

Farmer's Department.

Cheddar Cheese.

The following directions for the manufacture of Cheddar cheese are issued on the authority of the Committee of the Ayrshire Agricultural Association on Cheese-making:—

Immediately after the morning milking—say at seven o'clock—the evening and morning milk are put together into the tub. In summer the temperature of the whole is brought to 80 degrees, by heating a small quantity of the evening milk. In spring or autumn, when the weather is colder, the milk may be heated to 83 or 84 degrees. The temperature should always be ascertained with precision by the use of the thermometer.

When the desired temperature is obtained the rennet is added in the usual manner. Pure, well-flavored rennet is indispensable.

After the rennet is added, an hour is requisite for coagulation.

At eight o'clock the curd is gently broken and allowed to subside a few minutes, in order that a small quantity of whey may be taken off to be heated. This whey is put into a tin vessel and placed in an adjoining apartment to be heated in hot water. The curd is then most carefully and minutely broken, and as much of the heated whey is mixed with it as suffices to raise it to 80 degrees, the temperature at which the rennet was added. It is then left for an hour.

A little after nine the work is resumed.—A few pails of whey are taken off, and heat is to a higher temperature than at eight o'clock. The curd is then broken as carefully as before, and after this is done an assistant pours several pails of the heated whey into the mass. During the pouring in of the whey the stirring is actively continued, in order to mix the whole regularly, and not to allow any portion of the curd to become overheated.

The temperature at this time is raised to 100 degrees, and the stirring is continued until the minutely broken pieces of curd acquire a certain degree of consistency. The curd is then left half an hour to subside.

The next operation is to draw off the whey. The greater proportion of it is lifted in a tin bowl and poured through a hair sieve, for the purpose of retaining any small pieces of curd that may have been lifted along with it.

When the whey above the mass of curd is thus removed, the spout at the bottom of the tub is turned, and the remainder is allowed to drain off, without any pressure being applied. After the most of the whey is thus drawn off, the curd is cut from the sides of the tub, and placed upon the convex centre. It is carefully heaped up, and left for half an hour, or a little longer, with no other pressure than its own weight.

The curd is next cut into large slices, turned over once on the centre of the tub, and left in a heap as before for half an hour. The whey flows away towards the sides of the tub, and drips from the spout. At this stage the whey should come away very pure.

After this interval the curd will be nearly ripe for the application of pressure. But it must not be put into the vat to be pressed at too high a temperature. As the temperature is usually too high at this stage, the curd is broken by the hand into pretty large pieces and placed upon a cooler until the temperature descends to 65 degrees, or thereby. The curd is then put into one or more vats, and subjected to a moderate pressure for a period of from fifteen to thirty minutes. The next process is to take the curd from the vat, break it finely by putting it through the curd mill, mix it with salt, and make it up into a cheese. A pound of good salt is sufficient for half a cwt. of curd.

The cheese which is commenced at seven may be carefully made and put into the press by two o'clock, where it remains till next morning. It is then reversed in the vat and another cheese cloth is put upon it. The following morning a fine cotton cloth is put upon it to give it a smooth surface, and it is again reversed in the vat and pressed twenty-four hours, after which it is laid upon the shelf. During two or three days, over which the process extends, the pressure is continued for the purpose of consolidating rather than drying the cheese.

When the cheeses are taken from the press they are each laced into a piece of canvas, for the purpose of preserving their shape, but without any fillet a well-made Cheddar cheese retains its shape as well as a Dunlop cheese. At first they should be tared daily, and the time between the turning may be extended as they become firmer.

A temperature in the cheese-room of from 55 to 65 degrees is regarded as the best for ripening Cheddar cheese. In good weather, during the month of June, July, and August, the natural temperature of the atmosphere is sufficiently high; but at other times of the year, and also during these months if the weather be cold, a stove should be kept in operation in the cheese-room.—English Farmer's Magazine.

TRAINING OF TREES.—The editor of the Horticultural Review says:

"Trees with low heads do bear sooner and better, and will bear longer than whip-stems and bean poles. In our prairies, low-headed trees are the only ones that can hold up their heads, or hold on their fruit. They are naturally shaped fruit bearers, and they are miserably unpoplar with that class of purchasers who 'know more about trees than the men who raise them.' This is a most important subject, and fruit growers will never repent but once, if they prune their trees up high. Like most tyros, we began so too, and it has inflicted upon us perpetual sorrow upon us. The low tree is healthier, not subject to affections of bark or insects, not injured by winds, the fruit is easier gathered; in fact every reason is in favor of low growth. We now try to form a head not higher than three feet from the ground, for apples letting the branches grow out."

