To the Editor of the N. Y. Tribune : Sir: Yesterday morning the passengers from New-York who left that city, April 21, from this place for Panama in three separate trains of cars. The first contained the mails, express matter and the passengers baggage. The other two were filled with passengers. After proceeding something more than half way to Panama, the engine of the freight train ran of the track in such a position that it could not be replaced without a good deal of delay. So the conductors of the passenger trains, very wisely I think, determined to run back to Aspinwail, where they could get something to cat, which they could not do anywhere on the road We were within about two miles of this place. when the terrible crash occurred. I was seated in one of the rear cars, and the first sensation I felt was a sudden jerk, and immediately looking out of the window I could see the cars rushing upon each other until nine in number were completely demolished. Every car was crowded with passengers, containing at least sixty persons. At present it is impossible to estimate the number killed and wounded or their names, but when we consider that there were not less than five hundred persons in the ears that were shivered to atoms, it must be a low estimate to say that fifty were killed, and at least a hundred, and, perhaps, many more. hadly wounded-and it seems almost miracu-

that so many escaped with their lives. There are many opinions as to the cause of the disaster and where the blame should rest. I do not think the conductors or engineer were o blame. It was a defect the construction of the road at that place. It was at a small bridge, and the rails were laid on timbers that ran lengthway of the road, and there was nothing to keep them from spreading and letting the cars through, and we now see the result .lexamined very critically to determine the true cause, and I feel certain that the above is the true cause, and any attempt to censure blame anywhere else will be unjust. I wish to speak quite emphatically on this

point, to call the attention of the agents of the road in New-York to the subject. While they are endangering their property and the lives of their fellow-citizens in this way, they ought to know the cause. When timbers have ain in this climate a few years, they become a much soaked with water in the rainy season that they have about as much substance as so much water. I do not say that all their bridges are made as this one was, for some certainly are not, and a little expense to tie the sleepers together would save a good deal of trouble Truly yours, WM. SHEW.

WONDERFUL INSTANCE OF SAGACITY .- We ear, says the Columbus (O.) Capital City Fact of an instance of sagacity practiced by elephant attached to Herr Driesbach's Menagerie, which deserves record. PRESIDENTIAL.—The Washington Sentine contains the following paragraph:-

"Ever since that time [the Ostend Conferencel to the present, Franklin Pierce has instigated and invented the most insidious and diseputable attacks upon Mr. Buchanan, not only through his own mouth-piece, but even in his own conversations. We make this charge: that Gen. Pierce has told delegates to the National Convention, that if he did not get the nomination himself, no Northern man should have it—clearly pointing to Mr. Buchanan, who, except Judge Douglas, is the only "Northern man" spoken of, and if report be true, the relations of the latter are greatly changed towards the Administration."

It has been clear for a long time that the relations of the Administration to Mr. Buchanan were anything but friendly, and our advices from Washington indicate that the war upon him has been successful. The President and Judge Douglas have united their forces against him as a common enemy. The attempt will first be made to re-nominate Gen. A WASTE OF IRON.—The English are now engaged in embarking the shot and shell they have collected at Sevastopol. As to collecting and removing these missiles, which fare sown broadcast in the very soil, like pebbles on the beach, for the space of several miles in length and two miles in breadth, the task is hopeless of execution. Piles of shot have been formed in every ravine, and stand there as a monument of the uselessness of such efforts as have yet been made to gather the iron showers which fell for eleven long months in front of Sevastopol. Every watercourse is full of iron-shell, shot, and splinters of strange shapes abound in every ravine. The Russians will only have to collect what the Allies leave behind them to form large magazines of shot, but shell will not be so plentiful, as they were more sparingly used, and were generally damaged, if they did not burst. Guns, too, are buried in the earth, and peep out from the earthwork of overthrown batteries. It is calculated that the Russians fired about 30,000 tuns of iron at the Allies. The English gave them about 11,000 tuns in return, and possibly the French fired about 20,000 tuns; so that between 60,000 and 70,000 tuns weight of iron must be lying about on the plateau.
