CLOVER SEED ON WINTER WHEAT may be sown any time this month. Frost does not hurt it, unless it has germinated. It may be sown on the snow. Indeed, some suppose there EXTRA CHARGE OF \$5 FOR HEMMERS. is an advantage in so doing-the snow, as it melts, washing the seed into the ground. Unless the soil and the weather are very dry, however, there is little danger that the seed will not germinate. The wheat plants afford sufficient shade and moisture.

Last year, the weather was remarkably warm early in the spring, followed by protracted rai: and cold. Much of the clover seed sown early had started, and the young plants perished .-To avoid such failure, some of our best farmers sow part of the seed say the first week in April and again about the 20th. This is double labor of sowing, but it lessens the risk of failure; and when the second sowing is crosswise the first, it secures a more even distribution of the seed.

It is well to sow a bushel of plaster per acre, for the benefit of the young clover plants -Many good farmers in Western New York think it is better to sow the plaster on the wheat at the time of sowing the clover, than to sow at on the clover the next spring. Some however, think the plaster has a tendency to retard the ripening of the wheat; and if this is the case, of course the practice canot be recommended, as the liability to injury from the midge is largely augmented by any delay in the ripening processes. Whether plaster really has this effect or not, we can not tell. In Mr. Lawes' experiments, alkaline salts in connection with ammonia had a tendency to increase the quantity of straw without an increase of grain; i. e., alkalies and ammonia gave no more grain, but more straw, than the same quantity of ammonia without alkalies. It is not improbable that plaster might have the

Since the advent of the midge, and the decreased quantity of land sown to wheat, clover is sown more extensively with spring grains. Barley is undoubtedly the best spring crop for this purpose. In England, nearly all the clover is sown with barley. The land is made as fine and mellow as possible, and the clover seed is generally sown after the barley has been harrowed in and the work completed, except rolling, which is done after the barley is up. If the land is at all cloddy, it is better to roll before the clover is sown. There is much more clover seed lost from burying it too deep than from not covering it at all. Several years ago, we recollect seeing the results of some careful experiments, made by Mr. STERLING, of Scotland, on sowing clover seed at different depths. More seeds germinated when covered very slightly (if we recollect aright, the eighth of an inch,) than at any greater depth-the dccrease being in proportion to the depth. Those sown on the surface gave a less favorable result than those slightly covered, but better than any sown at a greater depth; -i e., those covered the eighth of an inch did best; those sown on the surface, nearly as well; those covered one-fourth of an inch, not quite so well as those on the surface; those covered half an inch, still worse; and so on, till at two inches they did not germinate at all.

As a general rule, clover does not succeed so well sown with oats as with barley, spring wheat, or rye, though we have known several instances where a good set of clover has been obtained when seeded with oats. With this crop, it would undoubtedly be safer to sow a little more seed.

For pasture, and when it is intended to plow up the land at the end of one or two years, we should sow nothing but clover. From four to six quarts, or from eight to twelve pounds, is the usual quantity in such cases. For mowing six pounds of medium clover, and four and a succeed.

Call and examine our stock.

**Cal As a general rule, clover does not succeed

six pounds of medium clover, and four and a care. I will wager they will last o half pounds of timothy seed, is the usual quantity, varying less or more according to the condition of the soil. We are in favor of thick seeding, and would much rather sow more than less. English farmers, as a rule, sow half as much again clover and grass seeds per acre as we do and a greater variety. They find their ac count in so doing. We have known experienced English farmers sow as much as 20 lbs, per acre of red clover, trefoil, and white Dutch, in addition to rye-grass. Our land is so well adapted to clover and grass, that such thick seeding is unnecessary here; but we are not sure if it would not sometimes be advantageous to sow more seed than we do.

