Again.
Yours truly,
J. Burt, Jr.

Calendar of Operations for Feb. 1359.

FARM -Judicious planning and care in retaining are equally important with the more apparent efforts made in securing successful results: thus, though the farmer has now neither fields to plow nor harvests to gather, he can do much this month that will "tell' before the year is ended. In addition to the various employments indicated, the thrifty cultivator will thoroughly mature his plans for the campaign before him -- studying not only his own past experience, but that of others, and thus, with the aid of his journal and his books, he will be prepared to do the right thing, in the right way and at the right time. This will leave him no time to lounge away and worse than waste at the tavern or grocery.

Buildings .- If any are to be erected this Spring, fell and hew the timber now, unless it has been on hand seasoning the past year, which is preferable. Replace the nails which the frost or high winds may have started, and batten up cracks through which cold and snow enter the stables.

CATTLE .- Attend carefully to feeding now. Remember, " well wintered is half summered." Give roots, carrots if you have them, with hay. Do not let the straw cutter rust for want of use. Make feeding racks for the yard. Cows about to calve, should be well fed, and securely housed in roomy stalls.

Cellars. - Look out for frost ; examine and sort fruit and vegetables if decaying ; send rats and mice on a long journey; and bottle cider for Summer use.

DRAINS .- Examine frequently during thaws, and keep open. Much grain is lost by neglecting drain furrows in Winter.

Fencing.—Continue to prepare materials.— Work out posts and rails under cover on stormy days. Put old fences in order and build new as soon as frost will allow. Flax and Hemp-Finish dressing.

Grain.—Thresh out any remaining on hand and guard bins from rats and mice. Keep an eye to the market reports, and improve a good opportunity for selling. GRAIN FIELDS .- Keep all stock from grazing

on those not covered with snow. H LP.- Engage for coming season, before

choice hands are employed. Horses AND MULES Keep them sharp shod. Give roots with their feed as directed lat month. Cut feed is most economical. Let them be well

blanketed when not in use, and have plenty of of bedding at night, also litter under them to absorb moisture when standing. food, with which mix charcoal and salt occa-

sionally, especially for breeding sows. Keep pens well littered with leaves or short straw, to increase the stock of manure.

ICE HOUSES.—Secure a good supply of ice if not already done, and see that the house is in good condition for preserving.

TOWANDA BORO ORDER ACCOUNT.

Outstanding orders

Jan. 1, 1858, 8545 59
Issued in 1858, 1,794 47
Issued in 1858, 1,884 56
Outstand'g Jan.1,759, 824 68

MANURES .- Follow up the manufacturing The deeper the muck saturated with manure droppings and ammonia, the higher the corn in the crib next Fall. It may be carted to the fields for use, during the latter part of the Judgment in favor of Michael Kennan, fields for use, during the latter part of the month; if so, cover the heaps with soil or muck to absorb escaping ammonia. Better leave it under cover if practicable, till wanted to spread.

Maple Sugar may be made in some localities in the latter part of the month. Examine apparatus, put in order and provide what is ceces-

POTATOES .- Let seed be carefully selected. Keep different varieties from mixing. At the south, plant as early as the ground will answer, for northern market.

Roads .- Notice where drifts obstruct, and shelter with trees as soon as ground will an-

SHEEP .- Give grain and cut roots with hay Shelter from storms, and keep separate from horses and cattle. Salt regularly, and supply with plenty of water.

Tools.-Look to steel or iron, and prevent rust by oiling with land having a little resin melted into it. Put all in thorough repair, and select new tools for the coming seuson.

ORCHARD A D NURSERY .- There is usually very little to do in these during the present month. Occasionally an early Spring will admit of planting during the latter part of Feb.

"Thomas Barnes for digging 3 graves, par "Sarah Ogden for keeping Dan Sullivan,"

"Sarah Ogden for keeping Dan Sullivan, Nurserymen having southern orders to fill, in their anxiety to get them off at an early date should guard especially against the danger of freezing on the way. If the trees or shrubs chance to be frozen, upack carefully, and bury the roots at once in earth or sand, leaving them

until all the frost is out. Everything should be in readiness, especially with the nurseryman, for the first working weather, as early planting is most desirable. Unless old orchard trees have been well

scraped as heretofore directed, attend to them now while there is leisure Grafting may be done at the South, and

even in this latitude, during the latter part of this month, if the weather is open. Make no attempts while the limbs are frozen. March is the better month for grafting.

PRUNING .- Many old orehardists still prefer this season for pruning. Our advice is, if you will prune in the Spring, do it now rather than wait until March or April. Select mild weath er for the operation, when frost is out of the limbs. We greatly prefer Summer and Autumn for the pruning, even though they are more busy seasons. Hay must be attended to when it is ready, if a good article is wanted, and not June 8, 1858. when it suits your convenience, and it pruning is properly done, you must do this also at the right time even if there is a press of business. We have in mind several orchards which were nearly ruined by heavy Spring pruning.

Scions.-Cut at any time during this month when not frozen. Use every precaution against PROVISIONS OF ALL KINDS, errors in varieties. Select well known or labelled bearing trees to cut from, as much as pos-

Snow banks as they melt away in the Spring often do much damage to low branching standard and nursery trees. Examine such and shovel away the snow whereever it is splitting down the branches in settling.

Miscellancons.

The World Challenged!

Patented by SILAS HEWITT, July 14, 1857. Patented by SILAS HEWITT, July14, 1857.

