VIRGINIA VERSUS SLAVERY .- There is nothing like figures. The all instructive census speaks like a prophet out of the "old dominion."

There are one hundred and forty eight counties in Virginia. These contain 1,047,576 white inhabitants, and 481,456 slaves. Fortyeight counties-rather less than one third of at Boston. He is making preparations for his departure the whole-lie westward of the Blue Ridge which traverses the state from northeast to south west. They are, of course, adjacent to Pennsylvania, Ohio and Kentucky. They contain 5.000 slaves - one third of the counties, and one hundredth part of the slaves. Not only does this extraordinary relative disproportion exist, but a majority of the western ber of slaves since the previous census-in the aggregated 1,115. During the same period, the white population of these thirtyeight couties has increased 79,812 souls. One alone-Ohio county-has gained 4,584 white inhabitants; being within a fraction of the whole number of slaves in the thirty-eight. The total gain in whites of the 148 counties of the state is 152,779 in ten years. Of this number, therefore, 79,812, or over fifty per cent, has occured in one third of the counties, the forty-eight west of the Alleganies .- N. Y.

WARLIKE RUMORS .- The New York Herald's Wasnington correspondent, of Saturday, says; Governor Curtin, of Pennsylvania, besides being closeted with the President an hour, has had an interview to-day with Secretary Cameron and General Scott, and at eleven o'clock to-night had a private interview with one of General Scott's confidential officers. What is up? There is no doubt that Pennsylvania will be put upon a war footing immediately.

Massachusetts has six thousand six hundred and seventy men, all equipped and ready to march at twelve hours' notice. Among them are two flying artillery batteries, almost as expert in drill as the best regulars, and several dragoon and cavalry corps, not surpassed in efficiency by any in the volunteer militia in the United States. The infantry corps are well drilled.

New York is pledged to furnish ten thousand men at forty-eight hours' notice, and other States in proportion. Illinois and other Western States are begging to be called into the Senate on Friday-killed very dead. The vote stood:

TOWANDA:

Thursday Morning, April 11, 1861. THE GOVERNMENTAL POLICY. The Administration has at last given evidence of its vitality. From absence of action and lack of a declared policy on the part of those in power the people had begun to fear that the Administration had sat down in apathy under its troubles, and left to the decision of past few days give a different coloring to the picture, and display action-prompt and energetic, though which reference to what particular policy we are yet in the dark. The movements of the Army and Navy Departments within the past few days have given rise to considerable excitement and give evidence that the Administration has in view important plans touching the military posts and revenue stations in the seceded states. The U.S. steam frigate Powhattan has been full equipped for sea within three days, and takes out an immense supply of the implements of war, with transports for five handred men, and a full complement of officers. The Steamship Atlantic has been chartered by the Government, and extraordinary diligence has been used night and day in -Carl Schurz is appointed Minister to getting her ready for sea-accommodations having been prepared for over six hundred troops; besides the large steamer Illinois has been taken and fitted up for the same service. Their destination is only known to the Government-all the vessels sailing under sealed orders. Whatever may be the course of ac tion decided upon it is a consolation to know that something is to be done, and that we are not to go on in inaction while the rebels are strengthening their positions and increasing their forces day by day. A decided policy is greatly to be desired as a standard around which the people can rally, and we doubt not that one has been fixed upon-a wise one we must concede it to be as the result of a long and careful deliberation, to which the people can give their aid to carrying into effect .--There need be no bloodshed if the rebels will it, but should they choose the other alternative, upon their own heads rest the responsibility. The question to be decided is not one of party, but one upon which the patriotic citizens of all party organizations can rally. It is simply whether the Constitution of the United raid. States creates a Government or not; - whether the people of the United States are under the dominion of law, or whether they can throw off its obligations and repudiate its solemn sanctions at their own free will ;--whether we

IMPORTANT INTELLIGENCE.