There are few implements more needed on American farms than a light pair of harrows for covering small seeds. The roller answers the purpose to some extent; but if the soil is at all damp, and dry weather ensues. a hard crust forms on the surface, through which it is at pleasure."—Mrs. H. G. Scorel, Nashville, Tenn. difficult for the seeds to penetrate. An implement which should combine the operation of roller and harrow, would be an improvement, for this purpose, upon either. The late Mr. Smrn, of Deanston, invented an implement which is designed to accomplish this result .-It is called the web-harrow. It consists of an iron chain web, connected by discs or quoits of iron which, lying obliquely upon their sides when in operation, roll around, thus tearing and abrading the surface of the ground, and grinding the smaller clods, so as to expose and disturb the surface sufficiently to cover the small seeds strewn upon it. It is by the rubbing of the sides of the discs against the land, as they revolve, that they are especially useful as they revolve, that they are especially useful more than by the action of their edges, though that is also efficient to some extent. The price of this harrow in England is about \$25 covers. of this harrow in England is about \$25, covering 25 square feet of ground. The common Tenn. brush-harrow-a framework of wood interlaced with brush-forms a good substitute for the expensive implement of Mr. Smith. It merely scratches the surface, and so far gives the seeds a very shallow covering; but it wants the weight which makes the web-harrow to compress as well as abrade the surface, both of which conduce to its efficiency.

BARLEY .- Since the uncertainty of the wheat erop, the cultivation of barley is attracting more attention. Our short, dry, hot summers, are not as well adapted for barley as for wheat. Our best samples of wheat are heavier, finer, drier, and more farinaceous than the English ; while our barley is decidedly interior to that Tona. grown in the cool, long summers of the British Isles. Barley delights in a loose, warm, quick soil. Its roots sprend but little-not half as far or deep as the roots of wheat. Hence the soil should be rich, and as loose as possible. It is probably owing to this fact that superphosphate of lime (which seems to develop the CIVIL. MECHANIC, OR formation of roots) has a better effect on barley than on wheat. A clayey soil will produce good barley, if it can be made sufficiently light and porous.

POLITENESS is like an air-cushion-there may be nothing in it, but it eases your jolts wonSewing Machine.

GROVER & BAHER'S CELEBRATED

Family Sewing Machines.

F. B. CHANDLER, AGENT, MONTROSE; J. M. ROBINSON, LAKEST, ELMIRA.

THESE MACHINES sew from two spools. As purchased from the store, requiring no re-winding of thread; they Hem, Fell, Gather, and Stich in a superior style, finishing each seam by their own operation, without recourse to the hand needle, as is required by other machines. They will do better and cheaper sewing than a seamstress, even if she work for one cent an hour, and are, unquestionably, the best Machines in the market for family sewing, on account of their simplicity, dorability, ease of management, and adaption to all varieties of family sewing—executing either heavy or fine work with equal facility, and without special adjustment. As evidence of the unquestioned superiority of their Machines, the Grover & Baker Sewing Machine Company beg leave to respectfully fefer to the following TESTIMONIALS.

"Having had one of Grover & Baker's Machines in my family for nearly a year and a half, I take pleasure in commending it as every way reliable for the purpose for

I confess myself delighted with your Sewing Machine which has been in my family for several months. It has always been ready for duty, requiring no adjustment, and is easily adapted to every variety of family sewing, by simply changing the spools of thread."—Mrs. Elizabeh Strickland, wife of Rev. Dr. Strickland, Editor of N. Y. Christian Advocate.

"After trying several good machines, I preferred yours, on account of its simplicity, and the perfect case with which it is managed as well as the strength and durability of the seam. After long experience, I feel competent to speak in this manner, and to confidently recommend it for every variety of family sewing."—Mrs.E. B. Spooner, wife of the Editor of Brooklyn Star.

"I have used a Grover & Baker Machine for two year "I have used a Grover & Baker Machine for two years, and I have found it adapted to all kinds of family sewing, from Cambric to Broadcloth. Garments have been worm without the giving away of a stitch. The Machine is easily kept in order, and easily used.—Mrs. A. B. Whipple, wife of Rev. Geo. Whipple, New York.

"Your Sewing Machine has been in use in my family the past two years, and the ladies request me to give you their testimonials to its perfect adaptness, as well as abor-saving qualities in the performance of family and nouschold sewing.—Robert Boorman, New York.

" For several months we have used Grover & Baker's combined qualities of beauty, strength and simplicity, are invaluable.—J. W. Morris, daughter of Gen. Geo. P. Morris, Editor of the Home Journal.

