To Farmers wanting Machines:

As many of you are but little, if at all are quantited with the Kirby Harvester, and no well acquainted with its ments, or with the defects of those machines which you will be urged to buy, we have thought it advisable to offer you a few timely hints, that you may be prepared to meet any arguments that may be offered in favor of others and against the Kirby. While we would not have you think that there are no other good machines in the market, we want to satisfy you that the Kirby Harvester is the best combined Mower and Reaper in the world. You will find that there are a great many machines that will come up and have a run for a year, and perhaps for two or three years, which from some radical defect in the principles involved in their construction kill themselves. You will have noticed this is the case with three machines which have successively taken the lead in their day, but are now evidently fast being laid aside and replaced by others in which new and more practical principles are disclosed. We refer to M'Cormick's, Ketchum's and Manny's. It may be that the Kirby will be numbered with these after having its day, but we have the faith to believe that there principles involved in it which are absolutely essential to the proper working of a Mower and Reaper, and so long as we have "live men" to watch for any improvements, and, with the capacity and ability to apply them, we think we shall not be outstripped in the march of invention, and will keep the Kinny where it now is, -at the head of combined machines.

We wish to impress upon you that the Kirby is superior as a Mower to any that is adapted to mowing only, and it surpasses as a Reaper any adapted to reaping only; thus, the farmer gets a Mower and Reaper combined in one, at the price of any other first class single mower or single reaper. The M'Cormick and Ketchum machines are so nearly out of market, that it is unnecessary to speak of them here, except to say, that they have rigid fingerbars without any means of adapting themselves to uneven surfaces. M'Cormick's can only be successfully used as a Reaper, and Ketchum's only as a mower ; they must soon die a natural death. The Manny machine has been to most popular one ever built, but like the others, it must also surrender and fall into the rear rank with the other two. The public now demand a light, strong, durable and easy working combined machine. Let us see if any of the principal machines come up to the demand :

It is well known the Manny hangs heavily on the horses' necks ; has a great side draft ; is very hard for the driver in mowing, and still harder for the raker in reaping, and is a heavy and cumbrous thing to handle. Like all ma-chines that are made principally of wood, it shrinks and swells with every exposure to a dew, shower or hot sun; the nuts on the bolts that hold the gearing have to be tightened; this, with the warping of the timber, throws the gearing out of place and out of line; it meshes too deep or not deep enough ; the finger bar springs-that throws the guards out of line -creates friction, spoils the knives, and after one season's work and one winter's storage the machine is often used up and has to be laid aside or expensive repairs made. These are some reasons why a wooden frame machine, (and these remarks apply to all wooden frame machines, as well as Manny's,) though, perhaps, well liked at first, grows worse from the day it is bought.

The Kirby is made entirely of iron, except the seat, pole and reaping attachment ; shrinkthe seat, pole and reaping attachment; shrinking or swelling of these parts does not effect the working of the machine. The gearing will be found precisely in the same position of reasonable terms, with prompt remittances. after being run twenty years as when it left the workman's hands. The finger-bar retains its Cartains its Store. Dec. 1, 1857. remains without being subject to change by

every shower and every dew.

There is another class of machines now being manufectured somewhat extensively, and urged upon the public as something very superior and new, and to some extent have been successful as mowers, but not at all successful as reapers. These are machines with joints in the bar ; the Aultman & Miller or Buckeye and Hubbard's are of this class. To the inexperienced and those who do not study the principles of construction, the folding over the finger-bar and having two wheels to carry the Bend for New York and Philadelphia at..... 8 10 A.M. frame, so that you can drive off on a trot, is a very attractive thing, and they make up their minds at first sight that that is the best thing forgetting that the primary object of a mower respective to cut grass and grain well and support the state of the state o and reaper is to cut grass and grain well and easily, and the making it of easy transportation and a buggy in which one can ride to church but a secondary consideration; and, forgetting that the joints will wear very quickly-that the connecting rod is never in line except work is being done on perfectly level ground, and the two wheels are a necessity where a joint is used, and a very serious objection to a machine. You will see that the joint is that part of the bar which is subject to the greatest strain