THIS CHURN is the result of years of experience by a practical farmer, to produce a Churn that has all the advantages of the old Pash Churn, and he a labor-saving Machine. We claim for this Churn, and are prepared to prove by actual demonstration, that it will produce more butter—a better quality—with less time and less labor—than any other Churn in market. It is perfectly simple in its construction, not liable to get out of order, and a child can operate on it. It has been thoroughly tested by several hundred farmers in Seneca and adjoining Counties, and its merits fully established wherever introduced, and is pronounced by all to be one of the greatest improvements of the age.

For the following extract from the Seneca Falls pap Fr following extract from the Seneca Falls papers of May 20th, is a sample of what the "EXCELSIOR CHURN" has done, in competition with other Churns:

"A trial between the Smith Churn, of Elgin, Illinois, (which took the first premium at the State Fair at Buffalo last fall, and has taken the premium at all the Fairs where it has been exhibited) and the Excelsior Churn, of this village, took place at Woodmansee's Hotel, the 20th inst. The cream was taken from the same vessel, after being directly in that it might be of the same temperature and The cream was taken from the same vessel, after being stirred up that it might be of the same temperature and quality—one quart at a time—each Churn receiving two gallens. The Excelsion Churn poduced and gathered the Butter hard and yellow in six and a half minutes, while the Smith Churn was 12 minutes in producing the Butter, which was soft, white and oily; and Excelsion Churn produced Twelve Ounces more Butter than the Smith Churn! The Excelsion Churn then produced thirteen oances of good Butter from the Butter Milk of the Smith Churn, being more than half as much as they got from the cream! The Smith Churn could not produce any Butter from the buttermilk of the Excelsion Churn." Trial of Churns—Report of the Committee.

any Butter from the buttermilk of the Excelsior Churn."

Trial of Churns—Report of the Committee.

At the trial between Smitt's Churn, from Elgin, Illinois, and Hewitt's Excelsior Churn, manufactured in this village, which took place at Woodmansee's Hotel, on Wednesday morning, the following was the result of the trial:

Hewit's Churn, 24 lbs.—Butter in 64 minutes.

Smith's Churn, 24 lbs.—Butter in 12 minutes.

Smith's Churn, 24 lbs.—Butter in 12 minutes.

About two gallons of Cream was put in each Churn. The milk from Smith's Churn was then changed to Hewit's, and thirteen ounces of Butter extracted from it. No Butter could be brought from the milk from the Hewit Churn, which was transferred to Smith's. The quality of better color, and more solid.

A second trial, which was about one-third more cream was put in the Hewit Churn than in the other, resulted very nearly the same as above, Hewit's Churn being

was put in the Hewit Churn than in the other, resulted perry nearly the same as above, Hewit's Churn being shown to be greatly the superior.

EDWARD S. LATHAM.
JONATHAN SACKET,
Seneca Falls, May 29, 1858.

All that is a-ked for this Churn is, to let it rest on its was merits—the world is challenged to produce better.

EMERY'S PATENT RAILROAD HORSE POWERS are manufacturing these justly celebrated End W less Chain Powers, for one and two horses; which we have added such improvements as to make the the best endless Chain Powers in the world. Our THRESHERS AND SEPARATORS

Are much improved over the Albany machines, and worl lmirably. Our new TIOGA-POINT THRESHER AND CLEANER,

INGLA-POINT THRESHER AND CLEANER, lust finished, will, we are confident, prove itself to be the Best Comeined Threesher AND Winnower in market, truns easily, is simple, strong, light and durable; will not carry over, nor waste grain; and will thresh and clean fit for market as much grain per day, with the same lower, as any Thresher with Separator will thresh. It is admirably adapted for two and four horse powers, lot threshe will do it to be fixed the light of the lin

It is admirably adapted for two and four herse powers, Job threshers will find it to be just the machine they have so long desired to find.

Our Horse Powers and Threshers are, to say the least, squal to any made in the Union; so that farmers in Southern New York and Northern Pennsylvania, will find it to their advantage to buy our Machines, on account of saying heavy expense in Faither. ving heavy expense in freights, as well as for their su eriority. We invite the particular attention of Farmers and Deal

TIOGA-POINT FEED CUTTERS, GALE'S PATENT. TIOGA-POINT FEED CUTTERS, GALE'S PATENT. We can with confidence, recommend these Hay, Straw and stalk Cutters on account of simplicity, durability, strength, efficiency, ease of operation, rapid cutting. &c. They do away with the very serious objections heretofore arged by farmers and others, and justly too, against all patented feed cutters; namely—that they are too complicated, too many small eastings and traps, consequently too liable to get out of repair; that they have too many wearing or friction places, therefore bard to operate. Our Feed Cutters have two simple straight knives which can easily be sharpened, or, if ever necessary, can be made by any blacksmith. All are warranted to give satisfaction. Ask your merchant to order one for you, and send for our Catalogue, which contains additional information concerning all of the above mentioned machines and many others of our manufacture and sale. and many others of our man WELLES, BLOOD & CO.

Matched Morses for Sale. THE Subscribers desire to sell

THE Subscribers desire to sell their fine span of matched BLACK HORSES, not having tearning enough to keep them employed. Said team is a valuable one and is well known, having been formerly owned by Messrs. Harris & Page, and Welles & Brooks. They took the first premium as she best pair Carriage Horses at the Bradford County Aggregatural Fair in 18-37, their weight is about 1200 nounder friending. We will sell them cheap, either for cash, me with approved security.