Extract of a letter from Thos. R. Leavitt, an American gentleman, now resident in Sydney, New South Wales, lated January 12, 1858. "I had a tent made in Melbourne, in 1853, in which there were over three thousand yards of sewing done with one of Grover & Baker's Machines, and a single seam of that has outstood all the double seams sewed by sailors with a needle and twine."

"If Homer could be called up from his murky hades, he would sing the advent of Grover & Baker as a more benium tuiracle of art than was ever Vulcan's smithy. He would denounce midnight shirt-making as "the directal spring of woes unnumbered."—Prof. North.

"I take pleasure in saying, that the Grover & Baker SewingMachines have more than sustained myexpectation. After trying and returning others, I have three of them in operation in my different places, and, after four year's trial, have no fault to find .- J. H. Hammond, Senator of

lachines for some time, and I am satisfied it is one of he best labor-saving-machines that has been invented. I take much pleasure in recommending it to the public. J. G. Harris, Governor of Tennessee.

"It is a beautiful thing, and puts everybody into an acitement of good humor. Were I a Catholic. I should nested upon Saints Grover & Baker having an eternal holiday in commenoration of their good deeds for humanity."—Cassias M. Clay.

"I think it by far the best patent in use. This Machine

" and never get out of fix." - John Erskine, Nash-"I have had your Machine for several weeks, and am

perfectly satisfied that the work it does is the best most beautiful that was ever made."—Maggie Aim Nashville, Tenn.

"I use my Machine upon coats, dressmaking, and fine linen stitching, and the work is admirable—far better than the best hand-sewing, or any other machine I have ever seen."—Lucy B. Thompson, Nashville, Tenn.

"I find the work the strongest and most be untiful I have ever seen, made either by hand or machine, and regard the Grover & Baker Machine as one of the greatest blessings to our sex."—Mrs. Taylor, Nashville, Tenn.

"I have one of Grover & Baker's Sewing Machines in use in my family, and find it invaluable. I can confidently recommend it to all persons in want of a machine."—G. T. Thompson, Nashville, Tenn.

"I take pleasure in certifying to the utility of the crover & Baker Sewing Machines. I have used one on al most every description of work for months, and I find much stronger and better in every respect than work do by hand."—Mrs. D.W. Wheeler, Nashville, Tenn.

"Our two Machines, purchased from you, do the work f twenty young ladies. We with pleasure recommend be Grover & Baker Sewing Machine to be the best in of twenty young ladies. We with pleasure recommend the Grover & Baker Sewing Machine to be the best in use."—N. Stillman & Co., Memphis, Tenn.

"The Grover & Baker Sewing Machine works admira bly. I think the stitch and work far superior to that of any Sewing Machine I ever saw. On fine work, I think the Machine would be hard to be beat."—W. J. Davie,

"I find the Machine easily managed, very durable, and take pleasure in recommending it to all who wish con-nience, economy and pleasure."—Mrs. F. Titus, Me phis, Tenn.

"The Grover & Baker Sewing Machines have given such satisfaction that we cheerfully recommend them to all who wish a good and substantial Sewing Machine. It executes work with much care and speed, and more finely than any other machine I have seen."—Mrs. R.B. Mitchel. Memphis, Tenn.

Mrs. Bryan, wife of Rev. A. M. Bryan, Memphis

Tenn.

"It affords me much pleasure to say that the Machine works well; and I do not hesitate to recommend it as possessing all the advantages you claim for it. My wife is much pleased with it, and we take pleasure to certify to this effect."—R. C. Brinkley, Memphis, Tenn. "It gives me pleasure to find the Grover & Baker Sew-

ing Machine giving so much satisfaction. I have it in constant use, and find it all that could be desired. It is the most simple and durable machine in use, and I heartly recommend it."—F. M. White, Memphis, Tenn.

"Having seen, examined, and used many other kinds Sewing Machines. I feel free to say that the Grover & aker Machines are far superior to all others in use." M. Francois Seltz, Memphis, Tenn.

"I consider my machine invaluable, and would not take five times its costs, if I could not supply its place. With it I can do all my family sewing in about one fourth the time I could with my hands."—M. J. Scott, Nushcille,

The World Challenged! Patented by SILAS HEWITT, July 14, 1857.

Patented by SILAS HEWITT, July 14, 1857.

