A New Kind of Grass.

The Patent Office, by its agents in Europe, as is well known, is engaged in collecting and distributing seeds throughout the Union. A variety has been received by W. C. BOGART, Secretary of the Bradford County Agricultural Society, among which is a quantity of Sainfoin -a kind of grass which must be entirely new to most of our readers. We find in the Farmer's Dictionary, published by HARPERS, some account of this grass, which may induce some of our farmers to give it a trial. The seed! can be procured by calling upon Mr. Bogarr.

Sainfoin. Hedysarum Onobrichis (Fig.) Esparcette. A long-rooted, perennial, leguminous plant with red flowers. It is a native in calca-

reous soils. There are few plants which have more rapidly improved the value of poor, thin, calcareous soils than sainfoin; and in the richer kinds of loam, which contain a considerable proportion of calcareous matter, its value surpasses even that of broad clover, giving fully as great a return, with a much smaller expenditure of manure. The plant has a strong, woody, and fibrous root, which insinuates itself into the fissures of calcarous rocks, and finds moisture in the dryest seasons, while its spreading fibres keep the earth from being washed down the steep slopes of the hills. In favourable situations, it may be made into hay twice in the year, or cut oftener as green food. In the most arid and exposed situation it gives at and looked rather sickly, while the other was a least one good crop of hay. The plants grows dark green, and looked much more like making about two feet high, and the stem branches out a crop. This had a tendency to doubt on my into many compound leaves. After it has part as to it answering for corn. But as the been mown, it shoots out rapidly again, and season advanced so did the corn, particularly may be advantageously depastured by every that which grew on the subsoiled part of the kind of cattle or sheep. There are varieties field, and in a few weeks there was also a of the plant which differ in the rapidity of marked difference in favor of that subsoiled, their growth; the best is called, in France and the yield was one-third more per acre and esparcette, or sainfoin a deux coupes. From France it has been introduced into England. The duration of sainfoin depends on the nature of the soil, and the state it was in with respect to weeds when it was sown. A cold, wet subsoil soon destroys the roots, whereas a free and dry one, whether rocky or gravelly, gives them vigour. Grass and weeds, which choke the crown of the plant, soon causes it to decay, as is the case with lucern. With every advantage, it may last in vigour ten years, especially if it is occassionally invigorated with a topdressing of manure or ashes, or, which is best of all, with diluted urine, or the drainings from daughills. During that time it may be cut twice for hay every year, taking care to cut it before the flower is faded or the seed formed and if sheep are folded on it after the second cutting, the next crop will well repay the trouble. It is usually sown in spring in a crop by barley or oats, which should be sown thin in order that the sainfoin may not be smothered. The land should have been prepared by a cleansing crop. From three to four bushels of seed may be sown, harrrowed in, and rolled .-It is not often drilled, although this method, by allowing the use of the hoe between the rows, would much strengthen the young plants. and protect them against coarse grasses, which are their greatest enemies. In the first year the sainfoin should not be fed off by sheep; and if it is mown, it should not be mown too close to the ground. The crown of the root in the young plant rises a little above the ground, and if this be bit off, or cut with the scythe, the plant dies. It is useful to harrow the ground lightly, to draw the earth round the roots, and to destroy seed weeds soon after the barley or oats are reaped. The sainfoin does not produce a large crop the first year, for some of the seeds will lie a twelvemonth in the ground before they spring up. It is in perfection after the second year, when a portion may be reserved for seed. Sainfoin hay is extremely nourishing for every kind of cattle, especially if it has been made without rain. Although it is not apt to heat in the stack, it must be put up in a very dry state; and if it has suffered from rain, too much care cannot be taken thoroughly to dry it : for the water insinuates itself by capillary attraction into the hollow stems, and is long in evaporating, so that when it feels quite dry it may yet contain much water. The mode of discovering this is to twist it strongly in the hands into a rope, when the moisture, if there is any, will ooze out. It is better to let it dry thoroughly than, by carrying it in a hurry, to run the risk of its becoming mouldy within. In very precarious situations it may be carried in a green state, provided there be no moisture in it from dews or showers, and stacked in alternate layers with good straw. It will impart some of its fragrance to the straw, and loose none of its nutritive qualities. The same may be done with lucern or clover. The most advantageous use of sainfoin, however, is to cut it green and dropped in each hill before planting the corn, give it immediately to the cattle. There is no danger of their being hoven by it, for it ferments very slowly, owing to the fibrous nature of the stem. If the situation of the field admits of occasional irrigation, without danger of the and three bushels plaster paris. Work the water stagnating, the produce of the sainfoin will be greatly increased; and it may then be Our corn ground having received a coating of cut four or even five times in a season without fear of exhausting its strength. When it begins to appear thin on the ground, and other surface is well pulverized. We mark one way plants seem to get the better of the sainfoin, for the hills with a shallow furrow of the plow, it is time to break it up. The land will be and then draw a chain the other way which found much improved in fertility by the sanfoin. shows the place for each hill. The compost A poor chalk or gravel, which before would scarcely repay the seed sown in it, will now, helps it out. We have also, for the two years by the gradual decay of the roots and fibres of past, soaked our seed corn in a strong solution the sainfoin, produce several good crops with- of tobacco water, and have not been troubled out any other manure. The prudent farmer, however, will not entirely destroy, by repeated lution from twelve to twenty-four hours. crops of grain, that cohesion of the soil which is produced by the roots of the sainfoin; but by a judicious course and proper application of the manure, which the sainfoin enabled him to make, he will keep up the newly-acquired fertility until, in the course of ten or twelve years he-can again sow sainfoin seed in it with the prospect of a crop more abundant than the Many a poor, barren tract of calcareous rock and gravel has been fertilized and raised in value by the sole effect of the sainfoin, without which it must have remained in its unpro

