THE ARRANGEMENTS FOR WORKING THE CABLE PROBABLE CAUSE OF THE DELAY. TRINITY BAY. (N. F.) Friday, Aug 13.

All the arrangements for working the cable are confided exclusively to the assistants of Professor WHITEHOUSE, the Electrician-in-chief of the Atlantic Telegraph Company, and as all their operations are conducted privately, and they decline to give any information beyond the fact that signals are successfully and constantly passing through the cable from the Telegraph office here to the Telegraph office at Valencia Bay, Ireland, all rumors representing a different state of things are unfounded. Although it is not known, except to the Electricians immediately connected with the cable, what progress is being made in working Professor Whitehouse's recording instruments. we hazard little in saying that it has as yet been found impossible to work them success fully. No doubt, however, is entertained that the Hughes invention, when ready, will overcome all difficulties.

To the repeated inquiries which were made every hour through the day as to the condition of the cable and the probabilities about the reception of the Queen's message, we are unable to return any other answer than that the cable remains all right—the electrical signals passing through its whole length satisfactorily; that the electricians have not yet concluded their arrangements for putting their re-
