All the cabbage tribe are liable to be attacked and fatally injured by minute maggots, resembling, very nearly, the maggots in cheese, and which are doubtless the larva of some fly. There is another enemy, also, by which they are frequently infested—a small grub, similar, in many respects, to those found in corn and potato hills, and which not unfrequently prove very destructive. Salt water applied to the hills will have a tendency to arrest their depredations, and if the application be repeated frequently, say once in two or three days, it will effectually destroy or drive them off.

The water, however, should not be allowed to come in contact with the foliage, in this instance, but should be applied to the soil immediately around the stalks, but without coming in actual contact with them. To destroy the first named insects, it may be applied in a state sufficiently dilute to admit of a perfect ablution of every part of the foliage; but as we said before, care must be taken not to make it too strong, or will destroy the plant. Every cook knows, or ought to know, that the washing of applicage lettures grainagh for insell much less time than Daguerreotypes, and equally well in cloudy as clear weather.

28 Minimum 19 Daguerreotypes, and equally well in cloudy as clear weather.

20 Minimum 20 Daguerreotypes, and equally well in cloudy as clear weather.

20 Minimum 20 Daguerreotypes, and equally well in cloudy as clear weather.

21 Daguerreotypes are far superior to all other kinds of pletures. Having no reflection, they can be seen in any position, and can be taken in unch less time than Daguerreotypes, and equally well in cloudy as clear weather.

21 Daguerreotypes are far superior to all other kinds of pletures. Having no reflection, they can be seen in any position, and can be taken in unch less time than Daguerreotypes, and equally well in cloudy as clear weather.

22 Minimum 23 Daguerreotypes are far superior to all other kinds of pletures. Having no reflection, they can be seen in any position, and can be taken in unch less time than Daguerreotypes, and equally well in cloudy as clear weather.

23 Minimum 24 Daguerreotypes are far superior to all other kinds of pletures. Having no reflection, they can be seen in any position, and can be seen in any position, and can be seen diately around the stalks, but without coming cabbage, lettuce, spinach, &c., in salt water before cooking or preparing for the table, is sure to expel every species of insect which so fre-quently seeks a habitation or a shelter in these vegetables .- Western Agriculturist, June.

TRUE VALUE OF A FARM.—There is some thing in the owning a piece of ground which effects me as do the old ruins of England. I am free to confess that the value of a farm is not chiefly in its crops of cereal grain, its orchards of fruit, and its herds, but in those larger and more easily reaped harvest of associations, fancies, and dreamy broodings which it begets. From boyhood I have associated classical civic virtues and old heroic integrity with the soil. No one who has peopled his young brain with the fancies of Grecian mythology but comes to feel a certain magical fancy for the earth. The very smell of fresh turned earth brings up as many dreams and visions of the country as sandal wood does of oriental senses. At any rate, I feel in walking under these trees and about their slopes, something of that enchantment of vague and mysterious glimpse of the past which I one felt about the ruins of Kenilworth Castle. For thousands of years this piece of ground had wrought its tasks. Old slumberous forests used to darken it : innumerable deer have tramped across it ; foxes have blinked through its bushes, and welves howled and growled as they battered along its rustling leaves to empty with maws. How many birds; how many flocks of pigeons, thousands of years ago; how many hawks dashed wiidly among them; how many mailed bugs and limber serpents, gliding among mossy stones have had possession here before my day! stones have had possession here before my day! It will not be long before I, too shall be wasted and recordless .- Henry Ward Beecher.

Heading Cabbages .- I have been troubled! much at times with the untowardness on the part of my cabbages, and cauliflowers as well li, to form their appropriate heads. Conversing on the subject some two or three years ago with a friend fond of Horticulture, he informed me that some one of much practical experience in the raising of such vegetables, told him, that the way to insure their heading was to transplant them twice, the second transplanting to take place at a moderate interval after the first. The very next year another friend, who had been bringing forward many ordinary garden vegetables in a hot bed, sent me a number of well-grown plants both of cauliflowers and cabbages when those I had planted were scarcely above ground .-At the time I received them, I had not prepared the ground destined for the reception of such vegetables, and was too busy with other things to do so forthwith. I accordingly struck the end of a hoe-blade into a soft well prepared border, and turning the handle down so as to leave a sufficient cavity to set out the plants.

