ter. For each rod of fence it requires on board each ten, eight, seven, six, and five inches in width; also one five inch board extra for battens on every four posts or two rods of fence.

Necessary for posts or two rods of fence. leaving them 5 by 5 where they come to the top of the ground. For every three rods of fence I use one 4 by 4 scantling, twelve feet long, sawing the same in six pieces, two feet each, which I use as follows: Halve each post at the bottom 4 inches up, and make a dovetail. Lay it on the two feet piece, in the michel, and mark the dove tail, taking half of that, then drive it into the post, forming a sort of foot. One hand will bottom fifty posts aday, and it can be done in the barn in the the winter and on wet days. I find that the holes can be dug two feet deep, as easily and a quickly as if only eight inches square. Such a fence here costs about 87.1-2 cents per rod, and will last fourteen to twenty years, if the posts are well seasoned from Carbon and the content of the content of the posts are well seasoned from Carbon and the content of the conte square. Such a fence here costs about the square inches square. Such a fence here costs about the first per rod, and will last fourteen to twenty years, if the posts are well seasoned previous to setting, and a coat of coal tar put on six inches up, and down at the surface of the Editor of Brooklyn Star.

Spoomer, wife of the Editor of Brooklyn Star.

"I have used a Grover & Baker Machine for two years, and I have found it adapted to all kinds of family sewing, from Cambric to Broadcloth. Garments have been worn without the giving away of a stitch. The Machine is easily kept in order, and easily used.—Mrs. A. B. Whipple, wife of Rev. Geo. Whipple, New York. the ground. This will not pull up by frost nor lit with wind. Mine, seven years old, is firm as can be. Seasoned posts will last double the time of green ones. Coal tar can be got at gas works at \$1,00 per barrel, and should be put on hot. A farmer that can make a hay rack with a good saw. square, chisel, and hammer can build such a fence. I use the five inch boards for caps and battens. The fence is four boards high, and four feet four inches high. I cut logs for posts thirteen feet long, and saw in two at the mill; fence boards, siteen feet, six inches, and one inch thick. Brash white oak is the best. DAYTON SIGLER.

Construction of Stone Wals.—To construct

a good stone wall is by no means a difficult task, and yet a large share of those we see are by no means what they should be, but tumbledown ricketty affairs, only an apology for a force of the stone of the stone

except on ground not effected by frost, to dig a trench twelve to eighteen inches deep, and trial, have no fault to find.—J. H. Hammond, Senator South Carolina. as wide as the base of the wall is desired to be. For a half wall, two feet; and for a four and a half or five foot wall, two and a half feet wide. This trench should be filled with small J. G. Harris, Governor of Teanessee. stones ponded down, and made level with the "It is a beautiful thing, and puts everybody into an ground. The frost will not effect such a fundation injuriously. Where the foundation of large stone is laid on the top of the ground, or near the surface, thawing affects it badly by occurring on one side before it does the other especially in walks running east and west, causing them to lean to the sun, and soon fall down in that direction.

firmly together. If stones are not long enough to reach through the wall pretty often, use those that will lap on each other and form binders as in this binding will depend in a binders as in this binding will depend in a great measure, the strength of the wall. In making wall where the stones are all small use is made of small slats of ceder, chesnut, or oak | ville, Tenn. for binding the wall, and experience has proved them to answer a good purpose. The wall should have an equal batter, or draw in with Nashville, Tenn. an equal slope on each side, so as to be not more than ten or twelve inches wide on the top. A full wall should be about five feet top. A full wall should be about five feet top. high, and where practicable, have a course of of large stone firmly placed on the top, large enough to cover the width of the wall. walls are built about three and a half feet high, with a good black ash, or other straight pole laid on the top, over which, at proper distances stakes are firmly set in the ground, crossing at the top into which rails are placed, making a fence much preferred for some purposes. Sheep and cattle never get in the habit of running over the wall with a top rail, and are often troublesome where the wall is whole, unless quite high; and sheep are often getting over dat pleasure."—Mrs. H. G. Scovel, Nashville, Tenn. the highest stone fences. As a finishing stroke to a wall, bank it up

with the earth taken from the trench, and plow a furrow on each side, where practicable placing the earth against the wall, and cleaning out the furrows to serve as ditches to carry off surplus water.

Stone fences constructed in this manner may reasonably be expected to remain permanent for years.