GREEN HOUSE .- All plants requiring a shift, should now receive it, as a pressure of work coming on in a few weeks, may prevent its being done at that time; cleanliness must also be kept in view. All plants that require training should now be attended to. Admit air at every favorable opportunity.

ductive state."

They have got to growing chickens so large in Massachusetts, that farmers have to sell them by the quarter, like pork. These are chickens to crow over.

Deep Cultivation. Having directed my attention somewhat to a deeper cultivation of the soil, and advantages

arising therefrom, in the fall of '53, I purchased

a Michigan Double Plow, and used it for plowng my ca's stubble, first hauling out the manure which covered but a part of the field,) and plowed it to the depth of 12 inches or more. Covering to that depth the manure and a greater part of the top soil, it gave the field a different appearance than it ever presented before. A subsoil of 5 or 6 inches seemed but a poor prospect for a crop of wheat, and the question was frequently asked, "What do you expect to raise on that field?" However, I prepared the ground, and drilled in the wheat. It came ap uncommonly well and covered the ground. As to the average yield per acre, I cannot say, not having thrashed all yet. But am confident on the manured part there was at least 35 bushels per acre. To the remaining part of the field, I applied 300 lbs of Jordan's Phosphate of Lime per acre, which did not benefit the wheat much, but had an astonishing effect on the young timothy, forcing it to such a growth as to injure the wheat. The grain on this part was perfect and weighed heavier than the other, but the wheat did not shell out—hence less the yield. In the spring of '54, I used the same plow for corn, plowing the same depth. I plowed about six acres with it, leaving one acre in the middle of the field, for this I used a common plow, prepared the ground and planted the corn. It came up equally well all over the field, and no difference ould be seen for two or three weeks, when there was a marked difference in the color .-That on the subsoiled part was a pale yellow, of a superior quality. I have also used it for vegetables, and find the same beneficial results. I will add that I have full faith in subsoiling, and believe the Michigan Double Plow to be preferable to any other that has come under my notice. - Farm Journal.

AGRICULTURE.

Bounteous source of honest wealth, Source of happiness and health, All the treasure of the fields, Agriculture freely yields. From the field we all are fed-From the ground on which we tread-From her inexhausted store. Prince and peasant, rich and poor-All are nourished by her care, All her generous bounty share. But the soil must first be tilled. Ere a harvest crowns the field. Rain and dew must lend their aid; Light must shine, and darkness shade: Care its fostering hand extend. Daily toil his steps attend, And kind Heaven a blessing send; Or the plowman hopes in vain, Ceres' bounty to obtain.

BUTTER MAKING .- Not one pound in five of he butter sold in our cities under the name of "Goshen," &c., and very little "Country butter" is fit for human food. Butter makers should observe these few short rules:

The newer and sweeter the cream, the weeter and higher flavored will be the butter. The air must be fresh and pure in the room or cellar where the milk is set.

