THE BEST TIME TO SOW PLASTER .- FOR about a dozen years, we have annually made experiments, on sowing plaster. We have had it sowed on grass land in every month in the year, except November and December. We have been successful, some times, with most of the different applications ; but have invariably been fully satisfied with that sown in the mont of March. On grass land we think three fourths | will also be kept up, embracing of a bushel per acre, sown in March, of more value than double the amount in May or June.

Our custom is, if possible, to sow it on a light snow, the melting of which seems to have a beneficial effect in dissolving gypsum. Where we had five acres, four years ago, and left a corner to note the effect, it has been visible for miles each summer since; the piece left furnish ing certainly a third less feed and of a much March "worked wonders," while that of May and June seemed to be lost entirely. GET YOUR SEED FOR SPRING -The World well remarks : " One of the most improtant | matters is the quality of seeds of all kinds for farm and garden, and of the trees and vines which are to be planted. Without careful selection in these matters, all the preparations er for grain and fruits and vegetables are lessened in value. As surely as like produce like, so certainly will not poor seed produce good crops in fruits, roots and grain. See, then instantly, to these matters, if you have not already arranged your supplies of the best quality which labor and expense can procure ; and when you have to bay, buy only from persons of well known character in cultivation of such articles as you may desire for planting.'
