Earthquake in Simoda.

One of the Largest Cities in the Empire Destroyed-Extraordinary Experiences of a Russian Frigate.

From the North China Herald Extraordinary we take the subjoined interesting news from

We have been favored from a private source with the following extracts of a letter from an officer of the United States steamer Pow-

The island of Niphon, in which Simoda is situated, was visited, on the 23d of December. by a severe earthquake. which was most disastrous in its effects. The city of Ohosaca, one of the largest in the empire was completely laid waste. Jeddo itself suffered considerably, but has since suffered more seriously from the effects of an extensive conflagration. The town of Simoda, on our arrival, presented a complete scene of desolation and ruin. After the shock of the earthquake, the sea commenced bubbling up as it were along the shore, and then receded with great rapidity, and as soon returned with such increased volume as to flood the whole town to the depth of six or seven feet, sweeping away houses, bridges, and temples, and piling them up in a mass of ruin.

Five times during the day did the sea advance and recede in this manner, spreading desolation far and wide. The largest junks in the harbor were driven from one to two miles above high water mark, where we saw them lying high and dry. About 200 of the poor inhahabitants lost their lives by the overflow, the remainder saving themselves by fleeing to the mountains with which the town is surrounded.

"The Russian frigate Diana, having Vice-Admiral Pontiatine on board, was lying in the harbor at the time, engaged in finishing up the treaty they had made with the Japanese .-Immediately after the shock was felt, the water in the harbor became convulsed to such a degree in eddies and whirlpools, that in the space of thirty minutes she swung entirely round forty three times twisting her chains up into knots; so rapid was the motion that the people on board could not keep their feet and were made giddy. When the sea receded it left the frigate in eight feet water on her side, when her usual draft was over twenty one feet. On its return, it is stated, the water rose five fathoms above its ordinary level.

"On its again receding, four feet only of water remained, so that they saw the stocks of their anchor above the water. The heaving of the bottom of the bay was then so violent that the frigate-although, as I said, in only four eet of water-was moved bodily past her anchor. The officer momentarily expected that the bay would become the outlet of the subterranean fires, and that they would be engulphed in it. When the frigate again floated they saw her keel and rudder, which had been wrenched off, floating alongside, and the ship filling with water. By getting sails under her. they managed to get her affoat, and the next day, things having keep quiet once more, they hauled her into deeper water. Occasional shocks of earthquake still continued to be felt, but none were attended with serious conse-

"After repairing damages as well as they could, and having rigged a temporary rudder, and the weather becoming fine, they attempted to take the ship around to another bay, where she would be less exposed, and they would omplete repairs (Simoda being badly adapted or such a purpose;) but when within seven niles of their harbor a gale sprung up—the undred Japanese boat that were towing them abandoned them (not, however, till they had got out all of the officers and crew,) and hortly after the gallant ship sunk in deep water, the officers and men saving only the lothes they stood in. Notwithstanding all their misfortunes and the dangers through which they passed, they only lost one man, and he was accidently killed by being jammed by one of the guns which had gone adrift."

ESCAPE OF EIGHT CONVICTS .- Eight convicts scaped from the Auburn State Prison between and 4 o'clock this afternoon. They made heir egress through the south wall by a hole which had evidently cost them time and labor make.

In order to make their escape, after getting brough the wall, they were compelled to swim the Owasco outlet, which in such an inclement ay as this, must have so completely chilled em as to render them incapable of making ery swift progress.

P. S. We learn that three of the convicts were retaken about a mile and a half from the city by Zebulon Holms, who happened to see hem passing his house.—Auburn Adv.

FARMERS, ATTENTION!

Plant your Corn economically and scientifically! C. H. DANA'S HAND CORN PLAN-TER, patented September 5, 1854, costs ONLY THREE DOLLARS, and is therefore within the means of every man who plants half an acre of ground. It is simple in its construction, and executes its work with accuracy and despatch on various kinds of soil.

Unlike other planters, it has no gearing to get out of repair, but is carried in the hand like a cane, and can be worked up hill or down; as well as on level ground, planting as much ground in a day as five men can with hose.

worked up hill or down; as well as on level ground, planting as much ground in a day as five men can with hoes.—
It may also be used to plant beans, as it can be guaged to drop as few or as many kernels as desired. It is meeting with unprecedented success everywhere it is introduced, having been presented at several Agricultural fairs, and always without exception received the highest premium, being the best and cheapest implement of the kind in use.

The undersigned, having purchased the right of selling the said Planters in Bradford county, will canvass the county in April, at which time he will supply those who wish, or dispose of Town Rights to any who wish to purchase.

\$500 REWARD!

For an improvement on SCOTT'S PATENT BLACKSMITH'S STRIKER! SCOIT'S PATENT BLACKSMITH'S STRIKER!

THE undersigned, having purchased the right to sell in a number of the counties of this state, and elsewhere, Scott's Patent BLACKSMITH'S STRIKER, respectfully announce that they are now stopping at BLACK'S Hotel, in Towanda, where they will exhibit the Patent Striker, and explain its operation. They expect to remain about three weeks. By the aid of this invention, every Blacksmith can dispense with the additional hand required to forge iron, and will consequently effect a great saving of labor to all who become possessed of it. This is considered one of the greatest and most useful inventions of the age, and the manner in which it forges iron of every description has greatly surprised the numerous sons of Vulcan who have seen it operation.