The cream should not remain on the milk over thirty-six hours.

Keep the cream in tin pails, or stone pots; into which put a spoonful of salt at the beginning, then stir the cream lightly each morning and evening: this will prevent the cream from moulding or souring.

Churn as often as once a week, and as much oftener as circumstances will permit.

Upon churning, add the cream upon all the milk in the diary.

Use nearly an ounce of salt to a pound of butter.

Work the butter over twice, to free it from the buttermilk and brine, before lumping and nacking. Be certain that it is entirely free from every

particle of buttermilk, or coagulated milk and t will keep sweet forever.

In Scotland a syphon is sometimes used to parate the milk from the cream, instead of kimming the pans .- South Cultivator.

CHEAP COMPOST FOR CORN .- Having received the credit for two years past, of having as good pieces of corn as any in our neighbor-

hood, and attributing our success mainly to the use of a single handful of cheap compost, we give you a statement as to how we form it. Supposing a load to contain twenty-five ushels, we take two loads of muck manure from our hog-yard, one load of wood ashes. parts thoroughly together with a hoe or shovel.

manure before being plowed, the harrow follows the plow lengthwise of the furrows until the gives the corn a good start, and the manure much with worms. Let it remain in the so-

FROSTED PLANTS .- When plants through accident or neglect, get frozen they should be well sprinkled overhead through a fine rose watering pot with cold water. Great care must be observed in shading from the sun until the frost is thoroughly drawn out, which should be done as gradually as possible. Standing them on the floor of the house is the best plan that can be adopted. Care must be taken that they do not again freeze after springing. It seems not to be generally understood that frost merely suspends, but does not entirely destroy vegetation; and unless plants are very tender, with careful treatment they may generally be saved.

BEDDING PLANTS .- Cuttings of the various bedding plants may now be taken, wherever the means are at hand. It should be borne in mind that one good plant is worth three bad ones at the time of bedding out.

16 Man's inhumanity to man makes countless thousands mourn, what is the effect of man's inhumanity to woman?

Aliscellaneons.

W. A. CHAMBERLIN,

CLOCK & WATCH REPAIRER .- The undersigned is constantly receiving from NewYork by Express, new additions to his Stock of Watches, Clockey, Jewelry, Silver ware, and Fancy Goods, comprising in part—Gold and Silver Lever, L'Epine and Plain Watches, with a full and complete assortment of Fine Gold Jewelry, such as Gold chains, Lockets, Bracelets, Gold Pens, Keys, Breast-Pins, Ear-Rings, Finger-Rings, etc. etc. Also, a large variety of Silver ware such as Table and Tea Spoons, Cream spoons, Butter knives, Salt spoons, Spectacles, together with an extensive assortment of Plated Ware—All of which will be sold very low for CASH.

CLOCKS.—A large assortment Clocks just received, of all descriptions, ranging in prices from 75 cents to Fifty Dollars.

all descriptions, ranging in prices from 75 cents to Fifty Dollars.

#32 Watches repaired on short notice, and WARRANTED to run well. Also, all kinds Clocks repaired.

The most elegant and useful volume of the year.

SEARS' GREAT WORK ON RUSSIA.

SEARS' GREAT WORK ON RUSSIA.

Just published, an Illustrated description of the RUSSIAN EMPIRE. Being a Physical and Political History of its Governments and provinces, Productions, Resources Imperial Government, Commerce, Literature, Educational Means, Religion, People, Manners, Customs, Antiquity, etc., etc., from the latest and most authentic sources.—Embellished with about 200 Engravings, and Maps of European and Asiatic Russia. The whole complete in one lare octavo volume of about 700 pages, elegantly and substantiantially bound. Retail pice, \$3.

This work has been several years in preparation, and will, it is believed, meet in the fullest acceptation of the word, the want so universally felt for reliable information on the history and internal resources of a country occupying so large a portion of the Eastern Hemisphere, and holding so formidable a position at the present time to the rest of Europe and Asia; but of which far less is known than of any other European nation.

11.

#57 Also, a deeply interesting volume, entitled "THE REMARKABLE ADVENTURES OF CELEBRATED PERSONS," embracing the Romantic Incidents and Adventures in the Lives of Sovereigns, Statesmen, Generals, ventures in the Lives of Sovereigns, Statesmen, Generals, Princes, Warriors, Travellers, Adventures, Voyagers, &c. eminent in the History of Emrope and America, including Sketches of over fifty selebrated heroic characters. Beautifully illustrated with numerous engravings. Oone vol. 400 pages, royal 12mo. cloth. gilt. Price, 81.25.