THIS CHURN is the result of years of experience by practical farmer, to produce a Churn that has all the advantages of the old Dash Churn, and be a labor-saving Machine. We claim for this Churn, and are prepared to prove by actual demonstration, that it will produce more butter—a better quality—with less time and less labor-than any other Churn in market. It is perfectly simple in its construction, not liable to get out of order, and child can operate on it. It has been thoroughly tested by several hundred farmers in Seneca and adjoining Counties and its merits fully established wherever introduced, and is pronounced by all to be one of the greatest improvements of the age.

**The following extract from the Seneca Falls paper

ments of the age.

Ba The following extract from the Seneca Falls papers of May 26th, is a sample of what the "EXCELSIOR CHURN" has done, in competition with other Churns: "A trial between the Smith Churn, of Elgin, Illinois, (which took the first premium at the State Fair at Buffall last fall, and has taken the premium at all the Fairs where it has been exhibited) and the Excelsior Churn, of this village, took place at Woodmansee's Hotel, the 20th inst. The cream was taken from the vame vessel, after being stirred up that it might be of the same temperature and quality—one quart at a time—each Churn receiving two gallons. The Excelsior Churn p oduced and gathered the Butter hard and yellow in six and a half minutes, while the Smith Churn was 12 minutes in producing the Butter, which was soft, white and oily; and Excelsior Churn produced Twelve Ounces more Butter than the Smith Churn! urn produced Twelve Ounces more Butter than hith Churn! The Excelsior Churn then produced t teen ounces of good Batter from the Butter Milk of the Smith Chura, being more than half as much as they got from the cream! The Smith Chura could not produce any Butter from the buttermilk of the Excelsior Chura.'

Trial of Churns—Report of the Committee.

At the trial between Smith's Churn, from Elgin, Illinois and Hewitt's Excelsion Churn, manufactured in this vil lage, which took place at Woodmansee's Hotel, on Wed

lage, which took place at Woodmansee's Hotel, on Wednesday morning, the following was the result of the trial:
Hewit's Churn, 24 lbs.—Butter in 63 minutes.
Smith's Churn, 14 lbs.—Butter'in 12 minutes.
About two gallons of Cream was put in each Churn.
The milk from Smith's Churn was then changed to Hewit's, and thirteen ounces of Butter extracted from it. No Butter could be brought from the milk from the Hewit Churn, which was transferred to Smith's. The quality of Butter from Hewit's Churn was much the best, being of better color, and more solid.

A second trial, which was about one-third more cream was put in the Hewit Churn than in the other, resulted very nearly the same as above, Hewit's Churn being shown to be greatly the superior.

EDWARD S. LATHAM,

JONATHAN SACKET,

Seneca Falls May 29, 1858. Seneca Falls, May 29, 1858. All that is asked for this Charn is, to let it rest on its

wn merits—the world is challenged to produce better.

E. B. PARSONS, ATTORNEY AT M. & H. F. Long's store. Augs 7, 156. HENRY B. M'KEAN, ATTORNEY AT LAW, TOWANDA, PA.; will pay prompt attention to business entrusted to him. Collections made on reasonable terms, with prompt remittances. oct19

ELHANAN SMITH, having returned to Towanda, has opened a Law Office over Mercur's Dec. 1, 1857.

TOWANDA FOUNDRY.

THE subscriber continues to carry on the Foundry business in Towanda, and is prepared to do all kinds of work in his line on short notice and in a workmanlike manner. He will keep on hand or make to order Plows, Stoves, Mill Irons, Sleigh Shoes, Wagon-Boxes, and any article of cast iron that may be required. Turning and fitting up work will be done on short notice and on reasonable terms. Persons wishing to purchase Stoves of any kind will find it much to their advantage to buy at the Foundry, as they can be repaired much cheaper. Please call and examine before purchasing elsewhere. Old cast iron and Grain taken in payment.—Don't mistake the place—one door east of Mercur's Block.

**3" I would also say to those having accounts standing over six months, that they must be settled without delay, and those having notes that are due will do well to pay up and save cost.

**Towards Out of the state of the stat JOHN CARMAN. ay up and save cost. Towanda, Oct. 22, 1856.
