mechanical condition. The roots of plants require air and water. If the surface become crusted, evaporation is obstructed, the moisture from the deeper layer of the soil does not rise freely, and the air and dews can not readily enter from above. The organic matter decomposes but slowly under such circumstances, the plants are stinted for nourishment, and their growth is checked. Hoeing by hand or by horse power, is the remedy for weeds and for a hide-bound soil. There may also yet be vacant spots to replant with corn, or to fill with other seasonable crops. He who has a mind to work, will now find enough to employ

Barley usually succeeds best sown early, but may still be put in. It prefers a gravely soil, which should be deeply worked, and free from weeds. It may well follow a hoed crop. Sow from two and a half to three bushels per acre, and harrow in thoroughly.

Barns and Sheds-See that they are in order before the busy having season comes on .-Arrange the bay-way platforms to keep the hay from the ground and allow ventilation. If hay has spoiled, remove it to the manure heap. Examine grain bins, wool closets, and cattle stalls for vermin, and cleanse if necessary.

Beans—Plant where corn has failed, if seed

of King Philip or other early variety of corn can not be obtained.

Bees-Be cautious in adopting "patent' hives; many of these traps puzzle the bees It will be time enough to procure Italian bees when they have been thoroughly tried by those who can afford to experiment with them. It is possible to be stung by handling them too freely while held at the present

Beets-Sow Mangel Wurzel and Sugar var-

Boys will be ambitious to do men's work. Do not allow them to exceed their strength. Give them good tools, allow them frequent rests, and remember "All work and no play, makes Jack a dull boy." Make farm life attractive if you would have them remain in the business.

Buckwheat yields a quick return, and is an available crop for lands too wet for Spring plowing. It may also replace corn destroyed by worms or other casualties. It may be sown but the first or second week of July is prefer able in this latitude, as it then has the cooler weather of September for filling. Make the soil fine and mellow, and use half a bushel to three pecks of seed per acre.

Butter .- This is one of the very best dairying months, both for quantity and quality. he new growth of grass is plentiful and tender, and the cows if well cared for, have come up to full condition. Observe scrupulous cleanliness in every department. Keep the milk and cream at a temperature of from 62 degrees to 65 degrees Fahrenheit. Let all butter be well worked. See that the cows are milked rapidly, and perfectly dry. Let butter for market be put up neatly, and plainly marked Towanda Marble Factory. with the owner's name.

Cabbages—Cultivate among the rows frequently—they can scarcely be hoed too much. Plant out for late crops. They may be set between the rows of early potatoes which are to come, the first of July. Good after culture will bring them forward in season, and thus two crops will be secured. Use plenty of stable manure, but none from the pig pen.— Sprinkle the plants with airslacked lime or thed ashes, to prevent green lice (aphides) and other vermin

Carrots may still be sown, for Winter use -they will pay as food for cattle or horses .-Hoe and thin early, leaving them six inches distant in the row. Some extensive cultivaters in carrots between the rows of onions, after the second or third hoeing of the latter. If this be done, leave every third space vacant to give room for curing the onions when pull-

Corn-King Philip or other quickly maturing varieties may be planted, to replace failures or otherwise. Manuring in the hill will give it a rapid start. Thorough culture should be given to the growing crops this month, to subdue grass and weeds before the corn roots have extended far from the bill, when later lowing and hoeing would injure them. Leave e surface nearly level. Allow not more than four stalks to a hill-many successful growers leave but three. If the pasture ground is limited, put in a good quantity of corn broadcast or in drills, for feeding gree.

Fences-An occasional survey of all on the premises is necessary for the safety of the growing crops.

Grain Fields-Cockle, thistles and other weeds may now be seen plainly .- Pass through the fields after rain while the ground is soft, and root them out. This should be done es pecially in the best parts of the field, from which seed for nature sowing is to be selected. Winter grain will be ready for the reaper in some localities. Cut it before fully ripe-when the berry is advanced enough to bear moderate pressure of the thumb nail without breaking, or just after it leaves the "milk" stage. The weight will be greater, and the flour better than from grain ripe enough to shell.