A dispatch to the N. Y. Times says that the latest reports from Charleston, telegraphed on Satorday, taken in connection with the faact that telegraphic communication with the South has been cut off below Petersburg, Va., render it extremely probable that actual war has at last been commenced by the Secessionists, and that the bombardment of Fort Sumter is now proceeding. The information received in Charleston relative to the warlike movements here, created the greatest excitement there under the supposition that the object of the Administration was the reinforcement of the Fort; and though at last accounts the ultimatum of siege or surrender, mentioned in our previous dispatches, had not chance and time the formidable questions with been sent to Major Anderson, his supplies which it had to deal, but the events of the have positively been cut off by order of Gen. BEAUBEGARD-and this was considered equiva lant to a declaration of hostility.

THE DESTINATION OF THE TROOPS. It is generally believed that the greater portion of the armament of troops and supplies fitted out at New-York is destined for at all. Texas. The howitzers, horses and Flying Artillery are of no available service except on land, and there is no point at the South except Texas, where they could be advantageously employed. The Flying Artillery would be sent to none of the Gulf Forts, where only simple artillerists, accustomed to manage heavy sea-coast guns, would be order-The mounted troops will go to Texas to replace the force now there, demoralized by

APPREHENSIONS OF AN ATTACK ON WASHINGTON.

The city is full of exciting rumors to day, of an intended attack on Washington to night, by the secession rabble, supposed to be under the command of Major Ben. McCulloch, who impudently enters and departs from the city upmolested, notwithstanding his overt treason recently at San Autonio. People inquire with surprise why the authorities do not arrest him. especially in view of the certainty that his presence here has some evil purpose.

Another rumor to-day was that Gen. Scott had slept in his office for two nights past, and that the artillery horses were saddled and harnessed all last night, ready for instant action, to defend the city against the expected raid. Inquiry dispels these sensations, and shows that there is no foundation whatever for them beyond the fact that certain secession militia in the district continue their drills. as if expecting service in due time.

At least one Philadelphian left town tonight in great fright, relative to this rumored

THE CRISIS AT HAND .- The intelligence from Charleston looks war-like, and indicates that a collision is likely to take place at any moment. The reports which have reached there relative to the movements of the Administration have created much excitement, and the feeling appears to be general that war is inevitable within a short time. Gen. BEAUREGARD, is understood to have declared that Major Anderson and his command must either evacuate Fort Sumter or be shelled within fortyeight hours. The report that the supplies for the market. Will our emineut Secessionist the garrison had been cut off by authority, is correspondent at Montgomery-who favors corroborated by the Charleston papers. Confederacy are involved in mystery. The excitement is intense, and everybody is in fighting humor.

A Frank Confession.

What ex Secretary Floyd was enabled to ecomplish for the benefit of the seceded States, is faithfully set forth by the Southern Confederacy, published at Atlanta, Ga. Such an overwhelming sense of gratitude as is here exhibited is as uncommon as it is astonishing:

"But for the foresight and firmness, and patriotic providence of John B. Flord, in what stress and peril would the cotton States be floundering in this day. He saw the inevitable doom of the Union, or the doom of his own people. For many months past, from his standpoint, he had an expanded field of vision which enabled him to see the great danger which threatened us, but which was hid below the norizon from the eyes of most of us. When his faithful loyalty to his own persecuted peo-ple began its labors in our defence, in what a condition were the Southern States? The North had the heavy guns, the light arms, the powder and ball, just as the North had every thing else that belonged to the common government. How quietly were men shifted from our soil who might have been here to-day to murder us at Abraham Lincoln's order. How slender the garrisons became in southern forts, which were made for us, and belonged to nobody else, but which a savage enemy now chafes and rages to get possession of. sent 37,000 stand of arms to Georgia? How came 60,000 more prime death-dealing rifles at Jackson, Mississippi? And, in short, why have we anything at all in the South to mail the strong hands of the sons of the Booth with at this hour, when every heart and head, and arm of her children are needed in her defense? Truth demands it of us to declare that we owe to John B. Floyd an eternal tribute of gratitude for all this. Had he been less the patriot than he was, we might now have been disarmed, and at the mercy of a nation of cutthroats and plunderers."

THE NEW LOAN of Eight Million having been taken at 93 per cent, and upwards-over Thirty Million having been offered-we are anxious to ascertain the amount and average rates of the bids for the \$15,000,000 loan of the Cotton Republic-or even for the \$5,000, 000 which we believe was to be first put in we care to pay such high telegraphic tolls up
