**J. MONTAGNE, DENTIST.**  
D. R. J. ALLEN, late Professor in the Ohio College of Dental Surgeons, has discovered a method of inserting Artificial Teeth on plate, which makes any further improvement impossible.  
It combines strength and durability with perfect cleanliness. The gum is continuous, and can be made to suit any case, however difficult. So life-like is the expression, that the most familiar with artificial teeth fail to determine they are false; the teeth appearing as if they actually grew out of the gum.  
I have secured letters patent for Bradford Co. Office in Mercers' Block.