"I find the Machine easily managed, very durable, and take pleasure in recommending it to all who wish convenience, economy and pleasure."—Mrs. F. Titus, Memphis Tens

Washington, Co., N. Y. Dec. 1858.

door is always a nuisance. Its noise is unpleasant to all, and particularly distressing to the sick. With a feather occasionally introduce a little oil or even melted tallow or lard into the joints of the hinge, and all will go smoothly. Locks should also be kept well works well; and I do not hesitate to recommend it as the bolt that strikes the catch or holder, when shutting the door. This will prevent the shutting the door shuttened to say that the machine works well; and I do not hesitate to recommend it as works well as works well as works well as works well as wor and lessening the wear of the door and the ing parts around it. # The World Challenged! The Excelsior Churn

Patented by SILAS HEWITT, July 14, 1857. Patented by SILAS HEWITT, July 14, 1857.

THIS CHURN is the result of years of experience by a practical farmer, to produce a Churn that has all the advantages of the old Dash Churn, and be a labor-saving Machine. We claim for this Churn, and are prepared to prove by actual demonstration, that it will produce more butter—a better quality—with less time and less labor-than any other Churn in market. It is perfectly simple in its construction, not liable to get out of order, and a child can operate on it. It has been thoroughly tested by several hundred farmers in Seneca and adjoining Counties, and its merits fully established wherever introduced, and is pronounced by all to be one of the greatest improveed by all to be one of the greatest improv

and its merits fully established wherever introduced, and is pronounced by all to be one of the greatest improvements of the age.

\*\*B\*\*The following extract from the Seneca Falls papers of May 26th, is a sample of what the "EXCELSIOR CHURN" has done, in competition with other Churns: "A trial between the Smith Churn, of Elgin, Illinois, (which took the first premium at the State Fair at Buffalo last fall, and has taken the premium at all the Fairs where it has been exhibited) and the Excelsior Churn, of this village, took place at Woodmansee's Hotel, the 20th inst. The cream was taken from the same vessel, after being stirred up that it might be of the same temperature and quality—one quart at a time—each Churn receiving two gallons. The \*Excelsior\*\* Whurn poduced and gathered the Butter hard and yellow in six and a half minutes, while the Smith Churn was 12 minutes in producing the Butter, which was soft, white and oily; and Excelsior Churn produced thirteen ounces of good Butter from the Butter Milk of the Smith Churn, being more than half as much as they got from the cream! The Smith Churn could not produce any Butter from the buttermilk of the Excelsior Churn.

\*Trial of Churns—Report of the Committee.\*\*

At the trial between Smith's Churn, from Elgin, Illinois, and Hewitt's Excelsior Churn, manufactured in this village, which took place at Woodmansee's Hotel, on Wednesday morning, the following was the result of the trial: Hewit's Churn, 2½ lbs.—Butter in 6½ minutes.

Smith's Churn, 1½ lbs.—Butter in 6½ minutes.

About two gallons of Cream was put in each Churn.

The milk from Smith's Churn was then changed to Hewit's, and thirteen ounces of Butter extracted from it. No Butter could be brought from the milk from the Hewit Churn was put in each Churn.

EDWARD S. LATHAM.

Seneca Falls, May 29, 1858.

All that is asked for this

# The Great Atlantic Telegraph! M. E. SOLOMON'S CLOTHING EMPORIUM

Towanda, Nov. 24, 1858. JEWELRY! JEWELRY! JEWELRY A. M. Warner's

New & Splendid Jewelry Store, one door north of Pattons Drug Store,

HAS just been opened with the largestand most choice stock of FASHIONABLE JEWELRY everoffered to a discriminating public. Indeed, he can safely say that with the opening of his new store has been inaugurated a new era in the Jewely line, inasmuch as along with the choice and elegant assortment he gives the most reliable assurance of an almost incredible reduction in prices: the rich and tasteful articles having been all bought with ready cash.

A. M. W., when he reflects how, for the past years, with a far less attractive stock, he has enjoyed so large a share of public patronage, flatters himself that the immense increase of Goods he now offers, which have been boughtso much more advantageously, will enable him to increase crease of Goods he now offers, which have been boughtso much more advantageously, will enable him to increase the generous confidence which has hitherto been which safed to him. He therefore solicits a continuance of favor of his old customers, and invites the public general. y to come and see the fashions. continue to be distinguished by the skill and despatch which has heretofore enabled it to enjoy the enviable reptation of being the most reliable in town.

Towanda, September 24, 155. TOWANDA CABINET WAREHOUSE CHESTER WELLS would respectfully inform his friends and the public that he is now receiving at his old stand one door north of Laporte, Mason & Co.'s banking house, a large and extensive assortment of
