In answer to an inquiry for information as to the best mode of cleaning and oiling harness, &c., we re-publish the substance of an article given in the Rural New Yorker :

Observing the good condition and fine appearance of the harness of Ald. Baker, proprietor of the most extensive livery establishments in Rochester, we requested him to impart to us, for publication, the modus operandi by which so desirable an object was achieved. In compliance therewith, he stated the course adopted as the best and most economical, after twenty years experience in a business which required considerable attention to tackling apparatus. His process of oiling and washing harness is substantially as follows:

Take neats foot oil and ivory or patent black -the latter well pulverized, or to be made so before using. Mix thoroughly, adding the black until the oil is well colored or quite black. In cool weather the oil should be warmed somewhat before mixing. With a sponge apply character to their School which will recommend it to the leather will readily absorb, unless the harness is very dry, in which case a heavier coating may be necessary. After the harness is dry—which will be in from two hours to half or a whole day, depending upon the weather and previous conditions of the leather—wash the meaning the second transfer of the leather—wash the meaning transfer of the community.

The next Quarter will commend it to the confidence of the community.

The next Quarter will commence on Monday, April 30.

They be leave to refer to the following named gentlemen:—R. Rev. Alonzo Pottera, Bishop of the Diocese of Penn'a, Philadelphia; Rev. Dr. Maclean, President of the College of New Jersey, Princeton.

Two applications of this oil and black mixture a year, (or once every six months) will be sufficient to keep harness, as ordinarily used, in good order. It may be necessary for livery men, and others who use harness constantly, to apply the oil oftener—but in most cases two apply the oil oftener-but in most cases, two oilings a year and washing with suds when

The only difference in treatment is, that less oil should be used or rather a light coating applied—and it should be washed off before drying in, top leather being thin and much more penetrable than harness. Kicking Cows.

Hear what an old man, who has spent his whole life and grown gray upon a farm, says about kicking cows :

In most cases the habit of kicking is contracted during the first mouth after she has had her first calf. If, as it is often the case with well fed heifers, the udder is a little feverish at the time, and it often becomes so sore that it is impossible for the poor creature to stand still while the necessary milking is done. Following the instinct of nature, she kicks; and finding she is thus freed from pain continues to do so till the anger of the milk is aroused, and then a bad matter is made much worse.

It is better in the first place to tie the heifer by the head, then set your left shoulder gently but firmly against her, just back of her right shoulder, grasp firmly her fore leg below the knee, turning her foot up backward till it touches the leg, then slip on over the knees a stay, or hoop, or cork that will conon three legs she will find it difficult to kick so as to hurt you. Now take a convenient sized cloth, and wet and wash the udder thoroughly with tepid or cold water, after which milk her as carefully and tenderly as possible, using at the same time such gentle and soothing language as is calculated to show her that you do not wish to hurt her-but let her struggles be ever so violent or provoking, mind you keep control of your own temper. An outbreak on your part will as certainly be productive of a bad effect upon the cow, as an echo will answer your own voice, or as your image will be reflected in a mirror. Kindness combined with breaking them; and after a few times she will J. D. HUMPHREY is just lift her foot to be tied as readily as a horse will to be shod. Continue to milk her in this way until the soreness is gone, and she will find it a gratification to be milked, will often meet you as she sees you coming with the pail, and you will ever after find it easier to get along with her should her teats by chance get sore afterwards .- Life Illustrated.

REAL NEW ENGLAND BROWN BREAD .- Take equal proportions of sifted rye and Indian meal. mix them well together; add half a teacupful of molasses, and two gills of good yeast to about three quarts of mixed meal. Wet this with a good, new milk, sufficient to make a dough than can easily be worked, even with one hand. For economy's sake, milk that has stood twelve hours, and from which the cream has been taken, may be substituted for the new milk, or water which has been pressed from from boiled squash, or in which squash has been boiled, is a substitute much better than pure water. But warm water is more commonly used. The ingredients should be thoroughly mixed, and stand, in cold weather, for twelve hours; in warm weather two hours may be sufficient before baking.

If baked in a brick oven, a three-quart loaf should stand in the oven all night. The same quantity in three baking-pans will bake in

about three hours. Serve this warm from the oven, with good, sweet butter, and we could fesst upon it every morning for breakfast, from January to Dec.