when striking an obstruction; that place will wear some, and by taking all the strain that comes on the machine, the outer end of the bar must drop back; this, of course, creates friction, and with the fact that the connecting rod is seldom in line, causes the machine to work hard, and the longer it is used the less it is liked, and finally it finds its way into the scrap heap. Besides this, you will find a good Reaper has never been made with a joint in the bar. The fact that the two wheels require too much space to travel in, makes it impossible to lay the grain far enough off to be clear of the machine on its succeeding swath. Having three and some times more wheels on the ground, it is impossible drive the reel with a provided in the source of the machine on its succeeding swath. Having three and some times more wheels on the ground, it is impossible drive the reel with a provided in the source of the sacromagner Car will be attached to the Express Freight Trains, leaving Scranton, at. 1 00 a. M. Due at Stroudsburg, at. 2 20 r. M. Returning, will leave Junction, at. 3 30 a. M. Due at Stroudsburg, at. 7 05 "

Seranton, at. 2 30 r. M. Seranton, at. 2 30 r. M. Seranton, at. 2 30 r. M. too much space to travel in, makes it impossibelt except from the platform wheel; and the cramping of the conection and the great side draft are some of the causes why a Reaper can-not be made with a joint in the bar. Hence you will see that they recommend and warrant | s the machine as a Mower, but say "the Reaping attachment is warranted to work satisfactorily ; and should it fail to do so, the attachment may be returned and the money paid for

it refunded." The Kirby, as before remarked, is entirely firon; the peculiar independent action allows he wheel and cutter-bar to work each on its wing ground, to adjust itself perfectly to it in the Foundry, first door below Mercur's Store, where he wheel and cutter-bar to work each on its wing ground, to adjust itself perfectly to it in the Foundry first door below Mercur's Store, where he is prepared to conduct the business in all its various structure in the Foundry business in Towanda, and is prepared to all kinds of work in his line on short notice and in a workmanlike manner. He will keep on hand or make to order, on short notice. Stoves of various styles constantly for sale. Particular attention paid to Jobbing. Old Iron, Copper and Brass taken in exchange for goods.

JOHN CARMAN.

BUFFALO ROBES.—Two doz. Buffalo ither end or both ends of the bar, and by mother you can throw it in or out of gear—all he while in motion. So, as to portability, it agoite at much so as any one that has the bar of foll for Jor can lift the bar on the small.

STOVES FOR SALE.—A Second Hand, No. 10, "Queen of the West" COOKING STOVE, in good condition—also a Sheet-leng Air Tight STOVE, and those having notes that are due will do well to purchase the wing of the work, and the prom the surface of workmanlike manner. He will keep on hand or make to order, on short notice and in a workmanlike manner. He will keep on hand or make to order plows, Stoves, Mill Irons, Sleigh Shoes, Wagon Boxes, and any article of cast iron that may be required. Towards if workmanlike manner. He will keep on hand or make to order plows, Stoves, Mill Irons, Sleigh Shoes, Wagon Boxes, and any article of cast iron that may be required. Towards if workmanlike manner. He will keep on hand or make to order plows, Stoves, Mill Irons, Sleigh Shoes, Wagon Boxes, and any article of cast iron that may be required. Towards if workmanlike manner. He will keep on hand or make to order plows, Stoves, Mill Irons, Sleigh Shoes, Wagon Boxes, and any article of cast iron that may be required. Towards if workmanlike manner. He of iron ; the peculiar independent action allows the wheel and cutter-bar to work each on its own ground, to adjust itself perfectly to it without cramping the connection or the cutters; turn it up-side down, and the connection will be in line-the draft is always light and always the same whether on rough or level ground ; by a lever at your side you can lift either end or both ends of the bar, and by another you can throw it in or out of gear-all the while in motion. So, as to portability, it is quite as much so as any one that has the bar

wheel and start off without stopping to throw it up or or to throw it out of gear. We au thorize our Agents to warrant it both as a Mower and Reaper-as a perfect combined Machine. We have never had a man say he liked the Kirby less after than before using it and we have not sold one where it could be

exchanged for any other kind. The man who bought the first one made, and the only one in 1855, now thinks it is the best machine ever made, and the longer he uses it the better he

