KYANIZING .- If shingles before being put on are soaked in a solution of one pound blue vitriol, or an equal amount of chloride of zinc, (and in fact several other metallic salts will answer,) in four or five gallons of water, moss will not grow upon them, nor will they rot .-How long they will last no body knows, but we can safely presume they will not last forever, though we have heard say they will.

Painting shingle roofs is of little or no use, anless they are painted when they are put on, fuel and contingents. and each course painted over and the whole

upper surface; this is very effective.

Liming roofs is recommended as nearly, or quite equal to this and applicable to old roofs. Slacked lime should be sprinkled on thickly over the whole roof, on rainy days after the roof is soaked. Sprinkle more at the ridge than at the eaves, but evenly over all. A writer in the Rural Intelligencer gives his experience thus:

"Put it on considerably thick, so as to make the roof look white, and you never will be troubled with moss; and if the shingles are covered ever so thick with moss, by putting the lime on twice, it will take all the moss off, and leave the roof white and clean, and will look almost as well as if it had been painted. It ought to be done once a year, and in my opinion, the shingles will last almost twice as long as they will to let the roof all grow over to moss. I tried it on the back side of my house, ten years ago, when the shingles were all covered with moss, and they appeared to be nearly rotten. I gave the roof a heavy coat of lime, and have followed it nearly every year since then, and the roof is better now than it was then; and, to all appearance, if I follow this course, it will last ten or fifteen years longer. The shingles have been on the roof over thirty years. There is no more risk | about sparks catching on the roof than on a newly shingled roof. Those that do not have lime near by, can use good strong wood ashes, and these will answer a very good purpose to the same end."-Homestead.

AFTERWARDS .- Of all methods of using muck, which we have tried, we are best pleased with it as an article of bedding for cattle .-This, we think the best and most rapid way of manufacturing it into manure. In addition to the liquid manure and a portion of the solid which it receives, it has the heat of the animal while lying down, and this, with well fed cattle is a large part of the time. It has all the qualities of a good bed, dryness, softness, cleanliness, until it becomes saturated with urine, when it is time to throw it out, and put in a new charge. An allowance of a half cord to the animal, will become saturated in about two weeks, if the stall be occupied all

A correspondent asks if the muck should be taken from the stable to the compost heap, or to the field, for plowing in? Either is a safe practice. We are governed entirely by circumstances, in the disposition of the muck after it leaves the stable. In the Spring, during the planting season, we fork it over, make it as fine as possible, and plow it in. Nothing is lost by this method. It not wanted for immediate use, we remove it with the solid droppings of the cattle to the compost heap, where we mix it with two or three times its bulk of muck or peat. It undergoes fermentation, and becomes a more valuable manure, we have no doubt, than that taken directly from the stables. The ammonia is more equally distributed through the mass, there is more of it, and it is in a much finer condition. But the labor of handling is considerable. Which ever course is pursued, we always think money is made about as fast as a farmer can expect. when he is handling muck. We are confident the man who follows it up ten years, will come to the same conclusion.

THE NEW ENGLAND CATTLE DISEASE .- The cattle disease which created so much alarm and anxiety in portions of Masschusetts the latter part of last winter appears to have entirely disappeared even in the infected districts. The Boston Traveler says that when the disease ceased its ravages early in summer. many predicted that it would reappear in Au gust and September, with the coming cold nights and cold rains. This was predicted with the more confidence as that has been the experience with the disease in Holland. But August and September have come and gone, and we are now in the last days of October, but the fearful anxiety of the cattle raisers of the State, not one case of the disease has come to light-not one symptom has been discovered. The opinion begins to prevail either that there was an unnecessary alarm upon the subject or that by the thorough manner in which the Commissioners acted, the disease has been exterminated, cut up, root and branch. It is yet to early to be fully assured upon this point but certainly there is reason to hope that the dreaded calamity has been avoided.

TEACHING PIGS TO EAT SLOW -A correspondent of the New-England Farmer says : Pigs should be early taught to eat slowly, for the advantage of the pig, as well as of the owner. Nothing is easier. Give the weaned pig, at 6 to 8 weeks old-in a clean trough-half a tea cop of dry shorts or bran, and after his dry food is all eaten, give his drink, and increase the dry food according to the age and appetite, till three months old; then add one half Indian meal for two months, and then dry Indian meal, till fattened sufficiently. This plan has been followed for five years with decided success.

To GET RID OF RED ANTS IN CLOSETS .-Throw some twigs of tomato vines on the shelves; or let the shelves be made of black walnut. Either will drive them away-so at least say writers in the Country Gentleman.

FROSTING FOR CAKE. Beat to a froth the white of one egg, add ten heaping teaspoonsful of pulverized white sugar. This will do for one loaf baked in a two quart basin.

Miscellaneous.

TOWANDA, BRADFORD CO., PA.

FACULTY:
OLIVER S. DEAN, A.B. Principal Professor of Ancient Languages, and Mental and Moral Sciences.
WM. H. DEAN, A. B. Associate Principal, Professor of Mathematics and Natural Science.
Prof. CHARLES R. COBURN. County Superintendent, General Director of Normal Department.

