On stating the case to Dr. Dadd, the skillful veterinary surgeon of Boston, it elicited the following valuable letter. The importance of occasional change of food which it recommends, is not sufficiently attended to by our farmers in feeding their stock.

"As regards your horse, I would (if he is no better) change the diet immediately. He is probably suffering from acute, or perhaps chronic indigestion, which is very apt to occur in animals when kept too long on one kind of

No fact in dietics is better established than that of the impossibility of long sustaining health, or even life on one kind of diet.— It fails to support nutrition. (See Liebig and Carpenter.) The animals experimented upon, after a certain length of time, seemed willing to endure starvation rather than live on one kind of diet. As regards the adult horse, however, he will exist for some time on highly nutritous articles, such as oats, barley, corn meal, &c., but they finally induce febrile diseases such as laminitis (inflammation of the

The adult, however, requires a greater variety
of food than the latter, to support the integrity
of his organization, consequently as you have
fed your horse on corn and cob meal all winter,
Mrs. MARTHA A. DAYTON. Preceptress;
Mrs. MARTHA A. DAYT there may be a disproportion between the amount of carbon, (in the form of food,) and be deranged, or carbon in the form of fat, is deposited in the various tissues.

A fat horse, of course you are aware, is not the one for fast work nor fatigue, and, the emaciated excepted, is more likely to become sick, from the least exciting cause.

On the other hand, an excess of carbonaceous material deranging the stomach-it holding sympathetic relation with the brain-is apt to terminate in staggers, &c. It should be known to horsemen that an adult horse Contingent fund for each ought not to increase in weight from year to year ; the food may be proportioned to work, any increase of flesh, or fat, is a signal to dip a lighter hand into the meal bag ; that is, if you want to keep disease and death at bay.

It pays to fatten cattle, sheep and swine, because the result, is dollars and cents, but you may depend that it is losing a spec to fatten horses; for among such I have the most practice, their disease being more difficult to control than when occurring in others, in fair working order.

As regards corn and cob meal, I think it operates injuriously on a great many horses. In the first place they do not always masti-

cate it properly, it being soft and easily insalivated, they are apt to bolt it, as the saving is, it then runs into fermentation, resulting in flatulent or spasmodic cholic.

In order to obviate the difficulty, the meal ought to be mixed with cut hay or straw, articles that must be masticated ere swallowed. Should the digestive organs be deranged, meal ferments very rapidly, inducing flatulency.

I shold not object to giving a horse a feed of corn and cob meal occasionally, mixing it with cut hay and a little salt. Salt is a good and soda; aids digestion and prevents the mail. generation of worms.

ACID PHOSPHATE OF LIME. -- It is some years since this salt was proposed as a manure, and repeated trials since that time have fully demonstrated its efficiency. The simplest method of preparation it is as follows: Bones are thrown into heaps, where they soften by fermentation. They are then covered with half their weight of water in wood or stone vats, and half their weight of oil of vitriol added. The whole passes into a pasty state in the course of eight or ten days, when it is mixed with earth. charcoal, or saw-dust, to render it pulverulent. If it be required to apply the salt in a fluid state to land, the paste is diluted with 100-200 times its bulk of water.

To Destroy Red Ants.—A correspondent Home Manufactured work, sole & U LEATHER, FRENCH AND AMERICAN CALF SKINS, MOROCCO, &c. of the Southern Cultivator contributes the following method for destroyintg the above named insects :- Procure a large sponge, wash it well; press it very dry; by so doing it will leave the small cells open- lay it on the shelf where they are most troublesome, sprinkle some fine white sugar on the sponge (lightly over it :) two or three times a day, take a bucket of hot water to where the sponge is, carefully drop the sponge in the scalding water, and you will slay them by the thousands, and soon rid the house of these troublesome insects. When you squeeze the sponge, you will be astonished at number which have gone in the cells."

