Orchard and Nursery

Both orchardist and nurseymen will find best quality of hay, some roots, a little something to do in preserving the trees grain, and access to straw, or they may fall they already have, as well in providing for off in condition. When sheep have no further operations whether of buying or As usual the best quality all wool off in condition. When sheep have no roots or similar food, keep them supplied selling. Cattle will often in winter do more with hemlock or pine boughs, and if con- injury to a young orchard in a few hours venient, give them the range of a piece of than monthe of nursing will repair; hence

ing fine stock is bestowing attention and made tight. A few hours' work and some od care on them while growing. All nails, may save much vexation and perhaps kinds, especially colts and calves, should loss of neighborly feeling. Then other be kept rapidly growing, and never lack smaller animals are to be guarded against. Probably three quarters of Rabbits, in many sections, do great damthe young stock of the country nearly or age by girdling young trees Prevention quite stop in their growth during several is better than cure, and among the preventives already published are, wrapping the Calves and Yearlings should always be trunks with paper and smearing them with separated from large cattle, and receive blood. A correspondent states, that the usemore nutritious feed than store animals or of cow dung, sufficiently thinned with wadry cows require. Half a pound of oil-cake ter to apply with a brush, some sulphur be meal per head (soaked or scalded in much ing added, renders the bark so offensive as water, and sprinkled over the fodder,) will to repel the rabbits. Apply as often as it

health, and give all not worked daily an hoar for exercise, turning them loose one at a time, lest in their play they kick each other. Do not expose brood mares to danger of falling in slippery weather; bring water to them, or keep them calked, and so too,

Oxen used on slippery roads should be kept well shod, both for their comfort and their owner's security. Large bodied oxen often get a bad habit of crowding by being their owner's security. Large bodied oxen often get a bad habit of crowding by being is employed, use plenty and bind it on with

yokes longer. Long yokes alone will not cure it,

Milch Cows should not be milked too close upon their time of calving. If dried off within five weeks, it is well enough for both cow and calf. Cows not giving the country of the country in the cou within five weeks, it is well enough for both cow and calf. Cows not giving milk do not need so good feed, but should be stabled if possible, and fed good hay and stables which if chaffled and not need to good here. The feet of every person in health perspire more or less—the exhalations from the feet alone usually, amount to several spoonsfuls of water daily. If this be confined by have the leather saturated with oil or water daily. If the leather saturated with oil or water daily. If the leather saturated with oil or water daily. If the leather saturated with oil or water daily. If the leather saturated with oil or water daily. both cow and calf. Cows not giving milk alone usually, amount to several spoonsfuls alone usually, amount to several spoonsfuls stabled if possible, and fed good hay and stabled if possible, and fed good hay and stabled if possible, and fed good hay and little bran, corn meal or oil cake will go little bran, corn meal or oil cake will go ribber overshoes, the feet are kept damp farther. The fact is, farmers generally pay too little attention to properly economizing Fodder of all kinds. It ought never to the leather. The better way is to not in the fact is, farmers generally pay too little attention to properly economizing Fodder of all kinds. It ought never to be fed upon the ground, the waste will pay for good racks in one season. Fodder goes farther and is consumed to better advantage when hay, straw, cornstalks, with a suntable allowance of roots or grain are fed daily, at different feedings or mixed more or less, than when the animals are confined for days or weeks to one kind of coarse fodder. One of the most economical ways to feed

Otte is to thresh off about two-thirds of the grain and feed the straw with the remainder to sheep and cattle. It will be found nearly equal to good hay.

Grain,—It is poor economy to feed a ryskind of grain whole or uncooked, to any stock except sheep. They do their own offer any stock except sheep. They do their own before graining to advantage, except when being rapidly fattened. If whole corn be being rapidly fattened. If whole corn be fed, pour boiling water over it and let it stand twelve hours; and if boiled half an hour after that, it is all the better. stand twelve hours; and if boiled half an hour after that, it is all the better. A strange but general prejudice exists among many old-school farmers not only against many old-school farmers not only against. kept constantly on the feet. The variation and large state and water-proof blackings are generally and water-proof blackings are generally of far more injury than benefit to either feet or leather.
