RESUMES its sessions on Monday, the 11th of September.

In the classical, scientific and mathematical departments of this seminary, very desirable advantages will be given to the studiously inclined, especially if well grounded in all the important elements taught in our district schools.

A faithful account will be kept of each student's attendance, conduct and scholarship, for the benefit of parents, school districts and all whom it may rightfully concern.

The school is not sectarian, but free; and a class in Theology would always have been, right cheerfully, allowed its share of time and attention.

Higher English, Latin and Greek languages, 5 00

No pupil received for less than one term. Payment in advance. Board may be obtained at from \$1 50 to \$2 00 per week.

J. MINTOSH, DENTIST.

D. R. ALLEN, late Professor in the Ohio College of Dental Surgery, has discovered a method of inserting Artificial Teeth on a plate, which makes any further improvement impossible. It combines strength and durability with perfect cleanliness. The gum is continuous, and can be made to suit any case, however difficult. So life-like is the expression, that the most familiar with artificial teeth fail to determine they are false; the teeth appearing as if they actually grew out of the gum.

I have secured letters patent for Bradford County, in Mercer's office.

The public will please notice one fact, that so many not practically acquainted with the business is capable of judging of the quality and make of a garment, hence the reason why the community have been so much imposed upon by a certain class of community who deal in the article, who, if they were not practically and professionally cheats, could of necessity, know nothing about the business.—They are certain, if the public would consult their true interest, they would purchase only of those acquainted with the business.
