like very well indeed.
Some say that if a cellar fits a horse as it should, he will never have sore shoulders .-Now, I do not think that this is the case, for I have a pair of horses who could not be worked at plowing or harrowing for a week, with-out having sore shoulders, yet their collars fitted them well. It seemed that one hide had to be rubbed, and as that of the collar was the hardest, the consequence was that the horses' hide got the rubbing.

The galls I could soon cure, but if the horses were worked I could not prevent them. From observation I have been convinced that some have weak shoulders, and that it is transmitted from generation.

Chancing one day to take hold of an English agricultural journal, the first thing which I noticed was an editorial proposing that a piece of leather should be laid on the horse's neck under and disconnected from the collar. I saw that the theory was good, and concluded that as one hide had to take a rubbing, the collar and the leather might settle it between them as best they could. So having procured paper, (not an old Telegraph, for they should be filed, not because they are not sharp enough but for the sake of reference,) and scissors, and cut out a pattern for my havelock. I cut the pattern so that it could be sewed together on top of the neck and in front of the breast, and at the same time fit the neck neatly without creasing. They were made considerably wider that the collar, say from ten inches to one foot.

I then applied my patterns to a piece of leather, and cut out their counterparts and sewed them together, and after soaking them over at night, I applied them to the horses' necks, taking care to keep them smooth and

Since then my horses have never had sore shoulders; and any one seeing the havelocks after three months' use, would not wonder that the horses' shoulders were sore, or rather would wonder that all horses' shoulders were

I have cured the shoulders of horses not having weak shoulders, with the following com pound :

Good brandy, 1 quart; pound alum powdered; quart bottle.

The brandy and alumn should be placed in the bottle, and when used should be well shaken, the mixture should be rubbed on with a sponge and a pad (one o'd stocking leg stuffed with straw,) should be placed below the gall, and I will insure a cure if the collar is as soft as it should be.

I have cured shoulders with this mixture even when the skin was broken, without taking the horse from his work.

But, use the havelocks, and you won't want the mixture, and instead, (if you see fit,) can drink the brandy, as doesn't

#### How to Destroy Thistles.

F. H. Gordon, of Jennings Forks, Tennessee, writes to the Southern Homestead, thus: -" I have never seen the Canada thistle in this State and hope I never shall. It is a perennial plant, with deeply penetrating and rambling roots, which are so tenacious of life that the ingenuity of farmers in Europe and the Eeastern States of the Union has failed to find, a cheap and easy method of exterminating them. They are represented as great pests to meadows, pastures and grain fields.

"The thistels of this section is a biennial plant, being easily destroyed. I will give a method of exterminating those thistles which I have tested and found effectual, and cost FASHIONABLE & DESIRABLE STOCK, nothing. It consist in learning your hogs to which was purchased at eat the roots of the plant. Tramp on buds of a goodly number of the largest plants, in the spring season, and place on each a teaspoonful of salt. Then turn your hogs on them. They will eat the roots of the salted plants first, and will thus acquire a fondness for the roots, and will continue to eat them daily, as long as they can be found. If one hog be educated in this way he will soon teach the whole heard to eat them, and will soon exterminate all on your farm. I have not found any difficulty in keeping my farm clear of thistles since I have adopted this method, which was more than twenty years ago. Other varieties of thistles may not be so easily managed ; but I have never seen but one of the same variety in the West and South."

KICKING Cows .- I have a way to stop kicking cows, or to keep them from stepping while milking. It is this : I begin quite moderate, and when they begin to hoist a foot I give the teats a jerk; by following this up it will stop any cow, for a cow very much dislikes teats jerked. If a cow gets into the habit of starting off, I hold on to the teats as hard as I can, which soon cures her of that caper .-Genesee Farmer.

VALUABLE LINIMENT. - As for liniments the best I know of for horses or human beings, for sprains, swellings, (slight consequent on blows, &c.,) in horses, and sore throats and rheumatism in horse matters, is as follows: Equal parts of hartshorn, (aqua ammonia) oil origanum, olive oil, gum camphor, laudanum and spirits turpentine-all best quality--to which add three parts of good soft soap. I have used this for several years .- Country Gentle-

PLANTING TREES -A correspondent of the American Agreculturist gives the following points to be kept in view in planting out trees of all kinds-especially fruit trees :

1st. A portion of the roots should be so near the surface, and in so porous a soil, that

they can enjoy air and sun's warmth. 2d. Part of the roots must go deep enough

to secure abundant moisture or sap at all times—particularly when the surface soil is temporarily parched by drought. 3d. The subsoil, so far down as the roots

penetrate, should be of good character; that is, it should have been so exposed to the action of air as to destroy the soluble proto-salts of iron, magnesia, etc; and also organic acidsotherwise these substances will be absorbed and act as poison.

A FEW years ago, several varieties of oats were imported into Canada from Great Britain. They retained their superiority one or two years, but rapidly degenerated afterward.

#### CAUTION.

"To be, or not to be— hat is the question! Whether its nobler in the mind to suffer The slings and arrows of outrageous opposition. Or by taking ap arms against a sea of printing ink, And opposing, end them."

And opposing, end them."

THE proprietor of the Argus takes o casion in advertising his Bindery to indulge in an uncalled for fling about a "sort of a concern," which is hoping "to delude the public." As I have opened a Bindery on my own account, the inference is that if the public bring their binding to me, they are in no danger of being defrauded. For two years I have worked for Mr. Pansons, and he has taken great pains t satisfy the public I was the "best Binder in America," as the columns of the Argus will testify. Has he been all that time "deluding the public?" If I have been engaged in a fraud, he has been the principal. But I refer to any work during that time evidence that there has been no fraud practiced.

Having served a long apprenticeship at the Bindery business, I have resumed business here on my own account, as I know of nothing which prevents me from following a legitimate and bawful calling for my support. I shall endeavor by good work and attention to my business to give public satisfaction.

# Ayer's Sarsaparilla.

A COMPOUND REMEDY, designed to be the most effectual Allerative that can be made. It is a convintated extract of Para Sarsaparilla, so combined with ther substances of still greater alterative power as to flord an effective antidote lot the discases Sarsaparilla is epated to cure. It is helieved that such a remedy is vanted by those who suffer from Stemons complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted feloweritizens. How completely this compound will do it as been proven by experiment on many of the worst asses to be found of the following complaints:

SCROFULA AND SCROFULDUS COMPLAINTS, ERUPTIONS NON EMETITIES DISCASS, ULMES, PIMILIS AND SCHOULDS, CLOSES, PIMILIS AND SCHOULDS, CLOSES, PIMILIS AND SCHOULDS, CLOSES, PIMILIS AND SCHOULDS, AND EMETITY DYSFERSIA AND SMERCHAL DISCASS, DROPSY, NEUTICALIA OR THE BLOOD.

This compound will be found a great promoter of nealth, when taken in the spring, to expel the foul hoors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disoriers are nipped in the bid. Multitudes can, by the aid of this remedy, spare themselves from the endurance of ruptions and ulcerous sores, through which the systém will strive to rid itself of corruptions, if not assisted to to this through the matural channels of the body by an alterative medicine. Cleanse out the vitiated blood vhenever you find its impurities bursting Abrough the kin in pimples, eruptions, or sores; cleanse it when you ind it is obstructed and sluggish in the veins; cleanse it when you ind it is obstructed and sluggish in the veins; cleanse it when you have the blood healthy, and all is well; but with this abnium of life disordered, there can be no lasting health, sooner or later something must go wrong, and the grea machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been eggeiously deceived by preparati
