Farm.—There is scarcely a more important. agricultural mouth in the whole year, than It terminates the period in which most seeds can be sown, and introduces the indispensable work of cultivation. Many early sown or plant-ed crops that have failed, may yet be replaced; if the whole available area be not already occupied with growing crops, now is the time to put in quick growing corn, teans, or other staples. The early planted corn, potatoes, and roots of all kinds, should receive immediate and careful attention, to free them from weeds, loosen the soil, top-dress with guano, ashes, or plaster, and thus secure their rapid growth .-Vigorous growth in the earlier stages of a plant, is most likely to be followed by generous fruiting.

Cultivation of the soil may appear tame and uninteresting work in these exciting times, and the temptation will be great to leave peaceful fields for the field of conflict, but remember that feeding the country is as necessary, as fighting her battles, and that full garrisons

can only be maintained by full garners.

Barley will usually yield a fair crop, if sown at this season, although earlier sowing is preferable. It speceeds best on a gravelly soil, and may well occupy ground devoted to hoed crops last year. Sow two and a half to three bushels per acre, and harrow in thoroughly.

Barns and Sheds will soon be needed to receive the first fruits of the mowing grounds .-Put platforms, bay-ways, etc., in order; clean out all rubbish, and repair floors and entrance ways, if needed. Examine grain bins, wool closets, and cattle stalls, and exterminate any

of King Philip, or other early variety, can not be had. They may also be put in on soil too light for corn. They do not require heavy manuring; too strong soil gives great growth of vine, without a corresponding yield. If the war continues long, beans will be in great de mand; they furnish much nutriment in a small space. Plant them abundantly.

Beets-Mangel Wurzel and Sugar varieties, sown will have plenty of time to mature for winter feeding. A great saving of grain and hay will be effected, by having a good supply of these and other roots, to feed out in Winter is prepared by Dr. G. P. Bellingham, an eminent physical prepared by Dr. G. and Spring.
Butter, if properly made during this month, may be laid down and kept throughout the season, or until the best prices can be had .-Cleanliness and thorough working are the two essential points to be observed. Keep the milk room cool, and free from dust, insects, and offensive smells. Churning the milk with the cream, after the latter has raisen, saves the work of skimming, and some claim that more butter is obtained in this manner. Experiment to learn if this be true; note also the quality of the butter. In sending butter to market, be careful to have the cask or pail look neat and inviting, and plainly marked. New tubs should be well scalded with buttermilk before packing, to remove the taste of the wood.

Cabbages-Plant out for late crops. Hoe and cultivate between the rows of those previously set, at least once a week-the oftener the better. Set plants between the rows of early potatoes, which are to be dug, the first of July. Examine often to destroy cut worms and other insects.

Carrets-In favorable seasons large crops have been obtained, when sown the first week in June. Keep the rows well hoed, and thin to six inches apart. They may be crilled in between rows of onions after the second or third hoeing of the latter. If this be done, leave every third space vacant, to give room coal COOKING STOVES, every variety of pattern an for curing the onions when pulled.

Cheese-Study to improve the quality, rather than to increase the quantity produced .-"White-oak," cheeses are always a drug in market, while those of first class are always in demand at good prices. Cattle-Young cattle, especially calves of

the present season, need attention to keep them growing. Allow them the best pasture. Grain Fields will whiten to the harvest in Southern localities. Wheat or rye should be cut, as soon as the berry is advanced enough to bear moderate pressure of the thumb nail, without breaking, or just after it leaves the "milk" stage. Examine the fields for the earliest and best portions, to be left to ripen fully for seed. Haying will begin, in the earlier sections .-

Cut grass or clover for hay, just as the bloom is passing away, and the seed commences to form. If left later, much of the nourishing part of the stalk is hardened into woody fiber .-Provide a supply of hay caps, to be used this season. They will enable you to cure much of the hay in the cock, which will give a better quality of fodder. A mowing machine and a horse pitchfork will pay on all farms, where there is much meadow.

Manure-Turn every source to account, as recommended in previous numbers. Throw weeds from the garden, etc., into the pig stye, and supply the swine with plenty of material, to work over at their leisure

Peas-Sow or plant, if there be vacant ground. They make excellent food for swine, when fed green with the straw, or ripened and ground with oats, or when fed alone, cooked or soaked. Hogs will grow and partly fatten well on peas. The last few weeks' feeding should be on corn, to harden the pork.

Potatoes-Keep well hoed until blossoming Hill them only moderately. Try top-dressing with ashes, to drive away insects, and to pre vent rotting.

Poultry-Accustom them to lay in their appropriate places, by confining them in the poultry yard until afternoon. Allow none to set after the middle of this month. Give plenty of food, particularly to the growing broods, to fit them for an early market. Keep their apartments clean, and use the droppings, mixed with plaster, in the garden. They are also an excellent addition to liquid manure.