SALT FOR MILCH COWS.—When cows in milk are kept on green, succulent food, they require a regular and liberal supply of salt. So, when cattle are first turned to pasture in the spring they require salting more frequently than in the latter part of the season, when the herbage is less succulent and fresh. It is often the case that animals taken from dry food, and supplied exclusively with green fermentable herbage, are greatly debilitated by scours. Salt in due quantity is a certain preventive of this malady.

The N. E. Farmer, says that common hard soap applied to the end of a recently pruned vine will effectually stop the bleeding.

Business Cards.

T. F. MADILL, M. D., PHYSICIAN AND SURGEON—Office at his residence in Wyalon, Pa. July 28, 1855.—6m

DR. JOHN MINTOSH, SURGEON DENTIST, HAS RETURNED. Office next door to Mercu's store, and over Alexander's Clothing Store, Main street, Towanda, Pa. February 24, 1855.

JAMES MACFARLANE, ATTORNEY AT LAW, occupies the Office in the Union Block, formerly owned by John C. Adams Esq. He will attend to procuring Bounty Land Warrants and Pensions. March 22, 1855.

H. J. MADILL, P. D. MORROW, MADILL & MORROW, ATTORNEYS AND COUNSELLORS AT LAW.—Office over Mercu's Store, Towanda, Pa. n-43-4f

DR. E. H. MASON, PHYSICIAN AND SURGEON, offers his professional services to the people of Towanda and vicinity. Office at his residence on Pine street, where he can always be found when not professionally engaged.

JOHN C. ADAMS, P. A. OVERTON, ADAMS & OVERTON, ATTORNEYS AT LAW. Office in the room formerly occupied by George Sanderson, over Burton Kingsbury's store. Towanda, May 26, 1855.

SURVEYING.—JAMES A. PAINE, Surveyor for Bradford County, is prepared to attend to the business in all its branches. His office is at Towanda. All letters addressed to him at this place will meet with prompt attention. April 4, 1854.

Bradley Wakeman, Laceyville; M. H. Holback, Wilkes-Barre; Michael Meyler, Laceyville. P. O. MOODY, Agent for Bradford County. Address, Waverly, N. Y.

REMOVAL OF QUOTIONS COLLINS & POWELL

WOULD respectfully inform their friends and the public that they have REMOVED their CLOTHING STORE from the Union Block, No. 3, to No. 3, and will be happy to wait on all who may give them a call. Their stock consists of: Black Broadcloth and Fancy Coats; Fancy Cassimeres Coats of all colors; Black and Fancy Cassimeres Pants; Black Satin and Fancy Vests; Marcelline, Cashmere, White and Pink; Marseilles and Linen Coats, all kinds; Linen Pants, Shirt Collars, Cravats and Hose. Hats, of all kinds, made up to order, and warranted to fit or no sale. Our stock comprises all kinds of goods adapted to men's wear, which we are bound to sell cheaply than any other establishment in town or county. CUTTING done to order as usual. Towanda, June 9, 1855.

TOWANDA FEMALE SEMINARY.

THIS school, under the charge of the Misses HANSON, is held in the new building on Second street, west of the Ward House. The school year will consist of four quarters, of eleven weeks each. The summer vacation commencing in July, and ending in September.

TERMS, PER QUARTER. First Class.—To include the elements of English, Latin, French, and the study of the Latin Language. \$6 00 Second Class.—To include the more advanced study of the English Language, with Mathematics, and the study of Latin and French. \$9 00 Third Class.—To include Mathematics, Mental and Moral Philosophy, Rhetoric, Botany, &c. \$12 00 with Latin and French. Each pupil will bring with her a desk and chair. There will be no extra charges whatever. Music instruction on the Piano, with use of instrument, will be given by Miss REBECCA D. HANSON, at \$10 per quarter. The Winter Term commences MONDAY, Nov. 26. LECTURES on Logic, Metaphysics, and Intellectual Philosophy, and the higher branches of English Composition, will also be delivered once or twice in each week. Those desiring to refer to the names of the gentlemen:—Rev. ALTON PORTER, Bishop of the Diocese of Penna., Philadelphia; Rev. DR. MACLEAN, President of the College of New Jersey, Princeton. Hon. DAYTON WILSON, G. F. MASON, Esq., C. L. WARD, Esq., Hon. GEORGE SANDERSON, D. F. BARSTOW, Esq., Col. J. F. MEANS, Towanda. Towanda, November 8, 1855.