On the Manny and some other machines, the raker when Reaping, stands on the back and outer corner of the platform, leaning with his breast against a support, and with a fork pushes the grain off at the side. Riding thus on the small wheel which supports the platform he receives a blow on his breast every time the wheel passes over a tuft of grass, stone, or drops into a hole or dead furrow. This he can stand a short time, which, added to the severe strain of forcing the grain off with an unnatural motion, makes his position an uncomfortable one, but not more so for him than for the team ; for every time the platform wheel No. 4, Patton's Block, Towarda, Pa., drops into a hole or strikes any obstruction whatever, the pole is thrown against the left horse's side. Instances are numerous where horses have been actually killed by this constant thumping on their sides.

By a patent just secured, we place our raker directly behind the horses on a comfortable spring seat, his weight directly on the driving wheel, where it is the most easily carried, and with a rake of peculiar construction, he can, by a quarter turn of the arms and a perfectly natural movement, lay the grain in good condition for binding, entirely out of the way of the ma hine on its succeeding swath.

We have given you a few of the leading features of the Kirby Machine and the reasons why it is superior to others. We might give many more, but we believe our Harvester will demonstrate in the field, where it shows to the best advantage, that it is the most durable, simple and easily managed, the least liable to get out of repair, and if broken by accident, the most read i y mended, and altogether the most ecomical machine for the farmer to buy; and although there are some machines that are good Mowers and some good Reapers, there are none that are better Mowers or better Reapers, and none that are equal as a combined Mower and Reaper to KIRBY'S AMERICAN HARVESTER.

Farmers will be urged by travelling agents, for other Machines, to buy of them :- all we can ask of those not acquainted with the Kirby Harvester, is not to buy any other kind till at least, they can see our Harvester work. WELLES, BLOOD & CO.

Sewing Machine.

GROVER & BARER'S

CKLESRATED Family Sewing Machines. NEW STYLES-PRICES \$50 TO \$125 EXTRA CHARGE OF \$5 FOR HEMMERS.

F. B. CHANDLER, AGENT, MONTROSE; J. M. ROBINSON, LAKE-ST., ELMIRA.

THESE MACHINES sew from two spools THESE MACHINES sew from two spools, as purchased from the store, requiring no re-winding of thread; they Hem, Fell, Gather, and Stich in a superior style, finishing each seam by their own operation, without recourse to the hand-needle, as is required by other machines. They will do better and cheaper sewing than a seamstress, even if she works for one cent an hour, and are, unquestionably, the best Machines in the market for family sewing, on account of their simplicity, durability, case of management, and adaption to all varieties of family sewing—executing either heavy or fine work with equal facility, and without special adjustment. As evidence of the unquestioned superiority of their Machines, the Grover & Baker Sewing Machine Company beg leave to respectfully refer to the following ny beg leave to respectfully refer to the following TESTIMONIALS.

"Having had one of Grover & Baker's Machines in my family for nearly a year and a half, I take pleasure in commending it as every way reliable for the purpose for which it is designed—Family Sewing,"—Mrs. Joshua Leavitt, wife of Rev. Dr. Leavit, Editor of N. Y. Indemedent.

"I confess myself delighted with your Sewing Machine, which has been in my family for several months. It has always been ready for duty, requiring no adjustment, and is easily adapted to every variety of family sewing, by simply changing the spools of thread."—Mrs. Elizabeth Strickland, wife of Rev. Dr. Strickland, Editor of N. Y. Christian Advocate.