Haying should commence as soon as the seed begins to form on grass, or clover, that is just as the bloom passes away. After this, part of the nourishing matters of the stalk change to woody fiber. Hay, especially clover, cared without much exposure to the sun, will be sweeter. Put it up in narrow Cocks, and provide hay caps for protection from rain. A farmer having much meadow, who has no mowing machine, is behind the times. The horse pitchfork will also expedite the work.

Hoeing will be the main work of the month on many farms, as already noted. Use horse power where the ground will admit of it.

Manures-Roadside weeds, and sods from waste corners will add much to the manure cap, if properly prepared. Keep a supply in the pig pen, and also in the cow yard. They will absorb and save the liquid excrements, and wash the droppings. If an animal die, turn it to account, by covering with a mound of nuck or loam.

Millet-Sow, if not previously. It will afford a supply of green fodder, or add to the of Winter feed.

Turnips do better sown next month.

THE FRIEND OF WOMAN.

E. Clark's Revolving Looper DOUBLE THREADED

FAMILY SEWING MACHINE The Revolving Looper is a late improvement on Ray-mond's Latest Improved.)

Warranted the best in the world for Family Use!

Price Within the Reach of Every Family. PRICE \$35. Hemmer, Feller, Binder & Tucking guage, combined, \$5

THE reputation of this Machine is now fully established as the most reliable Machine in the market for family use, and has been attested too by thousands of the most respectable families in the Union.

This Machine makes the celebrated "Double Lock Stitch," the only one made by machinery that meets all the requirements of Family Sewing. Each stitch is tied twice, so that every one is securely fastened and wholly independent of all the other stitches for strength, so that if the sew is cut or every fourth stitch broken, the sewtwice, so that every one is securely fastened and wholly independent of all the other stitches for strength, so that if the seam is cut or every fourth stitch broken, the sewing must hold good while the fabric will wear. The machinery which makes this stitch is a marvel of simplicity, requiring no mechanical skill to manage it, nor does it require adjustment more than the mere change of thread and needles to adopt it to the character of the work to be sewed—coarse or fine as the case may be. It will sew gauze laces, and all varieties and kinds of fabrics between and including heavy beaver cloth, without changing either needles or thread equally well, and return to either variety of work with perfect satisfaction. No other Machine ever offered to the public will do as much.

A perfect Sewing Machine, one making a stitch answering all the requirements of the family, sewing coarse and fine work equally well, was the great desideratum of the home circle, previous to the invention of EDWIN CLARK'S REVOLVING LOOPER. The stitch is beautiful, trong, and elastic, and will not rip in wear or in accidental breaking a thread.

Every Machine is warranted to give satisfaction or the proper refunded.

dental breaking a thread.

Every Machine is warranted to give satisfaction or the money refunded.

He flatters himself that from his long experience in business he will be able to please all who may favor him with their custom. Owing to the low pressure in the money market, he will make Coats from \$2.50 to \$4.50 each and other work in proportion for READY PAY.

Country Produce in payment, will not be refused, if flered

Towanda, March 20, 1858.

The Argus Book bindery Again in Full Operation!

WE have the gratification of announcing to our friends, customers, and the public, that we are now prepared to do

BOOK BINDING,

in all its Branches in the latest and most approved styles, and on the most favorable terms.

Having secured, permanently, the services of Mr. H. C. WHITEKAR, a finished workman from Philadelphia, and having added extensively to the fixtures of the concern—giving greater facility than formerly—we can present to the public the most positive assurance of our ability to please our patrons.

sent to the public the most positive assurance of our ability to please our patrons.

Customers should be particular to remember that the "Argus Bindery," is in the Argus Building, as formerly, (first building north of the Ward House) and is connected with our Book and Stationery Store and Printing Office, where all work should be delivered.

