The World Challenged!

Patented by SILAS HEWITT, July 14, 1857. THIS CHURN is the result of years of experience by practical farmer, to produce a Churn that has all the dwantages of the old Dash Churn, and be a labor-savit fatchine. We claim for this Churn, and are prepared grove by actual demonstration, that it will produce mo

It is perfectly simple its construction, not liable to get out of order, and a higher can operate on it. It has been thoroughly tested by everal hundred farmers in Seneca and adjoining Counties, and its merits fully established wherever introduced, and pronounced by all to be one of the greatest improvesses of the area. E3 The following extract from the seneca ratio paper of May 26th, is a sample of what the "EXCELSIGI CHURN" has done, in competition with other Churus: A trial between the Smith Churn, of Elgin, Illinois ich took the first premium at the State Fair at Buffale (which took the first premium at the State Fair at Buffalo last fall, and has taken the premium at all the Fairs where it has been exhibited) and the Excelsior Churn, of this village, took place at Woodmansee s. Hotel, the 20th inst. The cream was taken from the same vessel, after being stirred up that it might be of, the same temperature and quality—one quart at a time—each Churn receiving two gallons. The Excelsior Churn p oduced and gathered the Butter hard and yellow in six and a half minutes, while the Smith Churn was 12 minutes in producing the Butter, which was soft, white and oily; and Excelsior Churn produced Twelve Onnees more Butter than the Smith Churn, being more than half as much as they got from the cream! The Smith Churn could not produce any Butter from the buttermilk of the Excelsior Churn."

Hewit's Churn, 2½ lbs.—Butter in 6½ minutes.
Smith's Churn, 1½ lbs.—Butter in 12 minutes.
About two gallons of Cream was put in each Churn.
the milk from Smith's Churn was then changed to Hewit's, and thirteen ounces of Butter extracted from it. No
