark the ground each way in straight rows, just three feet apart. This gives 4,840 hills to the acre, or a fraction more than 66 hills to the bushel.

Delay planting until the ground is so warm that the corn will come up within eight days. Put in from five to eight kernels in a hill and roll the ground after planting.

Cultivate each way as often as the weeds start.—About the time of wheat harvest pull up all the large weeds that can be found.

Cut up when the small as well as the large ears are sufficiently glazed. When husked, I put the ears in an out door crib which admits the free passage of the air."

Opinion is the guide of fools, but reason and prudence conduct wise men.

DR. H. C. PORTER,

Wholesale and Retail Dealer in

DRUGS, MEDICINES,

GROCERIES, LIQUORS, &c.

STORE in the south end of the Ward House, well known as the largest, cheapest and most extensive assortment west of the city. Particular attention will be given to any or all who may wish to call, either to examine or purchase, and any medical information will be cheerfully and *gratuitously* given to those who wish to consult concerning themselves or friends. Continuous supplies of *fresh* and recently prepared articles are weekly arriving, having been carefully selected with a view to their *usefulness*; and any article wanted not usually kept, either will be found here, or procured at the shortest notice by Express, for those leaving their order. Accommodating clerks always will be ready to *safely* compound any prescription and endeavor to make it (whatever the purchase) mutually agreeable. All goods shall be considered *warranted* as represented, and being Agent for the best and popular Patent Medicines, all those found in this store can be relied upon, in all cases, as being *genuine*. The stock now comprises every article in the trade, among which may be found the following:

Drugs and Medicines.

ACIDS.	gloes	iberis
Acetic	assafoetida	squill
Citric	arabic	valerian
Nitric	camphor	senego

Medical.

DR. SCHENCK'S Pulmonic Syrup.

I was on the verge of the grave, and so far gone that my family and friends had but little hopes of my recovery, and when in this situation, having been recommended by the use of Schenck's Pulmonic Syrup, I determined to testify, with grateful emotion to Dr. Schenck, the unspeakable benefit I have received from the use of his invaluable medicine.

Early last fall, I contracted a violent cold, and in consequence of which I had chills, alternated with fever, pains in my right breast and shoulder blade, with a bad cough, and no expectoration. I kept getting worse until I took my bed, and had the attendance of my family physician. I was under his care about four weeks, and at the expiration of that time was reduced so low that despair took hold of myself and friends, and even my physician abandoned me and gave me up to die with the hasty consumption. My appetite was gone, my bowels very irregular, fever and night-sweats. Pain in my breast and shoulder, attended with a distressing cough, which was very tight; my flesh had nearly all gone, and was so weak that I could scarcely raise my head from the pillow, and was truly an object of pity to behold. My friends had been sent for to see me die, and my sick bed was surrounded by kind and sympathising neighbors, who had come to witness my departure from this world.

When all hope of recovery, a neighbor, Mr. David Conrad, proposed to try Schenck's Pulmonic Syrup, with a view of loosening my cough and relieving me of the tough phlegm, and as a means of affording temporary relief, remarking at the time, that I was the Engine for the Syrup to be of any permanent benefit. My wife anxious for the relief of my intense sufferings, procured some of the Pulmonic Syrup. I found it afforded me relief, and continued using it. I could feel its healing influence upon my lungs.

I continue to improve under its use, and my friends were much gratified to witness my unexpected improvement; many of my neighbors came to look at me as one raised from the dead.

My cough now became loose, and I felt something break, when I had the pain in my breast, and I discharged large quantities of yellow matter. I have for weeks discharged and raised a spit box full of matter every day, with hard lumps like grains of something. My bowels now became regular and natural, and my appetite was so far improved, that I could scarcely refrain from eating too much. My strength improved, and I regained my flesh.

I continued to improve in every respect soon after I commenced using the Syrup, and the improvement continued until I was restored to my health. I have passed through the inclement weather of the latter part of winter and the spring, and feel as well now as ever I felt in my life, and I am this day a living testimony of the great efficacy of Schenck's Pulmonic Syrup in curing pulmonary diseases.

Lest this statement be thought too highly colored by some people, I subjoin certificates of a number of the inhabitants of Tacony, who saw me at different times during my disease, and never expected to see me restored. I also append the certificate of the brothers of Mystic Lodge, No. 270, I. O. of O. F., who kindly watched over me, and fully believed they would consign my remains to the tomb; but, thanks to Dr. Schenck for his invaluable Pulmonic Syrup, my life has been spared, and I am permitted to make the foregoing statement for the benefit of suffering mankind.