The subscriber publishes a number of most valuable Pietorial Books, very popular, and of such a moral and religious influence that while good men may safely engage in their circulation, they will confer a bublic benefit, and receive a fair compensation for their labor.

**To men of enterprise and tact, this business offers an opportunity for profitable employment seldom to be met with.

Persons wishing to engage in their sale, will receive promptly by mail, a Circular containing full particulars, with "Directions to persons disposed to act as Agents," together with terms on which they will be furnished, by addressing the subscriber, post paid.

AYER'S PILLS.

A ND CHERRY PECTORAL.—The following remedies are offered to the public as the best, most perfect, which medical science can afford. Ayen's Cathartic Pills have been prepared with the utmost skill which the medical profession of this age possesses, and their effects show they have virtues which surpass any combination of medicines hitherto known. Other preparations do more or les good; but this cures such dangerous complaints, so quick and so surely, as to prove an efficacy and a power to uproot disease beyond any thing which men have known before. By removing the obstructions of the internal organs and stimulating them into healthy action, they renovate the fountains of life and vigor—health courses anew through the body, and the sick man is well again. They are adapted to disease, and disease only, for when taken by one in health they produce but little effect. This is the perfection of medicine. It is antagonistic to disease, and no more. Tender children may take them with impunity. If they are sick they will cure them, if they are well they will do them no harm.

Give them to some patient who has been prostrated with

It is antagonistic to disease, and no more. Tender children may take them with impunity. If they are sick they will cure them, if they are well they will do them no harm.

Give them to some patient who has been prostrated with bilious complaint; see his bent-up, tottering form straighten with strength again; see his long-lost appetite return; see his clammy features blossom into health. Give them to some sufferer whose foul blood has burst out in scrotulatill his skin is covered with sores; who stands, or sits, or lies in angoish. He has been drenched inside and out with exery every potion which ingenuity could suggest. Give him these Pills, and mark the effect; see the scabs fall from his body; see the new, fair skin that has grown under them; see the late leper that is clean. Give them to him whose angry humors have planted rheumatism in his joints and bones; move him, and he screeches with pain; he too has been soaked through every muscle of his body with linaments and salves; give him these Pills to purify his blood; they may not cure him, for olas! there cases which no mortal power can reach; but mark, he walks with crutches now, and now he walkes alone; they have cured him. Give them to the lean, sour, haggard dyspeptic, whose gnawing stomach has long ago eaten every smile from his face and every muscle from his body. See his appetite return, and with it his health; see the new man. See her that was radiant with health and loveliness blasted and too early withering away; want of exercise, or mental anguish, or some lurking disease has deranged the internal organs of digestion, assimilation, or sceretion, till they do they do their office ill. Her blood is vitiated, her health is gone. Give her these Pills to stimulate the vital principle into renewed vigor, to cast out the obstructions, and infuse a new vitality into the blood. Now look again—the roses blossom on her cheek, and where sorrow sat, joy bursts from every feature. See the sweet infant wasted with worms. Its wan, sickly features tell you withou

Neuralgia, Gout, and Kindred comploints all arise from the derangements which these Pills rapidly cure. Take them perseveringly, and under the counsel of a good Physician if you can; if not, take them judiciously by such advice as we give you, and the distressing, dangerous diseases they cure, which afflict so many millions of the human race, are cast out like the devils of old—they must burrow in the brutes and in the sea. Price 25 cents per box—5 boxes for \$1.

