## Farmer's Department.

#### Milking Cows.

To insure the greatest yield of milk from cow she should not only be well fed and well tended, but also well milked. Now it is not every man or every maid who can squeeze fluid from a cow's udder that is a good milker.

It is important in the first place that a cow's bag should be clean. For this purpose, when the animal is stabled-as they are or should be during the winter, on all farms and throughout the year, by many-let the whole ndder be washed with cold water, and immediately thoroughly dried with a towel. The advantages of this practice to the health of the animal and the healthiness of the milk, are great and manifest : and in this way, too, we escape the black sediment, of which milk buyers so constantly complain, and which is nothing else than small particles of manure brushed from the bag and belly of the cow into the milk pail. The hands of the milkmen, by this pro-SURVEYING -JAMES A. PAINE, Surcess, become washed clean, of necessity ; an operation too generally omitted by those who consider themselves neat and careful. The D veyor for Bradford County, is prepared to attend to the above business in all its branches. His office is at Towanda. All, letters addressed to him at this place same process obviates, too, the necessity of moistening the teats by milking a fine stream into the hands and washing the teats therewith, a filthy practice, followed by almost all men and too many women.

The udder being now cooled and cleansed we are ready to begin milking. If the cow be well trained, she will now extend backward her hind leg for your convenience, without a blow accompanied with the word "hoist."---They understand what is required of them, and need only at times a gentle reminder. But it is a singular fact that men who are kind in every other relation of life-as a husband, father, neighbor and master-are rough in their treatment of gentle "Bossy." If they say " hoist," it is in stentorian tones; and too generally the first intimation of their wishes is conveyed in a striking manner by the edge of a heavy milking stool. Now a considerable experience among the "milking mothers of the herd, has convinced us that harshness of tone or petty cruelty is not only not productive of good results, but is extremely disadvantageous. Many cows that hold up their milk to a cross milker will give down freely BIDMOVAL OF OLOTHING. to one more gentle. And the sack of grain, or other weight across the loins, which is well used to compel the animal to give down, would have been uncalled for if a kind hand had always drawn her milk, or could be dispensed with, if gentleness takes hold of the teats.

Now the cow may kick. Well, we have in previous numbers of this journal shown that to return kick for kick is a poor method of converting Mooley from the error of her ways, but she may be completely cured by kindness.

When fairly seated, it is of the utmost consequence that the milking should be done without violence, and as rapidly as possible. Ma-ny persons who pride themselves on their fast milking jerk the teats violently, and others will cause them to become sore by the presure of their finger nails. The best milkers scarcely move their elbows, but with the upper portion of the hand, grasping and compressing the teat, force the jet of milk by the pressure of the lower fingers.

Whether a cow should be milked before. after, or during feeding is a question of minor importance, and must be decided by circum-stances. R. L. Allen, in his excellent work on "Domestic Animals," recommends, if we rightly remember, that they be milked while feeding, for the reason that while thus engag-ed they will more readily let down their milk; but many cows, at other times quiet, will be a little uneasy while eating, and anxious to get not only all that belongs to them, but a share of their neighbor's meal also. For this reason we always milked before feeding, that the feed might appear as a reward of merit.— Where one has but one or true access it is of

UKEUI & IU-&-TKUELEUIKU MASINE IIU MACHINE. JAMES HARRIS, ELECTRICIAN, of Towanda, respect-fully informs the public that he has lately procured from New York the celebrated Electro-Chemical Bath, which has proven to be one of the most important and wonderful discoveries of the age, from its ability to extract minerals from the human system. Some eight years ago, a physician of Cincinnati disco-vered the process of extracting minerals from the body, by galvanism; more recently, M. Verges, of New York, an electro-gilder, having suffered from the introduction of poisonous minerals into his system in the prosecution of his art, conceived the idea of removing them by the same processes, he succeeded in doing so, and quickly recovered. He then applied the same means to others similarly af-fected, with like results. His success exceeded his most

He then applied the same means to others similarly at fected, with like results. His success exceeded his most sanguine expectations, for not only did these Baths remove mineral poisons, but cured many diseases, some of which were the result of minerals, and some were not. More recent experiments have fully contirmed the sin-gular power of this Bath to draw from the system all mi-nerals that may be lodged therein, to the great detriment of health. Very often persons are afflicted by diseases which are beyond the comprehension of the most skilful physicians, and which are the effect of poisonous mine-rals accumulating in the system for years, taken in the shape of calomel, lead, &c. &c. The following are some of the diseases cured by these baths: Rheumatism, Paralysis, Palsy, Painter's Cholic, Chronic Ulcers, Glandular Swellings, Scrofula, Cancer, Neuralia in all its forms, Salt Rheum and Humors of all kinds.