I reside at Tacony, and am well known by most of the people there, and will be gratified to have any person call upon me and learn more particulars of the virtues of this medicine. JOHN C. GREEN.

June 24th, 1851.

The subscribers, members of the Mystic Lodge, No. 270, I. O. of O. F. of Holmesburg, Pa. do hereby certify that we know John C. Green, (and is a member in good standing in No. 270 I. O. of O. F.) who was dangerously ill with a low Pulmonary Consumption, last winter, so that they give him up to die; that he is now fully restored to perfect health, and they believe his recovery was produced by Schenck's Pulmonic Syrup.

We believe his certificate is correct in every particular.

HENRY NEFF, P. G.
ALFRED ROBINSON, P. G.
ABRAHAM ARTHUR, P. G.
J. K. OSMAN, N. G.
JACOB WATERMAN, JR.
JAMES C. CALVER.
JOSHUA PHINEMORE.

Holmesburg, Philadelphia Co., June 25, 1851.

The undersigned, residents of Tacony, eight miles above Philadelphia, being well acquainted with John C. Green, and the circumstances attending his case, feel impelled by a deep sense of imperative duty, to make universally known to the public his entire recovery from the very last stages of Pulmonary Consumption. So entirely helpless was his condition, having been but a brief period since in that rapidly sinking and emaciate state, as to utterly preclude, in the opinion of his physicians and friends, who watched by his bedside, all hopes of even a temporary recovery and restoration to his present robust health. Thus the careful use of your invaluable Specific, the Pulmonic Syrup, makes all our belief, under the circumstances of his previous prostrate, not to say dying condition, one of the most startling results that the whole annals of medical skill or science can produce. It deserves to be impersonably recorded to your credit, and secure to you, the greatest discoverer of this hitherto remediless disease, a lasting monument and a world-wide reputation in the healing art, that no time may either diminish or destroy. Having witnessed Mr. Green's distressing struggles, and sufferings from a continued cough, superadded to the other symptoms consequent upon, or attending to the last stages of a pulmonary disease; and moreover, it being so generally believed by his numerous friends that no human power could relieve, or protract his life, much less restore him back again to his former health, we feel it thus our duty to give our unqualified testimony of Mr. Green's perfect recovery, by means of the exclusive use of your wonderful Syrup; and we should indeed rejoice if we could be made the humble instruments of relief and cure to others who may be so unfortunate as to be similarly afflicted.

Towanda, January 17, 1852.

HEAL THE SICK.

NONE Genuine unless accompanied by a fac simile of the above Engraved Wrapper of Dr. E. L. SOULE & Co., upon each box.

In offering to the public this justly celebrated SOVEREIGN BALM OF LIFE, it is not our wish to make any false statements or wild assertions of their superior efficiency in restoring to health the sick and suffering, well knowing that their reputation as a STANDARD MEDICINE is of itself sufficient reference for the afflicted.

Many *proofs* might be given of their value on paper, but we prefer those unacquainted with them to satisfy themselves by enquiring of living witnesses and trying the Pills. They will find them perfectly safe and reliable in all cases, being *purely vegetable*, and a medicine worthy their best confidence and patronage.

The following certificate was sent us for the public good:

HENRIETTA, Monroe Co. N. Y., May 10, 1851.

We the undersigned, citizens of Henrietta, having used personally *Dr. Soule's Sovereign Balm Pills*, and witnessed the health-restoring effects thereof, cheerfully recommend these Pills to the afflicted as the best with which we are acquainted.

G. M. ROBERTS,	G. H. BROWN.
M. D. PHILLIPS,	D. G. OTIS,
H. A. TIBBETTS,	LEWIS REED.

P. S.—You are at liberty to publish this for the public good.

BEWARE OF COUNTERFEITS! We are not aware that any one who is making a spurious article has yet dared to make use of our name; but some of them has had the impudence to imitate our boxes and copy our Circulars, Certificates, &c. Unless the public are careful when they purchase, they will be deceived.

☞ The genuine *Sovereign Balm Pills* can be had wholesale and retail, of Dr. SOULE & Co., Syracuse Onondaga Co. N. Y.

Sold by Dr. H. C PORTER, Towanda Pa., and by their Agents in every town in the country. 21z

STEAM ENGINES AND BOILERS.

THE ERIE COMPANY,

LAWRENCE, MASS.

