My method is this: Take them from the cow at two days old, and learn them to drink new milk. When they have learned well, mix a little warm skimmed milk with the new, adding more and more until they will drink all skimmed, and that without warming. Then I add a little sour, and gradually increase the quantity until they will take all sour. This they will generally do by the time they are two or three weeks old.

I have temporary stalls in the calf-pasture, and a separate dish for each calf; so the hoggish glutton can not rob his more considerate and sensible neighbor. A little trouble, with gentle treatment, will learn each calf to know his own stall as well as the "ox." There is another advantage in tying them up; it makes them familiar with confinement in the best possible manner. I think the stalls a decided im provement unpon the long trough and club system, to admonish the more greedy that they have " had their share."

Many calves are over fed for the few first weeks, much to their detriment, in my opinion. I think one-third or one-half of the milk of an ordinary cow is ample feed for the first four weeks. The quantity should then be increased, until they take the whole of one cow's milk: and if you add more in the latter part I think one-third or one-half of the milk of an milk ; and if you add more in the latter part of summer, all the better.

A calf fed with sour milk until fall, will show a decided improvement over the half-fed "runt" that was "weaned" at six weeks or two months old; and with equal good keep through the winter, the well-fed one will buy a baker's

and punctuality in the time of feeding, of great importance in the successful rearing of

I have tried letting a calf "run with a cow: but that is poor policy, I think: for if you do not keep up high feeding through the winter, you have a miserable looking animal in the spring; and if you do, you have an over grown beast of but little practical utility.

I have been awarded the first premium on native heifer calves twice, by the Jefferson County Agricultural Sociey, that were fed entirely on sour milk; and one year there was a very large competition. If any one can raise a better calf than I can, with less expense, let him tell me how he does it. E. MAYNARD,

LIMERICK, Jefferson county, N. Y.

EARLY VEGETABLES .- Many persons wishing early vegetables, sow the seeds in crocks or boxes, and start their plants quite early; but early growth is nearly lost in transplanting. Let them try the following method :

Take a flat box, and fill in an inch or two of earth; then take flat or English turnips, scrape out the inside of as many as you wish hills of tomatoes, cucumbers, cabbage, or lettuce, place them in your box, fill in and around with rich earth, and sow a few seeds in each. Keep in a warm room, and water occasionally. When you plant them, cut off the bottom of the turnip, being quite careful not to disturb the roots, and your vegetables will be from one to two weeks earlier than those raised in a hot-house and transplanted in the common way. Let three or four cucumber or lettoce plants grow in a hill, and but one tomato or cabbage plant. After they are set and growing well, nip off the poorest of the tomatoes and cabbages, for by pulling them up you disturb the roots of the one you wish to grow. -G. Converse, Wilkesbarre, Pa.

VEGETABLE INSTINCT.—If a pan of water be placed within six inches on either side of a andt stem of a young pumpkin or vegetable marrow ville, Tenn. it will in the course of the night approach it, | and it will be found in the morning with one of its leaves floating on the water. This experiment may be continued until the plant begins to fruit. If a prop be placed within six inches of a young convolvulus or scarlet runner, it will find it, althought the prop be shifted daily. If, after it has twined some distance up the prop, it be unwound and twined in the opposite direction, it will return to its original position or die in the attempt; yet, notwithstanding, if those two plants grow near each other, and have no stake around which they can twine, one of them will alter the direction of its spiral, and they will twine around each Duhamel placed some kidney beans in in a cylinder of moist earth, after a short time they began to germinate, of course, sending the plume upwards to the light and the root down into the soil. After a few days the cylinder was turned one-fourth around, and again this was repeated, until an entire revolution of the cylinder had been completed. The beans were then taken out of the earth, and it was found that the plume and radicle had bent to accommodate themselves to every revolution, and the one in its effort to ascend perpendicularly, and the other to descend, had formed a perfect spiral. But, although, the natural tendency of the roots is downwards, if the soil beneath be dry, and any damp substance above. the roots will ascend to reach it .- Farmers Magazine.