CAUTION.—We are compelled in justice to ourselves, and our old customers, as well as to prevent an imposition upon the public generally, to caution them against a sort a concern, that falsely holds out to the public that it is the Argus Bindery. This fraud is practiced no doubt, with a hope of deluding the Public. Against this bold and deliberate attempt to deceive, they are hereby cautioned.

Particular attention paid to re-Binding. All work guarranted.
Country Produce of all kinds taken in payment for work.

** Having made complete arrangements, we are prepared to Rule and Bind BLANK BOOKS to any style or pattern, at prices as low as elsewhere.
4 Sowanda, March 5, 1860. E. A. PARSONS.

BOOK BINDERY.

THE subscriber having withdrawn from the Argus building would respectfully inform the public that he has removed his Plain and Fancy Bindery to the North Room of the Wa:d House, formerly occupied by the Post Office, where he is now prepared to bind all kinds of Books in the most approved and workmanlike manner.—Having to share my profits with no second person I flatter myseli that my prices will meet the satisfaction of the public.

"To be, or not to be— hat is the question! Whether 'tis nobler in the mind to suffer The slings and arrows of outrageous opposition, Or by taking up arms against a sea of printing ink,

The sings and arrows of outrageous opposition,
or by taking up arms against a sea of printing ink,
And opposing, end them."

THE proprietor of the Argus takes occasion in advertising his Bindery to indulge in an uncalled for fling about a "sort of a concern," which is hoping "to delude the public." As I have opened a Bindery on my own account, the inference is that if the public bring their binding to me, they are in no danger of being defrauded. For two years I have worked for Mr. PARSONS, and he has taken great pains t satisfy the public I was the "best Binder in America," as the columns of the Argus will testify. Has he been all that time "deluding the public?" If I have been engaged in a fraud, he has been the principal. But I refer to my work during that time as evidence that there has been no fraud practiced.
Having served a long apprenticeship at the Bindery bisiness, I have resumed business here on my own account, as I know of nothing which prevents me from following a legitimate and bawful calling for my support.—
I shall endeavor by good work and attention to my business to give public satisfaction.

March 15.

Classical, 2d and 3d year, per term.
Classical 2d and 3d year, per term. oranch they respectively pursue.
Pupils using scholarships are charged \$1 per term for uel and contingents.

EXTRA EXPENSES:

Drawing. Board in the Institute, per week, including fuel Washing, per dozen. 38

The Collegiate year is divided into three terms of 14
weeks each. The Anniversary exercises will be held at

the close of the Spring term.

No deduction will be made for absence, except in case No deduction will be made for absence, except in case of protracted illness of over two weeks.

Instrumental Music will not, as heretofore, be taught in the Institution, but by special arrangement—a class will be taught in a hall adjoining the grounds of the Institute, by the Teacher of Vocal Music.

This arrangement has been adopted for the past term, and experience has proved it to be eminently superior to the plan pursued in former years. Special pains will be taken to secure the greatest progress of those wishing to take lessons in this branch. Terms will be as heretofore:

Tuition on Piano Forte, per term.

Tuition on Piano Forte, per term..... \$10 00

should board in the Institution, as better opportunities for advancement in study are thereby secured.

Normal Department—Special exercises are arranged without extra charge for those preparing themselves as Teachers of Common Schools. Prof. C.B. COBURN, the able and well known Superintendent of Common Schools in the county, has kindly consented to organize the Teacher's class, and direct the course to be pursued.

He will also be present to conduct its exercises as often as practicable, and will deliver frequent lectures on the Theory and Practice of Teaching, as also on other subjects connected with Normal training.

Those persons, therefore, intending to engage in teaching for the winter, will find it greatly to their advantage to be present during the Fall term.

Prof. Coburn's connection with the institution is not such as to in any way interfere with the discharge of the regular duties of his office.

No pains will be spared, on the part of the Faculty and Trustees in sustaining the high repulatation the institution has hitherto enjoyed, and in rendering it more worthy of future patronage and support.

WILLIAM H. DEAN, Principals.
