> SURGICAL ANALYSIS OF THE CAUSE OF THE ASSASSIN BOOTH'S DEATH. To the Editor of the Philadelphia Press:

Sir: Booth's wound and death were peculiar that they deserve notice and at-

tention. A post-mortem examination was made, but the result has not been published; we since announced that the plot had been discovered to stretch from Richmond to Candada, he spoke from the record. Judge Holt has since received the great mass of evidence, and knows it to be of crushing weight.

President Johnson fully comprehended the gravity of the charges made in his proclamation.

It is confidently affirmed in the highest Government circles that when this evidence is given, it will not only make our transfatlantic cousins, who have so long enveloped the Rebels in a halo of heroic glory, stand aghast, but it will astound the civilized world. the gravity of the charges made in his the grass, and survived the wound four

sufferings. From these statements from those who were about him and witnessed the "fussy doctor" probe his wound, we know that he had a wound of the spinal cord, about the second cervical vertebra, which was doubtless fractured. Such a wound would produce complete paralysis of the arms, legs, and lower portions of the trunk, while respiration and the action of the heart would continue, as the nerves which proceed to those organs pass off from the cranium and not from the spinal cord. The mind was clear and undisturbed, save from the shock of the wound and pain ; but the brain was uninjured. It was a living, active mind. with a dead, helpless body, with the most excruciating, agonizing pain that a human body can be subject to. We once saw an officer with a similar wound lower down in the spine; his sufferings were terrible, and