LOCK JAW IN HORSES .- This is a terrible malady to which horses are sometimes subject, and it is generally fatal owing to the want of skill on the part of veterinary physicians. The method persued by them in its treatment has been blistering, cystering, &c., which rather aggravates than relieves the spasms that usually attend it. Death generally ensued by this practice, and the disease has been held to be almost incurable. In a late number of the Ed inburgh Veterinary Review, a new system of managing lockjaw is described, and nearly all the cases in which it has been applied, have resulted favorably. The plan consists of a hot water packing similar to that pursued in the "water cure" for the genus homo.

As soon as the horse is observed to be affected with tetanus, it is wrappe I from head to take five times its costs, if I could not supply its place. With it I can do all my family sewing in about one fourth the time I could with my hands."—M. J. Scott, Nashville, T.nn. As soon as the horse is observed to be afture of 200° Fah. The animal is then allowed perfect rest and quietness for about two hours, when warm water of the above temperature is poured along its back outside of the blankets, and another like period of repose allowed, and so on until a cure is effected. A thin gruel of flour, oat, or Indian corn meal is CIVIL MECHANIC, OR given, when the jaws of the animal are capable of being opened.

As horses are liable to take lockjaw from pricks in the feet caused by careless or unskillful blacksmiths while shoeing them, this simple method of managing the disease can be applied by any person, and is designed, we think, to be of considerable benefit

Sewing Machine.

GROVER & BAKER'S CELEBRATED

Family Sewing Machines. NEW STYLES-PRICES \$50 TO \$125

EXTRA CHARGE OF \$5 FOR HEMMERS. F. B. CHANDLER, AGENT, MONTROSE; J. M. ROBINSON, LAKE-ST., ELMIRA.

THESE MACHINES sew from two spools.

THESE MACHINES sew from two spools, as purchased from the store, requiring no re-winding of thread; they Hem, Fell, Gather, and Stich in a superior style, finishing each seam by their own operation, without recourse to the hand-needle, as is required by other machines. They will do better and cheaper sewing than a seamstress, even if she works for one cent an hour, and are, unquestionably, the best Machines in the market for family sewing, on account of their simplicity, durability, ease of management, and adaption to all varieties of family sewing—executing either heavy or fine work with equal lacility, and without special adjustment. As evidence of the unquestioned superiority of their Machines, the Grover & Baker Sewing Machine Company beg leave to respectfully refer to the following TESTIMONIALS.

"Having had one of Grover & Baker's Muchines in my family for nearly a year and a half, I take pleasure in commending it as every way reliable for the purpose for which it is designed—Family Sewing,"—Mrs. Johna Leavitt, wife of Rev. Dr. Leavit, Editor of N. Y. Inde-

"I confess myself delighted with your Sewing Machine

"After trying several good machines, I preferred yours, on account of its simplicity, and the perfect case with which it is managed as well as the strength and du-rability of the seam. After long experience, I feel com-petent to speak in this manner, and to confidently recomand it for every variety of family sewing."—Mrs.E. B. booner, wife of the Editor of Brooklyn Star.

I have used a Grover & Baker Machine for two years dozen of lean ones, even if you succeed in getting them through the winter.

1 consider uniformity in the quantity given, and punctuality in the time of feeding, of

"Your Sewing Machine has been in use in my family the past two years, and the ladies request me to give you their testimonials to its perfect adaptness, as well as bor-saving qualities in the performance of family and busehold sewing.—Robert Boorman, New York.

"For several months we have used Grover & Baker" sewing Machine, and have come to the conclusion that very lady who desires her sewing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable "iron needle-women," whose combined qualities of beauty, strength and simplicity, are invaluable.—J. W. Morris, daughter of Gen. Geo. P. Morris, Editor of the Home Journal.

