"FISH AND PHILOSOPHY."

DR. JOHN MINTOSH,
Would inform the inhabitants of Bradford county
that he respectfully solicits 600 subscribers for his local
work entitled "FISH AND PHILOSOPHY, or Sketches
made During a Short Sojourn in Northern Pennsylvania."
The book will consist of from 250 to 300 pages, 12mo.,
and will be bound in embossed muslin. The price will be
\$1,00. As the work was not written to vindicate
any particular theory, or to advance any particular interest, it is difficult to say what it aims at—further than to
help while away a leisure hour or two, in what the Author hopes, not unprofitable reading.
The pages are chiefly devoted to descriptions of local
scenery; incidents while Trouting on the Schrader branch;
literary criticisms and reminiscences; conversations, developments of local character, poetry and philosophical R. JOHN MINTOSH,

As the publication of the book is not a question of As the publication of the book is not a question of pread, the author can use the liberty of speaking plain.—
In the first place, then, he cannot affird to publish the book unaided—nor would be if he could; for the simple reason, he is unwilling to shoulder the responsibility of committing a—possibly—poor book to the world. He therefore seeks to make a corporate concern of it, and thus share with the subscribers the odium of failure, should if fail. It is a purely graduitons matter, centlecommitting a—possibly—poor book to the world. He therefore seeks to make a corporate concern of it, and thus share with the subscribers the odium of failure, should it fail. It is a purely gratuitous matter, gentlemen, sign, or not sign. In the second place, the author is unwilling to have his stock of books added to, by too many hundred copies of a work that failed to redeen the price of its publication; neither does he desire the horror of witnessing the awful spectacle of an auto da-fe, of what cast him so much pains and time to create—for he certainly would commit to the flames what remained unsold the follow, should it bey printed, asking no favors; and if 600 subscribers can be had, he will do so. He can afford, however, to wait, should the 600 refuse to come to the rescue. The MS will not diminish in value. It will remain as it has done, cherished by the owner, as was cherished and loved "the poor man's one little ewe lamb, that was unto him as a daugher." The author will ask no one to undertake to publish it on the strength of its merits: perhaps from a prophetic apprehension of its lack of merit. Time—perhaps—will defermine to remain as it has done, chrished by the owner, as was cherished by the owner, as was cherished and loved "the poor man's one little ewe lamb, that was unto him as a daugher." The author will ask no one to undertake to publish it on the strength of its merits: perhaps from pride, perhaps from a prophetic elegated to prompt a second edition follow, he—the author—will exert office the cities of the principal character, Dr. Plum. And should a second edition follow, he—the author—will exert office as a lock of that distinguished individual's hair, as thank Heaven, he is appreciative, and, judging from his antecedents, the author has no doubt that Plum would gialdy werr a wig for a whole year, to have the pleasure of formithing to his friends so interesting a souvenir.

The publication of the book, them, is dependent on the rescent of the principal character, and, judging form bis antec

may have ordered.

Subscription lists will be opened on Monday next, at all the stores, and at the P. O. in the borough; and at C. H. Herrick's, at Athens. At Burlington, there will be one at Messrs. Long & Merry's store, and at Ulster Mr. John Mather, and at Monroe, Mr. Skymour Phinney, will act as agents. Others may be authorized.

This article is now prescribed by some of the most distinguished Physicians in the Country, and has provamore efficient in practice than any preparation of Sarsaparilla yet offered to the public. Several cases of secondary Syphilic, Mercurial and Scrofulous diseases have entirely recovered in the incurable wards of our public institutions, which had for many years resisted every mode of treatment that could be devised. These cases furnish striking examples of the salutary effects of this medicine in arresting some of the most inveterate diseases, after the glands were destroyed and the bones already affected.
