reflections.

As the publication of the book is not a question of bread, the author can use the liberty of speaking plain—In the first place, then, he cannot afford to publish the book anaided—nor would he if he could; for the simple reason, he is unwilling to shoulder the responsibility of committing a—possibly—poor book to the world. He therefore seeks to make a corporate concern of it, and thus share with the subscribers the odium of failure, should it fail. It is a purely gratuitous matter, gentlemen, sizu, or not sign. In the second place, the author is unwilling to have his stock of books added to, by too many hundred copies of a work that failed to redeem the is unwilling to have his stock of books added to, by two many hundred copies of a work that failed to redeem the price of its publication: neither does he desire the horror of witnessing the awful spectacle of an auto-da-fe, of what cost him so much pains and time to create;—for he certainly would commit to the flames what remained unsold of the edition, should they remain too long on his hands. He is determined to pay the publisher on the receipt of the edition, should it be printed, asking no favors; and if 600 subscribers can be had, be will do so. He can afford, however, to wait, should the 600 refuse to come to the rescue. The MS will not diminish in value. It will romain as it has done, cherished by the owner, as was cheriman as it has done, cherished by the owner, as was cheriman as it has done, cherished by the owner, as was cheriman as it has done, cherished by the owner, as was cheriman as it has done, cherished by the owner, as was cheriman as it has done. however, to wait, should the 600 refuse to come to the rescue. The MS will not diminish in value. It will romain as it has done, cherished by the owner, as was cherished and loved "the poor man's one little ewe lamb, that was unto him as a daugher." The author will ask no one to undertake to publish it on the strength of its merits: perhaps from a prophetic apprehension of its lack of merit. Time—perhaps—will determine if he did well to be influenced by the latter consideration. The author will further say, that should the desired number of subscriptions be obtained, he will feel tempted to promise an embellished frontispiece, enclosing a medallion likeness of the principal character, Dr. Plum. And should a second edition follow, he—the author—will exert all the influence he can command to secure for the original subscribers a lock of that distinguished individual's hair; as thank Heaven, he is appreciative, and, judging from his antecedents, the author has no doubt that Plum would gladly wear a wig for a whole year, to have the pleasure of furnishing to his friends so interesting a souvenir.

The publication of the book, then, is dependent on the receipt of 600 subscribers, and one month will be allowed for names to be given in. If, at the expiration of that time only one person has subscribed, or any other number between that and 600—unless very closely approximating it—the book will not of course be expected to see the light. But, if the entire number be obtained, those who have signed, will, in three months from the closing of the subscription lists, be supplied with a copy, or copies, as they may have ordered.

Subscription losts will be opened on Monday next, at all

the stores, and at the P. O. in the borough; and at C. H. Herrick's, at Athens. At Burlington, there will be one at Messrs, Loso & Merry's store, and at Utster Mr. John Mather, and at Monroe, Mr. Seymour Phinney, will act s agents. Others may be authorized. Towanda, October 13, 1855.

they may have originated, and ho matter of how long standing.

If you have contracted the terrible disease, which when once seated in the system, will surely go down from one generation to another, undermining the constitution, and sapping the very vital fluids of life, do not trust yourself in the hands of Quacks, who start up every day in a city like this, and fill the papers with glaring falsehoods too well calculated to deceive the young and those not acquainted with their tricks. You cannot be too careful in the selection of a remedy in these cases.

The fluid extract Buchu has been pronounced by eminent Physicians

THE GREATEST REMEDY EVER KNOWN.

It is a medicine perfectly pleasant in its taste, and very innocent in its action, and yet so thorough that it aunihilates every particle of the rank and poisonous virus of this disease; and, unlike other remedies, it does not dry up the disease in the blood.

Constitutional Debility, brought on by selfabuse, a most terrible disease, which has brought thousands of the human race to unfintely graves, thus blasting the brilliant hopes of parents, and blighting in the bud the glorious ambition of many a noble youth, can be cured by this in the disease in the the terribude of many a noble youth, can be cured by this in the disease in the the confined and despairing invalid, no

from excess of Mercury, exposure and imprudence in life, chronic constitutional disease, arising from an impure state of the blood, and the only reliable and effectual remedy known for the cure of Scrofula, Salt Rheum, Scald Head, Ulcerations of the Throat and Legs, Pains and Swellings of the Bones. Tetter, Pimples on the face and all Scaly Eruptions of the Skin.

This article is now prescribed by some of the most distinguished Physicians in the Country, and has proved more efficient in practice than any preparation of Sarsaparilla yet offered to the public. Several cases of secondary Syphilic, Mercurial and Scrofulous diseases have entirely recovered in the incurable wards of our public institutions, which had for many years resisted every mode of treatment that could be devised. These cases furnish striking examples of the salutary effects of this medicine in arresting some of the most inveterate diseases, after the glands were destroyed and the bones already affected.

Notice—Letters from responsible Physicians and Professors of several Medical colleges, and certificates of cures from patients will be found accompanying both preparations.