Extract of a letter from Thos. R. Leavitt, an American itleman, now resident in Sydney, New South Wales

gentleman, now resident in Sydney, New South Wales, dated January 12, 1858.

"I had a tent made in Melbourne, in 1853, in which there were over three thousand yards of sewing done with one of Grover & Baker's Machines, and a single seam of that has outstood all the double seams sewed by sailors with a roadle and twine." with a needle and twine.

"If Homer could be called up from his murky hades, he could sing the advent of Grover & Baker as a more be-ignant miracle of art than was ever Vulcan's smithy. He would denounce midnight shirt-making as "the dire-ul spring of woes unnumbered."—Prof. North.

"I take pleasure in saying, that the Grover & Baker SewingMachines have more than sustained myexpectation. After trying and returning others, I have three of them in operation in my different places, and, after four year's trial, have no fault to find.—J. H. Hammond, Senator of South Constitution.

"My wife has had one of Grover & Baker's Sewing achines for some time, and I am satisfied it is one best labor-saving-machines that has been invented the much pleasure in recommending it to the public. G. Harris, Governor of Tennessee.

" It is a beautiful thing, and puts everybody into an excitement of good humor. Were I a Catholic. I should insist upon Saints Grover & Baker having an eternal holiday in commemoration of their good deeds for humani

I think it by far the best patent in use. This Machine can be adapted from the finest cambric to the heaviest cassimere. It sews stronger, faster, and more beautifully than one can imagine. If mine could not be replaced, money could not buy it."—Mrs. J. G. Brown, Nashville,

Mrs. M. A. Forrest, Memphis, Tenn.

"If used] expressly for family purposes with ordinary care, I will wager they will last one "three score years

and never get out of fix." - John Erskine, Nash-"I have had your Machine for several weeks, and am perfectly satisfied that the work it does is the best and nost beautiful that was ever made."—Maggie Aimison,

"I use my Machine upon coats, dressmaking, and fine linen stitching, and the work is admirable—far better than the best hand-sewing, or any other machine I have ever seen."—Lucy B. Thompson, Nashville, Tenn.

"I find the work the strongest and most be utiful I have ever seen, made either by hand or machine, and regard the Grover & Baker Machine as one of the greatest bless-ings to our sex."—Mrs. Taylor, Nashville, Tenn.

'I have one of Grover & Baker's Sewing Machines in use in my family, and find it invaluable. I can confiden recommend it to all persons in want of a machine. G. T. Thompson, Nashville, Tenn.

"I take pleasure in certifying to the utility of the Grover & Baker Sewing Machines. I have used one on almost every description of work for months, and I find it

much stronger and better in every respect than wor by hand."—Mrs. D.W. Wheeler, Nashville, Tenn. "I would be unwilling to dispose of my Grover & Baker Machine for a large amount, could I not replace it again at pleasure."—Mrs. H. G. Scovel, Nashville, Tenn.

"Our two Machines, purchased from you, do the work of twenty young ladies. We with pleasure recommend the Grover & Baker Sewing Machine to be the best in use."—N. Stillman & Co., Memphis, Tenn.

"The Grover & Baker Sewing Machine works admira

bly. I think the stitch and work far superior to that of any Sewing Machine I ever saw. On fine work, I think the Machine would be hard to be beat."—W. J. Davie "I find the Machine easily managed, very durable, and take pleasure in recommending it to all who wish conve-nience, economy and pleasure."—Mrs. F. Titus, Mem-

"The Grover & Baker Sewing Machines have given

such satisfaction that we cheerfully recommend them to all who wish a good and substantial Sewing Machine. It executes work with much care and speed, and more finely than any other machine I have seen."—Mrs. R.B. Mitch-"I am happy to give my testimony in favor of Grover& Buker's Sewing Machine, and of the perfect satisfaction it gives in every respect. It sews neatly, and is by no means complicated, and I prefer it to all others I have seen."