MANUFACTURE Steam Engines and Boilers from 8 to 1000 horse power. Horizontal Engines, on heavy iron bed plates, cast in one piece. All have expansion valves; all joints ground so as to be steam tight without packing or paint; all bearings are wearing surfaces large, and running in adjustable boxes of bronze or Babbitt metal; all balances wheels turned bright. The Regulator is attached to the base plate. The Force Pump is in an independent cast, arranged with crank shaft and tight and loose pulley ready to receive a belt from the engine shaft or from any other shaft. The whole style of work is not surpassed by any engine builders in the United States.

Boilers of the best American or English iron both cast or wrought iron—either tubular or with flues made in the most thorough manner.

Engines from 8 to 100 horses power constantly on hand or in progress, to be delivered within a few days of the receipt of an order.

Also, Steam Saw Mills, capable of sawing 6000 feet board measure, of one inch boards, in 12 hours, with one Muley saw, and requiring no other fuel than the sawdust.

The following are the prices of a few of these engines:—

Saw Mill, including steam Engine, boiler and smoke chimney, complete; pitman irons; muley saw guides, setters, feed, and all bolts and irons for 30 feet of carriage, complete, $1500

Steam engine, 10 in. diameter of cylinder, 24 in. stroke, with tubular boiler, containing 360 square feet of heating surface, and all castings, pipes, valves, and other parts necessary to set it in complete operation, 1500

Steam engine, 12 in. diameter of cylinder, 30 in. stroke, with tubular boiler, containing 480 square feet of heating surface, complete as before, 1750

Delivered on the cars of the Boston and Maine Railroad at Lawrence, 26 miles from Boston. Terms, cash on delivery.

Boilers for the above modified to suit purchasers, and prices accordingly.

McKay & Hoadley, late of Pittsfield, Mass., whose steam engines are already widely known, have recently taken charge of the works of the Essex Company, and will be able, with their increased facilities and experience, to make their approved engines cheaper and better than heretofore.

May 8, 1852.y GORDON McKAY, Agent.

$500 CHALLENGE!

WHATEVER concerns the health and happiness of a people, is at all times of the most vital importance. I take it for granted that every person will do all in their power to save the lives of their children, and that every person will endeavor to promote their own health at all sacrifices. I feel it to be my duty solemnly to assure you that WORMS, according to the opinion of the most celebrated physicians are the primary causes of a large majority of diseases to which children and adults are liable; if you have an appetite continually changing from one kind of food to another, bad breath, pain in the stomach, picking at the nose, hardness and fullness of the belly, dry cough, slow fever, pulse irregular—remember that will often denote Worms, and you should at once apply the remedy:

Hohensack's Worm Syrup.

An article founded upon scientific principles, compounded with purely vegetable substances, being perfectly safe when taken, and determined in all its effects and not leaving the system in a diseased condition as most advertised nostrums, composed of Calomel for the removal of Worms, such as Lozenges, Vermifuge, &c., but has performed the most astonishing cures and saved the lives of thousands, both young and old, that have been pronounced hopeless incurable by Physicians. Read the following, and become convinced of its efficacy over all others:

MORRIS RIVER, N. J.

MR. J. N. HOHENSACK—This is to certify that my child, 15 years of age, having been sick for 5 years and was attended by Drs. Looper, Whillis and Phisler for a long time without receiving any benefit; when during my long her up as incurable, I went to Philadelphia and consulted one of the best physicians; her disease still growing worse. It was at this time I was induced to try *Hohensack's Worm Syrup*, and after taking two bottles she entirely regained her health. Hoping that this will prove a benefit to parents whose children are similarly affected,

I am yours, &c. R. BOWAN.

Hohensack's Liver Pills.

No part of the system is more liable to disease than the LIVER, it serving as a filterer to purify the blood, or giving a proper secretion to the bile; so that any wrong action of the Liver effects the other important parts of the system, and results variously in Jaundice, Liver complaint, Dyspepsia, &c. We should therefore watch every symptom that might indicate a wrong action of the Liver. These Pills being composed of *Roots and Plants*, furnished by nature to heal the sick—Namely, 1st: An *Expectorant*, which augments the secretion from the pulmonary mucus membrane, or promotes the discharge of secreted matter. 2d—*Alterative*, which changes in some insensible and inexplicable manner, the certain morbid action of the system. 3d—a *Tonic*, which gives tone and strength to the nervous system, renewing health and vigor to all parts of the body. 4th—a *