COLLINS & POWELL Wild be approximately and the pub-like of that they have *REMOVED* their CLOTHING & FURNISHING STORE to Patton's New Brick Block, No. 3, and will be happy to wait on all who may give them a call, Their stock consists of Black Broadcloth and Fancy Coats; Fancy Cassimere Coats, of all colors; Black and Fancy Cassimere Pants; Black and Fancy Cassimere Pants; Black Satin and Fancy Yests; Marseilles vests. White and Fancy : Marseilles and Linen Coats, all kinds; Linen Pants, Shirt Collars, Cravats and Hose. Hats, of all kinds. Garments of all kinds made up to order, and warranted to fit or no sale. Our stock comprises all kinds of goods kinds.

He has also S. B. Smith's newly invented DIRECT AND TO-AND-FRO ELECTRO MAGNETIC MACHINE, which TO-AND-FRO ELECTRO MAGNETIC MACHINE, which is a great improvement on the Magnetic machines hereto-fore in use. With the aid of the Bath and Machine, we have at command all the available medical efficiency of Electricity. The medical power of the Machine is very great, in introducing medicines into the system through the pores of the skin—applying it directly to the parts af-fected, which gives an increase of medicinal power over that of taking it into the stomach, rendering it particular-by efficience in all local diseases.

If an over the source of the s

course a matter of little moment.

In fine, we recommend to those who want much milk and good milk, kindness and cleanliness.-Journal of Agriculture.

REPORT FROM OREGON .- The following extract is taken from a report made by Mr. J. Woodside, of Marion county, Oregon Territory, to the Agricultural Bureau of the Patent Office :

"We find that many kinds of crops can be raised in great abundonce here. We raise excellent wheat ; for rye, oats, and barley, there are few better climates, and for peas potatoes, and various other kinds of vegetables, there are few climates as good as this. Most kinds of fruit suited to a temperate climate do well with us, and it is thought that we shall excel in the production of apples and pears ; these appear to be sure crops, and always of superior quality. Meadows and pastures, so far as tried, give good satisfaction. Most kinds of cultivated grapes grow luxuriantly here .--It is only with Indian corn that we have diffi culty. To the production of this valuable grain our soil is certainly not well adapted ; but Indian corn, from being acclimated, or from some other cause, yields better now than it did formerly, and is receiving increased attention from our farmers. I have little doubt but that we shall be able in a little while to cultivate it with success and advantage."

To DESTROY VERMIN .- The celebrated Ras-To DESTROY VERMIN.—The celebrated Ras-pail, well known as one of the best French chemists, has given an important recipe for destroying vermin on animals, and also on plants and trees, important, at least, if true. The process he recovered is to be a set of the Matter and board in private families, at per week. gum to two pints of water, and, by means of a large brush to wash over the trunks and branches of trees with this solution. This simple process, says Raspail, will speedily destroy all the vermin on the trees, and will effectually prevent others from approaching. In order to clear sheep and animals with long hair, they must be bathed with the solution, or be well washed with it. Raspail mentions several trials he has made with the mixture, all of which have been attended with the most complete success, and he recommends it very strongly to general use

The better animals can be fed, and the more comfortable they can be kept, the dered, Crushed and Granulated; Molasses, Syrup, Rio and Java Coffee, Rice, Saleratus, Ginger, Sperm Candles, for Rice, Tobacco-in fact a general variety of Groceries, for the more profitable they are-and all farmers work for profit.

Take a pleasant afternoon and go and see how others are managing their stock and farms,

Der Turnips of small size have double the nutricious matter that large ones have.

Devote every year one acre at least of your farm to the cultivation of roots as winter SPICES, of all kinds, both white and ground at feed for your stock.

They beg leave to refer to the following named gentle-men :--Rt. Rev. ALONZO POTTER, Bishop of the Diocese of Penn'a, Philadelphia : Rev. or Monuments, Head Stones, Tomb Tables, Stand Tops, Jaint Stones, Mullers, &c. Having secured the services of A. H. POWERS, who is well known to be the most perfect trist in the state, they offers unparalleled inducements o persons wishing to secure any of the above articles, in heapness, style and artistical beauty. Waverly, N. Y., October 13, 1855.

ESTRAY.—Came to the enclosure of the subscriber, in South Towanda, about the first of Sep-tember, a two year old BRINDLE HEIFER, with heavy horns, and no particular marks. The owner is requested to prove property, pay charges and take her away. October 9, 1855. CORNELIUS MOORE.

### And a fine assortment of LAMPS, of all sizes and descriptions, Bird Cages, Cups, Nests and Sed.

All of which is offered for sale on the most satisfactory terms. Our stock being large and mostly purchased from h Importer and Manufacturer at the lowest rates, and with Cash, enables us to sell at reduced prices, that must be s tisfactory to all. We invite the attention of the public to an especial examination of our stock of goods and prices. *Our Motto is*—" THE CASH SYSTEM—QUICK SALES—SMALL PROFITS."

Our Goods are selected with the utmost care and warranted to be what they are represented; if any should provide the contrary, we are not only willing but request our customers to return them, and the money shall be refunded. **#37** Having secured the services of DR. HUSTON, who will keep his office at this store, and will give medici advice gratuitously to those purchasing medicines. JOSEPH G. PATTON.