Mrs. Bryan, wife of Rev. A. M. Bryan, Memphis, It affords me much pleasure to say that the Machine

works well; and I do not hesitate to recommend possessing all the advantages you claim for it. My is much pleased with it, and we take pleasure to cet to this effect."—R. C. Brinkley, Memphis, Tenn. " It gives me pleasure to find the Grover & Baker Sew-

ing Machine giving so much satisfaction. I have it in constant use, and find it all that could be desired. It is the most simple and durable machine in use, and I heartily recommend it."—F. M. White, Memphis, Tenn. "Having seen, examined, and used many other kins of Sewing Machines, I feel free to say that the Grover Baker Machines are far superior to all others in use."-M. Francois Seltz, Memphis, Tenn.

The World Challenged! The Excelsior Churn

Patented by SILAS HEWITT, July 14, 1857. Patented by SILAS HEWITT, July 14, 1857.

THIS CHURN is the result of years of experience by a practical farmer, to produce a Churn that has all the advantages of the old Dash Churn, and be a labor-saving Machine. We claim for this Churn, and are prepared to prove by actual demonstration, that it will produce more butter—a better quality—with less time and less labor—then any other Churn in market. It is perfectly simple in its construction, not liable to get out of order, and a child can operate on it. It has been thoroughly tested by several hundred farmers in Seneca and adjoining Counties, and its merits fully established wherever introduced, and is pronounced by all to be one of the greatest improvepronounced by all to be one of the greatest improve-ents of the age.

Ba The following extract from the Seneca Falls papers of May 26th, is a sample of what the "EXCELSIOR CHURN" has done, in competition with other Churns:

"A trial between the Smith Churn, of Elgin, Illinois, (which took the first premium at the State Fair at Buffalo last fall, and has taken the premium at all the Fairs where it has been exhibited) and the Excelsior Churn, of this village, took place at Woodmansee's Hotel, the 20th inst. The cream was taken from the same vessel, after being stirred up that it might be of the same temperature and quality—one quart at a time—each Churn receiving two gallons. The Excelsior Churn p oduced and gathered the Butter hard and yellow in six and a half minutes, while the Smith Churn was 12 minutes in producing the Butter, which was soft, white and oily; and Excelsior Churn produced Twelve Ounces more Butter than the Smith Churn, being more than then Butter Milk of the Smith Churn, being more than half as much as they got from the cream! The Smith Churn could not produce any Butter from the Butter milk of the Excelsior Churn.

Trial of Churns—Report of the Committee.

any Butter from the buttermilk of the Excelsior Churn.'

Trial of Churns—Report of the Committee.

At the trial between Smith's Churn, from Elgin, Illinois, and Hewitt's Excelsior Churn, manufactured in this village, which took place at Woodmansee's Hotel, on Wednesday morning, the following was the result of the trial: Hewit's Churn, 2½ lbs.—Butter in 6½ minutes.

Smith's Churn, 1½ bbs.—Butter in 1½ minutes.

Smith's Churn, 1½ bbs.—Butter in 1½ minutes.

About two gallons of Cream was put in each Churn. The milk from Smith's Churn was then changed to Hewit's, and thirteen ounces of Butter extracted from it. No Butter could be brought from the milk from the Hewit Churn, which was transferred to Smith's. The quality of Butter from Hewit's Churn was much the best, being of better color, and more solid.

A second trial, which was about one-third more cream was put in the Hewit Churn than in the other, resulted very nearly the same as above, Hewit's Churn being

nearly the same as above, Hewit's Churn being

shown to be greatly the superior.

EDWARD S. LATHAM, J.

JONATHAN SACKET, J.

Seneca Falls, May 29, 1858.

All that is asked for this Churn is, to let it rest on its wn merits—the world is challenged to produce better.

For particulars for Rights or Churns, address:

H. F. BURT, Ridgbury, Bradford County, Pa.
