Good warm shedding, if not already prepar ed, should be got ready for these, having an eye, as already intimated, for proper ventilation. It will take more time and give some trouble, but you will be amply repaid for it, if the cows should be well rubbed down with a wisp of straw daily, or curried and rubbed EDWARD T. ELLIOTI, LL B., Lecturer and Instructor down, watered night and morning, and given an ounce or two of salt twice a week, or of the salt and ashes mixture, with a little lime added. Give them the use of an enclosed yard, which should at all times be provided with rough materials to turn into manure. Their food should be properly cut. The roots when fed to cows should be mixed with cut hay, fodder or cornstalks. Young cattle should be well cared for during winter ; give them mod erate supplies of food to enable them to keep in good condition, so that in spring they may be in a condition to thrive, without having to make up for lost time-they should be provided with good, dry sheds, facing the south, and be protected from northernly winds-have access to an enclosed vard, which sould also be covered with woods-mould, and such like trashy substances, having in view continually the making them earn their keep by the manufac ture of manure. In addition to the long provender and cut food, they should be treated to a mess of oats two or three times a week to help to make muscle, and give strength-their sheds should be kept clean. Chopped roots and cut hay and straw fed together keeps them in good health, the bowels free, the blood cool, and the skin free.

HEALTHFULNESS OF APPLES. - There is scarce y an article of vegitable food, says Hall's Journal of Health, more widely useful and universally loved, than the apple. Why every farmer in the country has not an ap ple or hard where trees will grow at all isone of the mysteries. Let every family lay in from two to ten or more barrels, and it will be to them the most economical investment in the whole range of culinaries. A raw, mellow apple is digested in an hour and a half, while boiled cabbage requires five hours. The most healthy dessert which can be placed on a table is a baked apple. If taken freely at breakfast, with coarse bread and butter, without meat or flesh of any kind, it has an admirable effect on the general system, often removes constipation, correcting acidities, and cooling of febrile conditions more effectually than the most approved medicines. If families could be induced to substitute the appleripe, sound and lucious-for the pies, cakes, candies and sweatmeats with which their children are too often indiscreetly stuffed, there would be a dimunition in the sum total of doctor's bill, in a single year, sufficient to lay in a stock of this delicious fruit for a whole season's use.

The Germantown Telegraph has the following receipt for curing meat: To one gallon of water, 1 1-2 lbs. of salt, 1 2 lb. of suguar, 1.2 oz. of saltpeter, 1.2 oz. potash. In this ratio the pickle to be increased to any quantity desired. Let these be boiled togethweeks. The meat must be weil covered with pickle, and should not be put down for at least two days after killing, during which time it should be slightly sprinkled with powdered saltpeter, which removes all the surface blood, &c., leaving the meat fresh and clean.

Nails and Glass, Paints and Oils, House Trimmings, Carriage Trimmings. Springs, Iron Axels and Boxes, of all sizes, Carpenters and Joiners Tools, Black. smiths Tools, Cross-cut, Circular and Mill Saws, Table and Pocket

Some omit boiling the pickle, and find it to answer well: though the operation of boiling purifies the pickle by throwing off the dirt always to be found in all salt and sugar.

If this receipt is properly tried, it will never be abandoned. There is none that surpasses it, if so good.

Do NOT DESPISE THE SHOP .- The importance of mechanical training and of habits of regularity and method, cannot be over-estimated in their various bearings upon the relations of life, and we would say to those ina wrong.

Young men who are at this moment strugBlock, Main street, CODDING & RUSSELL. gling through details which appear to be hard, useless, and full of weariness, to hold on: their utility may not be apparent at present, but the day is sure to come when they will reap the benefit of such discipline and routine. Hold on; don't give up; in our own country no social prejudices prevail which prevent the humble dyer from becoming the learned and skillful chemist; no barriers exist which deprive those whom the chances of life made rude and unaltered, from becoming shining lights in the world of science. Most great inventors have sprung from the ranks of the brave daily workers, and the field is still a wide one, expanding every day; therefore we say " hold on" to the training of the shop, improve your spare hours in mental culture and reward is certain.

Coloring:-When the farmer's wife wants to color a bright red, she must wash her yarn clean and nice, and boil it in strong alum water; then dry in the sun a day-but do not rinse it out. Then the next day boil in good madder, soak over night; then dry it again, after which wash it, and you will have a brilliant red. When you want to color a bright green, you must boil in alum water the same way, having it very clean, then boil in the kettle some good, strong hickory bark and put in the yarn ; then make some blue dye in the usual way, from indigo and a small bit of mad-

The loss upon hay, weighed July 20th, when cured enough to put in the barn, and again, February 20th, has been ascertained to be 27 1-2 per cent. So that hay at \$15 a ton in the field, is equal to \$20 and upward when weighed from the mow in winter. The weight of cobs in a bashel of corn in November, ascertained to be 18 pounds, was only 8 1-2 in May. The cost of grinding a bushel of dry cobs, counting, handling, and miller's charge, is about a cent a pound. Is the meal worth the money?

SUBSTITUTE FOR YEAST.—Boil one lb of flour, a quarter of a pound of brown sugar, and a little salt, in two gallons of water, for an hour. When milk-warm, bottle and cork it close, and it will be ready for use in twentyfour hours.

Why is a bechive like a rotten potato? A bee-hive is a bee-holder, and a beholder is a spectator, and a specked tater is a rotten potato.

in all its Branches in the latest and most approved styles, and on the most favorable terms.
Having secured, permanently, the services of Mr. H. C. Whitekar, a finished workman from Philadelphia, and having added extensively to the fixtures of the concern—giving greater facility than formerly—we can present to the public the most positive assurance of our ability to please our patrons.

Customers should be particular to remember that the "Argus Bindery," is in the Argus Boilding, as form-erly, (first building north of the Ward House) and is con-nected with our Book and Stationery Store and Printing Office, where all work should be delivered. CAUTION.—We are compelled in justice to ourselves, and our old customers, as well as to prevent an imposition upon the public generally, to caution them against a sort a concern, that falsely holds out to the public that it is the Argus Bindery. This fraud is practiced no doubt, with a hope of deluding the Public. Against this bold
