**The Art of Butter Making.**

N. Winslow, in the *Mining Farmer*, says that the farmer should ascertain the character of his cow's milk separately, fattening for beef those whose milk does not yield good yellow butter. Then his firkins should be made of sweet wood, ash, maple, oak or spruce, and thoroughly saturated with strong pickle; work out all the butter milk with a wooden ladle; then take for seasoning one pound of good salt, one half pound of pure white sugar, and two ounces saltpeter; mix thoroughly together and use one ounce of this preparation for every pound of butter. The above quantity is sufficient for twenty-five pounds of butter. The butter should be put into the firkin solid beating it down smooth with a wooden pestle; cover it with a linen cloth, saturating the cloth with sweet hot tallow or beeswax, taking care to wring out all the tallow or beeswax you can after dipping the cloth. This cover will exclude the air. No salt should be put between the layers; simply stamp down each layer smooth with the pestle, and cover with the cloth until the next layer is ready—Butter packed in this manner will neither grow soft in warm weather, nor crumble in cold weather, and is better one year old than when first made. It will sell for from five to six cents per pound more than common butter.

In a P. S. he remarks some use four instead of two ounces for saltpeter, and think it is an improvement. Let farmers try both.

**STRIP THE SOIL.**—Good farmers are well acquainted with the fact—that an important fact in all good farming—that frequent stirring of the soil in all open eros, is calculated to have as much effect in producing an abundant yield as an extra dressing of manure. It is especially valuable in dry seasons, and the oftener it is resorted to, whether in field or garden, the more beneficial will be the result. As to the latter it is frequently neglected to a painful degree, but most generally in small gardens which are left to the management of women. Thrice as many vegetables could be raised in many of these small enclosures by stirring the ground often, destroying the weeds as fast as they appear, and so arranging as to obtain at least two crops from every part of it.

Every family should have not less than three crops of peas, planting tomatoes between the rows; three crops of corn, planting celery between every other row, or cucumbers for pickling, or citrus for preserving, or cabbage. Cabbages can be set out between every two rows of potatoes; turnips will grow among corn; lettuce plantee can go between cucumbers and melon hills, or even in new strawberry beds. The ways to multiply crops in a small garden are numerous.

**STOCK PAYS ALL THE TIME.**—The heading of this article, says the *Valley Farmer*, was the remark of an old farmer the other day, while deploring the failure of his wheat crop. One year the wheat fails, another year the oats fail, another year the corn; but, said he, "Stock pays all the time." He also remarked, that the farmers who early gave their attention to stock-raising, had gone right along without set-backs, and had outstripped the grain-growers.

There is no doubt much truth in the old man's remarks. Stock is the surest and most remunerative. But in thickly settled regions it is better and safer to divide the interest between the two. The two assist each other and improve the farm. Waste straw and offal of the grain crop will go far to feed the stock, will go far in fertilizing the soil and improving its capacity for productiveness. The strength of the soil is a greater desideratum with the farmer. The soil is his main source of wealth—his treasury—his bank of deposit. He must keep it good, or his paper is protested; his reputation as a farmer is dishonored.

It is well to keep a variety of stock, as well as raise a variety of grain crops. The general profits of each year are thus kept nearly equal. Farming may be done closer, less wasted and more made.

**TO KEEP BUTTER SWEET.**—A correspondent of the *American Agriculturist* gives the following directions for preserving butter any length of time. In May or June, when butter is plenty, work it thoroughly two or three times, and add at the last working about one grain of saltpeter and a teaspoonful of pulverized loaf sugar to each pound of butter. Pack it tightly in stone jars to within two inches of the top, and fill the remaining space with strong brine. Cover the jars tightly, and bury them in the cellar bottom, where the butter will keep unaltered for a long time.

**FALL POTATOES.**—Keep the vines well cultivated and hoed, free of weeds, and take care that the soil be perfectly loose and open—Potatoes will not grow freely in a close, compact soil. If any further fertilizers appear to be needed to increase the vigor of the growing plants, rewater over the drills a mixture of ten bushels of wood ashes, one bushel of plaster, and one bushel of refuse salt. This will suffice to an acre, and under any circumstances the application will prove beneficial.

**TO DRESS CUCUMBERS.**—Take three good sized cucumbers, pare them, put them in cool water for an hour, take them out and cut them in the usual way; sprinkle salt upon them and let them be so until an hour before dinner; drain off the salt liquor; put them into a vegetable dish. Take a pint of sour cream (not too old) a good tablespoonful of cider vinegar, a piece of butter the size of a hickory nut; put them on a fire and let it come to a boil; pour it over the cucumbers while hot; set them by in a cool place until dinner. We think it is the only way to eat them. Try it.—*American Farmer*.

**BARLEY FOR HENS.**—There is no grain so well suited as food for hens. Barley, when fed with oats and corn, will often be gathered first by the fowls, and hens fed with more or less barley, are said to lay more freely.—We have used barley and peas, and our return of eggs is evidence of the suitability of the food.