"After trying several good machines, 1 preferred yours, on account of its simplicity, and the perfect ease with which it is managed as well as the strength and durability of the seam. After long experience, I feel competent to speak in this manner, and to confidently recommend it for every variety of family sewing."—Mrs.E. B. Spooner, wife of the Editor of Brooklyn Star.

" I have used a Grover & Baker Machine for two years and I have found it adapted to all kinds of family sewing, from Cambric to Broadcloth. Garments have been worn without the giving away of a stitch. The Machine is easily kept in order, and easily used. —Mrs. A. B. Whipple, wife of Rev. Geo. Whipple, New York.

Your Sewing Machine has been in use in my family the past two years, and the ladies request me to give you their testimonials to its perfect adaptness, as well as labor-saving qualities in the performance of family and household sewing—Robert Boorman, New York.

For several months we have used Grover & Baker's "For several months we have used Grover & Baker's Sewing Machine, and have come to the conclusion that every lady who desires her sewing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable "iron needle-women," whose combined qualities of beauty, strength and simplicity, are invaluable.—J. W. Morris, daughter of Gen. Geo. P. Morris, Editor of the Home Journal.

Extract of a letter from Thos. R. Leavitt, an American gentleman, now resident in Sydney, New South Wales, dated January 12, 1858; "I had a tent made in Melbourne, in 1853, in which there were over three thousand yards of sewing done with one of Grover & Baker's Machines, and a single seam of that has outstood all the double seams sewed by sailors with a needle and twine."

"If Homer could be called up from his murky hades, he would sing the advent of Grover & Baker as a more benignant miracle of art than was ever Vulcan's smithy. He would denounce midnight shirt-making as "the direful spring of woes unnumbered."—Prof. North. " I take pleasure in saying, that the Grover & Baker

Sewing Machines have more than sustained myexpectation.

After trying and returning others, I have three of them in operation in my different places, and, after four year's trial, have no fault to find.—J. H. Hammond, Senator of "My wife has had one of Grover & Baker's Sewing Machines for some time, and I am satisfied it is one of the best labor-saving-machines that has been invented.

take much pleasure in recommending it to the public. J. G. Harris, Governor of Tennessee. "It is a beautiful thing, and puts everybody into an excitement of good humor. Were I a Catholic. I should insist upon Saints Grover & Baker having an eternal holiday in commemoration of their good deeds for humanity."—Cassias M. Clay.

"I think it by far the best patent in use. This Machine can be adapted from the finest cambric to the heaviest cassimere. It sews stronger, faster, and more beautifully than one can imagine. If mine could not be replaced, money could not buy it."—Mrs. J. G. Brown, Nashville, Tenn.

"It is speedy, very neat, and durable in its work; is easily understood and kept in repair. I earnestly recommend this Machine to all my acquaintances, and others."—Mrs. M. A. Forrest, Memphis, Tenn. "We find this Machine to work to our satisfaction, and

with pleasure recommend it to the public, as we believe the Grover & Baker to be the best Sewing Machine in use."—Deany Brothers, Allison, Tenn. "If used expressly for family purposes with ordinary care, I will wager they will last one "three score years and ten." and never get out of fix."—John Erskine, Nash-

"I have had your Machine for several weeks, and am perfectly satisfied that the work it does

ost beautiful that was ever made."-Maggie Aimison,

"I use my Machine upon coats, dressmaking, and fine linen stitching, and the work is admirable—far better than the best hand-sewing, or any other machine I have ever seen."—Lucy B. Thompson, Nashville, Tenn.

"I find the work the strongest and most be autiful I have ever seen, made either by hand or machine, and regard the Grover & Baker Machine as one of the greatest blessings to our sex."—Mrs. Taylor, Nashville, Tenn.

"I have one of Grover & Baker's Sewing Machines in use in my family, and find it invaluable. I can confidently recommend it to all persons in want of a machine."—G. T. Thompson, Nashville, Tenn.

"I take pleasure in certifying to the utility of the Grover & Baker Sewing Machines. I have used one on almost every description of work for months, and I find it much stronger and better in every respect than work done by hand."—Mrs. D.W. Wheeler, Nashville, Tenn.