Through a trial of many years and through every nation Through a trial of many years and through every nation of civilized me, AVER'S CHERRY PECTORAL has been found to afford more relief and to cure more cases of pulmonary disease than any other remedy known to mankind. Cases of apparently settled Consumption have been cured by it, and thousands of sufferers who were deemed beyond the reach of human aid have been restored to their friends and usefulness, to sound health and the enjoyments of life, by this all-powerful antidote to diseases of the lungs and throat. Here a cold had settled on the lungs. The dry, hacking cough, the glassy eye, and the pale, thin features of him who was lately lusty and strong whisper to all but him Consumption. He tries everything; but the disease is gnawing at his vitals, and shows its fatal symptoms more and more over all his fame. He is taking the Cherry Pectoral now; it has stopped his cough and mado his more and more over all his fame. He is taking the 'Cher-ry Pectoral now: it has stopped his cough and mado his breathing easy: his sleep is sound at night: his appetite returns, and with it his strength. The dart which pierced his side is broken. Scarcely any neighborhood can be found which has not some living trophy like this to shad-ow forth the virtues which have won for the Cherry Pec-toral an imperishable renown. Influenza, Croup, Bron-chitis, Hoarseness, Pleurisy, Whooping Cough, and all ir-ritations of the throat and lunes are easily cured by the chitis, Hoarseness, Pleurisy, Whooping Cough, and an in-ritations of the throat and lungs are easily cured by the Cherry Pectoral if taken in season. Every family should have it by them, and they will find it an idvaluable pro-tection from the insidious prowler which carries off the parent sheep from many a flock, the darling lamb from

any a home.

CLEAR TEE TRACKS GREAT WAR AGAINST CLOTHING.

RICH would respectfully inform the citizens of Bradford county that he has opened a branch establishment in Towanda, for the sale of READY MADE CLOTH-ING, comprising the usual stock of Over, Dress, Frock and Sack Coats; Vests, Pants, Shirts, Drawers, Wrappers, Overalls, Stocks, Cravats, Collars, Pocket h'dkfs, &c.

Mr. Rich positively assures the public, that residing in New-York and buying always for cash, enables him to take advantage of the market, so that he can and will sell Clothing 25 per cent. cheaper than any other establishment in the country!

CALL AND SEE! examine and price the stock, be satsfied yourselves that it is more extensive, of better manu-acture and style, and sold much cheaper than ever before

offered in this market.

I have appointed as my agent in Towanda for the sale of Clothing, M. E. SOLOMON, formerly of the firm of Alexander & Solomon, who is well and favorably known Location, for the present, over Tracy & Moore's Store, Main street. Upon the completion of Patton's block, the stock will be removed to one of the new stores, corner of Towanda, January 8, 1855.

M. E. SOLOMON respectfully calls the attention of his old friends and the public generally to the above amouncement, and invites all who may be in need of Clothing to give him a call, assuring them that he can furnish them with woods at the lowest prices, and that no pains will be spared to merit their patronage.

2m31

COLLINS & POWELL

WOULD respectfully call the attention of the public to their large stock of Mens' and boys' furnishing Goods, consisting of every variety of Broadcloths, Cassimeres, Doe-skins, Tweeds, Kentucky Jeans, Linens, Shirts, Collars, Stocks, Cravats, Hosiery, Suspenders, Hats, Carpet Bags, Trunks, Canes, &c. &c., which will be sold cheaper than the same quality can be sold in any other establishment in this country.

They have also on hand a well manufactured assortment of READY-MADE CLOTHING, to which we invite the attention of buyers. Our Clothing is mostly made up in the shop—and not purchased at "slop-shops"—as some we wot of.

Orders in the Tailoring line executed in the most fash-Orders in the Tailoring line executed in the most fashionable manner, at the shortest notice, and warranted.

B The public will please notice one fact, that xo one not practically acquainted with the business is capable of judging of the quality and make of a garment; hence the reason why the community have been so much imposed upon by a CRETAIN CLASS of community who deal in the article, who, if they were not practically and professionally cheats, could of necessity, know nothing about the business. They are certain, the public would consult their true interest, they would purchase only of those acquainted with the business. Towanda, Jan. 1, 1855.

NEW WINTER GOODS!

JOSEPH POWELL is now receiving, as usual, a large stock of WINTER GOODS of every description, consisting of Dry Goods, Groceries, Hardware, Caoekery, Boods and Shoes, Leather, Shoe Findings, Hats and Caps, &c., which he is now offering for Ready Pay at unusually

Me., which he is now onering for Ready Fay at unusually low prices.

DR. HALSEYS' FOREST WINE.—The discovery of the FOREST WINE is the greatest blessing of the age. Put up in Quart Bottles, a single bottle of which does more good, and goes further in the cure of Disease, than ton bottles of any Sarsaparilla in use, and warranted to cure without an unpleasant or weakening effect.

ect. The method by which all Sarssaparillas, and other similar medicines are prepared, is by boiling the Roots of plants to obtain the extracts. Their medicinal virtues are thus

rincipally evaporated and destroyed.