**INDELIBLE INK.**—Take of nitrate of silver one and a half ounces, and dissolve it in twelve ounces of weak gum mucilage then add five ounces of liquid ammonia, and put it into blue bottles for use. When applied to articles they must be exposed to sunlight until they become black. The blue bottles protect the nitrate of silver from decomposition by the action of light.

**THIS IS THE ESTABLISHMENT** where you can find a very fine assortment of **WATCHES AND JEWELRY** of all descriptions, also a good stock of **CLOCKS**, ranging from 10 shillings up, and warranted to give good satisfaction or no sale. I am also agent for the sale of **D. E. LEWIS'S** celebrated Barometers, which every farmer should always have. **REPAIRING** done as usual in a neat and workmanlike manner and warranted.

**BUY YOUR GARDEN SEEDS AT FOX'S.**

I have the largest stock and best variety of Garden Seeds ever offered for sale in this town. It is a well known fact that a large proportion of the Garden Seeds sold throughout the country, are of inferior, and often worthless, quality. In view of this fact I have taken great pains to procure

**Fresh and Reliable Seeds,** in fact the best to be found in market, in hopes to supply a want long felt in this country. I can also give you my own sales in that line. Will you examine my Seeds before purchasing elsewhere?

**REMEMBER THAT GOOD SEEDS COST NO MORE THAN POOR ONES.**  
**WITH GOOD SEEDS YOU CAN HAVE GOOD VEGETABLES.**  
**WITH POOR SEEDS NONE.**

**BOOK BINDERY.**

THE subscriber having withdrawn from the *Argus*, is desirous to respectfully inform the public that he has removed his place of business to the North Room of the Ward House, formerly occupied by the Post Office, where he is now prepared to bind all kinds of Books in the most approved and workmanlike manner. Having shared my own experience in the trade, I feel myself that my prices will meet the satisfaction of the public.

Particular attention given to re-binding Books. All work will be warranted. Terms, Cash.  
Also, a large assortment of STATIONERY of the best quality, at the lowest prices. Justices' and Constables' BLANKS of all kinds.  
**PICTURE FRAMES,** round, square and oval; and pictures framed to order, cheaper than ever known here.

**CAUTION.**

To be, or not to be,—is that the question! Whether 'tis nobler in the mind to suffer The slings and arrows of outrageous opposition, Or by taking up arms against a sea of printing ink, And by the sword of truth, to win our country's name.

The proprietor of the *Argus* takes pleasure in advertising his binder to induce in an unfeigned belief about a "sort of a conspiracy" which is being "deluded the public." As I have opened a Bindery on my own account, I can give the public the assurance that I am not bound to me, they are in no danger of being defrauded. For two years I have worked for Mr. Parsons, and he has taken great pains to satisfy the public I was the "best Binder in America," as the columns of the *Argus* will testify. He has been all that time, "deluding the public." If I have been engaged in a fraud, he has been the principal. But I refer to my work during that time as evidence that there has been no fraud practiced. Having served long apprenticeship at the Bindery business, I have resumed business here on my own account, as I know of nothing which prevents me from following a legitimate and honest trade. My business is to give the public good work and attention to my business to give public satisfaction.

Pupils boarding in the Hall will furnish their own towels, &c., and the table will be supplied with bed and bedding when it is convenient, but when otherwise, these will be furnished at a slight charge.

Teaching recommended that students from abroad should board in the Institute, as better opportunities for advancement in study are thereby secured.

Normal Department—Special exercises are arranged without extra charge for those preparing themselves as Teachers in Normal Schools. Those desiring to do so, should also well known Superintendent of Common Schools in the county, has kindly consented to organize the Teacher's class, and direct the course to be pursued.

This arrangement is so arranged that we are often as practicable, and will deliver frequent lectures on the Theory and Practice of Teaching, as also on other subjects connected with Normal Teaching.

Those persons, therefore, intending to engage in teaching for the winter, will find it greatly to their advantage to be present during the Fall term.

Prof. Deane's office will be in the Institute, and not such as is now in the hands of the Institute.

No pupils will be spared, on the part of the Faculty and Trustees, in maintaining the high reputation of the Institute, which has hitherto enjoyed, and in rendering in more worthy of future patronage and support.

**Ayer's Sarsaparilla.**

A COMPOUND REMEDY, designed to be the most effective of all that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alternative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large and suffering class of our citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:

SCROFULA AND SCROFULOUS COMPLAINTS, ERIPTIONS AND EFFLUVIAL DISEASES, GLEETS, SCALDS, STITCHES, TUBERCLES, SALT RHEUM, SCALD HEAD, SYRILIS AND STIPULATED AFFECTIONS, MERCURIAL DISEASE, DROPSY, NEURALGIA OF THE DORSALGIA, DEBRITY, DYSPERYSIA AND INDISTESTION, ERYTHRELA, RASH, OR SCURF, AND INDEED the whole class of complaints arising from IMPURITY OF THE BLOOD.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humor which festers in the blood at that season of the year. By the timely expulsion of this most rankling disorder, the system is purified, and the body is strengthened, and the mind is cleared, and the system is rendered more susceptible of the salutary effects of the atmosphere.