"I would be unwilling to dispose of my Grover & Baker Machine for a large amount, could I not replace it again at pleasure."—Mrs. H. G. Scovel, Nashville, Tenn.

"Our two Machines, purchased from you, do the work of twenty young ladies. We with pleasure recommend the Grover & Baker Sewing Machine to be the best in use."—N. Stillman & Co., Memphis, Tenn.

"The Grover & Baker Sewing Machine works admirably. I think the stitch and work far superior to that of any Sewing Machine I ever saw. On fine work, I think the Machine would be hard to be beat."—W. J. Davie, Memphis, T nn. "I find the Machine easily managed, very durable, and take pleasure in recommending it to all who wish convenience, economy and pleasure."—Mrs. F. Titus, Mem-

phis. Tenn. "The Grover & Baker Sewing Machines have given such satisfaction that we cheerfully recommend them to all who wish a good and substantial Sewing Machine. It executes work with much care and speed, and more finely than any other machine I have seen."—Mrs. R.B. Mitchell, Marnelle, T. el, Memphis, Tenn.

"I am happy to give my testimony in favor of Grover& Baker's Sewing Machine, and of the perfect satisfaction it gives in every respect. It sews neatly, and is by no means complicated, and I prefer it to all others I have seen."— Mrs. Bryan, wife of Rev. A. M. Bryan, Memphis,

"It affords me much pleasure to say that the Machine works well; and I do not hesitate to recommend it as possessing all the advantages you claim for it. My wife is much pleased with it, and we take pleasure to certify to this effect."—R. C. Brinkley, Memphis, Tenn. "It gives me pleasure to find the Grover & Baker Sew

ing Machine giving so much satisfaction. I have it in constant use, and find it all that could be desired. It is the most simple and durable machine in use, and I heartily recommend it."—F. M. White, Memphia, Tenn. "Having seen, examined, and used many other kinds of Sewing Machines, I feel free to say that the Grover & Baker Machines are far superior to all others in use."—
M. Francois Seltz, Memphis, Tenn.

"I consider my machine invaluable, and would not

take five times its costs, if I could not supply its place. With it I can do all my family sewing in about one fourth the time I could with my hands."—M. J. Scott, Nashville, Tenn.

Raymond's Latest Improved, DOUBLE-THREADED

FAMILY SEWING MACHINE

srd. They use cotton from the ordinary spot strategy rewinding.

4th. The stitch is stronger and more difficult to rip than any other made by Machinery. The two threads are double-looped into each other, and firmly tied and knot-ted at every stitch, which is the best and most elastic 5th. They sew with cotton, linen and silk thread equal-

5th. They sew with cotton, unen and and yell y well.

6th. They finish their work. There is no occasion to fasten the thread at either end of the seam, as is required by other shuttle stitching machines.

7th. Every Machine is made to run by hand or foot power, thus combining the advantages of both methods.

All persons des rous of purchasing the best and cheapest Machine ever invented for family use, will have an opportunity after the 1st of June, by addressing or calling on the subscriber,

B. F. SHAW,

Ulster, Bradford County, Pa.

N. R. These Machines are warranted, and any person

N. B. These Machines are warranted, and any person purchasing them can return them and get their money, if after one month's trial, do they not give satisfaction.

# MYER'S MILLS.

THE undersigned having purchased the above well known mills and attached to it a Steam Engine, and also put every thing connected with it in perfect repair, with all the modern improvements now in use in first class Flouring Mills—would respectfully solicit the partronage of the community—trusting that the reputation the mill has heretofore borne may not suffer in the hands of the new firm. It shall be our aim to do all work entrusted to us promptly and in the best possible m nner. Customers from a distance may rely upon having their work done at once, so as to make but one trip "to mill."

Mr. FROST will continue to give his own personal attention to the business at the mill.

CASH paid for all kinds of GRAIN; also Flour. Meal and Feed for sale at the lowest market prices.

MYER, FROST & CO.