LIQUOR STORE.

S. FELTON would respectfully inform the public that he is now ready at his old stand, under Hall & Russell's, south side of the public square, to furnish these wanted PURE LIQUORS, with almost everything in that line. He has lately made large additions to his stock, purchasing of the best importers, and in the original packages. He has on hand, and for sale in any quantity from a quart upwards: Brandy—Sicotte, Cogniac, Old Hennessy, and Otard. Gin—Swan, American, and Scheidman Schnapps. Whisky—Scotch, Old Eye, Monongahela, and Rectified. Wine—Currant, Port, and Brown Sherry. Fresh Camphene and Burning Fluid kept constantly on hand. Also 90 per cent. Alcohol. CIGARS of the best brands. Jugs of all sizes; quart flasks, and a large quantity of utility barrels. Bingham Ale by the gallon or barrel. Those favored with their patronage may be certain that all articles will be what they are represented. N. B. The person who borrowed my "Wantage Rod" is requested to return it. Towanda, January 18, 1856.

THE ELECTRO-CHEMICAL BATH, AND DIRECT TO- & PRO-ELECTRO-MAGNETIC MACHINE.

JAMES HARRIS, ELECTRICIAN, of Towanda, respectfully informs the public that he has lately procured from New York the celebrated Electro-Chemical Bath, which has proven to be one of the most important and wonderful discoveries of the age, from its ability to extract minerals from the human system. Some eight years ago, a physician of Cincinnati discovered the process of extracting minerals from the body by galvanism; more recently, M. Verges, of New York, an electro-gilder, having suffered from the introduction of poisonous minerals into his system, by the use of his art, conceived the idea of removing them by the same processes, he succeeded in doing so, and quickly recovered. He then applied the same means to others similarly affected, with like success, his success exceeded his most sanguine expectations, for not only did these Baths remove mineral poisons, but cured many diseases, some of which were the result of minerals, and some were not. More recent experiments have fully confirmed the singular power of this bath to draw from the system all minerals that may be lodged therein, to the great detriment of health. Very often persons are afflicted by diseases which are beyond the comprehension of the most skillful physicians, and which are the effect of poisonous minerals accumulating in the system for years, taken in the shape of camel, lead, &c. &c. The following are some of the diseases cured by these baths: Rheumatism, Paralysis, Palsy, Palmer's Cholera, Chronic Ulcers, Glandular Swellings, Scrofula, Cancer, Neuralgia in all its forms, Salt Influx and Humors of all kinds. He has also S. B. Smith's newly invented DIRECT AND TO- & PRO-ELECTRO-MAGNETIC MACHINE, which is a great improvement on the Magnetic machines heretofore used. With the aid of this machine, and which he has at command all the available medicine of Electricity. The medical power of the Machine is very great, it induces a current of the system through the pores of the skin—applying it directly to the part affected, which gives an increase of medicinal power over by efficacy in all local diseases. I am now prepared to apply these Baths, and also the Machines, at my house in the south part of the borough of Towanda, or I will visit patients at a distance, when unable by reason of disease to come to this place, at moderate prices. I am also sole agent for Bradford County, for the above Machines. Towanda, December 22, 1855.

DRIED APPLES—a few first rate ones, for sale at J. H. FOX'S.

5000 SHEEP BELTS WANTED at HALL & RUSSELL'S, for which the highest price will be paid in CASH. Also, all kinds of GRAIN wanted for Goods, or on account for which the highest market price will be paid. Towanda, November 22, 1855.

Medical.

HELMHOLD'S GENUINE PREPARATIONS.

Helmhold's Highly Concentrated Fluid Extract Buchu, for Diseases of the Bladder and Kidneys, Secret Diseases, Stricture, Weakness, and all Diseases of the Sexual Organs, whether in Male or Female, from whatever cause they may have originated, and no matter of how long standing. If you have contracted the terrible disease, which when once seated in the system, will surely go down from one generation to another, undermining the constitution, and sapping the very vital fluids of life, do not trust yourself in the hands of Quacks, who start up every day in a city like this, and fill the papers with glaring falsehoods, well calculated to deceive the young and those not acquainted with their tricks. You cannot be too careful in the selection of a remedy in these cases. The Fluid Extract Buchu has been pronounced by eminent Physicians THE GREATEST REMEDY EVER KNOWN. It is a most perfect medicine in its use, and very innocent in its action, and yet so thorough that it annihilates every particle of the rank and poisonous virus of this disease; and, unlike other remedies, it does not dry up the secretions of the system. Constitutional Debility, brought on by self-neglect, a most terrible disease, which has brought thousands of the human race to the grave, and which, in the most advanced stages of parents, and blighting in the bud the glorious ambition of many a noble youth, can be cured by this HELMHOLD'S GENUINE REMEDY. And as a medicinal agent, it is equally valuable in the simple delicate to the confined and despairing invalid, no equal to be found, acting both as a cure and preventive.

