THE history of the grape is almost as old as that of mangrowing in its highest perfection in Syria and Persia, its lucious fruit and the unrivalled beverage which its fermented puice affords, recommended it to the especial care of the Patriarchal tillers of the soil; and vineyards were xte sively planted, long before orchards or collections of other truit trees were at all common.

The grapes of the old world are all varieties of the wine grape, which, though so long and universally cultivated and naturalized in all the Middle and Southern portions of Europe, is not a native of that Continent, but came originally from Persia. From the latter country, as the civilization advanced westward, this plant accompanied it—first to Egypt, then to Greece and Sicily, ard gradually to Italy. Spain, France, and Britain; to which latter-country the Romans carried it about two hundred years after Christ. To America the seeds and plants of the European varieties were brought by numerous Emigrants and Colonists, within the first lifty years after its settlement.

The wild grapes of our own country, are quite distinct species from the wine grape of Europe, and are usually stronger in their prowth, with longer and more entire foliage, and in their native state with a peculiar foxy odonr or flavor, and more orless hardness of pulp; these traits, however, disappear in process of cultivation; and we have already obtained from the wild type, new varieties of high quality, and of superior bardiness and productiveness in this, our Northern climate.

The universal experience in all countries, has established the fact that dry, warm soil is the very best for the vine. All in this latitude may raise the grape successfully by setting the vine in a favorable exposure to the sun. The late varieties that I offer for sale, are all earlier than the Isabella but one, and that ripens full as soon as the Isabella There is no fruit grown, in my opinion, in this world, more beautiful, delicious, or asseful than the grape. If a man is not too lazy, he may have round him all the varieties of grapes in a high state of cultivation, and his garden adorned with all the beautiful and social productions of this fair world of ours, and a mind that has any strr in it at all, by little enquiry and practice, may learn to cultivate anything that grows.

I consider the following variety of grapes the very best to cultivate for out door culture in our northern climate, out of the vast variety.

The Bubscriber would announce to the public that he has now on land, and will make to order all linds of CABINET PURNITURE, such as Sofias, Divans, Lounges, Centre, Card, Dining and Breakfast Table. Mahogany, Walnut, Maple and Cherry Bureaus, Stands of various kinds, Chairs and Bedsteads of every out of the vast variety.

#### BURGUNDY.

This excellent hardy grape, is the true Burgundy grape so highly valued for wine in France. The fruit is very sweet and excellent, and the hardiness of the vine renders it one of the best varieties in the open air in this climate. Bunch small, compact, (i.e. barries closely set.) Berries midle-sized, roundish-oval, black, juice sweet, good, ripens about 20th of Sept. Thompson gives more than forty synonymes to this grape.

PRICE SEVENTY-FIVE CENTS.

#### CATAWBA.

This excellent native grape, was first introduced to notice by Maj. ADLUM, of Georgetown, D. C., and was found by him in Maryland. It probably has its name from the Catawba river, it is one of the most productive and excellent of our native sorts. There is is no grape in some portions of the United States, so good for wine or table use. Beautiful bunches, paie red, rich musky flavor, and very sweet when ripe.

# PRICE, TWENTY-FIVE CENTS.

CLINTON. Origin uncertain, said to have originated in Western New York, growth vigorous, hardy, and productive, bunches compact, berries round, rather below medium size, black, covered with a thick bloom, eatable eight or ten days before Isabella, frosts make them very good. PRICE, TWENTY-FIVE CENTS.

#### CONCORD.

This exceeding fine, hardy native grape, was raised from seed by E. W. Bell, Concord, Mass. It is very healthy, vigorous habit, and very productive, bunch rather compact, large shouldered, almost black, covered with bloom, very sweet, it is more hardy than the Isabelia, and ripens about ten days earlier. Consequently it is very valuable for a large Northern range.

In the HARDWARE line, Brass, Brittania, Jappane and Plain Tin Ware, single or in setts, Bar, Band, Scroen Hardward and Spades.

#### PRICE, ONE DOLLAR. DELAWARE.

The precise origin of this is not known, we have the following account of it from A. Thomson, of Delaware, Ohio. It was brought to Pelaware by a German, its excellence attracted his attention, and an inquiry as to its history. It was brought from New Jersey some eighteen or twenty years ago, having been obtained from the garden of a French gentlemen, PAUL H. Provosr, in Kingswood twp., Hunterdon Co., N. J. It was known in that vicinity as the Italian Grape, sent from Italy, bunch small, a beautiful light red, or flesh color, exceedingly sweet, one of the most delicions, hardy grapes. It is a vigorous grower, an early and profuse bearer, and probably more hardy than the Isabella, it ripens two or three weeks before the Isabella. No grape more desirable for our climate.

This very popular grape, a native of South Carolina.

was brought to the North and introduced to the notice of
cultivators about the year 1818. Mrs. Isabella Gibbs,
the wife of Gronge Gibbs, Esq., in honor of whom it
was named. Its great vigor, hardiness, and productiveness, with the least possible care, have caused it to be
most widely disseminated. It is probably more hardy, and
ripens carlier than the Catawba, which renders it most
valuable at the North. It is so well known it is hardly
worth while to describe the beautiful fruit it bears.

PRICE TWENTY, FIVE CENTS.