It is not to be wondered at then, that 10 and even 20. bottles of these Sarsaparillas are sometimes taken without any perceptible benefit. Not so with the Forest Wine.—By the invention of a wonderful chemical apparatus, a perfect wine is produced without beating; retaining, at the same time, all the primitive healing properties of the rare medicinal plants of which it is composed, thus rendering the Forest Wine the most efficient medicine the world ever produced at the same time time the most agreeable. produced, at the same time time the most agreeable.

TESTIMONY. TESTIMONY.

This is to certify, that I have used Dr. Halsey's Forest Wine in my family with the most entire success. My wife was badly afflicted with Neuralgia, affections of the Spine and Kidneys, and general Debility. She found speedy relief, and regained her health by the use of the Forest Wine.

From my own knowledge of this excellent medicine. I confidently recommend it for the good of others who may be suffering from similar complaints. It is the best medi-tine with which I am acquainted, and those who are afflic ted with the above, or any similar disease, ma ly on its virtues. E. G. MU MORE TESTIMONY FROM COHOES

MORE TESTIMONY FROM COHOES.

DR. G. W. HALSEY—Dear Sir: My wife last autumn was reduced to a low state of Debility. My family physician advised her to take your Forest Wine. Accordingly I went to Mr. Terry's, your agent in this town, and procured a bottle of it, which restored her in a very short time to perfect health.

Cohoes, April 13, 1850. HENRY DONALDSON. DREADFUL COUGH, DEBILITY, AND LOSS OF APPETITE.

Dr. Halsey: APPETITE.

Cohoes, April 13, 1850. HENRY DONALDSON. DREADFUL COUGH. DEBILITY, AND LOSS OF APPETITE.

Dr. HALSEY: Hempstead, Dec. 1, 1847. A bottle of your Forest Wine and box of Pills, which I procured of James Carr. (your agent for this place.) has done wonders for me. I had been in a state of decline for more than a; year, afflicted with a dreadful cough, pain in the breast, general debility, and loss of appetite. I became admost a skeleton, and had been unable to leave my room for more than two months; my friends told me I had the Consumption and despaired of my recovery. I could not obtain any permanent relief from any medicine I had taken, or my physician, until your Wine and Pills were procured. The first dose of the Pills brought up from my stomach, much phlem and greenish matter, and my stools were perfectly black. I then commenced taking your Forest Wine three times a day, my appetite began to return immediately, my cough left me, and in less than two weeks I was almost well. I now enjoy better health than I ever did before, having increased twenty-five pounds in seven weeks. Your Forest Wine and Pills are highly valued in this vicinity, and I owe my recovery entirely to their virtues. Yours, respectfully.

MARTIN CALDWELL.

AFFECTIONS OF THE KIDNEYS.

Mr. T. J. Gillies, a highly respectable Merchant of No. 308 Broadway, New York, cured of a severe affection of the Kidneys by the Forest Wine and Pills. Dr. G. W. HALSEY: New York, March 12, 1853.

Dear Sir—In the summer and fall of last year I had a severe complaint of the Kidneys, which rendered me quife unfit for business. I procured your Forest Wine and Pills which cured me in a few weeks time, and I have since enjoyed better health than I had for many years previously. From their efficacy in my own case, and from what I know your medicines to have done for others, I am induced to recommend them as the best medicines with which I am acquainted.

Yours, respectfully.

T. J. GILLIES.

DYSPEPSIA.

DYSPEPSIA. There are thousands cured every year of this disease by the Forest Wine and Pills; Dyspepsia, Costiveness and Indigestion, are kindred complaints, frequently existing together, and the cure of one is generally the cure of all. The Forest Wine and Pills above all remedies are pre-emi-

The rorest wine and Pills above an remedies are pre-emi-nent in the cure of Dyspepsia.

Testimony of J. N. Vermile, of New York City, dated July 9, 1852.

Dr. G. W. HALSEY:—Dear Sir—Having been cured of Dr. G. W. HALSEY: — Dear Sir—Having been cured of Dyspepsia by the use of your Forest Wine and Pills, Itake the liberty to offer you my name, believing many who know me may be benefited by your excellent remedies.—For many years I have been afflicted with this malady so bably that nearly one-third of my time has been lost from business. The Forest Wine and Pills have restored me to excellent health, and I cheerfully recommend them, as I am convinced the discovery of these remedies are a blessing to mankind.