Mrs. OLIVER S. DEAN, Preceptress.
Miss ANNA M. DEAN, Assistant Preceptress.
Miss MARIETTA G. DICKINSON, Teacher of Vocal and Instrumental Music.
WM. H. DEAN, Librarian.
Mr. D. CANFIELD DAYTON, Stewarl.
Mrs. D. C. DAYTON, Matron.

Mrs. D. C. DAYTON, Matron.

The Fall Term commences WEDNESDAY, AU-GUST 22, and will continue 14 weeks.

TUITION, PER TERM :

Mashing, per dozen.

The Collegiate year is divided into three terms of 14 weeks each. The Anniversary exercises will be held at the close of the Spring term.

No deduction will be made for absence, except in case of protracted illness of over two weeks.

Instrumental Music will not, as heretofore, be taught in the Institution, but by special arrangement—a class will be taught in a half adjoining the grounds of the Institute by the Teacher of Vocal Music.

This arrangement has been adopted for the past term, and experience has proved it to be eminently superior to the plan pursued in former years. Special pairs will be taken to secure the greatest progress of those wishing to take lessons in this branch. Terms will be as heretofore:
Tuition on Piano Forte, per term \$10 00 Use of instrument on which to take lessons. 50 do for practice. 200
Pupils boarding in the Hall will furnish their own towels, Ac., and the table silver a their option. It is desirable that they also furnish their own bed and bedding when it is convenient, but when otherwise, these will be tranished at a slight charge.

It is strongly recommended that students from abroad should board in the Institution, as better opportunities for advancement in study are thereby secured.

Normal Department—Special exercises are arranged without extra charge for those preparing themselves as the strongly recommended without extra charge for those preparing themselves as the collection of the co

for advancement in study are thereby secured.

Normal Department—Special exercises are arranged without extra charge for those preparing themselves as Teachers of Common Schools. Prof. C.R. COBURN, the able and well known Superintendent of Common Schools in the county, has kindly consented to organize the Teacher's class, and direct the course to be pursued. He will also be present'to conduct its exercises as often as practicable, and will deliver frequent lectures on the Theory and Practice of Teaching, as also on other subjects connected with Normal training.

Those persons, therefore, intending to engage in teaching for the winter, will find it greatly to their advantage to be present during the Fall term.

Prof. Coburn's connection with the institution is not such as to in any way interfere with the discharge of the regular duties of his office.

No palus will be spared, on the part of the Faculty and

TREATMENT OF MUCK IN THE STABLE AND AFTERWARDS.—Of all methods of using muck, thich we have tried we are best pleased.

The same end."—Homestead.

Trustees in sustaining the high repulatation the institution has hitherto enjoyed, and in rendering it more worthy of future patronage and support WILLIAM H. DEAN. Principals.

BOOK BINDERY.

The subscriber having withdrawn from the Argust building would respectfully inform the public that he has removed his Plain and Fancy Bindery to the North Room of the Ward House, formerly occupied by the Post Office, where he is now prepared to bind all kinds of Books in the most approved and workmanlike manner.—
Having to share my profits with no second person I flatter mysel, that my prices will meet the satisfaction of the public.

CCTTING done as usual and warrended to fit, il preperty made up. No charges for Cutting when the goods are instanced to fit, in property made up.

Thankful for the confidence reposed in me and the pubappreciation of my work, for the last two years, 1 all endeavor in the future to merit the continuance of To Merchants and Dealers in Freight.

Particular attention given to re-binding Books. All work will be warranted. Terms, Cash.

***Also, a large assortment of STATIONERY of the best quality, at the lowest prices. Justices' and Constable's BLANKS, of all kinds.

PICTURE FRAMES, round, square and oval; and pictures framed to order, cheaper than ever known here.

JOHANN F. BENDER,
Towanda, Jan. 11, 1869. Bookbinder and Artist.

CAUTION.

"To be, or not to be— hat is the question! Whether 'tis nobler in the mind to suffer The slings and arrows of outrageous opposition Or by taking up arms against a sea of printing ink, And opposing, end them."

THE proprietor of the Argus takes o casion in advertising his Bindery to indulge in an uncalled for fling about a "sort of a concern," which is hoping "to delude the public." As I have opened a Bindery on my own account, the inference is that if the public bring their binding to me, they are in no danger of being defrauded. For two years I have worked for Mr. Parsons, and he be taken great pairs to skell the public bring their binding to me, they are in no danger of being defrauded.

For two years I have worked for Mr. Parsons, and he has taken great pains is sitisfy the public I was the "best Binder in America," as the columns of the Argus will testify. Has he been all that time "deluding the public?" If I have been engaged in a fraud, he has been the principal. But I refer to my work during that time as evidence that there has been no fraud practiced. Having served a long apprenticeship at the Bindery business, I have resumed business here on my own account, as I know of nothing which prevents me from following a legitimate and bawful calling for my support.—I shall endeavor by good work and attention to my business to give public satisfaction.

March 15. JOHANN F. BENDER. Binder.