KEEP FRUIT TREES STRAIGHT .- Trees in an open exposure often acquire a leaning position from the prevailing winds. This should not be suffered beyond a certain stage of the tree .-When as large as one's wrist they should be set up erect, and, indeed, thrown into the wind at an angle of ten or fifteen degrees; in order to bring them ultimately into a straight position. This is best done by obtaining crotched limbs from the woods, eight to twelve feet long, and placing the but end, which should be sharpened, on the ground, and the crotch and either against the trunk, immediately beneath branching point, or against a large outer limb, if more convenient, securing it from chafing in the crotch, by a padding of straw, or litter, and setting the tree up at once to the desired angle of elevation. Loosen, also the ground on the windward side of the root so that it will not bind, and the work is accomplished. Let this be done when the tree hegins to make its ing point, or against a large outer limb, if be done when the tree begins to make its porte, Pa summer growth, or soon after leafing out. One season, if the tree is thrifty, will be all that is required. If, however, it be obstinate repeat the trial another year. The remedy is sure. Even large trees, which have acquired a repeat the trial another year. The remedy is sure. Even large trees, which have acquired a permanent lean, may be thrown into an erect posture, by loosening the earth at the root, and occasionally cutting off an obstinate large root, without injury to its growth, and thus be made sightly. An erect tree will be longer lived

DR. HALSEYS' FOREST WINE.—The discovery of the FOREST WINE is the greatest blessing of the age. Put up in Quart Bottles, a single bottle of which does more good, and goes further in the cure of which does more good, and goes further in the cure of the forest Wine in the cure of Disease, the third property of the Forest Wine in the Control of warranted to cure without an unpleasant or weakening

warranted to cure without an unpleasant or weakening effect.

The method by which all Sarssaparillas, and other similar medicines are prepared, is by boiling the Roots of plants to obtain the extracts. Their medicinal virtues are thus principally evaporated and destroyed.

It is not to be wondered at then, that 10 and even 20 bottles of these Sarsaparillas are sometimes taken without any perceptible benefit. Not so with the Forest Wine.

By the invention of a wonderful chemical apparatus, a perfect wine is produced without beating; retaining, at the same time, all the primitive healing properties of the rare medicinal plants of which it is composed, thus rendering the Forest Wine the most efficient medicine the world ever produced, at the same time time the most agreeable.

TESTIMONY.

This is to certify, that I have used Dr. Halsey's Forest Wine in my family with the most entire success. My wife was badly afflicted with Neuralgia, affections of the Spine and Kidneys, and general Debility. She found speedy relief, and regained her health by the use of the Forest Wine.

MORE TESTIMONY FROM COHOES.

Dr. G. W. HALSEY—Dear Sir: My wife last autumn was reduced to a low state of Debility. My family physician advised her to take your Forest Wine. Accordingly I went to Mr. Terry's, your agent in this town, and procured a bottle of it, which restored her in a very short time to perfect health.

DREADFUL COUGH, DEBILITY, AND LOSS OF APPETITE.

DR. HALSEY: Hempstead, Dec. 1, 1847.

A bottle of your Forest Wine and box of Pills, which I procured of James Carr, (your agent for this place,) has done wonders for me. I had been in a state of decline for more than a; year, afflicted with a dreadful cough, pain in the breast, general debility, and loss of appetite. I became almost a skeleton, and had been unable to leave my room for more than two mouths; my friends told me I had the Consumption and despaired of my recovery. I could not obtain any permanent relief from any medicine I had taken, or my physician, until your Wine and Pills were procured. The first dose of the Pills brought up from my stemach, much phlem and greenish matter, and my stools were perfectly black. I then commenced taking your Forest Wine three times a day, my appetite began to return immediately, my cough left me, and in less than two weeks I was almost well. I now enjoy better health than I ever did before, having increased twenty-five pounds in seven weeks. Your Forest Wine and Pills are highly valued in this vicinity, and I owe my recovery entirely to their virtues.

Yours, respectfully.

Mr. T. J. Gillies, a highly respectable Merchant of No. 308 Broadway, New York, cured of a severe affection of the Kidneys by the Forest Wine and Pills.

Dr. G. W. HALSEY: New-York, March 12, 1853.

Dear Sir—In the summer and fall of last year I had a severe complaint of the Kidneys, which rendered me quite unfit for business. I procured your Forest Wine and Pills which cured me in a few weeks time, and I have since enjoyed better health than I had for many years previously. From their efficacy in my oan case, and from what I know your medicines to have done for others, I am induced to recommend them as the best medicines with which I am acquainted.