Sorghum-Drill or sow broadcast for cutting and feeding green, or to be cured for winter fodder. Cultivate that already planted, the

same as corp. Swine-Keep them growing with wash from the dairy, mixed with ground feed. Allow them the range of the orchard, to destroy grubs and worms in unsound fruit. Suffer none to run in the highway. A good clover pasture will afford them excellent feed. They should be supplied with pure water.

Tanner's Bark-Peel from hemlock and oak. as soon as it will run freely, and pile it so as to protect from rain.

Tools, particularly for having and harvesting, should all be in readiness before the season

Weeds grow rapidly, if left during this month. Keep the cultivator and horse and hand hoes busy-clean tillage pays best.

Miscellaneous.

NEW ATTRACTIONS! At Geo. H. Wood's Gallery, TOWANDA, PA. You can procure, at low prices, PHOTOGRAPHS,

Of all sizes, up to life size, either plain or re-touched, colored in oil or pastille. Also, MELAINOTYPES and AMBROTYPES, and al Melainotypes made in all kinds of weather, (except for children. All work warranted. August 10, 1859.

Bookbinder and Artist.

CAUTION.

"To be, or not to be— hat is the question! Whether its nobler in the mind to suffer The slings and arrows of outrageous opposition, Or by taking up arms against a sea of printing ink, And opposing, end them.

The proprietor of the Argus takes occasion in advertising his Bindery to indulge in an uncalled for fling about a "sort of a concern," which is hoping "to delude the public." As I have opened a Bindery on my own account, the inference is that if the public bring their count, the inference is that if the public bring their binding to me, they are in no danger of being defrauded. For two years I have worked for Mr. Parsons, and he has taken great pains to satisfy the public I was the "best Binder in America," as the columns of the Argus wil testify. Has he been all that time "deluding the public?" If I have been engaged in a frand, he has been in principal. But I refer to my work during that time a evidence that there has been no frand practiced.
Having served a long apprenticeship at the Bindery business, I have resumed business here on my own account, as I know of nothing which prevents me from following a legitimate and bawful calling for my support.—I shall endeavor by good work and attention to my business to give public satisfaction. ness to give public satisfaction.

Ayer's Sarsaparilla.

A COMPOUND REMEDY, designed to be the most effectual Allergarse that can be made. It is a concentrated extract of Pers Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to core. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:

SCROFULA AND SCROFULOUS COMPLAINTS, ERUPTIONS AND EMPTIVE DISFASSES, ULCRES, PIMPLES, BLOTCHES, TUMORS, SALT RHEUM, SCALD HEAD, SYPHILIS AND SYPHILITIO AFFECTIONS, MERCURIAL DISEASE, DROPSY, NEURALGIA OR TIO DOULOUREUX, DEBLEITY, DYSPEPSIA AND INDIGESTION, ENYSIPPLAS, ROSE OR ST. ANTHONY'S FIRE, and indeed the whole class of complaints arising from largerity of the BLOOD.

RALGIA OR TIC DOULOUREUX, DEBLEITY, DYSPERSIA AND INDICESTION, ENYSPELAS, ROSE OR ST. ANTHONY'S FIRE, and indeed the whole class of complaints arising from IMPCRITY OF THE BLOOD.

This compound will be found a great promoter of health, when taken in the spring, to expet the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the grea machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. Rut the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or anything else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one collar. Most of these have been frauds upon the sick, for they not only contain little, if any Sarsaparilla, and an entered to supply such a remedy as shall rescue the name from the load of obloquy which rests upon if. And we think we have ground for believi

Ayer's Cherry Pectoral.

Has won for itself such a renown for the cure of ever-variety of Throat and Lung Complaint, that it is entire ly unnecessary for us to recount the evidence of its vir-tues, wherever it has been employed. As it has long been in constant use throughout this section, we ree not do more than assure the people its quality is kept to the best it ever has been, and that it may be refled to do for their relief all it has ever been found to do. AYER'S CATHARTIC PILLS,

AYER'S CATHARTIC PILLS,

acted with our Book and Stationery Store and Printing Diffice, where all work should be delivered.

CAUTION.—We are compelled in justice to ourselves, and our old customers, as well as to prevent an imposition upon the public generally, to caution them against a sort a concern, that falsely holds out to the public that it is he Argus Bindery. This fraud is practiced no doubt, with a hope of deluding the Public. Against this bord and deliberate attempt to deceive, they are hereby causioned.

Ear Particular attention paid to re-Binding. All work fauranted.

Ear Country Produce of all kinds taken in payment or work. r work.

Agents below named turnish gratis our American AlmsHaving made complete arrangements, we are pre-

noe in which they are given; with also full descriptions of the above complaints, and the treatment that should be followed for their cure.

Do not be put off by unprincipled dealers with other preparations they make more predit on. Demand Ayrer's and take no others. The sick want the best aid there is for them, and should have it.
