WELLES, BLOOD & CO.

EMERY'S PATENT RAILROAD HORSE POWERS! WE are manufacturing these justly celebrated Engines for the purpose of use on our farm and in the mill, and we have added such improvements as to make them the best and most powerful in the world. Our THRESHING and SEPARATING MACHINES are much improved over the Albany machines, and work admirably. Our NEW THRESHING and CLEANING MACHINES will, we are confident, prove itself to be the best COMBINED THRESHER and WINDSOR in market. It runs easily, is simple, strong, light and durable; will not carry over, nor waste grain; and will thresh and clean fit for market as much grain per day, with the same power, as any Thresher with Separator will thresh. It is admirably adapted for two and four horse powers. Job threshers will find it to be just the machine they have so long desired to find.

Our Horse Powers and Threshers are, to say the least, equal to any made in the Union; so that farmers in Southern New York and Northern Pennsylvania, will find it to their advantage to buy our Machines, on account of saving heavy expense in freights, as well as for their superiority.

Write the particular attention of Farmers and Dealers to our TIPO-GAINT FEED CUTTERS, GALES PATENT. We can with confidence, recommend these Hay, Straw and stalk Cutters on account of simplicity, durability, strength, efficiency, ease of operation, rapid cutting, &c. They do away with the very serious objections heretofore urged by farmers and others, and justify too, against all patented feed cutters; namely—that they are too complicated, too small castings and traps, consequently liable to clog and stop; and that they have too many wearing or friction parts, therefore hard to operate. Our Feed Cutters have two simple straight knives which can easily be sharpened, or, if ever necessary, can be made by a single workman, and they will give satisfaction. Ask your merchant to order one for you, and send for our CATALOGUE, which contains additional information concerning the above mentioned machines and many others of our manufacture and sale.

A Book-Bindery in Towanda!

We would respectfully announce to our friends and the public generally, that we have connected with our Printing Office and Book Stationery Store, a Plain and Fancy BOOK-BINDERY, and earnestly solicit the patronage of all who desire anything in the line.

Having secured the services of one of the best binders in the United States, we flatter ourselves that we can give universal satisfaction, both in workmanship and price.—Therefore we present to the public the strongest assurance that we are prepared to bind in a workmanlike manner, all kinds of books, among which we may name Bibles, Histories, Music, Magazines, Pamphlets, Periodicals, Law and School Books, to order or pattern in French, Italian, German and English style; in Velvet, Silk, Cloth, Leather and Paper.

Upon the most reasonable rates, for CASH, or ready pay. Give us a trial.

Particular attention paid to re-binding Books. All works warranted to be perfectly executed.

EMERY'S PATENT RAILROAD HORSE POWERS! WE are manufacturing these justly celebrated Engines for the purpose of use on our farm and in the mill, and we have added such improvements as to make them the best and most powerful in the world. Our THRESHING and SEPARATING MACHINES are much improved over the Albany machines, and work admirably. Our NEW THRESHING and CLEANING MACHINES will, we are confident, prove itself to be the best COMBINED THRESHER and WINDSOR in market. It runs easily, is simple, strong, light and durable; will not carry over, nor waste grain; and will thresh and clean fit for market as much grain per day, with the same power, as any Thresher with Separator will thresh. It is admirably adapted for two and four horse powers. Job threshers will find it to be just the machine they have so long desired to find.

Our Horse Powers and Threshers are, to say the least, equal to any made in the Union; so that farmers in Southern New York and Northern Pennsylvania, will find it to their advantage to buy our Machines, on account of saving heavy expense in freights, as well as for their superiority.

Write the particular attention of Farmers and Dealers to our TIPO-GAINT FEED CUTTERS, GALES PATENT. We can with confidence, recommend these Hay, Straw and stalk Cutters on account of simplicity, durability, strength, efficiency, ease of operation, rapid cutting, &c. They do away with the very serious objections heretofore urged by farmers and others, and justify too, against all patented feed cutters; namely—that they are too complicated, too small castings and traps, consequently liable to clog and stop; and that they have too many wearing or friction parts, therefore hard to operate. Our Feed Cutters have two simple straight knives which can easily be sharpened, or, if ever necessary, can be made by a single workman, and they will give satisfaction. Ask your merchant to order one for you, and send for our CATALOGUE, which contains additional information concerning the above mentioned machines and many others of our manufacture and sale.