CATERPILLARS AND CANKER WORMS .- These pests of the farmer seem to be even more numerous this year than ever before. The canker worms seem to be gradually working from the coast to the interior. As far as seven or eight miles out, the trees attacked by them | Waverly, N. Y. appear as if exposed to a powerful fire. As to caterpillars, they swarm in every direction. not only upon trees, but upon bushes, fences and even in dwelling-houses- This great increase is no doubt in part owing to the killing

If you have contracted the terrible disease, which when once seated in the system, will surely go down from one generation to another, undermining the constitution, and sapping the very vital fluids of life, do not trust yourself in the hands of Quacks, who start up every day in a city like this, and fill the papers with glaring falsehoods too well calculated to deceive the young and those not acquainted with their tricks. This article is now pre-cribed by some of the most distinguished Physicians in the Country, and has proved more efficient in practice than any preparation of Sursaparilla yet offered to the public. Several cases of secondary Syphilic, Mercurial and Scrofulous diseases have entirely recovered in the incurable wards of our public institutions, which had for many years resisted every mode of treatment that could be devised. These cases furnish striking examples of the salutary effects of this medicine in arresting some of the most inveterate diseases, after the glands were destroyed and the bones already affected.

DR. G. W. HALSEY—Dear Sir: My wife last autumn was reduced to a low state of Debility. My family physician advised her to take your Forest Wine. Accordingly I went to Mr. Terry's, your agent in this town, and procured a bottle of it, which restored her in a very short time to perfect health.

DREADFUL COUGH, DEBILITY, AND LOSS OF APPETITE.

DR. HALSEY: Hempstead, Dec. 1, 1847.

A bottle of your Forest Wine and box of Pills, which I procured of James Carr. (your agent for this place,) has done wonders for me. I had been in a state of decline for more than a year, afflicted with a dreadful cough, pain in the breast, general debility, and loss of appetite. I became almost a skeleton, and had been unable to leave my room for more than two months; my friends told me I had the Consumption and despaired of my recovery. I could not obtain any permanent relief from any medicine I had taken, or my physician, until your Wine and Pills were procured. The first dose of the Pills brought up from my stemach, much phlem and greenish matter, and my stools were perfectly black. I then commenced taking your Forest Wine three times a day, my appetite began to return immediately, my cough left me, and in less than two weeks I was almost well. I now enjoy better health than I ever did before, having increased twenty-five pounds in seven weeks. Your Forest Wine and Pills are highly valued in this vicinity, and I owe my recovery entirely to their vicines.

Dr. G. W. HALSEY: New-York, March 12, 1853.

Dr. G. W. HALSEY: New-York, March 12, 1853. Dear Sir—In the summer and fall of last year I had a severe complaint of the Kidneys, which rendered me quite untit for business. I procured your Forest Wine and Pills which cured me in a few weeks time, and I have since enjoyed better health than I had for many years previously. From their efficacy in my own case, and from what I know your medicines to have done for others, I am induced to recommend them as the best medicines with which I am acquainted.

Yours respectfully Yours, respectfully, T. J GILLIES. DYSPEPSIA.

DYSPEPSIA.

There are thousands cured every year of this disease by the Forest Wine and Pills; Dyspepsia, Costiveness and Indigestion, are kindred complaints, frequently existing together, and the cure of one is generally the cure of all. The Forest Wine and Pills above all remedies are pre-eminent in the cure of Dyspepsia.

Testimony of J. N. Vermile, of New York City, dated July 9, 1859.

Dr. G. W. HALSEY :- Dear Sir-Having been cured of Dyspens by the use of your Forest Wine and Pills, I take the liberty to offer you my name, believing many who know me may be benefited by my excellent remedies.—For many years I have been afflicted with this malady so bably that nearly one-third of my time has been lost from business. The Forest Wine and Pills have restored me to prove the path and be the path and be the path. excellent health, and I chcerfully recommend them, as I ar convinced the discovery of the remedies

of which does more good, and goes further in the cure of Disease, than ton bottles of any Sarsaparilla in use, and warranted to cure without an unpleasant or weakening effect.

The method by which all Sarsaparillas, and other similar medicines are preparted, is by boiling the Roots of plants to obtain the extracts. Their medicinal virtues are thus principally evaporated and destroyed.

It is not to be wondered at then, that 10 and even 20 bottles of these Sarsaparillas are sometimes taken without any perceptible benefit. Not so with the Forest Wine. By the invention of a wonderful chemical apparatus, a perfect wine is produced without beating; retaining, at the same time, all the primitive healing properties of the rare medicinal plants of which it is composed, thus rendering the Forest Wine the most efficient medicine the world ever produced, at the same time time the most agreeable.

TESTIMONY.

This is to certify, that I have used Dr. Halsey's Forest Wine in my family with the most entire success.