#### PRICE TWENTY-FIVE CENTS. EARLY NORTHERN MUSCANDINE.

This grape ripens the last of Sept., is perfectly hardy. The variety is a scedling from the native white grape raised by Phillemon Stevens, Shaker Village, New Lebanon, Columbia Co., N. Y. Bunch fine and large, light amber color, and very delicious, very highly spoken of, and very hardy and productive.

# PRICE ONE DOLLAR.

REBECCA. A new variety, bunches four inches long, and two and a half inches in diamater, very compact, color light green in the shade, or golden in the sun, and covered with a light bloom, sweet and delicious, ripens ten days earlier than the Isabella, keeping a long time after it is gathered. This superior white grape is undoubtedly a mative—chance seedling in the garden of E. M. PEAKE, of Hudchance seeding in the garden of E. M. Peaks, of Hud-son, N. Y., proved perfectly hardy and productive. It is not so vigorous in its habits as the Isabella or Catawba; but hardy and healthy, and being exceedingly beautiful, as well as excellent, it must be regarded as a very great acquisition, it is so well adapted to the North.

# PRICE, TWO DOLLARS.

UNION VILLAGE. This very attractive grape originated among the Shakers at Union Village, Ohio, and was introduced by Mr. Longworth, of Cincinnati. It is undoubtedly a seeding of Isabella, is very vigorous in growth, and its fruit often nearly equals the size of the Black Hamburg. It ripens about the time of Isabella.

PRICE, ONE DOLLAR. The following tender variety of grape vines are all raised under glass with one exception, the Chasselas. I have succeeded admirably in out door culture with the vine. Black Hamburg, Ried Muscat White Syrian, Golden Hamburg, Bishop, White Frontignan, Black Prince, Elk. Damask, Golden Chasselas, may be found at my garden

well rooted.

The Isabelia, Catawba and Clinton, by the 100 or 1000 all well rooted, to any that wish to set vineyards at exceeding low rates. I warrant all true to name, any mistake or errors shall be made good. I do not want something for nothing. A legal thirf is the most despicable. I wish to advertise a simple fact only—no puffing in papers is wanted. By my own merit I stand or fall, earthly tribunals cannot keep me up or down.

The above grape vines can be had at the garden of HARRY MIV.

Mr. John A. Gamen being equally interested, will travel throughout the county and adjoining counties, and will give instructions about culture, &c., and be able to show drawings of some of the new varieties of grapes which are in great demand and very scarce.

Jersey. An old estate consisting of several thousands of
acres of productive soil has been divided into Farms of
various sizes to suit the purchaser. A population of some
Fifteen Hundred, from various parts of the middle States
and New England have settled there the past year, improved their places, and raised excellent crops. The
price of the land is at the low sum of from \$15 to \$20
per acre, the soil is of the best quality for the production
of Wheat, Clover, Corn, Peaches, Grapes and Vegetabless. It is considered the best fruit soil in the Union.—
The place is perfectly secure from frosts—the destructive
enemy of the farmer. Crops of grain, grass and fruit are
now growing and can be seen. By examining the place
itself, a correct judgment can be formed of the productiveness of the land. The terms are made easy to secure
the rapid improvement. The result has been, that within the
past year, some three hundred houses have been erected,
two mills, one steam, four stores, some forty vinyard and
Peach orchards, planted, and a large number of other
improvements, making it a desirable and active place of
business.

In locating here, the settler has many advantages. He s within a few hours ride of the great cities of New Engand and Middle States, he is near his old friends and asociations, he is in a settled country where every improvement of comfort and civilization is at hand. He can buy your article he wants at the chapter two gold sell his ment of comfort and civilization is at hand. He can buy every article he wants at the cheapest price, and sell his produce for the highest, (in the West this is reversed,) he has schools for his children, divine service, and will enjoy an open winter, and delightful climate, where fevers are utterly unknown. The result of the change upon those from the north, has generally been to restore them to an excellent state of health.

In the way of building and improving, lumber can be obtained at the mills at the rate of \$10 or \$15 per thou sand. The reader will at once be struck with the advantages here presented, and ask himself why the property has not been taken up before. The reason is, it was never thrown in the market; and unless these statements were correct, no one would be invited to examine the land before purchasing. This all are expected to do. They will see the land under cultivation, such is the extent of the settlement that they will no doubt, meet persons, from their own neighborhood; they will witness the improvements and can judge the character of the population. TIOGA POINT IMP'VED RAILWAY HORSE POWERS.

W E are manufacturing the above unrivalled Powen for One and Two Horses, under Emory's Patent which are warranted greatly superior to the c Rack and Pinion Power. Our Horse Power is un-Rack and Pinion Power. Our Horse Power is unequalled for convenience by any other;—being adapted to a great variety of uses where power is needed; for the reason that it is double geared; and that both ends of the main and counter shafts have couplings all alike, permitting the converge gear wheel, pinion and hand-wheel to be shipped from shaft to shaft and from side to side of the Power at pleasure; by which arrangement five different degrees of motion are obtained without extra gearing; and also, any desirable length and velocity of crank motion for cross cut sawing, pumping and churning. These Powers run easily, are strong, well finished and make from good materials.

These are made of various sizes. They are superior those of any other manufacture, of which fact any person well acquainted with the heretofore leading machines, will be satisfied upon examination. Our FANNING MILLS, which are the very best in market, are fitted for power to be run in connection with the Tresher and Separator.