HELMHOLD'S HIGHLY CONCENTRATED Compound Fluid Extract Sarsaparilla. For purifying the Blood, removing all diseases arising from impurities of the system, arising from the impure state of the blood, and the only reliable and effectual remedy known for the cure of Scrofula, Salt Rheum, Head Ache, Rheumatism, Gout, and all other diseases of the Bones, Teeth, Pimples on the face and all Scaly Eruptions of the Skin. It is a most efficient in practice than any preparation of Sarsaparilla, and has been pronounced by the most eminent Physicians, Syphilis, Mercurial and Scrofulous diseases, have entirely recovered in the incurable wards of our public institutions, which had for many years resisted every mode of treatment. Helmhold's Compound Fluid Extract Sarsaparilla, striking examples of the salutary effects of this medicine in arresting some of the most inveterate diseases, after the glands were destroyed and the bones already affected.

Prepared and sold by H. T. HELMHOLD, Chemist, 263 Chestnut-st., near the Grand House, Philadelphia. To be had of DR. H. C. PORTER, Towanda, Pa. and of Druggists and Dealers every where. All letters directed to the Proprietor or Agent will receive immediate attention. n-13

TAKE NOTICE.

R. C. L. KELLING, MECHANIC, Pa. announces to all afflicted with Tumors, Wens, Cancer, Warts, Polyps, Lupus, Moles or Marks, Scrofula or King's Evil, that he has discovered a new and never treated (Cancer or King) that he can remove them by an entirely new method, without cutting, burning or pain. It is no matter what part of the body they are, he can remove them with perfect safety and in the most judicious, if curable. No money required, except for medicines until a cure is perfected. Chronic and other diseases not mentioned above, treated with positive success. Full particulars can be obtained by addressing C. L. KELLING, M. D., Mechanic, Cumberland Co., Pa. Helmholt, Pa., residing at a distance, he has, for years, been in the habit of prescribing by letter, and with great satisfaction. He would say however to those desiring advice, in this way, that he secures attention, they should call, and see the general symptoms of their cases, a fee of one dollar, to warrant him in spending his time for their benefit. Those who desire to consult with him in his office at all times, when not professionally absent. CAUTION.—Strangers coming to see the Dr. are cautioned not to be deceived. Dr. K. is the only one in this State, who can perform the cure by the new method. The Dr.'s office is directly opposite the Union Church. Helmholt is 8 miles from Harrisburg on the Cumberland and Potomac Railroad, and 10 miles from the Union. The Dr. will visit cases within a reasonable distance when desired.

THE OLD STAND STILL IN OPERATION!

THE subscriber would announce to the public that he has now on hand a large assortment of kinds of CABINET FURNITURE, such as Sofas, Divans, Lounges, Chairs, Beds, and Dressing Cases, and also a large assortment of Mahogany, Walnut, Maple and Cherry Bureaus, Stands of various kinds, and all kinds of Chairs, and Bedsteads of every description, which are, and will be made in the most material and workmanlike manner, and which they will sell for cheaper than can be bought in any other Warehouse in the city. LOOKING GLASS PLATES CUT AND

fitted for any size, to be had at the Jewelry Store of Feb. 1, 1855. W. A. CHAMBERLIN.

JEWELRY! JEWELRY! JEWELRY!

A. M. Warner's New & Splendid Jewelry Store, one door north of Patton's Drug Store. HAS just been opened with the largest and most choice stock of FASHIONABLE JEWELRY ever offered to a discriminating public. Indeed, he can safely say that with the opening of his new store his business has been inaugurated a new era in the Jewelry line, inasmuch as along with the choice and elegant assortment he gives the most reliable assurance of almost incredible reduction in prices; the rich and tasteful articles having been all bought with ready cash.

A. M. W., when he reflects on the past years, with a large and attractive stock, he has enjoyed so large a share of public patronage, flatters himself that the immense increase of Goods he now offers, which have been bought so judiciously, will enable him to increase the generous confidence which has hitherto been vouchsafed to him. He therefore solicits a continuance of the favor of his old customers, and invites the public generally to call and examine his stock, and to witness the enviable reputation of being the most reliable in town. Towanda, September 24, 1855.
