Take him as a breeder of stock. It may for farmers to consider the advisability of appear to the unitiated a very simple course feeding as much of their grain as possible, to breed animals for the supply of the farm especially as corn, &c., has fallen so great-on which they are to be raised for sale or ly in value. A miller accustomed to feedfatted for the market; but put him to the ing a large number of hogs yearly, informed task, and he will soon discover his error. me that when pork is fourteen dollars a cwt The breeding of cattle for instance: animals it will pay to feed corn at a dollar a bushel; bred from a good stock are of quick, expan- but pork is now worth eighteen dollars a sive growth, will thrive and fatten rapidly, hundred, and corn less than a dollar a in great variety for sale cheap, at and are very early brought to maturity; bushel. Consequently a large margin is while to breed from a herd of common or- left for profit. - J. S. Near Moorestown, N. J.

Pasturing Horses in Winter.

Every horse turned out for winter grazing, should have a shed well protected from avoid the worst sorts as they would a pest. the north, west, and east, and well littered Great and universal attention is now giv- with straw, to which he can resort whenen to these points of profitable breeding, and the existence of badly bred animals is the cold and wet If no shed be provided, now the exception, while but a few years then the horse should be taken into the staback it was altogether the rule. It is per- ble every night. All horses are not bene fectly astonishing what a high state of im. fitted by a run at winter pasture; some, on provement has been attained by the breed-ers of short-horned cattle. We see im-stitutions, rendering exposure to cold promense animals of this breed at two years ductive of coughs and other complaints: mense animals of this breed at two years old; and the Hereford are not far behind them, while perhaps in the quality of their flesh they exceed them. The rapidity of the growth of short-horns and some other not so readily affected by extreme changes the growth of short-horns and some other not so readily affected by extreme changes cattle, their aptitude to fatten at an early age, and the quantity of meat they yield at this early age, are sufficient to place their breeders in a high position as public benefactors, and agest ages agest ages agest agest agest agest agest agest agest ages factors, and great contributors towards renness of pasture in winter keeps the carpromoting a nation's wealth. And this declared cass light, and the coolness of the atmospartment of cattle breeding is carried out phere fines and improves the legs. Horses with consummate skill and judgment in very that have become "gaunted" up, as the many ways. It has become quite a science. No novice would be able to estimate not benefitted by winter pasture, as the the product of certain animals being put grass at that season, although capable of together for breeding purposes. A breeder of standing, however, would tell you at once what would be the result. Hence the judgment in selecting sires to dams, strain of blood to strain of blood, etc. Then, feed. Others, again, that have become again, the breeding of cattle for particular stiffened in their joints, or subject to swollen legs, are often times almost entirely re-The small and beautiful Devon for the hill covered by a winter's run at pasture, when or mountain pastures, the Welsh and Scotch good sheds or stabling are provided for them against the night air and storms .-Md. Farmer.

My METHOD OF FATTENING PORK .- - In the a thoughtful class of men, who have to first place, I do not find it profitable to winmake the best produce from their holdings, in whatever district they are placed.

ter any but breeders. I give them plenty of muck, which should be thrown into a To graze cattle properly of each kind age requires a very considerable knowledge of their habits and diseases, and the horse papers was a superscript of each kind age requires a very considerable knowledge of their habits and diseases, and the horse papers was a superscript of each kind at any rate under cover, and where the horse papers was a superscript of each kind age requires a very considerable knowledge of their habits and diseases, and the horse papers was a superscript of each kind age requires a very considerable knowledge. means of prevention and recovery. "The eye of the master grazeth the ox," Verily, April, or perhaps March would be better, eye of the master grazeth the ox," Verily, no novice need expect to prosper as a breeder or grazier of cattle. I again confidently repeat that the farmer has as great a scope for knowledge, tact, and judgment in the management of his business as any other class of the community, in whatever business they may be engaged in.—Farmer's season, and by the first of September inseason, and by the first of September increase the quantity of meal to about as much as they will eat; and be sure to scald it all by stirring it up in boiling water, History informs us that a certain emper-or loved a favorite horse so much that he had a golden manger made for him. This pigs weigh nearly 400 pounds for the last

filthy apartment—expediency in sacrificing not only the comfort, but the health, and consequently the usefuliness and value of the animal.

Light is indispensible to the plant and to the man, is it less so to the horse? If it is, why? When the tyrants of the old countries sought to inflict their most fearful part is a dark cell was considered the most severe. Is it reasonable that the horse, whose native home is in the desert and wilderness, where there is nothing to obstruct the free light of heaven, is it reasonable, I ask, that he should not suffer from confinement in a dark cell was considered from confinement in the suffer of the exultant over the discovery, he says:

"Now for a big ditch, and then for big crops, and then for plenty of manure to enrich the upland portion of the farm. The low land has been receiving matter from the high ground, and now I hope for a change to get it back again. This is the cheapest way of getting manure 'Can't you draw the muck on your land? Yes, but I prefer to get it in a more concentrated form. Grow big crops on your low land, and these will make manure for your high land and at considerable less expense. There is nothing to obstruct the free light of heaven, is it reasonable, I ask, that he should not suffer from confinement in

it not a shame, in a land like ours, where glass enough for a moderate sized window can be had for fifty cents, that a valuable horse should be shut up day after day in a dark stall or stable? Let every horse owner's heart, if he has one answer!

FOREST LEAVES.—If gathered in the fait and placed in the yards, or mixed in heaps with fermentable substances, forest leaves will in a short time decay, and become excellent manure. The leaves of all trees contain phosphates and other vegetable nutricion of a mineral character, as well as WINDOW SASH & RUNDS. Is foul air wholesome for plants? Certainly not. Is it wholesome for men? Most emphatically, no! If not wholesome for plants or men, can it be for horses? The answer is as emphatically, xo!

Why then are the majority of our stables trition of a mineral character, as well as the ingredients of humus. In order, however, to facilitate the decomposition of the fibrous substances of the leaf, it is well to mix a liberal quantity of lime or ashes with the mass, and to see that it is kept moist why the mass are prepared to fill orders, whether large or small, upon the shortest notice. We have also a large variety of MOULDINGS, of the latest style and pattern, which we can furnish much cheaper than they can be worked by hand.

PLANING. The answer is as emphatically, No!

Why then are the majority of our stables constructed without the slightest regard to putrescent ingredients of the heap are sufputrescent ingredients of the heap are sufficient. Brakes mosses.

AND SCROLL small bushes, and, indeed, all succulent and easily decomposable vegetable substances, are of value in composting. They decay rapidly, and leave behind a residum which is found to be singularly salutary to almost every description of crop.

SAWING,

and all other work pertaining to Joinery, will be done to suit our customers.

For some building, and not living more than twelve or fourteen miles distant, will find it largely for their interest to buy of us, or bring their lumber and have it worked by our machinery. Bring your grist of Flooring. Or other lumber, and while your team is feeding, have it ground out and take it home with you.

We will pay CASH for PINE & HEMLOCK LUMBER delivered at our lumber yard. Come and see us, or if at a time in a stable, the atmosphere of decay rapidly, and leave behind a residuely