A friend in town has tried the plan above recommended, of twice planting the same plants.

HINTS ON PRUNING FOR THE SEASON .- We have often given our ideas of pruning, and cannot do more than to give merely an outline Never cut a limb of more than half an inch in diameter in the months of March, April or May; but cut in June, October or November, and always cover the wound, even of small limbs, with gum shellac dissolved in alcohol. Cut out where limbs cross, or where Tuition on Piano Forte with use of instru they incline too many of them to the inside of the tree. Do not cut off the young side shoots and leaves in the growing season, as they are placed there to elaborate sap, and will increase the growth of the tree.

As a general thing, too much pruning is done

Tuttion on Plano Forte with use of instrument, 12.

The Voung Ladies will find board in the Institute, under the care of the Matron, at per week, 17.

Fuel and light. 25.

The male pupils can find board in private families, at per week. 26.

The male pupils can find board in private families, at per week. 26.

The male pupils can find board in private families, at per week. 26.

As a general thing, too much pruning is done to young trees. If started judiciously, they need but little, very little trimming, annually, so that if the owner of a young orchard has an uncontrollable desire to use his knife, he had better supply his poekets with several pieces of soft pine wood, before he takes a stroll through his orchard. Prevention is better than cure .- New England Farmer.

BLUE GRASS AND WOODLAND PASTURES .-Cassius M. Clay gives some valuable directions in the Ohio Farmer, respecting blue grass pastures. He says the older the sward is the better. He has a pasture which has not been broken for more than sixty years, and it is the best on the farm. As to woodland pastures, he says they will keep young stock growing, or old stock, "on foot," but will not fatten them. "Just as far as there is shade, the grass is deficient in nutritious qualities—that grass which is most exposed to the sun being best."

Flour is very scarce at Vera Cruz .-A large importation is talked of, as the necesties of the people require it.

#### THE ELECTRO CHEMICAL BATH, DIRECT & TO-&-FRO ELECTRO MAGNETIC MACHINE.

DIRECT & TO-&-FRO ELECTRO MAGNETIC MACHINE.

JAMES HARRIS, Electracian, of Towanda, respectfully informs the public that he has lately procured from New York the celebrated Electro-Chemical Bath, which has proven to be one of the most important and wonderful discoveries of the age, from its ability to extract minerals from the human system.

Some eight years ago, a physician of Cincinnati discovered the process of extracting minerals from the body, by galvanisa; more recently, M. Verges, of New York, an electro-gilder, having suffered from the introduction of poisonous minerals into his system in the processed. He then applied the same means to others similarly affected, with like results. His success exceeded his most sanguine expectations, for not only did these Baths remove mineral poisons, but cured many diseases, some of which were the result of minerals, and some were not.

More recent experiments have fully confirmed the singular power of this Bath to draw from the system all minerals that may be lodged therein, to the great detriment of health. Very often persons are afflicted by diseases which are beyond the comprehension of the most skilful physicians, and which are the effect of poisonous minerals accumulating in the system for years, taken in the shape of calomel, lead, &c. &c.

The following are some of the diseases cured by these baths: Rheumatism, Paralysis, Palsy, Painter's Cholic, Chronic Ulcers, Glandular Swellings, Scrofula, Cancer, Neuralia in all its forms, Salt Rheum and Humors of all kinds.

He has also S. B. Smith's newly invented DIRECT AND TO-AND-FRO ELECTRO MAGNETIC MACHINE, which

Neurana in an its forms, saft kneum and Humors of all kinds.

He has also S.B. Smith's newly invented DIRECT AND TO-AND-FRO ELECTRO MAGNETIC MACHINE, which is a great improvement on the Magnetic machines heretofore in use. With the aid of the Bath and Machine, we have at command all the available medical efficiency of Electricity. The medical power of the Machine is very great, in introducing medicines into the system through the pores of the skin—applying it directly to the parts affected, which gives an increase of medicinal power over that of taking it into the stomach, rendering it particularly efficacious in all local diseases.

I am now prepared to apply these Baths, and also the Machines, at my house in the south part of the borough of Towanda, or I will visit patients at a distance, who are unable by reason of disease to come to this place, at moderate prices.

erate prices.

I am also sole agent for Bradford county, for the above fachines.

JAMES HARRIS. fachines.
